the proposed standard, OSHA evaluated the economic impact of the proposed standard on affected industries and the general economy utilizing the criteria of Executive Order 11821 (39 FR 41501) as amended by Executive Order 11949 (42 FR 1017), and related implementing instructions particularly Secretary's Order 15-75 (40 FR 54484). The evaluation of such impact was made a part of the economic analysis of ADL. The methods of evaluating these impacts and the conclusions reached were extensively discussed during the benzene hearing.

The portion of the ADL study was designed to show the economic effects of compliance with the proposed final benzene standard upon affected industries. OSHA believes that this analysis, as modified to reflect the changes made in specific provisions in drafting the final standard, adequately defines the economic impact of the final standard.

ADL's analysis was, as discussed further below, challenged by witnesses for AISI and API on the ground that it was not sufficiently rigorous. Neither AISI nor API questioning of the ADL costing methodology indicated serious disagreement with the data used. Nor did these witnesses offer any evidence tending to disapprove the conclusions reached by ADL, or suggest specific analytical procedures which, if followed, would clearly improve the study and increase the accuracy of the findings. After careful consideration of each of the questions raised by these and other witnesses, OSHA has made minor modifications in some elements of the cost analysis, and has concluded that the evidence indicates that the economic impact of the final standard may be more widespread than that shown in the ADL study but less severe for the industries analyzed by ADL.

IMPACT ON ENERGY, CRITICAL MATERIALS, AND OTHER MACROECONOMIC VARIABLES

The ADL analysis indicated that there would be no significant change in either the supply or demand sides of the markets for energy or critical materials.

Two economists testifying for API argued that these were important areas of potential impact improperly ignored by ADL. Scarborough, p. 4-5 and Henderson, p. 6-7. Under questioning at the hearings, however, neither witness offered any data indicating that these effects would be significant or put forth any reasons to suggest that they would be. (Tr. 2225-2226, Scarborough, and Tr. 2212-2214, Henderson.)

IMPACTS ON PRICES

The compliance costs identified in the cost analysis provided the basis for

estimating the impact on prices, output and labor productivity. The indirect costs resulting from increases in the prices of benzene and products made from it were identified and included in the estimation of impacts on producers and consumers. Capital costs were amortized over 7 years at 10 percent to reflect a normal return on investment. ADL assumed that the price would increase in the long run by the amount of any increase in long run average cost, including the normal return to investment. This provides a reasonable approximation of maximum potential price impact, and OSHA considers it to be acceptable where exact costs cannot be known and precise measurement of price changes is not feasible.

IMPACT OF PRICES ON OUTPUT AND MARKET STRUCTURE

Economic impact was judged on the basis of expected overall influence of price increases, product substitution, price elasticity of demand, market growth, volume of imports and exports, market concentration, and compliance cost differentials.

ADL reasoned that buyers of benzene will continue to purchase the same quantities after a small price increase, provided there are no economical substitutes for benzene and provided that they can pass the added cost along in the price of their products. If users of the end products reduce their purchases in response to the cost pass-through, then the industrial purchasers will change the mix of products they manufacture and buy less benzene. The elasticity of consumer demand in turn depends on whether consumers can substitute other goods of the same type for those whose prices increase as a result of the cost pass-through, and whether consumers reallocate their incomes to buy other kinds of goods and services while buying less of the ones whose prices increased.

The magnitude of the expected costs is such that the percentage change in consumer product prices would be very small. No income effect (reallocation of income) of any significance would be expected. Therefore, elasticity would reflect almost entirely the availability of substitutes, as ADL indicated, although this conclusion would be questionable if a large price change was anticipated. ADL's product-by-product discussion of the availability of substitutes for benzene and for the petrochemical products made from benzene showed clearly that in all major product lines substitutes were judged to be technically inferior and more costly, at best, and unavailable with present technology in many instances. (ADL, Ex. 5A, pp. 6-18 to 6-22.) Consumer substitution was also judged to be sharply limited on the

basis of the quality and cost of available substitutes. OSHA believes that the reasoning followed by ADL in this qualitative analysis is reasonable.

Using an estimate of relatively inelastic demand for benzene (elasticity = -0.5) (ADL pp. 6-11) and an estimated price increase of approximately 1 percent, ADL estimated that demand for benzene would fall by approximately 0.2 percent (16 million pounds) in the short run and by approximately 0.5 percent (54 million pounds) in the long run for refineries and steel companies producing benzene. Since the demand for benzene is growing moderately, these decreases would represent a slight decrease in the amount of growth, rather than an absolute decline from current levels of production. Foreign trade accounts for only 5 percent of U.S. supply and is not expected to be a significant factor affecting domestic producers, considering the small projected change in price.

The price of benzene is determined by petroleum refiners, who supply 95 percent of the market. Since coke oven producers will incur higher compliance costs than the benzene producing refineries, they will be able to recover only part of their costs through price increases and will be adversely affected by the standard. It appears probable that some producers of benzene from coking operations will choose to sell their light oil to other firms rather than continuing to produce benzene (AISI). Similarly, some refineries now producing benzene may elect to change their product mix to eliminate benzene production. These decisions will be made by benzene producers on the basis of many factors affecting the profitability of benzene production and not on the basis of the impact of this standard alone.

No data were submitted in the hearings that provided a basis for estimating the number of firms that may eliminate benzene production. It was not contended, however, that any producing firm will be forced to close or be forced into an unprofitable position as a result of the compliance costs associated with this standard.

IMPACT OF PRICE ON EMPLOYMENT AND PRODUCTIVITY

Since ADL projected no absolute decrease in total production of benzene, it did not project employment losses for benzene producers. API witnesses questioned this on the basis of their challenge of the analysis of demand elasticity, price change, and reduction of demand. (Scarborough, pp. 24-25; Henderson) OSHA reasons, however, that if these elements of the analysis are acceptable, the conclusion that production employment will not decline is valid, although some reallocation due to structural changes in the industries may occur.

API also argued that increased labor cost resulting from compliance programs could lead to some substitution of capital for labor. (Henderson, p. 10) In its testimony, ADL pointed out that the productivity of both labor and capital would decline in the same order of magnitude and that this would indicate that substitution would not occur. (TR p. 584) ADL also submitted that the industry sectors in question are quite capital intensive and that for this reason, "it is not anticipated that the proposed regulation would have any observed effect upon the utilization rate for labor in these industries." (ADL post hearing, Ex. 15N)

OSHA recognizes that some decline in overall labor productivity may result from adding compliance personnel such as technicians and hygienists to the work force of benzene producers, although the direct productivity of production workers is not affected. This decline was estimated by ADL to be approximately 1.4 percent for coke producers and 0.6 percent for refineries (ADL, Ex. 5A, Table 6.5, p. 6-16).

BENEFITS

The legislative history and language of the Occupational Safety and Health Act, as distinguished from some other environmental and safety legislation, clearly indicate that Congress has already arrived at a judgment concerning the balancing of cost and benefit, with the result that worker safety and health are to be heavily favored over the economic burdens of compliance. Specifically, Section 6(b)(5) of the Act provides that

the Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suffer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. Development of standards under this subsection shall be based upon research, demonstrations, experiments and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws.

Thus, while feasibility is an appropriate consideration, the Secretary is directed to set standards which attain the "highest degree of health and safety protection for the employee"

This does not mean, however, that a systematic evaluation of costs and benefits is not to be encouraged within the limits of the estimation techniques. In considering the issue of feasibility in this rulemaking, as in

others, OSHA has carefully evaluated the cost of compliance which may be incurred by the directly affected employers and their ability to comply. Additionally, OSHA believes that a standard for a substance which has been found to pose a cancer risk to workers, in this case benzene, must assure maximum benefit (i.e., prevention of serious illness or death), constrained only by the limits of feasibility.

There is general agreement that benzene exposure causes leukemia as well as other fatal diseases of the blood-forming organs. In spite of the certainty of this conclusion, there does not exist an adequate scientific basis for establishing the quantitative dose response relationship between exposure to benzene and the induction of leukemia and other blood diseases. The uncertainty in both the actual magnitude of expected deaths and in the theory of extrapolation from existing data to the OSHA exposure levels places the estimation of benefits on "the frontiers of scientific knowledge." While the actual estimation of the number of cancers to be prevented is highly uncertain, the evidence indicates that the number may be appreciable. There is general agreement that even in the absence of the ability to establish a "threshold" or "safe" level for benzene and other carcinogens, a dose response relationship is likely to exist; that is, exposure to higher doses carries with it a higher risk of cancer, and conversely, exposure to lower levels is accompanied by a reduced risk, even though a precise quantitative relationship cannot be established. In light of the uncertainties in this area of scientific knowledge, OSHA believes that it is required by prudence and by the statutory mandate to adopt a highly protective posture in considering the evidence for health benefits.

Various witnesses argue that cost benefit or cost effectiveness should be the primary criterion for regulatory decision. OSHA was criticized by industry participants for failure to consider what benefits would be derived from reducing the current permissible exposure level for benzene (API brief, page 92, 96; AISI brief, page 89, 97). The Council on Wage and Price Stability (CWPS) also suggested that OSHA estimate the incremental reduction in health risks which are associated with the reduction in employee exposure to benzene (Bosworth letter, 9/12/77, to Bingham).

Both CWPS and industry suggested ways in which this could be achieved. CWPS suggested that OSHA apply the expected lifetime incidence rates of leukemia and the increased incidence rates revealed by the scientific studies to the benzene exposed population to derive the number of expected

excess cases attributable to that exposure. An MCA witness, Dr. Wilson, assumed a dose response relationship and calculated that at the current exposure levels only one leukemia and one other cancer would be observed among the benzene exposed workers covered by the proposal every 6 years (Ex. 149-B). This witness further testified that the proposed standard would cost \$300 million for every hypothetical life saved (Tr 2750) and concluded as a result that the risk from benzene related deaths is comparable to many other socially acceptable risks.

An API witness contended that rational allocation of OSHA's resources required policies that utilize cost effectiveness as the primary basis for regulatory decisions. He further argued that OSHA should make an assessment of what risks exist from exposure to benzene at 1-10 ppm., which should then be compared with estimates of risks posed by other health hazards such as from cotton dust (Tr. 2157) as well as with the risk associated with other activities of society which he termed generally acceptable risks in order to determine whether the cost of the benzene standard is warranted.

In the face of the record evidence of numerous actual deaths attributable to benzene-induced leukemia and other fatal blood diseases, OSHA is unwilling to rely on the hypothesis that at most two cancers every six years would be prevented by the proposed standard. By way of example, the Infante study disclosed seven excess leukemia deaths in a population of about 600 people over a 25-year period. While the Infante study involved higher exposures than those currently encountered, the incidence rates found by Infante, together with the numerous other cases reported in the literature of benzene leukemia and other fatal blood diseases, make it difficult for OSHA to rely on the Wilson hypothesis to assure the statutorily mandated protection of employees. In any event, due to the fact that there is no safe level of exposure to benzene and that it is impossible to precisely quantify the anticipated benefits, OSHA must select the level of exposure which is most protective of exposed employees.

We recognize that in view of the latency period usually associated with the induction of cancer, significant reductions in mortality may not be seen for many years. However, unless exposures are reduced now, OSHA believes that the mortality rate will not decline and employees exposed to benzene will continue to suffer excess mortality. Finally, it should be noted that this standard for employee exposure to benzene cannot be simply described as a reduction in permissible exposure from 10 ppm. to 1 ppm. as a daily aver-

age. The previous standard for worker exposure to benzene permitted daily exposures as high as 50 ppm. for a period up to 10 minutes and repeated exposures of 25 ppm., levels which are known to produce serious hazards of blood diseases.

In making judgments about specific hazards, OSHA is given discretion which is essentially legislative in nature. However, in setting an exposure limit for a substance like benzene, OSHA may not substitute cost benefit criteria for the legislatively determined directive of protecting all exposed employees against material impairment of health or bodily function. Where the health effectiveness of the alternative approaches are extremely uncertain and likely to vary from situation to situation, OSHA must adopt the compliance strategy which provides the greatest certainty of worker protection even if that approach carries with it greater economic burdens for the affected employers. In the case of the benzene standard, the evidence in the record indicates that the costs of compliance are not overly burdensome to industry. Having determined that the benefits of the proposed standard are likely to be appreciable, OSHA is not obligated to carry out further exercises toward more precise calculations of benefit which would not significantly clarify the ultimate decision. Previous attempts to quantify benefits as an aid to decision making in setting health standards have not proved fruitful (41 FR 46742).

Based upon the foregoing and the record as a whole, OSHA finds that compliance with the standard (even if the higher cost estimates suggested by some participants are used) is well within the financial capability of the covered industries. Moreover, although the benefits of the standard cannot rationally be quantified in dollars, OSHA has given careful consideration to the question of whether these substantial costs are justified in light of the hazards of exposure to benzene. OSHA concludes that these costs are necessary in order to effectuate the statutory purpose of the Act and to adequately protect employees from the hazards of exposure to benzene.

VI. SUMMARY AND EXPLANATION OF THE STANDARD

The following sections discuss the various issues raised during the benzene rulemaking proceedings, the individual requirements of the permanent benzene standard and the rationale and policy considerations underlying the provisions of the standard. In developing these requirements, OSHA has considered all the evidence in the benzene record. After consideration of all of this evidence, OSHA has revised and clarified, as described in detail

below, certain provisions of its proposed benzene standard.¹

Scope and Application: paragraph (a) This standard applies to occupational exposure to benzene in all workplaces in all industries where benzene is produced, reacted, released, packaged, transported, handled or otherwise occupationally used, except for the agriculture industry. Thus, the standard applies to "general industry" as well as to the construction and maritime industries. By specific exclusion discussed in detail below, the standard does not apply to the sale, discharge, storage, transportation, distribution or use as a fuel of gasoline and other fuels, subsequent to discharge from bulk terminals. The application of the standard is further limited in that not all of the requirements of the standard will apply to every employer regardless of the conditions in his workplace. The permanent standard, unlike the emergency temporary standard and the proposed standard, incorporates an action level so that the specific provisions of the permanent standard that apply to any particular workplace depend upon the extent of employee exposure to benzene. Additionally, only the labeling requirements of paragraph (k) (2), (3), (4), and (5) and the training requirements of paragraph (j) apply to workplaces where the only benzene is contained in sealed intact containers.

The scope of the final standard has been significantly changed from the scope of the proposal and the emergency temporary standard. OSHA was faced with several alternatives in deciding on the extent of coverage of the benzene permanent standard and in achieving its objective of maximizing the protection afforded employees occupationally exposed to benzene while limiting the burden placed on their employers. Benzene, as pointed out earlier, is used in a vast number of operations in quantities varying from trace amounts in solvents to large amounts of pure benzene. Coverage of all workplaces where benzene is present would, of course, extend the protection of the standard to the greatest number of employees. It would mean, however, that workplaces where benzene is present only in trace amounts and potential employee exposure is minimal would be subject to the same exposure monitoring and medical surveillance requirements as workplaces where the potential for high employee exposures exists. While this would satisfy that part of OSHA's objective of maximizing the protection afforded employees, it would fail to reasonably limit the burden placed on employers.

¹For the convenience of the public, OSHA has included, as part of the title of each section of the summary and explanation of the standard, the particular paragraph of the standard to which the discussion refers.

PROPOSED PERCENTAGE EXCLUSION

The proposal and the emergency temporary standard both would have exempted from coverage those operations utilizing liquid mixtures containing 1 percent or less benzene by volume. The proposal would have limited this 1 percent exemption to the first year of the standard after which period only liquids containing 0.1 percent or less benzene by volume would be exempted. The proposed percentage exemption was based on some indication that exposures resulting from the use of mixtures containing less than 1 percent benzene would generally be less than 1 ppm (42 FR 27453-4). It was also anticipated that the percentage exclusion would lead to a reduction of the benzene content in solvents or to substitution of other substances for benzene with the result that employee exposure to benzene would be reduced or eliminated. As a result of evidence developed during the benzene rulemaking, however, OSHA has determined that the percent exclusion cannot be supported on this basis. The benzene record indicates that there is no consistent predictable relationship between the percent of benzene in a liquid mixture and the resultant airborne exposure to benzene (Tr. 3120). Studies conducted by the University of North Carolina demonstrated that exposure levels varied considerably during various work operations utilizing liquid mixtures containing the same percent of benzene (Tr. 3090-3091). Support for the conclusion that a less than one percent benzene solution can result in exposures above 1 ppm is found in testimony suggesting that other factors than the percent of benzene in the liquid may be determinative of exposure levels. Thus, NIOSH testified that employees working with No. 6 fuel which contains only 0.1 percent benzene were exposed to levels as high as 60 ppm under certain conditions of confined space, poor ventilation or elevated temperatures (Tr. 754). The University of North Carolina data also revealed that exposure levels in heavy duty tire spraying utilizing rubber solvents were 1.3 ppm when sprayed by the regular full time operator but reached 5.2 ppm and 7.3 ppm when sprayed by a substitute operator (Tr. 3093). This suggests that work practices are also determinative of exposure levels. To maximize protection of employees, it is necessary to reduce their exposure to benzene, to the lowest feasible limit. Since the percentage of benzene in a liquid is not in itself necessarily controlling of the employee's exposure level, the proposed percentage exemption, would not achieve this objective. Accordingly, the final standard does not contain a percentage exemption and thus applies to all liquid mixtures containing

benzene regardless of the percent of benzene.

It is OSHA's view that the absence of a percentage exemption does not eliminate all incentive to reduce the amount of benzene in liquid mixtures. Where another substance is totally substituted for benzene, this standard will obviously not apply. Additionally, it should be noted that the inclusion of an action level will effectively limit the burden of this standard where employee exposure is found to be low because of its limited presence in a mixture.

BENZENE SUBSTITUTES

In lieu of the percentage exception, OSHA considered the option of exempting from the standard certain benzene substitutes, such as toluene and xylene (although they may contain small amounts of benzene). An exemption of this type would encourage employers to discontinue the use of benzene and utilize a substitute in order to avoid the requirements imposed by the benzene standard. These substances themselves, however, do contain varying amounts of benzene and, as stated above, there is no evidence of a consistent direct predictable correlation between the amount of benzene and exposure levels. Thus, it was concluded that toluene and xylene, to the extent they contain benzene and result in benzene exposure, would be covered by the standard.

ACTION LEVEL

OSHA recognizes that the lack of a percentage exemption substantially expands the coverage of the benzene standard to operations which may otherwise have been exempt. In many of these operations, exposure levels below the permissible exposure limit have already been achieved. To minimize the impact of the standard on those employers who have attained these low exposure levels, the final standard provides for an action level. This action level is a benzene exposure equal to one-half of the permissible exposure limit above which certain precautionary measures, such as periodic monitoring and medical surveillance programs must be conducted and below which only a very limited number of the standard's requirements will apply. Thus employees who have an initial exposure measurement below the 0.5 ppm TWA action level will not have to be monitored periodically. If the initial monitoring exposure measurement is below the action level, no further monitoring is necessary until such time as a redetermination may be required as a result of a process, control or personnel change. Furthermore, medical surveillance of individual employees whose initial exposure measurements are below the

action level would not be required. Nor would regulated areas need to be established or engineering or work practices instituted or respirators provided. All other provisions of the standard, however, would apply and the employer would need to train his employees in the hazards of benzene exposure, to properly label his products and to maintain the record of the initial exposure measurement and, if any, the record of the redetermination measurement.

The adoption of an action level had been recommended by several participants to the rulemaking. NIOSH, recommended that an action level for periodic monitoring and routine periodic medical exams be incorporated for the purpose of assuring that no employee is exposed above the permissible exposure limit (Tr. 749-750). Industry participants advocated a level which would trigger the periodic monitoring of employee exposure (Com. 24; Com. 72; P.C. 36 AISI brief p. 74, FT. no. 168). A need for an action level is also suggested by the record evidence that some minimal exposure to benzene occurs naturally from animal and plant matter (Tr. 749-750; 759-760). Naturally occurring benzene concentrations, it appears, may range from 0.02 to 15 parts per billion (Ex. 117, p. 1). Additionally, it was suggested by certain employers that their operations be exempted from the requirements of the standard because those operations involve only intermittent and low level exposures to benzene. The use of the action level concept should accommodate these concerns in all cases where exposures are indeed extremely low since it substantially reduces the monitoring of employees who are below the action level and removes for these employees the requirement for medical surveillance. At the same time, employees with significant overexposure are afforded the full protection of the standard.

In developing this regulatory approach to occupational exposure from benzene, OSHA considered the request of those participants to the rulemaking who pressed for exemption from the benzene standard of their particular operations.

BULK TERMINALS

The final standards apply to bulk terminal operators but exclude exposure from gasoline, motor fuels and other fuels subsequent to the discharge from the bulk terminal.

During the rulemaking, bulk terminal employers requested that their gasoline operations be exempted from the benzene standard. Bulk terminals are the primary distribution facilities in the gasoline marketing network. A bulk terminal is the first distribution point of gasoline after the gasoline is processed by the refinery. Gasoline

products are transferred from refinery storage to the terminal by pipeline, tanker or barge (Comeaux statement, p. 11; A.D. Little, vol. II, D-35) and placed in larger storage tanks (Tr. 2353) at the terminal. Further distribution from the terminal is most commonly by tank trucks (Comeaux statement p. 11). The gasoline is pumped from the terminal storage tanks into the trucks and distributed directly to consumers, to retail outlets, i.e. retail service stations, or to other secondary distribution points. These secondary distribution points are smaller terminals (Tr. 476) referred to as bulk plants, which also distribute the gasoline by truck to ultimate consumers, such as farmers and small businesses, or to retail outlets. Final distribution of gasoline to retail service stations and to ultimate consumers is, therefore, by truck and either from a bulk terminal or a bulk plant (Comeaux statement, p. 11). Gasoline emissions occur at the storage tanks, at the tank trucks, and from leaks and spills, with the major emissions occurring when tank trucks are being loaded with the gasoline. The majority of terminal storage tanks are equipped with floating roofs which are effective in reducing storage emissions. Some tank trucks have bottom loading which reduces emissions during loading (Tr. 1294).

Participants in the benzene rulemaking argue that the exclusion of gasoline storage and distribution activities subsequent to discharge from the terminals results in an artificial distinction between bulk plants, which are not covered by the standard, and bulk terminals which are covered. (API P.C. 33, pp. 138-140; Comeaux, p. 12 Sexton p. 22). In support of this contention, industry furnished evidence that exposures at bulk plants were similar to exposures at bulk terminals (Ex. 115A-10; Sexton, p. 18; L.C. 4) and that bulk plants handle the same products, utilize similar handling procedures and use basically the same equipment as bulk terminals. From the technological standpoint, it also appears that several of the same types of vapor recovery systems can be utilized by both the bulk plants and the bulk terminals (Tr. 236). The major difference between bulk terminals and bulk plants, it was said, is a difference in the number of gallons of gasoline distributed (Sexton; Durham L.C. 4).

Although this description of bulk terminals and bulk plants suggests that there may exist some basis for treating bulk plants in a like manner to terminals, it does not necessarily follow that bulk terminals should be excluded from the standard. The question of what regulatory action should be taken with regard to bulk plants was, by specific notice issued prior to the benzene hearing (42 FR 32363),

not an issue at the benzene hearing. This exclusion of post terminal gasoline marketing activities from the benzene rulemaking was not based on the absence of any hazard. Rather, as stated in its FEDERAL REGISTER notice, OSHA concluded that regulatory efforts to reduce workers' exposure to benzene released during the transportation, storage, distribution and sale of gasoline subsequent to discharge from bulk terminals should await the conclusion of the deliberations of the inter-agency (OSHA-EPA-NIOSH) task force which was actively considering those activities. (As pointed out in the preamble to the proposed benzene standard (42 FR 27453) certain phases of the downstream gasoline activities which have been exempted from the standard, involve additional hazards which may necessitate different protective requirements and the development of appropriate equipment control devices, and require that these downstream operations be handled in an integrated manner.) In the same notice excluding bulk plants as an issue at the benzene hearing, OSHA solicited data and comments regarding those distribution activities "in order to assist in the subsequent development of a proposal for this industrial segment." Therefore, OSHA has presently under consideration the question of what types of regulatory action to propose for the protection of bulk plant employees exposed to benzene. Pending this regulatory action, bulk plants and other post terminal operations will continue to be subject to the requirements of 29 CFR 1910.1000 and to meet the exposure limits of Table Z-2 of that section.

The exclusion of bulk plants from the notice of the benzene rulemaking precludes regulation of those facilities in this final benzene standard. Exemption of the bulk terminals which were covered by the notice of rulemaking, however, would remove from the protection of this standard those employees who are involved in terminal activities. Data from eleven companies indicate that they operate 892 bulk terminals employing 9,900 employees (Comeaux, p. 12). One company alone estimated that over four thousand of its employees were exposed to benzene in its gasoline marketing operations covered by the standard (Sexton p. 20-1). This same company indicated that most of its 924 commissioned agents and 1,014 jobbers handling its products alone would have employees exposed to benzene emissions during terminal activities. It is OSHA's view that benzene's carcinogenicity requires extending the protection of the standard to the greatest number of employees. Accordingly, OSHA deems it necessary to apply this benzene standard to gasoline storage and distribution operations at bulk terminals.

It is OSHA's view that application of the benzene standard to bulk terminal activities will not impose a great burden on bulk terminal employers. The record evidence indicates that the exposures at storage tanks and loading docks at the terminals, of at least some employers range between 0.2 and .41 ppm on an 8-hour TWA (Sexton Ex. 115-A, 10). These ranges are based on measurements taken during the loading of trucks with and without bottom loading equipment. Where employee exposure to benzene is below the action level, as in the case of the range of measurements cited above, the standard imposes a minimum burden upon the employer.

NON-GASOLINE PETROLEUM PRODUCTS AND ACTIVITIES

Industry participants further argued that exemption of downstream gasoline marketing operations discriminates against the non-gasoline phases of the petroleum industry, such as oil and gas production, pipelines, marine petroleum transportation, refineries and petrochemical facilities, because worker exposures and compliance costs are comparable (API PC 33, pp. 140 ff, Com. 29). Crude oil and natural gas producers further argued for exemption of their facilities because conditions at their facilities—namely, open air workplaces, widely scattered employees, the transient nature of their workforce and essentially no exposure to benzene, made compliance burdensome (Com. 33). As stated above, the need to protect the many workers involved in the non-gasoline activities necessitates the inclusion of these activities in the benzene standard. Furthermore, by virtue of the action level concept, these very factors cited by the oil and gas producers will substantially mitigate the burden of the permanent standard on employers.

Air transport participants using aviation fuels, such as kero jet, argued that non-gasoline aviation fuels be included in the gasoline aviation marketing exemption. OSHA agrees. OSHA recognized, in its preamble to the proposed benzene standard (42 FR 27453), the special need to coordinate the Federal Government's efforts in reducing benzene exposure in certain aspects of the distribution of gasoline and other motor fuels. The joint OSHA-EPA-NIOSH task force, consequently, has under consideration the matter of non-gasoline motor fuels. Besides kero jet, there are other types of motor fuels, such as diesel fuels, which raise the same issues of control as gasoline. There may be other motor fuels containing benzene on which OSHA does not have data. OSHA is conducting its own review of gasoline and has solicited information from the public on gasoline (42 FR 32263). It is, therefore, OSHA's intention to determine the

regulatory action to be taken on non-gasoline motor fuels after review of the data and recommendations of the joint Federal task force and evaluation of the information furnished in response to OSHA's notice on gasoline. For these reasons, OSHA has exempted from the permanent benzene standard the storage, transportation, distribution, dispensing, sale or use as a fuel of all fuels (including gasoline, jet fuel, and diesel fuel) subsequent to their discharge from bulk terminals.

CLOSED SYSTEMS

Some participants requested exemption from the standard for workplaces where benzene is present solely in closed systems. The record evidence, however, indicates that closed systems frequently develop leaks, and that it is the amount of the solvent exposed to air (Tr. 3111-3) which, among other variables, is a major determinant in the degree of exposure. Accordingly, OSHA has retained coverage of closed systems in the final benzene standard. However, in the absence of leaks, exposures from closed systems should be below the action level and the impact of the standard in such operations should be minimal.

LABORATORIES

Still another segment of industry requested an exemption from the benzene standard. Many comments requested that research facilities in both industrial and academic laboratories be exempted from the benzene standard (Com. Nos. 14, 20, 57, 62, L.C. 12, L.C. 13) particularly where the permissible exposure limit is not exceeded (Com. 56, 58). Some comments suggested that separate requirements be developed for laboratory use of benzene (L.C. 12, L.C. 13). These requirements could include mandatory use of hoods (L.C. 9, Com. 21) of a specified velocity (L.C. 8, Com. 18) and periodic medical surveillance (Com. 18, 28, 29, 64, 70); annual inspection in lieu of monitoring (Com. 28); written safety rules (Com. 18) and container labeling (Com. 39) were also suggested. In the alternative, it was suggested, OSHA should promulgate separate regulations for all chemicals used in laboratories (L.C. 12, L.C. 13), since laboratories use a variety of chemicals, and compliance with separate regulations for each chemical, it was argued, would be burdensome (Com. 58).

The requests for exemption from the benzene standard or for special treatment of laboratories were largely based on the view that there exists a lesser, or slight, risk of exposure to benzene for laboratory technicians. In support of this contention, laboratories pointed to the manner in which they use benzene. Laboratories, it was stated, generally use small quantities of benzene at a time (Com. 10, 28, 38).

One laboratory reported that sometimes a sample is dissolved in only one ml of benzene (L.C. 2). That laboratory estimated that an individual laboratory technician, who analyzed 25 samples per day, 7 days a week, would use less than four gallons of benzene a year (L.C. 2). When not in use, benzene is stored in closed containers (L.C. 1).

The argument that laboratory technicians are trained in the hazards of chemicals was also made to support the view of lesser risk. One laboratory reported that it conducted blood tests every four months for twenty years of its technicians, and found no problem (Com. 4). Another reported that in thirty-five years, none of its employees developed leukemia even though exposures in the laboratory were between 1 and 20 ppm (Com. 31).

Another reason advanced for exemption or separate treatment of laboratories was the burden and cost of implementing exposure monitoring, engineering controls and medical surveillance (Com. 4, 5, 10). One industry comment argued that responsible research and quality control laboratories normally provide and encourage annual physical examinations that include the essentials of the proposed medical surveillance program (Com. 38).

OSHA has determined that applying the provisions of this benzene standard to laboratories is consistent with OSHA's responsibility to protect the health and safety of workers. The record indicates that exposure levels in laboratories vary greatly. While monitoring samples of one laboratory indicated levels of only .01 ppm (Com. 28), others indicated levels as high as 20 ppm (Com. 31; Ex. 39-3). Furthermore, it appears that protective measures vary from lab to lab (Tr. 3157). One chemist, who worked frequently and for several hours a day with benzene during his six years in a research lab that he described as "one of the most prestigious research institutions in the country," testified that employee exposures were not measured, hoods were not used, and there was no medical surveillance program (TR 3492-6). Moreover, there does not appear to be any firm basis to believe that training alone in handling of chemicals adequately protects all laboratory employees from the hazards of exposure to benzene.

Based on the above evidence, OSHA believes that laboratory employees are exposed to the leukemogenic hazards of benzene and, therefore, must be covered by this standard. OSHA does not subscribe to the view that laboratories should be exempted from the benzene standard and that protection for employees exposed to benzene should await promulgation of separate regulations for all chemicals used in

laboratories. OSHA is not currently developing a laboratory standard, and the result of exemption of laboratory workers from the benzene standard would, consequently, deprive them of the necessary protection against the hazards of benzene exposure for some time to come. Furthermore, the provisions of the standard relating to methods of compliance are performance oriented and, therefore, will encompass the suggested special requirements for laboratories. For example, the requirement that the employer institute engineering controls and work practices could be met by laboratories in many instances through the use of properly designed hoods. Also, the inclusion of an action level will minimize the monitoring and medical surveillance requirements in laboratories where employee exposure measurements indeed are low.

Although OSHA has not included special provisions just for laboratories, the provisions of the standard accommodate several of the suggestions of the participants, as noted above. Those laboratory operations where benzene exposure levels are at or below the action level will need to be monitored only initially, and medical surveillance of employees engaged in those operations will not be required. When benzene is sealed in containers, the laboratory employer will be required only to train his employees in the hazards of exposure to benzene, and assure that the container is properly labelled, and provide protective clothing where necessary.

COKE OVEN BATTERIES

Steel industry participants requested an exemption from the benzene standard for coke oven workplaces which are covered by the coke oven emissions standard. Although coke oven emissions at coke oven batteries are regulated by § 1910.1029, it is OSHA's view that there is a need to apply to these workplaces the requirements of the benzene standard, as well. The coke oven standard regulates the benzene soluble fraction of total particulate matter present during the carbonization of coal for the production of coke to protect workers from the risk of developing cancer of the lung and urinary tract. The coke oven standard, however, was not designed to protect coke oven employees from the hazards to the hematopoietic system which can result from exposure to benzene. Benzene exposure can occur from leaks in the ovens or in the collection system or from residual vapors left in the ovens when they are opened and the hot coke is pushed out (Little study, B-21). Accordingly, in order to protect workers from the hematopoietic hazards presented by exposure to benzene, OSHA has concluded that inclusion of all coke oven workplaces in the benzene standard is necessary.

The coverage of coke oven workplaces by both the benzene and the coke oven emissions standard does not create a conflict. OSHA believes that the engineering controls required by the coke oven emissions standard will, in all likelihood, reduce exposures to benzene below the action level. In such a case, the benzene standard will impose on coke oven workers only the burden of conducting initial measurement, retaining a record of that measurement, and the training of employees in the hazards of benzene.

SEALED CONTAINERS

The final standard applies only to the labeling requirements and the training requirements to the storage, transportation, distribution and sale of sealed, intact containers. This is a change from the proposed standard, and the emergency temporary standard which would have applied all the requirements of the benzene standard although benzene were "present" solely in sealed containers. The change in the final standard was made in response to comments to the effect that closed containers of benzene pose no threat of exposure to employees (Com. 10). Participants in the rule-making pointed out that coverage of closed containers would result in employers being required to monitor exposure and make medical surveillance available to employees, such as maritime employees occasionally handling small quantities of benzene in break-bulk form (i.e., drums or packages) (Com. 35), employees of receiving docks and warehouses, and employees involved in inter-departmental transfers of the containers (Com. 28). Additionally, such coverage would also apply the requirements of the benzene standard to employees of retail stores that sell products containing benzene.

Most participants requested exemption of closed containers (Com. 10, 28, 35) without distinguishing between closed and sealed containers. A state agency comment, however, suggested that only "sealed" containers be exempted (Com. 67). OSHA concurs in the view that properly closed containers do not present a health hazard to employees which warrants application of the monitoring and medical surveillance requirements. OSHA, however, is concerned that containers may, after being opened, be closed in such a fashion as to expose employees to a hazard. For this reason, OSHA has adopted the suggestion that the exemption apply only to sealed containers, intending by the use of that term to exempt only containers of benzene which are closed in such a manner as to contain the benzene vapors. However, since sealed containers may, during handling, develop leaks (Tr. 3051-2) and thus expose employees to the hazards of benzene, the exemption is fur-

ther limited to intact containers. Therefore, where the breakage of the container occurs, employers will be required to monitor and to comply with any other applicable provisions of the standard. To assure that all employees are aware of the hazardous nature of the contents of the containers they are handling and because at some point in downstream occupational activities the containers will be opened, the standard applies the training and the labeling requirements to sealed containers. Finally, it should be noted that the regulation of sealed containers in this standard is consistent with that in other carcinogen standards; §§ 1910.1003-1910.1016 exempt sealed containers from their requirements, except for labeling and transshipment.

Definitions: paragraph (b). The standard contains some appropriate definitions. The purpose of providing definitions for key terms is to clarify the intent of those terms as used in the substantive provisions of the standard. All of the definitions of the proposal have been retained in the final standard.

A new definition has been added to those contained in the proposed standard. This is the definition of "Action level." Action level is defined as a concentration of benzene of 0.5 ppm over an 8 hour workday. Industry participants recommended that monitoring be conducted only where exposure exceeds the permissible exposure limits (PC 36, AISI brief, p. 74). OSHA does not agree. It is generally acknowledged that worker exposure to airborne emissions can vary from day to day in a random fashion. This variation in levels is unavoidable; it is only minimally connected to the precision and accuracy of the method of measurement and does not include variations due to wind, temperature and other environmental factors.

Therefore, even though individual measurements of exposure levels may fall below the permissible limit, some possibility exists that on unmeasured days the employee's exposure may exceed the permissible limit. Thus, the concept of an action level provides, statistically, a means by which the employer may assure himself that his employees will not be exposed to benzene over the permissible exposure level (PC No. 14g, p. 5). In view of these considerations and in order to provide a greater degree of employee protection, OSHA has incorporated in the permanent benzene standard an action level of 0.5 ppm.

For those employees whose exposure level is determined by initial monitoring to be below 0.5 ppm, the employer need not do any further monitoring unless a redetermination of exposure is necessitated because of a process, control or personnel change. For these employees, moreover, the employer is

not required to provide medical surveillance. The employer, however, must train these employees, label his benzene products, provide protective clothing where necessary, and retain a record of the initial determination and, if any, record of the redetermination measurement.

Employees whose exposure measurements are above 0.5 ppm, but below 1 ppm must be monitored quarterly and provided with medical surveillance. Where exposures are above the action level but below the permissible exposure limit the requirements for regulated areas, methods of compliance and respiratory protection do not apply but the employer must comply with all other requirements of the standard.

Those employees whose measurements are above 1 ppm must be monitored monthly. All the provisions of the standard, moreover, apply where employees are exposed above the permissible exposure limits.

OSHA has, as suggested by some participants (Com. 46), clarified the definition of benzene to include solids which contain benzene. Some comments suggested that benzene be defined as commercial or high grade benzene (Com. 48, 59, 76). OSHA has not adopted this suggestion because of record evidence to the effect that low concentrations of benzene do not necessarily result in low exposures. Other comments suggested that a definition of benzene exposure be included (Com. 36, 57, 59). The thrust of these suggestions was to limit the application of the proposal's monitoring requirements which applied to workplaces "where benzene is present" and the proposal's medical surveillance requirements which applied to "all employees who are or will be exposed to benzene." For the reasons stated below in the appropriate parts of this preamble relating to these requirements, OSHA has not adopted this suggestion.

A new definition of emergencies was added to the standard to clarify the type of situation requiring the use of a respirator. The definition of emergencies also clarifies the situations in which employees shall be provided with a biological screen.

PERMISSIBLE AIRBORNE EXPOSURE LEVEL. PARAGRAPH (c)(1)

Based upon a thorough review and evaluation of evidence in the record, OSHA has, as stated above, concluded that benzene:

- (1) Is a human leukemogen;
- (2) Causes bone marrow depression resulting in alterations in peripheral blood; and
- (3) Causes chromosomal damage in blood cells.

These conclusions are based on studies ranging from single case reports to

retrospective mortality studies and also experimental evidence. These studies represent the best available evidence upon which OSHA must make a decision. This decision is not predicated on any particular study, but is based on an assessment of the entire set of evidence taken as a whole.

OSHA recognizes that only recently has there been a well-designed study which may indicate a leukemogenic response among benzene-exposed animals. (Nelson, Ex. 178) In any event, the best evidence to date is that based on direct human experience. Based upon such evidence, OSHA concludes that benzene is and must be regulated as an occupational carcinogen.

Comment and testimony from industry for the most part, does not dispute the leukemogenic potential of benzene (e.g. Eckhardt, Ex. 115.B. 1, pg. 3; Tabershaw Tr. 2545). However, industry argues that this relationship is valid only at high exposure levels. In support of this view, they cite as evidence that: (a) the documented cases of benzene-induced leukemia were among employees who were, most probably, exposed to high concentrations, and (b) that several studies of undefined numbers of workers who may have been exposed to low levels of benzene did not demonstrate a leukemia excess (The benzene studies are described under Health Effects: Leukemia). Industry also believes that observable blood disorders precede the development of benzene-leukemia and that such hematological abnormalities are reversible (ORC, PC 34, p. 2; Tabershaw Tr. 2543 Jandl, PC 26B, Allied P.C. 22, p. 7). They conclude that the present exposure limits of 10 ppm TWA and 25 ppm ceiling are sufficiently protective to guard against the development of non-malignant blood disorders and, consequently, that limiting exposure to such levels will also protect against leukemia. (ORC, PC 34; Jandl, PC 26B; Tabershaw, Tr. 2546.)

The issue of the levels at which cancer is induced by chemical agents and whether or not there is a "threshold" has been a major issue in every OSHA rulemaking concerning the regulation of occupational carcinogens (See preambles to Carcinogen standard (39 FR 3758); Vinyl Chloride (39 FR 35892); Coke Oven emissions (41 FR 46742). The benzene hearing was no exception. As in the case of arsenic, the lack of an unequivocal animal model (Kraybill, Tr. 758) requires that the Secretary's decision rely primarily on data obtained from human evidence. However, the epidemiologic method is by its very nature, a retrospective view of the evidence, i.e. findings of a recent excess of mortality among workers may relate to initial exposures occurring as much as 20

years or more previously and which most certainly correlate to exposures at higher concentrations than present levels. Because of these variables, it is extremely difficult to derive definite conclusions as to the quantitative health risk to the workers at exposures near 1 ppm. Studies which report negative findings, such as those studies conducted by Stallones, Tabershaw-Cooper and Thorpe suffer from the disadvantage of not being able to clearly define an exposed cohort, i.e. the identification of a group of workers actually exposed to benzene and to what levels they were, in fact, exposed. (Stallones, Ex. 115.C; Tabershaw-Cooper, Ex. 149A; Thorpe, Ex. 2-34). OSHA recognizes that it is extremely difficult to reconstruct and define employee exposures retrospectively. Therefore, given the uncertainty of the definition of exposure and the potential for dilution of mortality excess among those actually exposed to benzene and other methodological deficiencies, OSHA is reluctant to place substantial reliance upon these negative reports. Thus, there is little definitive information available pertaining to the leukemogenic risk of an adequate size cohort of workers exposed to benzene less than 10 ppm and who have been followed for an adequate amount of time. Furthermore, it is OSHA's view following a careful review of the record that, at the present time, it is impossible to derive any conclusions regarding dose-response relationships for benzene (Goldstein, Ex. 75, p. 2 NRC, Ex. 2-4 p. 11) beyond the general observation that higher exposure levels carry a greater risk than do lower exposure levels. What is apparent however, is that a decrease in exposure level and/or duration will result in a decreased risk of leukemia.

OSHA also recognizes that, in some published cases with adequate documentation, leukemia attributable to benzene exposure developed after observable changes in the peripheral blood, i.e., various cytopenias, pancytopenia and/or aplastic anemia. (Goldstein, Ex. 43B, p. 166.) However, many cases of benzene-induced leukemias were recognized as such only after a patient with overt physical symptoms presented himself to a physician. Similarly, Snyder stated that, in the cases of pancytopenia and aplastic anemia, individuals "exposed to benzene usually do not approach their physicians until late stages in the disease." (Ex. 156.2, p. 2.) As a result, the hematological picture before the onset of disease is often not known. Moreover, because of the well-known reserve proliferative capacity of the bone marrow it is possible that marrow damage may occur without being reflected in the peripheral blood. (Goldstein, Ex. 43.B, p. 175; Wintrobe, Ex. 2-107, p. 676.) Olson acknowledged that alterations

in bone marrow activity can occur despite a normal blood count (Tr. 2894). Moreover, Goldstein noted that some individuals may have significantly depressed blood values, and yet remain within normal ranges. For this reason, a pancytopenic response to hematotoxic agents may go unrecognized. Therefore, OSHA believes that the scientific evidence is insufficient for adoption of the hypothesis that a preceding prodromal blood syndrome is a necessary prerequisite for the development of benzene leukemia. In this regard, Goldstein in his testimony cautioned that benzene may act as a direct-initiator of a neoplastic response.

OSHA is also aware that in many instances, non-malignant blood disorders resulting from chronic exposure to benzene may be reversed by removal from benzene exposure. However, the apparent high degree of reversibility, as set forth in Jandl's review, is open to question as pointed out in the Health Effects section.

Furthermore, a most characteristic finding which pervades the published literature, is that physiologic factors which cannot be identified a priori, such as nutritional state, genetic constitution, variations in metabolism of benzene and exposure (both occupational and non-occupational) to other marrow depressants, and the variables of age and sex may act to modify the individual's response. (Browning, Ex. 31, pp. 26 ff; Shaw, Tr. 421; Snyder, Ex. 156, p. 2.) For example, Browning stated, "... [t]here is no doubt that both men and women differ markedly in their response to similar conditions of exposure." (Ex. 31, p. 2.) Therefore, unqualified identification of high-risk subgroups cannot be made at present. Because of these uncertainties, this standard is designed to protect the most sensitive as well as the more resistant members of benzene-exposed worker populations by limiting exposure to the maximum extent feasible.

It is, therefore, clear from an examination of the record that a determination of a precise level of benzene exposure which presents no hazard cannot be made and that the corollary question of whether a "safe" level of exposure to benzene exists cannot be answered. The agency is aware of and has examined scientific opinion and data submitted by industry that thresholds for carcinogens may exist. However, prudent public health policy requires a conservative course of action until such evidence is of a definitive nature.

In its conclusionary document the International Workshop also stated: "[t]he workshop discussed but could not agree on whether there was a concentration below which there would be no leukemogenic effect clearly attributable to benzene" (Ex. 17, p. 7). Kray-

bill testified that because there was not enough data at the lower part of the dose-effect curve, he was unable to estimate a "safe" level. As early as 1939, in presenting data on the effects of chronic benzene exposure including leukemia, Hunter stated: "It is doubtful whether any concentration of benzene greater than zero is safe over a long period of time." (Ex. 2-74, p. 354.) In 1974, the MAK-Werte Working Group stated, "... [O]n the proven carcinogenic (leukaemogenic) effects of benzene and the lack of quantitative measuring data in the low concentration ranges, it is not possible at this time to establish an MAC (maximum allowable concentration) which might be regarded to be without danger." (Ex. 2-58, p. 52.)

Goldwater testified that zero is the level at which there is no risk of getting cancer from benzene (Goldwater Tr. 2500).

Goldstein stated: "As we do not know what the safe level is, the standard would appear to me to be based, must be based on prudent medical approach, which is to keep it at the lowest feasible level" (Tr. 352).

Aksay stated: "(F)or me, the permissible exposure limit for benzene should be zero. Where it is technically impossible to achieve this, the permissible exposure limit should be lowest possible" (Tr. 149). In OSHA's view, the demonstration of cancer induction in humans at a particular level is not in the regulatory context, a prerequisite to a determination that a substance represents a cancer hazard for humans at that level. Relying upon a substantial body of scientific opinion, OSHA has concluded that, when dealing with a carcinogen, no safe level exists for any given population. For example, the National Cancer Institute's Ad Hoc committee on the Evaluation of Low Levels of Environmental Carcinogens (1970) states:

no level exposure to a chemical carcinogen should be considered toxicologically insignificant for man. For carcinogenic agents, a "safe level for man cannot be established by application of our present knowledge." (Ex. 272, p. 1.)

Thus, OSHA takes the position that in promulgating a health standard for a life threatening hazard such as benzene-induced leukemia, the exposure limits be established on a conservative basis so that worker health is properly safeguarded.

From the point of view of choosing a safe level of exposure, therefore, the permissible exposure limit should be set at zero. However, based on the evidence in the record, it is OSHA's judgment that a zero standard for exposure to benzene is not technologically feasible. In fact, it is clear that certain quantities of benzene are present in the ambient environment as a result of natural phenomena and as artifacts

of human activity. While a permissible exposure limit equal to zero plus background would represent the lowest level theoretically possible, OSHA believes that the record shows such an approach is not feasible. Even if such a number could be determined, achieving a standard of zero plus background would require that exposure to benzene be effectively zero so as not to increase employee exposure above background levels. There has been no evidence presented that convinces OSHA that such a complete elimination of benzene in all industries can be achieved by existing or future technology. In determining the appropriate permissible level of employee exposure to benzene, OSHA relies in part on the record of this proceeding and in part on policy considerations which lead the Agency to conclude that, in dealing with a carcinogen or other toxic substance for which no safe level of exposure has been demonstrated, the permissible exposure limit must be set at the lowest level feasible. Such a determination involves a measure of subjective judgment which OSHA believes is justified by the nature of the hazard being dealt with, and the intent of the Act. Section 6(b)5 provides that the standards for toxic substances shall be feasible. That section specifically provides that:

In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws.

OSHA has determined that 1 ppm TWA, 5 ppm ceiling limit for 15 minutes is the level which most adequately assures, to the extent feasible, the protection of workers exposed to benzene. In making this determination, the Agency recognizes that many industries affected by this standard have already achieved this permissible exposure limit, in a good many of their operations. As shown below for worksites currently above these values, currently available engineering controls and/or modifications of work practices can effectively reduce employee exposure to below the 1 ppm TWA, 5 ppm ceiling. This might suggest that the lower permissible exposure limits could be established, if not for all, at least for some of the industries covered by the benzene standard. OSHA has considered the appropriateness of establishing lower permissible limits for those industry sectors which can achieve these lower limits. It is, however, difficult on the basis of the available evidence to make this determination. The benzene standard applies to a multiplicity of industries and exposures occur from such varying sources as leaks in closed systems to batch operations using solvents. Identification

of some operations with lower exposure levels is possible in some industries, but even for these industries exposure information is not available for all operations. Moreover, even where information has been furnished by particular employers as to exposure levels for operations in their plants, it is not possible with any degree of confidence to apply this information to operations of another facility in the same industry. There is a great deal of variability in the configuration of plants, and the physical location of operations within a plant varies from facility to facility. Finally, it is OSHA's view that different levels for different industries would result in serious administrative difficulties. Because of these widespread differences and diversity, OSHA has decided to apply to all affected industries a permissible exposure limit of 1 ppm. Several industrial situations have been examined in making this determination and are discussed below.

Oil and gas production work is conducted in outdoor open air environments with relatively low-benzene content (Tr. 1463) streams maintained in closed systems. (Tr. 1463). Employee exposures in producing operations are intermittent and extremely low (PC 33API Brief p. 141; Ex. 116). Evidence in the record indicates employee exposures ranging between 0 ppm and 2 ppm, with over 80% of the measurements below 0.25 ppm. (Tr. 1467, Ex. 116, Ex. 115.A.4, p. 8). Since the production of crude oil and natural gas occurs in completely enclosed systems, the only employee exposures result from leaking valves (P.C. No. 30) and, as already indicated, these exposures are minimal. Visual inspections can detect these malfunctions and correction can be accomplished largely through replacement of seals. Engineering controls in the form of "double sealed" or "canned" pumps could also be instituted to avoid the leaks.

Pipeline transportation of crude oil and refined products is primarily a closed system operation (Tr. 1460). Potential employee exposure may occur where the products are transferred by truck or rail. (Tr. 1471.) Other operations involving employee exposure are gauging, and sampling operations, all of which are of relatively short duration with minimal employee exposures (Tr. 1472). Measurements taken by industry indicate that most such exposures on an 8 hour TWA basis are below 0.5 ppm. (Ex. 115, A.1.) The only area in which exposures were shown to exceed the permissible exposure limit was in the additive handling operations in which benzene was being utilized as a diluent. Since benzene was not necessary to the process, it was being eliminated from that operation (Tr. 1473).

The unloading and loading of gasoline, crude oil, and other refined products from marine vessels results in limited exposure to shoreside personnel ranging between 0.01 ppm to 0.82 ppm, with an 8 hour TWA of .2 ppm. (Tr. 2271.) The shoreside personnel's potential for exposure occurs during the connecting and disconnecting of the hoses and loading arms, an activity of limited duration. (Fuller Ex. 115, A.3, p. 4.) The unloading and loading of benzene from marine vessels, however, may result in higher employee exposures. The transportation by barge accounts for the majority of the total benzene transported. (A.D. Little, Ex. 5A, 4.24, 4.42.) The connecting and disconnecting, opening and closing of valves and the monitoring of fill levels are the typical operations in which employees will actively be involved. These operations are all of limited duration and, consequently, employees would spend little of their time involved in them. The remainder of the employees' time would be spent elsewhere removed from exposure. Therefore, work practice controls would be extremely effective in reducing employees' exposures to benzene during the unloading and loading of marine vessels. (A.D. Little Vol. 1, May 1977 p. 4.27.)

One methodology discussed to reduce exposure to vapors is a marine vapor recovery system (Fuller, Ex. 115-A.3). However, at the present time, questions concerning fire and explosion risk, and potential structural damage to barges have, not as yet, been adequately resolved.

The exposures measured during the unloading of gasoline at bulk terminals are low. Sexton, an industry spokesman, reported that the highest long-term samples on individual truck operators was 0.41 ppm, with the vast majority being below 0.2 ppm. (Ex. 115-A.10.) These terminals from which the exposure data was obtained represent examples of the various types of truck loading techniques and different physical characteristics of the terminals, such as loading rates, covered versus uncovered loading racks, and floating roof tops.

Data presented by Williams Pipeline also showed exposure levels, for the most part, below 0.5 ppm, on an 8 hr. TWA basis. It, therefore, appears that one or a combination of these available engineering controls will be sufficient to reduce employee exposure below the permissible exposure limit.

Approximately 94% of the benzene produced is derived from petroleum through the process of catalytic reforming, recovery from pyrolysis of gasoline and hydroalkylation of toluene. Many of the processes used to produce benzene involve completely enclosed units such as reactors. However, these processes do contain vents

and other sources of leaks, which can result in significant exposures (A. D. Little, Vol. II-B11).

Control of emissions can be accomplished by such activities as removal and reinstalling equipment such as pumps, compressors, machining of parts, cutting and welding of pipelines, fabrication of equipment, replacement of gaskets. Also, the use of automatic gauging devices, closed loop sampling systems, vapor recovery units, floating roof installations and rupture discs has been suggested (Ex. 5A, 4-53).

The majority of employees exposed at petrochemical plants are already within the permissible exposure limit. (Ex. 111-A, pp. 4-7.) At only four of twelve plants surveyed, exposures were above 1 ppm. (ADL May 1977 p. 10, Table 2), and of those four plants only two were above 5 ppm. The fact that eight of those twelve plants were already within the permissible exposure limit suggests that other plants can be rehabilitated with existing technology to achieve levels within 1 ppm.

The record indicated that exposures to benzene vary between 0.1 ppm and 20 ppm. (Com. 28, 31). The differences in exposure levels appear to be due to the particular protective measures employed in the laboratory. (Tr. 3157, 3492-6). On the basis of this evidence, OSHA has determined that the use of a properly operating laboratory hood is one available engineering control which is currently reducing employee exposures (See ADL 4-41) well below the permissible exposure limit. The type of control selected will be dependent upon the individual laboratory. (ADL May 1977 pp. 4-40 and 4-41.)

The two segments of the steel industry wherein benzene exposure occurs are the coke oven battery and the light oil distillation plants. Exposures at the coke oven batteries range between 0.02 ppm and 0.31 ppm. (Ex. 135 p. 4 and Attachment 2). It is thus apparent that the steel industry's compliance with the Coke Oven Emission Standard will maintain benzene exposures well below the action level.

Within the distillation plants, equipment is used to distill the benzene out of the light oil. It is in this operation that the steel industries claim that in certain situations it will not be feasible to reduce exposures through engineering controls. It appears, however, that those situations are limited to the older "coke driven by-products plants" (between 30, 40, and 50 years old). (PC 36 AISI Brief, p. 87-88) and does not exist for the newer plants which currently have low exposure levels.

As the Courts of Appeals have emphasized, OSHA is not restricted to the status quo. Standards may be set which require improvement in existing technologies or which require the development of new technology and

OSHA is not limited to setting standards based solely on devices currently available, at least where new technology appears on the horizons to limit exposures below the permissible exposure limit. (See e.g. *Society of Plastics Industry v. U.S. Department of Labor*, 509 F. 2d 301 (C.A. 2, 1975) cert. denied.) Certainly here, the evidence indicates that technological controls to reduce exposures, if they are not universally used, do exist (Ex. 5A, 4-37).

Benzene exposure may occur in a variety of industries when solvents containing small quantities of benzene are utilized. Some examples are the rubber industry, the manufacture and use of adhesives, paint manufacturing and application, metal can production and commercial printing. Evidence in the record indicates that, with the exception of paint remover firms for the most part have restricted the use of benzene as a raw materials. It appears, therefore that the percent of benzene coupled with presently available engineering controls, such as local exhaust systems, results in minimal employee exposures. (May 1977 ADL p. 4-27, 4032).

Based on the record of the benzene rulemaking, OSHA has concluded, as indicated above, that the permanent benzene standard is technologically feasible. Furthermore, OSHA has determined that this standard better effectuates the purposes of the act than the national consensus standard for benzene.

Dermal and Eye Exposure Limits: Paragraph (c)(2). The final standard, like the emergency temporary standard and the proposed standard, prohibits all eye contact and skin contact with liquid benzene. This requirement is based on OSHA's policy that, in dealing with a carcinogen, all potential routes of exposure (i.e. inhalation, ingestion, and skin absorption) be limited to the extent feasible.

Although the record evidence does not conclusively establish what the effects of contact with benzene are on the eyes or the skin, participants generally did not oppose a requirement for restricting such contact. Indeed some participants indicated that they already provide protective clothing and equipment to their employees in order to protect them from possible hazards of contact with liquid benzene.

The record evidence on the effect of liquid benzene on the eyes or the skin is extremely limited. No scientific data as to the effects of benzene on the eyes was presented during the rulemaking proceeding. The few studies of skin effects on animals and humans (Ex. 2-46, 2-47, 2-48, TR 2459-90) are not definitive as to the extent of benzene that is absorbed through the intact skin or as to the comparative

rate of absorption through damaged skin (TR. 2469-70). Testimony as to skin absorption of benzene was given by NIOSH and by an industry expert witness. NIOSH's view is that benzene is readily absorbed through the skin although the extent of absorption in any particular exposure is unknown. NIOSH however, believes that in instances of an inflamed skin or when benzene is contained in a mixture a "considerable amount" can be absorbed (TR-860). Industry's witness stated that he had no personal view as to whether benzene is absorbed through the skin (TR. 2469) nor whether the rate of absorption of benzene was or was not increased where the benzene is a component of a solvent (TR. 2471-2). The witness also pointed out that he did not know the effect of multiple applications of benzene on the broken skin (TR 2471). He suggested that additional studies be conducted to resolve these issues. This witness nevertheless testified that liquid benzene can damage the outermost protective layer of the skin (TR 2470) and that, although there is no verifying data, "it is ordinarily assumed that penetration of any molecule will be greater through damaged skin than undamaged skin" (TR 2469).

In order to assure that employees are adequately protected against all benzene hazards, it is OSHA's belief that it is appropriate to provide precautions against eye and dermal contact with benzene. In reaching this conclusion, OSHA has taken note that the threshold limit value for benzene adopted by the ACGIH for 1976, and the intended change of that TLV, bear a "skin" notation which refers "to the potential contribution to the overall exposure by the cutaneous route including mucous membranes and eye, either by airborne, or more particularly by direct contact with the substance. Vehicles can alter skin absorption. This attention-calling designation is intended to suggest appropriate measures for the prevention of cutaneous absorption so that the threshold limit is not invalidated" (TLVs for chemical substance in Workroom Environment with Intended Changes for 1976, p. 5). OSHA further notes that maximum allowable concentrations of benzene in other countries also carry a "skin" notation.

OSHA has reviewed the various suggestions for changes in some of the requirements of the provision on eye and dermal limits. Some participants suggested that the provision apply to "liquid benzene" to make clear that the limitation did not apply to eye and skin exposure to benzene vapors (For example, see Com. 53). OSHA has adopted this suggestion since it was never intended that the provision apply to other than liquid benzene. Some comments suggested that the

limitation apply only to liquid benzene of a commercial grade or higher (Com. 48; Com. 76) so as to exclude solvents with trace amounts of benzene (Com. 59). There is no evidence, however, to suggest that the absorption rate depends on the amount of benzene present in the liquid (TR 2472, 2482).

Regulated Areas: paragraph (d). The final standard contains requirements for regulated areas. The purpose of establishing regulated areas is to limit the exposure at above 1 ppm to as few employees as possible. The burden of the regulated area provision on the employer is expected to be minimal since the provisions require the employer merely to identify and control access to regulated areas and to notify the applicable OSHA area office of their existence and condition.

The standard requires that regulated areas be established where airborne exposures are above the permissible exposure limit and that access thereto be limited to authorized persons. Regulated areas must be established at all worksites where the permissible exposure limit is exceeded. Although transportation was not specifically listed in the proposed regulated area paragraph, the regulated area requirements of the permanent standard apply to the transportation of benzene, as well as to workplaces where benzene is produced, reacted, released, packaged, stored, handled or used. The scope of the regulated area subparagraph is, therefore, identical to the scope of the standard. This identity of scope has the result that, while the loading of gasoline at the bulk terminals may require the designation of a regulated area, the transportation of the gasoline from the terminals does not, in as much as that transportation activity is exempted from the standard.

Some participants misunderstood the regulated area requirement in the proposal and thought that regulated areas must be established even where exposures are below the permissible exposure limits. (Tr. 3136.) The standard, however, requires establishment of regulated areas only where exposures are above 1 ppm as an 8 hour time weighted average or 5 ppm averaged over a 15 minute period.

Some participants recommended that regulated area requirements not apply to laboratories (Ex. 6, No. 37, 70) or to coke oven batteries (Ex. 135; p. 2 PH; 36 AISI brief, p. 17). It is OSHA's view that existence of a hazard, rather than the type of operation, should be the basis for establishment of regulated areas. Therefore, if the exposures in laboratories or coke oven batteries were to exceed the permissible exposure limits, regulated areas would have to be established at those facilities. Moreover, OSHA feels that the burden is minimal compared to the protection afforded employees.

The standard requires that the OSHA area office be notified within 30 days following the establishment of a regulated area. Each employer must notify OSHA of the existence of any regulated areas within his establishment and of the conditions existing within such areas. Since regulated areas are required to be established only where exposures to benzene exceed the permissible exposure level, employers whose operations are all below that level need not file the report. This requirement is designed for compliance purposes. One comment suggested that OSHA should require, as it did in the Emergency Temporary Standard on Benzene, notification of the use of benzene in every workplace where it is present (Com. 62). It is clear from the record evidence that benzene is present in some amount or other in a vast number of workplaces and that, consequently, a notification of use provision would be administratively burdensome to OSHA and employers without necessarily resulting in more effective enforcement of the standard. For this reason, the final standard, as the proposal, requires merely the notification of regulated areas. Other comments suggested that laboratories and other small users of benzene be exempted from this notification provision on the ground that their use of benzene is infrequent (Com. 70) and that the filing of this notice by "big users" would be sufficient to set priorities for facility inspections. OSHA does not agree. The amount of benzene used by research and testing laboratories will vary from time to time depending on the projects being worked on. Finally, the suggestion presupposes that facility inspections would be conducted solely on the basis of the frequency of use of benzene. However, even where the use of benzene is infrequent, impairment of employee health may occur particularly where the exposure is above the permissible exposure limit. Other industry comments requested that employers be relieved of notification of regulated areas where temporary regulatory areas of short duration are established for maintenance work or for special projects or when leaks in closed systems occur (Com. 46, 50). In view of the hazardous nature of benzene exposure, OSHA deems it essential to require notification of regulated areas in all cases where employees are exposed above the permissible exposure limit. Moreover, in a facility where there are frequent leaks, the employer will be alerted by the necessity to report these leaks to the possible need to take additional measures to protect employees against such exposures. If the possibility exists that the permissible exposure limit will be exceeded from time to time, the maintenance of a regulated area at the lo-

cation of the leaks will, of course, minimize exposure and minimize the reporting requirement. Some industry participants recommended that the standard include a method for "deregulating" the regulated areas once exposures fall below the permissible exposure limits. (Com. 45, Com. 53, Com. 57) OSHA does not feel that a formal method for deregulation is necessary. Since the standard does not require maintenance of a regulated area except where exposures are above the permissible exposure limit, the regulated area requirement does not apply where the employer has reduced the exposure levels below the permissible exposure limit. Nor would a deregulation procedure contribute to the protection of employees. Moreover, if formal deregulation were required, it would be necessary for the employer to file an additional notification with the OSHA area office should conditions change thereafter and the exposure again exceed the permissible exposure limits. In view of these considerations, a formal deregulation procedure would appear to be unnecessarily burdensome.

Monitoring: paragraph (e). Significant changes have been made in the monitoring section of the final standard in response to comments by participants. Briefly, the final standard requires all covered employers to make measurements to determine whether any employee may be exposed to airborne concentrations of benzene, and imposes different measuring requirements depending on whether exposure measurements are above or below certain levels.

The monitoring requirements are imposed pursuant to Section 6(b)(7) of the Act (29 U.S.C. § 655) which mandates that any standard promulgated under section 6(b) shall, where appropriate, "provide for monitoring or measuring of employee exposure at such locations and intervals, and in such manner as may be necessary for the protection of employees." The purposes of monitoring are to determine the extent of exposure, to identify the source of exposure to the hazard and to enable the employer to select proper control methods and evaluate the effectiveness of the selected methods. Thus, monitoring enables employers to meet the legal obligation of the standard to assure that their employees are not exposed to benzene in excess of prescribed levels. Additionally, monitoring enables employers to notify the employees of their exposure level, as required by section 8(c)(3) of the Act, and provides information necessary to the examining physician.

The need to conduct exposure monitoring was generally accepted by participants in the rulemaking process (P.C. 35MCA brief, p. 55-b; P.C. 36;

ORC brief, p. 7). Many comments, however, objected to the proposal's requirement to measure airborne exposures in all workplaces "where benzene is present" (P.C. 33; API brief, p. 127a; P.C. 34; ORC brief, pp. 7-8). Participants argued that the use of the term "present" is so broad as to encompass each and every employee at a facility (Ex. 6, No. 53). It was also argued that benzene is present in the ambient atmosphere (Ex. 6, No. 43; Ex. 84B, 18, Ex. 84A, p. 7) with the result that every work operation in every city would probably have to be monitored (Ex. 6, No. 43, p. 12). OSHA's objective is to minimize all occupational exposures to benzene. The term "presence" was used in the proposal to convey the intent that, whenever the exposure of any employee to benzene concentrations resulted from workplace operations at the place of employment, the employer was required to measure that exposure. OSHA does not intend that employees, who might be exposed solely from other sources, such as ambient levels of benzene, be covered by the monitoring requirements. In view of the confusion as to the meaning of the term "presence," the final standard does not use that term but instead specifies the general classes of occupational activities which can result in employee exposure to benzene, and requires monitoring where any of these activities are conducted.

In conducting the monitoring of exposures, the standard does not require that each individual employee's exposure level be measured. Although individual measurement is the ultimate indicator of employee exposure, OSHA believes that a requirement for individual measurements may be too burdensome. Accordingly, the standard requires that the measurements be made by monitoring which is representative of each employee's exposure to benzene over an eight-hour period without regard to the use of respirators. It should be noted that the requirement for representative monitoring does not preclude an employer from taking individual exposure measurements of each of his employees; individual measurements are certainly considered to be representative; and the representative monitoring requirement is the minimum that the employer must meet.

In establishments having more than one work operation involving the use of benzene, the monitoring to be representative must be performed for each type of employee exposure within each operation. One participant requested that area sampling be permitted in order to lessen the burden and cost of monitoring each employee with a different job function (Ex. 6, No. 49, p. 4). Although the final standard does not specifically require personal sampling, monitoring under

the standard must determine breathing zone exposures. Appendix B, IV, therefore, recommends that air sampling be taken in the employee's breathing zone. Area samples are generally not as direct a measure of employee exposure, and consequently, may not meet the requirement for representative monitoring, although where area sampling can be correlated with breathing zone exposures, area sampling may be used. OSHA, however, notes that while there are techniques to correlate area sampling with breathing zone exposures, these are generally more burdensome than personal sampling and involve much more sophisticated data collection and analysis, including the performance of personal sampling to assure the correlation.

Some participants suggested that employers with several places of employment, in which there are workplaces with identical processes or operations, be permitted to monitor only a representative number of such locations (Ex. 6; Ex. 50, p. 3; Ex. 60, p. 7). The fact that work operations are in different geographical locations would not in itself preclude representative monitoring. However, it is the employer's responsibility to assure that identification of conditions, characteristics, activities, climate, etc. exist so that monitoring at particular sites would actually be representative of employee exposure at other sites.

The employer is also required to use a method of monitoring and measurement with an accuracy (at a confidence level of 95%) of not less than plus or minus 25% for concentrations of benzene of 1 ppm or more. Methods of measurement are presently available to detect benzene to this accuracy level (Tr. 342-3) and one such method is described in Appendix A, II, E. Industry participants expressed concern that consistent compliance with these accuracy requirements will be impossible. (PC 36; AISI brief pp. 106-108.) The record, however, indicates that, even where benzene is present with other organic solvents, the OSHA Analytical Method will still enable employers to measure low levels of benzene well within the accuracy requirement of the standard. (Tr. p. 343.) Indeed, it was suggested at the hearing that there is an alternate method for sampling, passive dosimeters, which may comply with the accuracy requirements contained in the proposal. (Tr. 2381.)

As earlier indicated, the standard requires all covered employers to initially measure the airborne exposure of all of their employees. Some participants objected to this requirement and recommended that initial monitoring be limited to those workplaces where there is a probability of exposure to benzene in excess of the permissible

exposure limit (P.C. 36; AISI brief, pp. 73-74; P.C.34; ORC brief, p. 8) or in excess of 10 ppm (MCA brief, p. 50). It is OSHA's view that a "probability" is too speculative where a carcinogen is involved, and that a more definitive basis is needed for determining employee exposure. It is, therefore, OSHA's decision to require initial monitoring at any level of exposure to a carcinogen. Initial measuring of exposure is necessary for the protection of employees particularly where, as here, the permissible exposure level is not a "safe" or "no effect" level but is predicated upon feasibility. Moreover, initial monitoring does not place an undue burden on the employer since he need not continue the monitoring for those employees whose exposures are below the action level.

The standard requires that the initial monitoring be conducted and the results thereof obtained within 30 days of the effective date of the standard. Several comments requested that a longer period, ranging between two months (Ex. 176) to six months (P.C. 36; AISI brief, p. 75; TR 3137), be allowed for employers to meet this requirement. OSHA has retained the thirty day requirement. Since the final standard has a delayed effective date of thirty days after date of publication in the FEDERAL REGISTER, employers will have sixty days to comply with this requirement. OSHA feels that this period is sufficient to enable employers to secure sampling equipment, take samples, and obtain the results. Moreover, the standard permits employers, who have monitored within the last year, to utilize these measurements for purposes of compliance with the initial monitoring requirements, provided that the sampling and analytical method used meets the accuracy test of this standard and provided that the employer maintains a record of these measurements and notifies employees of their exposure levels. Employers who have already monitored their employees' exposures within this period will, therefore, not have to conduct initial monitoring unless, because of a process, control or personnel change, they are required to redetermine exposures. In addition, to the extent that the initial monitoring requirement cannot be complied with because of the unavailability of professional or technical personnel or of materials or equipment, the temporary variance procedures of the section 6(b)(6)(A) of the Act may be appropriately utilized. As noted, however, it is not expected that this will be generally necessary.

The frequency of monitoring employee exposure has been modified in the final standard. The proposal would have required monthly monitoring where exposures were above the permissible exposure limit and quar-

terly monitoring of those employees whose exposure was below that level. The final standard does not require employers to repeat the monitoring where the initial measurements are below the action level, unless there is some change in operations which might alter the exposures. Where the exposure measurements are above the action level but not in excess of the permissible exposure limit, the employer is required to monitor quarterly. Where initial or subsequent monitoring indicates that exposures are above the permissible exposure limit, the employer must monitor monthly. In developing these requirements, OSHA has given serious consideration to the numerous suggested modifications of the proposal's requirements. These ranged from suggestions to lessen the frequency of repeated monitoring to suggestions that monitoring frequencies should depend on whether the process is stable or highly variable (Ex. 6, No. 40), or should be based on performance variables, such as frequency of use, quantity used (Ex. 6, No. 70) and engineering controls (Ex. 6, No. 12, No. 43), or should be at the discretion of a professional (Ex. 6, No. 43). Some participants objected to periodic monitoring where initial monitoring reveals exposures below the permissible exposure limit (P.C. 36; AISI brief, p. 76; Com. 36, 10, 37). OSHA agrees that periodic monitoring is not necessary where exposures are shown to be below the action level. Accordingly, OSHA has eliminated the repeat monitoring requirement for operations below the action level. Where initial measurements are above the action level but do not exceed the permissible exposure limit, periodic monitoring is necessary to assure that exposures remain within that range and do not rise to above the permissible exposure limit. OSHA believes that quarterly monitoring is sufficient to detect substantial changes in exposures and to assure that employee exposures remain below the permissible exposure limit. Some participants objected to monthly monitoring where initial measurements are above the permissible exposure limits (P.C. 36 AISI brief, p. 76, Ex. 6, No. 50). Their rationale is that repeat monitoring serves no purpose since the hazard has already been identified (Ex. 170). They argued that the requirement to establish regulated areas where exposures are above the permissible exposure limit is a sufficient incentive for employers to remonitor a workplace as soon as they believe that the exposure has been reduced (P.C. 36 AISI brief, p. 76-7). As previously pointed out, monitoring serves other purposes than initial determination of employee exposure. Monitoring is a check on the efficiency of engineering controls: increased levels alert the employer to

the need to check and possibly alter these controls. Increases in benzene levels may also necessitate changes in types of respirators. Exposure measurements remind employees and employers of the continued need to protect against hazards, and are also useful to the examining physician in determining whether the exposed employee is at an increased risk. OSHA, therefore, is of the view that repeated monitoring, where initial measurements are above the permissible exposure limit, is necessary to protect employees. Other participants expressed the view that this monitoring should be less frequent than monthly—that is, should be quarterly (P.C. 31 ORC brief, p. 9; L.C. 3); semi-annually (P.C. 36 AISI brief, p. 78; Ex. 6, No. 57), annually (Ex. 6, No. 59, No. 76), or as frequently as significant changes are believed to have occurred (L.C. 19). In view of the leukemogenic hazard of exposure to benzene, it is OSHA's view that monthly monitoring, where exposures are above the permissible exposure limit, is necessary to protect the health of exposed employees.

The final standard also provides that employers may discontinue monitoring for those employees for whom two consecutive measurements taken seven days apart show exposures to be below the action level. Where employee exposure measurements fall below the permissible exposure limit but are at or above the action level, the employer may alter the monitoring schedule for those employees from monthly to quarterly after two consecutive measurements taken seven days apart indicate the reduction in levels.

The standard further requires that, whenever there has been a production, process, control, or personnel change which may result in new or additional employee exposure, or whenever the employer suspects that a change of employee exposure may occur, the employer must repeat the required monitoring. Redetermination of exposures in such instances is necessary so that the employer may take the necessary action to protect his employees, such as providing appropriate respiratory equipment, or instituting engineering controls. Redetermination is required only where there is a new exposure or an increase in exposure levels is suspected (Ex. 6, No. 76, No. 50). The required redetermination where there is a change of personnel was added to the final standard in view of evidence that exposure levels can change when different employees perform the work (Tr. 3093). This requirement does not mean, however, that the employer must remonitor every time there is a personnel change but he must redetermine exposures when the work practices of the substitute employee are such that an increase in exposure may

result. Redetermination of exposure must also take place after the cleanup of spills and the repair of leaks, ruptures or other breakdowns. One comment suggested that redetermination not be required in these instances (L.C. 19). OSHA has not adopted this suggestion. Spills, leaks, etc., can result in very high exposure levels (Tr. 1299; P.C. 30, p. 48), and the requirement to redetermine exposures after cleanup or repair provides one method of ascertaining that proper corrective methods have been instituted and employee exposures are not significantly altered.

The final standard further requires that employers notify each of their employees of the exposure measurement which represents that employee's exposure. This requirement is discussed in detail under Recordkeeping.

It should also be noted that paragraph (m) of the standard requires the employer to allow employees or their designated representatives an opportunity to observe the monitoring. The specific provisions of paragraph (m) are discussed below.

Methods of compliance: paragraph (f). The final standard, as the proposed standard, requires employers to institute engineering and work practice controls to reduce employee exposure to benzene to or below the permissible exposure limits, except to the extent that such controls are not feasible. This requirement is in accord with OSHA's policy that feasible engineering and work practice controls must be used as the primary methods of reducing employee exposures. This policy is based on the view that the most effective means of controlling employee exposures is to contain concentrations at their source through use of mechanical means combined with work practices rather than reliance on the variability of human behavior so critical to the successful use of respirators. Thus, the standard also provides that, in situations where feasible engineering controls and work practices are insufficient to reduce exposure to the permissible limits, the controls must nonetheless be used to reduce exposures to the lowest achievable level, and then be supplemented by the use of respiratory protection.

In reaching the decision to require engineering and work practice controls as the primary methods of reducing benzene exposures, OSHA has carefully considered the objections of various participants. While recognizing that in many situations engineering and work practice controls are the preferred methods of reducing exposures to or below the permissible levels, several participants recommended that the hierarchy of control measures be eliminated and employers be allowed the freedom of selecting the control measure to be instituted. (Tr. 3140).

These participants particularly objected to the requirement that engineering controls and work practices be used to reduce exposure to the lowest achievable level even if that level is above the permissible exposure limit. Various arguments were made in support of this position. One participant pointed out that, where the controls will not reduce exposures sufficiently, respirators will have to be used anyway. This employer suggested that OSHA mandate the continued search for controls which are sufficient to reduce employee exposure, but allow employers to select any appropriate method of reducing exposures (Com. 43). As was pointed out in the benzene hearing (Ex. 59, p. 12), as well as in other OSHA rulemaking proceedings, respirators are the least satisfactory means of control because of difficulties inherent in their design and use. Respirators are capable of providing good protection only if they are properly selected for the types and concentrations of airborne concentrations present, properly fitted and refitted to the employee, worn by the employee, and replaced when they have ceased to provide protection. While it is theoretically possible for all of these conditions to be met, it is more often the case that they are not. Consequently, the protection of employees by respirators is not always effective and is, therefore, permitted only in certain specified circumstances. For example, proper facial fit, is essential but, due to variations in fit, individual facial dimensions and the limited range of the facepiece configurations, such fit is difficult to achieve. (Tr. 332-335) Often the work involved is strenuous and the increased breathing resistance of the respirator reduces their acceptability to employees. Safety problems presented by respirators must also be considered. Respirators limit vision. Speech is also limited. Voice transmission through a respirator can be difficult, annoying and fatiguing. Movement of the jaw in speaking also causes leakage. Communication may make the difference between a safe efficient operation, on the one hand, and confusion and panic, especially in difficult and dangerous jobs, on the other hand. Moreover, skin irritation can result from wearing a respirator in hot, humid conditions and such irritation can cause considerable distress and disrupt work schedules. It is clear, therefore, that respirators cannot be considered as the primary means of employee health protection. Nevertheless, respirators do provide some protection and OSHA has concluded that under certain limited circumstances, where no alternatives are available, respirators may be used to reduce employee exposures.

Industry participants further argued against a system of priorities because

of alleged unfeasibility of engineering controls. Most of these participants' objections to methods of compliance, however, lie in the area of economic rather than technological feasibility (Com. 49, p. 5; Com. 54, p. 2; Com. 73, p. 3). As discussed below, OSHA has determined that this standard is feasible and that the implementation of engineering and work practice controls is for the most part technologically feasible. However, OSHA realizes that, under some particular circumstances, engineering and work practice controls may not be technologically feasible in a particular work operation. Therefore, the standard explicitly recognizes that an employer may demonstrate the infeasibility of engineering and work practice controls as to one or more operations in a particular process, and in these circumstances use respirators to provide the required protection. The question of whether an employer has met its burden of establishing that engineering and work practice controls are infeasible in a particular work operation involves the consideration of many complex factors and a rational balance process. Factors such as levels of exposure, useful remaining life of the equipment and the effort made by the employer to implement such controls are relevant.

In addition to the obligation to institute engineering and work practice controls, except to the extent that such controls are not feasible, the final standard also requires that each employer establish and implement a plan, including schedules for reducing exposures to within the permissible exposure limit or to the greatest extent feasible, solely by engineering and work practice controls. These written plans must be furnished upon request for examination and copying to representatives of the Assistant Secretary and the Director. These plans must be reviewed and updated periodically to reflect the current status of exposure control. Some participants felt that the requirement for written plans was burdensome and unnecessary (Com. 45, 59). OSHA, however, views the requirement for written plans as an essential part of the compliance program since it will encourage employees to actually achieve the controls and also provide the necessary documentation to OSHA, employers and employees of the compliance methods chosen, the extent to which controls have been instituted and plans to institute further controls to achieve safe and healthful workplaces.

A compliance issue relating to the requirement for engineering controls and work practices in this final benzene standard involves the relationship of that requirement to the covered employers' legal obligation as to engineering controls under the prior

benzene standard (29 CFR 1910.1000, Table Z-2). The new standard, at paragraph (f)(1), requires the implementation of engineering controls and work practices. OSHA views the two standards as a continuum of enforceable obligations which have been crystallized in the standards promulgation. More specifically, in evaluating whether the employer has instituted controls, OSHA compliance personnel would consider not only the employer's performance under the new standard but also his prior obligation under its predecessor.

Respirator protection: paragraph (g). The final standard contains requirements for respiratory protection. The standard requires employers to provide and assure the use of respirators whenever the permissible exposure level is exceeded. Paragraph (g) makes clear, however, that respirators are only to be used when other means of control are not feasible, and that the use of respirators is not a substitute for engineering and work practice controls. The standard allows respirators to be used to achieve compliance with the permissible exposure levels only in certain specific situations. The reason for the limitations is that respirators are, as stated above, the least satisfactory means of exposure control.

The standard contains a respirator selection table to enable the employer to provide the type of respirator which affords the proper degree of protection. While the employer must select the appropriate respirator from the table for each work operation on the basis of the airborne concentrations of benzene, he may always select a respirator providing greater protection—that is, one prescribed for higher concentrations of benzene than present in his workplace. It should also be noted that OSHA does not anticipate, as previously suggested in the proposal, that a conflict between the respirator selection table of the benzene standard and that of the coke oven standard will arise. Industry data (Ex. 136, attach No. 2) indicates that benzene exposures at coke oven batteries are generally below 1 ppm and respiratory protection for benzene exposure will generally not be required.

The standard further requires that the employer select respirators from among those approved by NIOSH under 30 CFR Part 11. Participants pointed out (Com. 41; Tr. 752; Tr. 139) that, although the standard's respiratory selection table permits the use of chemical cartridge respirators for concentrations of 50 ppm or less, NIOSH does not approve chemical cartridge respirators for benzene. OSHA is well aware of the fact that NIOSH does not approve organic vapor cartridge or canister respirators for substances, such as benzene, with poor warning

qualities and that such respirators do not generally have end-of-service life indicators (Tr. 140). The standard's requirement for NIOSH approval, however, is designed to assure that only devices approved and certified by NIOSH for use against organic vapors be used, notwithstanding the fact that such certification carries a stated or implied prohibition against the use of these devices for substances with poor warning properties. The alternative would be to chance employee protection by allowing use of non-approved devices, or to require supplied air respirators or self-contained breathing devices which in many cases would give rise to extreme operational difficulties (Tr. 142). Since organic vapor cartridge and canister respirators currently approved by NIOSH have been shown to be effective in absorbing benzene vapors, neither of these alternatives is necessary.

To compensate for the lack of adequate warning properties of these respirators, the standard requires frequent replacement of the cartridge or canisters (Tr. 140). The standard requires that the cartridges or canisters be changed at the end of their service life or the end of the shift in which they are first used, whichever comes first. Some participants objected to the requirement to replace air purifying canisters and cartridges at the end of the shift. They felt that it would lead to waste (Com. 40), would do little to encourage research and development of an end of service life indicator (Com. 41), and would be too frequent where benzene concentrations are low and cartridge life is long (Com. 65). Recommendations for longer periods varied (Com. 53; L.C. 3; L.C. 19; Com. 60). OSHA has considered these recommendations but has concluded that, in order to assure that employees receive the maximum protection from benzene vapors, cartridges or canisters must be changed at least at the end of each shift. Should NIOSH, at some later date, certify a benzene end of service life indicator, which demonstrates that the canister or cartridge is useful past the end of the shift, OSHA would allow the cartridge or canister to be used for the extended period. Accordingly, the final standard has been changed to make this clear and hence encourage research and development of an end of service life indicator for benzene.

The standard further requires that the employer institute a respiratory protection program in accordance with 29 CFR 1910.134. This section contains basic requirements for proper selection, use, cleaning and maintenance of respirators. The employer is also required to assure that the respirator is properly fitted and to allow employees to wash their faces and respirator face pieces. In addition, paragraph (j)(1) of

the standard requires that employees be properly trained in the use of respirators.

The standard requires that the employer shall provide respirators and other clothing and equipment required for protection from exposure to benzene at no cost to the employee. OSHA has allocated the costs of respirators and clothing and equipment required for protection from benzene exposure to the employer in order to effectuate the purposes of the Act. The employers' costs in providing respirators and protective equipment and clothing were considered in the economic assessment. This language clarifies OSHA's position which has long been implicit in health standard proceedings under section 6(b) of the Act.

Protective Clothing and Equipment: paragraph (h). The final standard retains the requirement that, where the employee is exposed to eye contact or repeated skin contact with benzene, the employer must provide and assure that employees wear the appropriate protective clothing and equipment. This requirement compels employers to furnish, where necessary, such items as goggles, face shields or gloves, or footwear.

The available scientific evidence on the intact and unbroken skin has been discussed above under Dermal and Eye Exposure Limits. Although the evidence on skin absorption of benzene is inconclusive, it is an "undisputed assumption" that the penetration of any benzene molecule will be greater through damaged skin (Tr. 2469-70). The record evidence also indicates that there are situations where employees are immersed or drenched with benzene liquids (Tr. 289, 292, 299). Liquid benzene on the skin may cause erythema and blistering, and dry scaly dermatitis may develop on prolonged or repeated exposure (Ex. 2-3). Burns may occur from benzene spills (Tr. 292). One purpose of the protective clothing and equipment requirement is to protect employees from dermatitis and burns. Additionally, since benzene is a carcinogen and since breaks in skin surfaces commonly occur, OSHA has concluded that it is necessary to require personal protective clothing and equipment although the full effect of liquid benzene on the eye and the skin is as yet unknown. To do otherwise would be to leave employees unprotected and expose them to what might ultimately be shown as a most serious hazard.

Few comments were received on the protective clothing and equipment requirements. Some participants indicated that they already provide such protection to their employees (L.C. 4). One participant suggested that the extent of body exposure, which would trigger the need for the protective clothing, be delineated in the stan-

dard. (Com. 55.) OSHA, however, believes that the likelihood of eye or repeated skin contact and the resultant need for protective clothing must be assessed on the basis of individual workplace operations. One comment objected to the need for protective clothing or equipment where 1 percent or less benzene is present in the liquid benzene. There is, however, nothing to indicate that such percentages would create a sufficiently reduced hazard to warrant total elimination of the requirement.

The final standard requires the use of "impermeable" protective clothing and equipment. This requirement was in the emergency temporary standard. The proposal, however, would have simply required "appropriate protective clothing and equipment." Where eye and skin protection are required, the protective clothing and equipment to be "appropriate" must not allow liquid benzene to reach the eyes or skin. To make this clear, OSHA has adopted the language of the emergency temporary standard. The impermeable clothing must prevent all penetration of benzene. Thus, where impermeable gloves are used, liquid benzene should not seep through the cuff or any other opening in the glove. This could very well increase the hazard to the employee. It appears, on the basis of testimony from the industry expert witness, that, when a chemical substance on the skin is covered with a totally inclusive material, the rate of permeability of the substance through the skin is greatly increased (TR 2464; 2473).

HYGIENE FACILITIES

Although normally required in carcinogen standards (See Coke Oven and Cancer Policy), the final benzene standard does not contain any requirement for hygiene facilities, such as waste disposal, housekeeping, showers, change rooms, or laundering of clothing.

The question of what, if any, hygiene facilities should be included in the final standard was at issue in the benzene rulemaking proceeding. The most common view of participants in that proceeding was that hygiene facilities were not necessary because of the volatility of benzene (L.C. 19). Almost all participants felt that no hazard would be created by the absence of hygiene facilities. One witness, however, testified that, in his opinion, the wife of a benzene exposed employee, who laundered her husband's work clothes daily died from benzene induced leukemia (Tr. 314). Unfortunately, no further information concerning this case was furnished. OSHA, consequently, finds that the record does not establish the need for a requirement for hygiene facilities.

Medical surveillance; paragraph (1). This standard requires that employers

make available a medical surveillance program for those workers who are exposed to benzene at or above the action level of 0.5 ppm TWA. In addition, the regulation contains an emergency provision for the biological monitoring of employees exposed to a massive release of benzene.

Evidence contained in the record clearly indicates that a medical surveillance program is an appropriate measure. Hematologists, company physicians and other participants have recommended the inclusion of a medical surveillance provision in the final standard (Ex. 106; P.C. 30; Ex. 211; Ex. 17, Ex. 179, Bommarito, Tr. 3382). Also, a review of the record discloses that it is a current common practice of many industries to routinely examine their employees for evidence of benzene toxicity. (e.g. Wodka, Tr. 1263; Com. 26; Joyner, Tr. 2286; Dow, Tr. 2967, 3021; Ex. 77H.)

Section 6(b)(7) of the Act requires that employers make available medical examinations to ascertain whether the health of workers is adversely affected by exposure to toxic substances, where appropriate. The requirements contained in this regulation are designed to detect changes in the hematopoietic system resulting from chronic exposures to benzene which may be manifested in a range of blood disorders, including leukemia.

It is widely recognized that the major target organ in chronic benzene toxicity is the hematopoietic system, especially the bone marrow. This system has the attribute that a sample of the peripheral blood offers a unique biological "window" on the functioning and health of this system, providing much direct visual information not readily available for other organs or systems.

It is OSHA's view that a medical surveillance program directed toward the early detection of hematopoietic dysfunction by examination of peripheral blood samples is an appropriate measure. This determination receives support from: (1) Studies showing that early blood dyscrasias have been detected in workforces screened by laboratory tests (and often in workers displaying no obvious physical symptomatology) (Greenburg, Ex. 2-8, p. 419; Savilahti, Ex. 2-95, p. 1; Goldstein, Ex. 43B, p. 138); and (2) that even in cases of acute myelogenous leukemia, a period of remission, unfortunately brief, may be effected in a substantial proportion of those afflicted with this fatal disease by appropriate treatment. (ORC/Jandl, P.C. 34, p. 73-74). OSHA's decision is also supported by evidence that some cases of benzene-induced blood disorders may be reversed upon cessation of exposure and by appropriate treatment. (ORC/Jandl, P.C. 34, p. 39).

The medical surveillance provision of the proposed standard was the

object of much comment and testimony. For example, over 45 separate comments addressed this issue in pre-hearing submissions alone. Additionally, substantial testimony was adduced during the hearing, and additional views were submitted to OSHA in the form of post-hearing comments. These suggestions addressed both the content and frequency of the examinations as well as what information should be elicited from the medical/work history portion.

OSHA, in formulating the provisions of the medical surveillance section, was aware of several problems. While there is no disagreement that the blood tissues are the most important organ relative to chronic benzene toxicity, there are as yet no consistent patterns of abnormalities, especially at low exposure levels, and no specific pathognomonic tests of benzene toxicity (Rosen, PC 23A, p. 2). Compounding this problem is the fact that it is difficult to separate cases of early benzene hematotoxicity from more common minor blood disorders (Goldstein, Tr. 354). Associated with the problems of exam content is one of testing frequency. There are simply no precise estimates of the time course of the various abnormalities to allow determination of optimal testing frequency. Opinions based upon the lifespan of the blood cells are equally inapplicable in determining the frequency of such exams (Battle, P.C. 26C). While realizing that the more frequent the exams, the greater the probability of detecting blood disorders induced by benzene, OSHA is also aware of the practical considerations of a medical surveillance program. Unlike the coke oven standard which applies to a defined number of workers employed in well characterized work sites, benzene is a component (usually as a contaminant) of a wide variety of refined petroleum solvents and, therefore, some benzene exposure occurs in a myriad of work sites and work operations.

OSHA also recognizes that to be effective a medical surveillance program must be acceptable to a majority of workers subjected to the examination, the tests must display a high degree of accuracy and reproducibility, and the program should be able to be performed in a routine manner without unduly taxing medical resources. Given the above facts, the prescribed medical surveillance program is designed to accommodate the purpose of detecting early blood disorders resulting from benzene exposure without being overly burdensome and unduly intrusive.

The medical surveillance program consists of three main elements: (1) An initial and periodic examination for all those employees exposed to airborne benzene concentrations at or above the action level, (2) evaluation of ab-

normal findings by a hematologist and, (3) a biological screen for workers who may have received excessive exposure as a result of an emergency.

Several commentators and hearing participants recommended to OSHA that the medical screening program should be, in some way, related to employee exposure, and several specifically suggested that an action level be utilized as the determining boundary. (Com. 10; Com. 21; Com. 26; Com. 36; Com. 46; Com. 47; Com. 53; Com. 70; Com. 72; Com. 76; L.C. 3; PC 36; AISI brief). Many others felt that routine medical surveillance applied to all workers exposed to benzene without regard to degree of exposure, as was specified in the proposed standard, was an excessive requirement (e.g. Ex. 6-36). OSHA has examined these analyses and, as a result, has significantly altered the content of the surveillance program in the final standard. Furthermore, it is OSHA's view that the requirements of the medical surveillance program cannot be left to discretion of the examining physician because some physicians may not be fully aware of the wide range of effects resulting from benzene exposure.

The final standard requires that employers must make available an initial and periodic examination to any worker exposed at or above the action level. While it is the Agency's position that there is no "safe" level for benzene exposure, OSHA believes that the vast majority of workers exposed below the action level will not manifest blood dyscrasias, while those at or above this value are at greater risk, the precise extent of which is unknown. The inclusion of an action level concept will therefore limit medical surveillance requirements for those employees as to whom the probability of identifying benzene-induced blood disorders is in all likelihood minimal, and will focus such efforts on a population at increased risk.

INITIAL EXAMINATION

The initial examination has two components: a medical/work history and a series of laboratory blood tests. This differs from the proposed standard which drew no distinctions between initial histories and examinations and subsequent ones. The final standard does, however, make such a distinction. The purpose of the history is to alert the physician to problems which may indicate an individual's increased sensitivity to benzene. The permanent standard requires the taking of a history with the data elements specified in the proposal.

Elil Lilly (Com. 28) and Dupont (Com. 46) generally agreed with the proposed history requirements, while Dow Chemical agreed with the intent, i.e., that a complete medical history with an emphasis on blood problems is

an essential part of a benzene medical surveillance program. They felt, however, that the wording should be simplified so that the worker could supply the information him/herself with minimal professional assistance. (Ex. 154.) OSHA, recognizing the merits of this suggestion, has not chosen to mandate the precise wording of the history taken, but only to require that specific areas should be queried. The employer, therefore, has considerable latitude with respect to the actual format. Whether the employee answers the medical history or is questioned by a health professional is also left to the discretion of the employer. The standard does require, however, that all aspects of the medical surveillance program be under the supervision of a licensed physician.

One hematologist objected to the inclusion of questions pertaining to a family history of hemologic neoplasms, noting that there is little evidence associating these disorders with a predisposing increased sensitivity to benzene (ORC/Jandl P.C. 34, Add. 5, p. vii). Another hematologist also criticized this provision on the basis that the information obtained was both unreliable and of unknown relevance to benzene toxicity (P.C. 26C). Jandl also stated that genetically related hemoglobin alterations (hemoglobinopathies) are not highly relevant and are therefore of no predictive value (ORC/Jandl, P.C. 34). OSHA agrees that there is no known or even suspected association of benzene-induced blood dyscrasias with some hemoglobinopathies such as sickle cell anemia. However, Aksoy has reported findings that individuals with thalassemia (another hemoglobin disorder) may be more sensitive to the hematotoxic effects of benzene (Ex. 44). (It is not clear from Aksoy's testimony whether or not thalassemias are at greater risk of developing leukemias resulting from benzene exposure.) Moreover, he also observed a familial link with leukemia resulting from benzene exposure. (Ex. 24). In view of Aksoy's findings, OSHA believes that it is appropriate that the questions in the medical history relating hemoglobinopathies and a family history of malignant blood diseases remain in the standard.

Battle recommended that the health history also include questions concerning possible exposure to marrow toxins, such as the use of insecticides and volatile cleaning agents in the home (P.C. 26C). Since exposure to these types of agents may have significant impact on the blood picture of examined workers, queries regarding exposure to other marrow toxins both in and outside of the work environment have been added to the history requirements.

The initial laboratory examination requires that a series of classical blood

tests and also measurements of serum bilirubin and reticulocyte count be performed. As noted, there is no consistent pattern of blood abnormalities resulting from benzene exposure. Various investigations claim that the earliest sign of benzene hematotoxicity is anemia or leukopenia, or changes in red cell indices. Some believe that red cell enlargement (macrocytosis) (Goldstein, Ex. 75; Goldwater, Ex. 140) or an absolute lymphopenia (Goldstein) may be suggestive of early marrow damage. (Occasional observations of a paradoxical hypercellularity in response to benzene exposure have been reported, e.g., by Aksoy; however, the basic hematological workup should detect this particular response).

An examination of the record demonstrates that there is general agreement that the following laboratory hematological tests should be part of an initial or baseline examination:

- (a) Red Cell count
- (b) White Cell count
- (c) Hematocrit
- (d) Hemoglobin
- (e) MCV—(mean corpuscular volume)
- (f) MCH—(mean corpuscular hemoglobin)
- (g) MCHC—(mean cell hemoglobin concentration)

These tests are routinely performed in most blood examinations; they provide basic information about all three blood cell lines. The normal values are well known, and the tests are usually automated with the attendant benefits of being highly reproducible and accurate.

Differential counts of white blood cells, also required by the standard, are not amenable to automation and are therefore performed manually under microscopic examination by trained technicians. Battle commented that white blood cell counts are no longer performed on a routine basis in his clinic and that such an assay is usually only performed in response to abnormal cell counts (P.C. 26C). However, other commentators have recommended the inclusion of a differential count as part of a basic hematologic examination (both the initial and interval tests) (ORC/Jandl, P.C. 34, pp. 46-51, Goldstein Ex. 75). In addition to providing information on the relative number of various white cell types, the differential count provides an opportunity to observe aberrant cellular morphology and to note any unusual proportions of immature cells. Jandl feels that scanning of the slide by a trained technician for these types of findings is of the utmost importance (ORC/Jandl, P.C. 34, p. 45). For the above reasons, a differential count is a required part of the laboratory examination. In addition to the basic laboratory tests, serum bilirubin and reticulocyte counts must also be done in the initial laboratory exam. These tests may provide information indicative of

hemolytic states and other abnormalities. Because of the non-specificity of these two assays relative to benzene toxicity, the time-consuming nature and instability of the reticulocyte preparations, these particular tests were the object of much comment and criticism. Several commentators stated that although these tests were of little value on a routine basis, they should be made part of a preplacement or baseline exam (Com. 28, 72). Based on a review of this issue, OSHA believes that these two particular blood examinations should be included as a part of the initial laboratory tests only, to provide a more comprehensive picture of a worker's hematological profile, for possible later comparative purposes.

Several hematologists stressed the importance of obtaining pre-exposure data as a baseline against which latter comparisons could be made (ORC/Jandl, P.C. 34, p. 36; Battle, P.C. 26C; Goldstein Ex. 75, p. 5). The initial exam requirement of the standard applies to both employees already exposed to benzene at or above the action level as well as to new or reassigned employees who may be exposed at or above the action level. In the first case, the blood data obtained is not, of course, a true non-exposed baseline, but may be useful at a later date should significant changes in blood values occur. In addition, since the standard requires that an initial laboratory exam be performed for all new or reassigned employees prior to their actual exposure to benzene at or above the action level, pre-exposure baseline data will gradually become increasingly available in the years subsequent to promulgation of this standard.

As an aid to physicians for comparing the results of the most recent blood testing with early data, the recordkeeping paragraph requires that, at the completion of the differential count, the slide of a peripheral blood smear be made permanent and stored for possible future reference. Retention of the slide allows the examining physician to directly compare the most recent findings with earlier ones, especially with respect to possible changes in morphology of the blood cells; counting data alone would not permit this type of comparison.

Doc Chemical suggested that kidney and liver function tests should be performed as a part of the preplacement examination (Tr. 2967). OSHA recognizes that these laboratory examinations may identify conditions indicative of an impaired ability to detoxify benzene. However, given the low permissible exposure limit mandated by this standard, OSHA concluded that requirement of these tests would be excessively burdensome. In this regard, Goldstein testified that he saw no value to incorporate these tests (Tr. 380).

PERIODIC EXAMINATION

The medical surveillance section requires that a brief updated history be taken semiannually at the time of one of the blood examinations. Battle suggested that such a history include queries as to exposure to drugs or chemicals as well as recent illnesses since the last history (P.C. 26C). Because these agents may act to adversely affect the hematopoietic system and may be reflected in the blood picture, OSHA agrees with these particular suggestions and has incorporated all of them into the requirements for the interval history.

The periodic laboratory tests are similar to those specified for the initial exam, except that serum bilirubin and reticulocyte assays are deleted since, as stated above, the two assays are required only in establishing a baseline. Comments received by OSHA concerning the frequency of interval blood examination ranged from quarterly (ORC, P.C. 34, p. 11; Tr. 3382, Tr. 270) to 3 times a year (Com. 28; Tr. 3328; Battle, P.C. 26C), semiannually (Tr. 3138) to those who felt the frequency should in some manner vary according to the exposure level (e.g., Tr. 2965, 6-10, 6-37, 6-47, 6-64, 6-76, 41-3, 41-19). Dow expressed the view that the frequency should be the decision of the responsible physician and related to the medical condition of the employee and the environmental control of the specific work area (Tr. 2965). As detailed previously, there is insufficient information in the record to allow a precise determination of optimum testing frequency. No completely reliable information exists on the number of months which elapse between the first laboratory signs of a blood disorder and the onset of clinical disease or what effect a particular time delay has on therapeutic outcome. There is no reason for casualness about the testing frequency though, since even if a blood change were to progress steadily downhill, early detection and treatment may provide substantial benefit. It is OSHA's judgement, following examination of the various options available, that a six month interval between routine blood examinations is appropriate.

The standard contains a provision, applicable to both the initial, periodic and emergency exams, requiring that employees' abnormal test results must be referred to a hematologist for further evaluation should certain specified warning signs appear. This provision, which was not a part of the proposal, is in response to recommendations that: (1) A hematologist be included in some manner in the medical surveillance program (ORC/Jandl, P.C. 34); (2) specific quantitative guidelines including ranges (Ex. 6-60) be given physicians and; (3) that addi-

tional laboratory tests should be given if an abnormal count becomes manifest or significant changes occur relative to baseline values (NPRA, Tr. 3325-3331; AISI, Tr. 3263-64; ARCO, P.C. 32C). With respect to item (1), an industry participant testified that it was already the practice at his company to refer workers to hematology specialists if blood abnormalities are discovered (Joyner, Tr. 2286-87), and Dow remarked that they discussed abnormal blood findings of workers with the hematologists (Tr. 3021). Also Arco commented that, if abnormal conditions arise among its employees exposed to benzene, follow-up examinations are given and medical treatment performed until blood tests reveal values within the normal range (P.C. 32C). Also, Dow disclosed that, for its employee exposed to benzene, an increased medical surveillance program would result if conditions such as an undiagnosed anemia or leukocytosis were detected (Tr. 2984-85). Sakol has noted that ineffective and inappropriate medical treatment was given to workers apparently suffering hematological disorders from benzene exposure which ultimately evolved into a frank leukemia (Tr. 303). This incident further illustrates the need for a specialist's evaluation, if abnormalities are detected.

Again it should be emphasized that the question of what constitutes the earliest laboratory evidence of chronic benzene toxicity is not known with certainty (ORC/Battle, P.C. 26C, p. 3). It is known that the level of all 3 blood cell lines may be variously affected by exposure. However, examination of the benzene literature reveals that the hematological boundaries of what is considered "normal" have varied. More recent tabulation of normal ranges are those published by NIOSH (Ex. 2-2, p. 135): Wintrobe (Ex. 2-107, p. 1791, 1794, 1795) and those submitted by Jandl (ORC/Jandl, PC 34, p. 29). The normal range of hematological values presented generally agree quite well, especially those given by Jandl and Wintrobe. It is OSHA's conclusion that laboratory findings beyond these ranges must require additional evaluation by a blood specialist. In specifying the values beyond which findings are considered abnormal, OSHA utilized the values in the above citations to yield the widest range (often the range limits do not exactly coincide) in order to minimize the burden on the employer in borderline cases.

However, as illustrated by Goldstein, it may be possible for some individuals to experience a significant hematological response to benzene exposure and yet exhibit blood values within the range normal for the population as a whole (Goldstein, Tr. 356). To identify such workers for referral to a hema-

tologist, the standard also includes as a trigger, an allowable deviation figure for certain indices, relative to an earlier determined value. The advantage of this approach is that the individual acts as his own control. As early as 1926, Greenberg in recommending criteria for exclusion of workers from further benzene exposure, utilized as one of his criteria changes in the blood picture based on results from previous examination of individual employees. He recommended a determined value of a 25% decline in red and white cell levels. The red cell count, hemoglobin and platelet count are generally very stable indices and usually do not vary in individual cases by more than $\pm 10\%$ from baseline values. OSHA believes that a deviation of $\pm 15\%$ or more in these indices compared to the laboratory findings obtained in the most recent test is of sufficient concern to require the attention of a specialist. As white cell counts commonly exhibit greater variation, a percentage deviation trigger would be too restrictive and is therefore not included in the standard. In lieu of a percentage deviation, limits of normal ranges are prescribed.

EMERGENCY SITUATIONS

The emergency medical surveillance provisions reflect OSHA's concern for those employees normally subject to low average exposures but who, because of equipment breakdown or other causes, may be exposed to massive doses of benzene. These workers may be at a relatively high risk for developing adverse hematological effects.

If a worker is exposed to a massive release of benzene, the employer must provide for each individual so exposed a urinary phenol assay at the end of the work shift in which the emergency occurred. If the results of such a test corrected to a specific gravity of 1.024 are less than 75 mg/l, no further testing is required. However, if a urinary phenol result is greater than 75 mg/l, indicating an average exposure above 10 ppm (Watts, Ex. 2-109), then a complete blood count including a differential count must be performed as soon as practicable.

If the red blood cell or platelet count or hemoglobin differ more than $\pm 15\%$ from the most recent prior exam's findings, the worker's test results shall be referred to a hematologist for additional evaluation. Also, if the levels of the three formed elements lie outside of the prescribed ranges further evaluation by a hematologist shall be required.

The use of a urinary phenol assay to determine whether additional tests are indicated for workers exposed to high concentrations of benzene is supported by evidence in the record. The Sun Oil Company reported that special uri-

nary phenol screening tests are prescribed for all persons when 10 ppm exposure levels are suspected (Ex. 77F).

For all types of medical examinations, the employer is required to provide the physician with certain information. This information includes a copy of the regulation, a description of the affected employee's duties as they relate to the employee's exposure, the results of the employee's exposure measurement, if any, or the employee's anticipated or estimated exposure level, a description of any personal protective equipment used or to be used, and information from previous medical examinations of the affected employee to the extent that it is not readily available to the physician. The purpose in making this information available to the physician is to aid in the evaluation of the employee's fitness to work in areas in which the exposure is at or greater than the action level. It should be noted that the standard does not require that a copy of the regulation be given to the physician for each employee. One copy would be sufficient, provided the employer informs the physician which employees are covered by this standard. Information that relates to individual employees or categories of employees (such as the description of job duties) need be transmitted to the physician only once, unless, for example, the duties change. Exposure measurements will be cumulative so that the results of each monitoring since the last examination are to be sent to the physician. However, since sampling may be done on a representative basis, the language of the standard requires the physician to be given either the employee's actual exposure measurements, if available, or the estimated level.

Several criticisms and suggested changes, discussed below, were also received by OSHA in regard to paragraph (i)(6) of the proposed medical surveillance requirements. In the final standard, the employer is required to obtain a written opinion from the examining physician containing: the physician's opinion as to whether the employee has any detected medical conditions which would place the employee at an increased risk of material impairment of health from exposure to benzene, the results of the medical tests performed, and any recommended limitations upon the employee's exposure to benzene and upon the use of protective clothing and equipment such as respirators. This written opinion must not reveal specific findings or diagnoses unrelated to occupational exposure, and a copy of the opinion must be provided to the affected employee.

Dow Chemical expressed the opinion that the notification requirements

were overly burdensome and that the physician should be required to notify the employer and the employee only for the following reasons: Evidence of benzene toxicity, recommended limitations on worker exposure to benzene for any reason, or a health condition that precludes the use of protective clothing and equipment. (Tr. 2966). The Rubber Manufacturer's Association offered the comment that the physician's written opinion should be supplied to the employee only if requested (Ex. 6-59, p. 5). One commentator cautioned that because of malpractice considerations, a physician might be reluctant to sign such an opinion (National Paint and Coatings Association, Inc. (NPCA), Ex. 41-14, p. 15). Also because of malpractice considerations, the American Iron and Steel Institute recommend that this section be deleted (P.C. 36, p. 109). ORC suggested language changes for this physician's opinion requirement (ORC, P.C. 34, p. 11, Ex. 6-76, p. 11). The NPCA also warned that unless the physician's opinion paragraph was altered, denial of clearance for many prospective employees may result (Ex. 41-14, p. 15). There was also comment concerning with whom the doctor's opinion should be shared. ORC felt that any medical findings or diagnoses should be kept strictly confidential between the worker and the examining physician (P.C. 34, p. 11; Com. 76). Finally, a suggestion was received from industry that paragraph (i)(6)(ii) which limits the physician's opinion to specific findings and diagnoses related only to occupational exposure should be deleted on the basis that the employer has a right to know if there are any reasons related to work or not, that might have an adverse effect upon an employee or may possibly jeopardize fellow workers. (American Coke and Coal Chemicals Institute, Ex. 176, p. 9).

The purpose in requiring that specific findings or diagnoses unrelated to occupational exposure not be included in the written opinion is to encourage employees to submit to medical examination by removing the fear that employers may find out information about their physical condition that has no relation to occupational exposures.

The purpose in requiring the examining physician to supply a written opinion containing the above mentioned analyses is to provide the employer with a medical basis to aid in the determination of initial placement and to provide information on a continuing basis concerning whether or not the worker is at increased risk as a result of his/her benzene exposure. Requiring that the opinion be in written form will serve as an objective check that the employers have actually had the benefit of the information

in making these determinations. Likewise, the requirement that the employee be provided with a copy of the physician's written opinion will assure that the employee is informed of the result of the medical exam and may take appropriate action. Comments suggesting that the physician's opinion be communicated only if there are problems or only upon request are not acceptable to OSHA on the basis that the employer has the ultimate responsibility to assure the protection of the worker's health. Where the findings are negative, transmittal of the doctor's opinion also provides necessary information to both parties that the employee's health has not been adversely affected and provides documentary evidence that the prescribed tests were performed and were evaluated.

Other aspects of paragraph (i) of the medical surveillance section are to be discussed under Recordkeeping, paragraph (1).

MANDATORY REMOVAL AND RATE RETENTION

Among the issues in the benzene rulemaking were whether OSHA should include a mandatory removal requirement—that is, a provision prohibiting the exposure of an employee to benzene if the employee would be placed at increased risk of material impairment to health because of such exposure, and whether OSHA should include a rate retention provision—that is, a provision requiring the transfer of such employee to another job or providing that removal for medical reasons should not result in loss of earnings or seniority status to the affected employee. These issues, as OSHA has previously stated (41 FR 46780), are related and must be addressed together. Both employee and industry participants expressed their views as to several aspects of these issues in pre-hearing comments, in testimony during the hearing and in post hearing arguments. Subsequent to the close of the record in this proceeding, however, OSHA conducted an informal public hearing on mandatory removal and rate retention for workers exposed to lead as part of the rulemaking proceeding on lead. Consideration of the critical issue of medical removal protection is being undertaken for several pending standards together. Once this consideration is completed, OSHA will consider the extent to which the conclusions on medical removal protection are appropriate for benzene and will propose the inclusion of those provisions in the benzene standard. The final standard published today, therefore, does not address the issues of mandatory removal and medical removal protection.

Employee Information and Training: Paragraph (j). The standard re-

quires each employer to provide training to each of his employees who is or may be exposed to benzene. The need to train employees was not disputed by participants in the rulemaking proceeding. Some comments, however, suggested limiting the training to certain employees. One industry comment requested that workers in closed system operations be excluded from training (Com. 47). Testimony at the hearing, however, revealed that leakages in closed systems are not unusual occurrences and that employee exposure during leaks can reach high levels. One comment suggested the exclusion of workers in open system operations where the benzene content is 1 percent or less (Com. 47). However, as stated above, it has been established that a consistent predictable relationship between the amount of benzene in a mixture and exposure levels does not exist and this suggestion has, therefore, been rejected. Another comment suggested the exclusion of laboratory personnel from training requirements on the ground that laboratory personnel have a good understanding of the hazardous nature of benzene (Com. 70). A laboratory technician, however, testified that during his six years working with many toxic chemicals, including benzene, he received no training (Tr. 3493) and indeed neither he nor his coworkers were aware of the fact that there was an OSHA standard limiting exposure to benzene (Tr. 3492). Information and training are essential for the protection of an employee. Each employee can do much to protect himself if he is fully informed of the hazards in his workplace and the protective equipment he should use. Furthermore, each employee, who is fully informed of the obligations which the standard imposes upon the employer, can determine if he is working in a safe and healthful environment. For the reasons stated herein, OSHA believes that training must be provided to all employees in workplaces where benzene is present.

A trade association, while not disputing the need for training, suggested that employee training not be included in the benzene standard but await development of a comprehensive employee information and training standard based on the report of the Advisory Committee on Hazardous Materials Labeling and/or NIOSH's criteria document entitled "A Recommended Standard"

An Identification System for Occupationally Hazardous Materials" (L.C. 14). OSHA deems it necessary for the protection of the health of employees to include the training requirements in the benzene standard at this time.

The standard specifies the contents of the training program. The information which must be imparted to the

employee must include the nature of benzene related health problems, the necessity for exposure control, and the purposes of medical surveillance and respiratory protections. No participants objected to any of these items. Two participants suggested that employees should also be trained in "early symptom diagnosis to detect acute leukemia" (Ex. Dow Venable statement, pg. 3; Tr. 3192; Ex. 154; Tr. 2963-3056). These participants, however, testified that the most common manifestations of acute leukemia are fatigue and nosebleeds and that these symptoms are not specific to acute leukemia (Tr. 3193).

The signs and symptoms of benzene-induced diseases are described in considerable detail in Appendix A and Appendix C. Both the proposed standard and the final standard specifically require that the employees be informed, among other things, of the information contained in Appendix A and Appendix C. (In this connection, the employee should be instructed to report promptly the development of any of these symptoms which could be attributed to benzene exposure.) In view of the requirement to include the information contained in the appendices as part of the training program, an additional requirement on early symptom diagnosis would be redundant. Similarly, since Appendix B details the volatility of benzene, OSHA has not adopted NIOSH's suggestion (Baler statement, Ex. 84A p. 11) that the standard further emphasize training on the flammability of benzene.

In addition to informing employees, the standard requires that the employer make available to his employees a copy of the standard and its appendices. This requirement is intended to assure that employees understand their rights and duties under the standard.

A public participant suggested that employers be required to hold classes for the training of each employee. (Ex. 183 p. 5) OSHA has not included any specific requirement to this effect in the final standard, preferring to leave the manner of training up to the individual employers. Some employers will need to train individuals on a one-to-one basis, depending on the number of employees at a particular workplace or involved in particular operations. Employers with a few employees may find it burdensome or disruptive of work schedules to conduct training in class sessions.

The employer is also required to provide, upon request, all materials related to the training program to the Secretary and the Director. This requirement is intended to provide an objective check of compliance with the content requirements of the training program.

The standard requires that training of employees be conducted within

ninety days of the effective date. Newly assigned employees must be trained at the time of initial assignment. The standard further requires that training be repeated annually. These requirements were not explicitly in the proposed standard; however, they are consistent with OSHA's policy on training (see, Coke Ovens Emissions Standard) and have been included in the final standard to assure that employees are trained promptly and receive continuing education essential to the protection of their health.

Signs and Labels: paragraph k. The requirements of the standard regarding the posting of warning signs and affixing caution labels remain primarily the same as those in the proposal with some difference in the legend of these signs and labels. These requirements are consistent with section 6(b)(7) of the Act which prescribes the use of labels or other appropriate forms of warning to apprise employees of the hazards to which they are exposed.

Signs. The standard requires the posting of warning signs in regulated areas. Some industry comments objected to this requirement on the ground that the training requirements of the standard are sufficient for informing employees of the hazards of benzene (Com. 28). In light of the serious nature of the hazard of exposure to benzene, OSHA does not agree. Not every employee will have completed his training before entering an area of operation where the exposure to benzene is over the permissible exposure level. Moreover, even trained employees will need to be reminded of the locations and the dangers of entering these areas. Additionally, other workers, such as employees of independent maintenance contractors who are authorized to enter particular regulated areas, need to be warned of the hazard and reminded to use protective equipment. OSHA, therefore, believes that both signs and training are necessary to adequately apprise employees of the hazards of benzene.

Other comments requested that laboratories be exempted from the sign requirements (Com. 70) on the ground that laboratory personnel are familiar with the hazards (Com. 20) and because there are already too many other hazardous substances in these work places (Com. 28) for which signs are posted (Com. 37). One comment expressed the view that there is no hazard from exposure to benzene in laboratories or other physical areas where the content of benzene in the mixture used is small (Com. 63, 59) or where benzene is used infrequently (Com. 70). As stated above, there is no established consistent predictable relationship between the amount of benzene and the exposure level, nor does

infrequency of use eliminate the hazard. Signs are required by the standard only in regulated areas where, by definition, the exposure is above the permissible exposure limit. Furthermore, as stated above, OSHA believes that training in hazards alone is not sufficient to inform employees of the potential health hazards of entering or working in a regulated area and the need for the use of protective equipment.

Since warning the employees is necessary, the standard explicitly provides that the employer must assure that nothing which detracts from the required information appears near or on the sign. Laboratory and other employers who have other signs posted in the regulated area, therefore, have the responsibility for meeting this requirement.

Another comment pointed out that signs would be required even where benzene was in a closed system regardless of lack of employee exposure (Com. 65). This comment appears to overlook the fact that signs would be required only in those areas where employee exposure is over the permissible exposure limit and that, if there is no benzene exposure from the closed system, no sign is required. This same comment suggested that signs would be required where benzene was in a sealed container. Since there is no exposure to employees when benzene is in sealed containers, the standard exempts sealed intact containers from all requirements but the labelling and training requirements; hence signs would not be required in areas where benzene is present solely in sealed intact containers. Another comment suggested elimination of sign posting requirements for gasoline products (Com. 55). Since benzene is present in gasoline there is, of course, a benzene hazard attendant to exposure to gasoline. However, sampling data indicates that exposure to benzene is usually below 1 ppm., which would, in such cases, obviate the need for signs.

The standard specifies the wording of the signs. The purpose of this provision is to assure that the proper warning is given to employees. Some participants suggested that the word "Cancer" be replaced by "Leukemia Suspect Agent" (AISI, Princ. Wit, Ex. 156, Tab I, p. 34; PC 36; AISI brief, p. 108; PC 35; MCA brief pp. 103-5, Com. 39). In view of the fact that it has been established that benzene actually induces leukemia, OSHA does not agree that "Leukemia Suspect Agent" adequately informs employees of the hazard. For the same reason, OSHA has not adopted the suggestion of another comment that the sign merely warn of the presence of breathing zone vapors which "may" be hazardous, the need to wear respirators and that unauthorized persons should stay

out (Com. 69). One comment pointed out that the sign requirements do not warn of other serious health hazards that may result from exposure to benzene. Addition of the various other health hazards would increase the wording on the sign with the likely result of detracting from the cancer warning. The reference to the most serious hazard is, in OSHA's view, a sufficient alert to employees that entering the regulated area may be hazardous. Some comments objected to the use of the term "Cancer Hazard" (Com. 26) on the ground that it would only serve to unduly alarm employees (Com. 28, 50). One comment suggested "Cancer Suspect Agent" be used to conform with 29 CFR 1910.1017 which regulates occupational exposures to vinyl chloride. Since exposure to benzene creates an increased risk of leukemia, and since leukemia is cancer of the blood, OSHA does not believe that the hazard is overstated by the use of the term "Cancer Hazard." Nor has OSHA adopted the suggestion that the word "Leukemia" replace the word "Cancer" (Com. 76). While the term "Leukemia" is more specific of the nature of the hazard, "Cancer" is the more familiar term and thus more readily alerts the employee.

Another comment (Com. 69) suggested that the word "Caution" be substituted for "Danger" to conform to 29 CFR 1910.145 (c)(1) and (2) which provide that danger signs should be used only where an immediate hazard exists, and caution signs used only to warn against potential hazards or to caution against unsafe practices. The suggestion was based on the view that OSHA failed to show that there exists a cause-effect relationship between employee exposure to benzene concentrations below 10 ppm. In view of the epidemiological evidence of the human carcinogenicity of benzene, OSHA feels that the use of the word "Danger" is appropriate. Furthermore, the word "Danger" is used to attract the attention of workers, to alert workers to the fact that they are in a hazardous area, i.e., an area where the permissible exposure limit is exceeded, and to emphasize the importance of the message to follow. The use of the word danger is consistent with the Coke Ovens Emissions Standard and other recent health standards.

Two comments objected to the legend "Respirator Required" pointing out that respirators are not always required in regulated areas. The reason given was that, although the concentration within a regulated area will be above 1 ppm, the employee would not have to use a respirator if his 8-hour TWA were below 1 ppm and his 15 minute ceiling is below 5 ppm (Com. 46, 59). OSHA recognizes that some employees entering regulated areas may not be exposed above the permis-

sible exposure limit. It is likely, however, that there will be many employees who work in the regulated areas for such periods of time or at such levels of exposure that they would without respirators be exposed to well above the permissible exposure limit. For this latter group, respirators would be required to reduce their exposure levels. To assure that these employees are adequately protected, it is necessary that the sign alert them to the need to wear respirators. Moreover, since even persons who are in a regulated area occasionally and are not exposed over the permissible exposure limits may face an increased risk of leukemia, OSHA does not believe that the respirator warning is such an overstatement as to necessitate elimination of that warning from the sign.

One comment pointed out that the warning sign ignores the flammability of benzene (Com. 50). NIOSH also recommended that the potential danger for fire be displayed on signs with equal prominence with the toxicological hazards. (Tr. 755) OSHA agrees. Benzene, as has been stated, is a highly flammable liquid. Accordingly, in the final standard, OSHA has added a requirement that the signs also contain the legend "Flammable—No Smoking" with equal prominence to the legend "Cancer Hazard."

Labels. The standard requires the use of caution labels on all containers of products containing any amount of benzene. This requirement imposes upon the employer the obligation to assure that all such containers within his workplace are at all times properly labeled. Some industry comments requested that OSHA define "container" (Com. 46, 55, 65) in terms of sizes and types of containers (Com. 53; Com. 72). Participants also appeared to be confused as to whether storage tanks, pipelines, tank cars and tank trucks are such containers as would be required labeling (Com. 60). The purpose of the labeling requirement is to assure that, wherever benzene is present in any quantity, employees are apprised of the hazard. The size or type of the container or its use as a storage vessel is, therefore, not material to this objective. In imposing the labeling requirement, however, OSHA does not intend to include pipelines, or to include trucks or other vessels transporting benzene products in sealed containers. At many points of pipelines, there is no employee exposure nor can the point at which benzene enters a product stream often be determined. Benzene in liquid mixtures, other than in gasoline, is often transported in closed containers, in which case labeling of the container is sufficient without a need for labeling the transport vehicle. Where benzene products not in containers are transported in barges or other tank vessels,

such as tankers and tank trucks, it is, of course, necessary that the vessel be labeled. With regard to gasoline, the standard does not cover activities past the bulk terminal and, therefore, gasoline trucks would not require labeling. In view of the above, the standard specifically excludes from the labeling requirements pipelines and any transport vessels or vehicles where the benzene product is transported in sealed containers.

Some participants suggested that the labeling requirements apply only to containers which have liquids with greater than 1% benzene (Com. 53, 72). It was also suggested that labels be affixed only to containers from which exposure to benzene levels above the permissible exposure limit might be reasonably expected to occur so as to exclude a requirement to label finished products which might contain trace amounts of benzene (Com. 59). Since there is no known safe level of exposure to benzene, OSHA feels that, for employees to be adequately apprised of the hazard, all containers must be labeled in the same manner.

The standard requires that the caution labels remain affixed when benzene products leave the employer's workplace. Some comments questioned OSHA's jurisdiction to impose such a requirement (Com. 50, 55, 59). The purpose of this requirement is to assure that all employees, not only those of a particular employer, are apprised of the hazardous nature of benzene exposure. It is OSHA's view that informing employees of the hazards to which they are exposed is an important element in reducing occupational disease and injury and one of the significant purposes of the Occupational Safety and Health Act. Section 6(b)(7) of the Act, which explicitly provides for regulation requiring the use of labels or other appropriate forms of warning to apprise employees of the hazards to which they are exposed, is broadly drawn. This section does not limit the employer's obligation of informing employees of hazardous conditions to the employer's own employee. When an employer manufactures, formulates or sells a product containing a toxic substance, that employer is exposing not only his own employees but also the employees of other employers involved in handling, transporting, or using the product. The extent of the obligation to inform should be commensurate with the extent of the exposure. This is especially true where the manufacturer, formulator or seller will in many cases be the only employer capable, through his unique knowledge, of providing the information needed for protection of employees. A narrower reading of the statutory authority would defeat the protective purposes of the Act by withholding from employees down the

line who come into any contact with the product, adequate information as to the hazard. Furthermore, the use of the labels will alert other employers, who utilize or handle the product and who would not otherwise know of the presence of benzene in their workplace, of their obligation to comply with the standard. OSHA, therefore, feels that this requirement is necessary and appropriate to effectuate the purposes of the Act.

The standard prescribes the legend that must be included on the label. This is to assure that employees are alerted to the fact that they are handling benzene and to the hazard involved. The record evidence establishes that a variety of code names have been used for benzene (Ex 61, Sakol) and that employers (Tr. 3383; 3516), workers (Tr. 3402) and physicians (Tr. 305-6) often do not know that the product contains benzene. Some participants suggested that labels state the percentage of benzene in the product (Com. 58, 21, 59). In order to keep the label information to a minimum and since there is no consistent predictable relationship between the amount of benzene in the product and the percentage level, the final standard does not require any such statement on the label.

Recordkeeping and reporting. The provisions for recordkeeping, reporting, availability of records and the transfer of records are similar to those in the proposal. Such changes as have been made in the final standard are in response to the request of public participants that OSHA reduce the burden imposed by these types of requirements. These provisions implement the requirements of section 8(c)(1) and (3) of the Act, and are consistent with OSHA's general policy concerning records and reports.

Records: paragraph (1) The standard requires a limited amount of recordkeeping. Employers must maintain exposure measurement records and medical records.

The need for keeping these records was generally accepted by the participants in the benzene rulemaking. The common purposes of these recordkeeping requirements is to assure the employer's compliance with the control measures designed for the protection of his employees, and to collect data vital to epidemiological and diagnostic investigations in order to resolve such questions as dose-response relationships in blood diseases caused by exposure to benzene. Furthermore, these records are useful for the employer by enabling him to identify areas of his operations where there is or may be a problem. Exposure measurement records assist in pinpointing those processes or operations which require additional efforts to reduce exposure to benzene. Medical records provide an

awareness of the incidence of industrial illness in the employer's establishment and assist the employer to focus on any aspect of his operation which may materially impair the health of his employees. The required records are also useful to the employee: Exposure records assure employees that their exposure to benzene is being monitored and also inform them of the hazards to which they are exposed; medical records assist their examining physician to accurately diagnose and treat any health problem and assure proper evaluation of their health.

The standard specifies the information which must be included in the record. The exposure measurement record must include information which accurately reflects the exposure of each individual employee. The medical record must include the work history of each individual employee and information accurately reflecting his health. A few participants disputed the need for the content of some of these records. One comment suggested deletion of the requirement in paragraph (1)(1)(b) to include as part of the exposure record a description of sampling on the ground that it is the same requirement as in paragraph (1)(1)(a) for a description of the sampling procedure used to determine representative employee exposure. (Com. 76) This participant has misunderstood these requirements. The "description of sampling" in subparagraph (b) refers to the type of equipment used for collecting the concentrations of benzene, the rate at which these samples were collected and the minimum period during which the collection took place. The "sampling procedure" referred to in subparagraph (a) refers to the criteria or method used by the employer to determine that the samples he has taken are representative of the particular employee's exposure. Although these paragraphs are directed to different requirements, OSHA has eliminated from subparagraph (a) of this provision the word "sampling" in order to avoid such confusion on the part of other employers.

Another comment expressed the view that requiring employers to include in the record all of the information provided to the examining physician is an undue administrative burden (Com. 59). Where the information is communicated in writing to the doctor who will examine the employee, the employer can meet his requirement by simply retaining in his files a copy of this communication. Where, however, the information is not furnished in writing, it is essential to record it to assure that the examining physician has been advised of all the information needed for evaluation of the employee's health. Moreover, since

this information includes exposure conditions and symptoms, the information is most useful not only to the current examining physician but also to a physician who years later evaluates the health of the employee. OSHA, therefore, has retained in the standard the requirement to record the information provided to the examining physician.

An industry comment pointed out that it is not necessary for the company physicians, who maintain the medical records on behalf of the employer, to retain a copy of the regulation and its appendices as part of the record of each individual employee, but that retention of one master copy in the files would be sufficient if there is a reference to it in each employee's file (Com. 46). OSHA agrees that retention of the regulation and appendices in each employee's file unnecessarily increases the space needed for the records and, accordingly, has given employers the option in the final standard of either including the regulation and appendices in each employee's file or of retaining a master copy of these documents and referencing them in each employee's medical file.

Some industry participants testified that their facilities would need additional record clerks to maintain the information in the required records (TR 3165-3171). In view of the reduction in the final standard of the number of employees for whom exposure and medical monitoring must be conducted and reduction of at the frequency rate suggested by the proposal, the need for additional recordkeeping personnel is significantly reduced. Furthermore, since the standard does not require the use of any particular form for maintaining the prescribed information, employers may incorporate these records into already existing recordkeeping systems, some of which are computerized, and thus further minimize the need for additional personnel.

The standard requires that the exposure measurement records and medical surveillance records be maintained by the employer for at least 40 years or for the duration of employment plus twenty years, whichever is longer. Several participants objected to the length of this retention period. One comment expressed the view that the retention period was unnecessarily burdensome where the only exposure to benzene is from liquid products containing small amounts of benzene (Com. 55). Both because there is no known safe level for exposure to benzene and because there is no direct linear correlation between the percentage of benzene in a liquid mixture and exposure levels, OSHA feels that there is no basis for different retention requirements based on the amount of benzene in liquids. More-

over, in view of the provision for an action level in the final standard, the number of exposure measurements and medical examinations which must be recorded will be greatly minimized where the small amounts of benzene actually do result in exposures below the action level.

Another comment suggested that the retention period for the medical surveillance records is unreasonably long (Com. 59). OSHA is aware of the burden of keeping both the medical and the exposure records for this length of time. However, OSHA feels that it is essential that the records be retained for this period. The record evidence establishes that the latency period for benzene induced leukemia is unknown (Ex. 2B-283, p. 4) and that, as in the case of other chemical carcinogens, the symptoms of carcinogenesis—in this case, benzene induced leukemia—may not appear for many years after the initial exposure (Tr. 385, 391, 410-11, 424). The retention period of forty years has, therefore, been selected to assure that the entire latency period would be covered. Furthermore, as stated in OSHA's standard for Coke Ovens Emissions (41 FR 46782), OSHA believes that it is essential to scientific investigations that exposure and medical records be maintained for the same length of time, and that the retention period for these records be at least forty years.

One comment suggested that independent contractors, who customarily hire employees only for temporary work at a particular facility, be allowed to send the medical records to the Director of NIOSH upon expiration of the employee's employment (Com. 63). As is noted below, it is OSHA's policy for all employers that the records be maintained at the place of employment so long as it is in existence.

The standard does not require that the employer, on any regular basis, send copies of his records to OSHA. The employer is, however, required upon request to make the records available for examination and copying to designated representatives of OSHA and NIOSH. This requirement is necessary both for compliance purposes and for scientific investigations. Records of required exposure monitoring are, in addition, to be made available, for examination and copying, to current employees and their representatives; and exposure monitoring records indicating their own exposure must be made available to former employees or their designated representatives. One participant suggested deletion of the reference to the term "or their designated representative" (Com. 48) thus restricting access to appropriate exposure records only to the current or former employee himself. OSHA is of the view that denying access to the re-

cords of individual exposure by designated representatives could result in a denial of access to the information by the employee where he is incapacitated and unable to inspect the records or simply not able to understand them. This would defeat the purpose of the availability provision which is to assure current employees that their exposure is properly monitored and assure former employees of access to information necessary for the continued protection of their health. Furthermore, the Act recognizes (sections 2(b)(13); 8(c)(3); 8(f)(1)) the legitimate role of employee representatives in occupational safety and health. One industry comment suggested that employee representatives be formally designated in writing and that access to records also be requested in writing (Com. 15). OSHA does not deem it necessary to include such a requirement in the standard, but employers may establish procedures for access to records so long as the procedures do not restrict the employees' and former employees' to access.

The standard also requires that medical records also be made available, upon request, for examination and copying to the designated physicians or representative of both current and former employees. Some comments questioned the fact that the standard enables not only the employer but also the employee and his representative and OSHA and NIOSH to have access to medical records without specifying confidentiality or otherwise limiting circulation of the information (Com. 26, 48). OSHA recognizes that a physician's records may contain a wide range of personal and medical information deemed to be confidential or private. For this reason, the standard limits the contents of the medical record to such information as is related to benzene exposure. Indeed, the standard requires in paragraph (i) (6) (ii) that the employer advise the physician that the physician's opinion, which becomes a part of the medical record, should not reveal findings or diagnoses unrelated to occupational exposure. The need of the employer, the employee and OSHA and NIOSH to have access to this information has already been thoroughly discussed. Disclosure of the information to other persons is, of course, subject to protective requirements of any applicable laws or regulations.

To assure that the records will be preserved for the required retention period of forty years, the standard requires an employer, who ceases to do business, to transfer his records to his successor and, in the event that there is no successor, to transfer the records to the Director of NIOSH. One industry comment suggested that this section be deleted. (Com. 59). Allowing employers to dispose, at will, of the re-

cords of exposure measurements and medical surveillance would result, more often than not, in destruction of these records thus depriving employees of information necessary for evaluation of their health, as well as depriving NIOSH of information valuable to its scientific investigations.

Another participant suggested elimination of the requirement that the records be transferred to NIOSH by registered mail. (Com. 68). OSHA has adopted this suggestion and the permanent standard eliminates the requirement to use registered mail.

Reports. Paragraphs (d)(3), (e)(5), (f)(2), (i)(4)(i). The standard imposes notification requirements upon employers. This requirement is discussed above under *Regulated Areas*.

The standard also obligates the employer to give certain information to employees. The employer must notify each employee of the exposure measurement representative of his exposure. This notification must be made regardless of what the exposure level of the employee is. Two comments suggested that availability of exposure records was sufficient to inform employees of the results of their monitoring (Com. 46 Com. 53). Several comments suggested that the notification be required only where the employees' exposure is above the permissible exposure level (Com. 10, 15, 21, 41, 46, 53, 59) and that exposures below the permissible level be available to the employee upon request (Com. 10). OSHA believes that, consistent with section 8(c)(3) of the Act, every employee has the right to know what his exposure level is and whether it is above or below the permissible exposure level. Moreover, since the permissible exposure level is a feasibility level and not a "safe" level, the employee must know, for proper evaluation of his health by a physician in the present and future, the level of benzene to which he is exposed. Accordingly, the suggestions to modify the employee notification requirements have not been adopted.

The standard further requires that, where the employee's exposure is over the permissible exposure level, the employer must also state in the notification what corrective action the employer is going to take to reduce the exposure level. This is necessary to assure employees that the employer is making every effort to furnish them with a safe and healthful work environment, and implements section 8(c)(3) of the Act.

Notifications to employees of their exposure levels must be made in writing. Several comments objected to this requirement. Some comments suggested that the employer be permitted to notify employees by posting of a notice on the workplace bulletin board (Com. 15, 49, 59), thus relieving the

employer of the burden of notifying each and every employee. It is OSHA's view that direct notification to each employee is necessary in order to assure that the employee, as required by section 8(c)(3) of the Act, is apprised of all hazards to which the employee is exposed.

The standard further requires that the notification be within five working days after receipt of the employer's measurement results. Several industry comments requested a change in the five day requirement so as to allow additional time for employers to comply. (Com. 47, 49, 54, 59). OSHA feels that, under ordinary circumstances, the five day limit fulfills the statutory requirement for promptness (section 8(c)(3)) yet allows employers sufficient time for the written notification.

The standard further obligates the employer to provide the employee with a copy of the examining physician's written opinion. One industry comment pointed out the large volume of letters per year which this notification would entail (Com. 53). However, in view of the necessity for each employee to have an evaluation of his health, OSHA is of the view that furnishing each employee with a copy of the physician's letter is not unreasonably burdensome.

Written compliance programs are also required by the standard. These are discussed above under *Methods of Compliance*. The employer is required to submit his compliance program, on request, to OSHA and NIOSH. Additionally, he must make this program available at the worksite for examination by OSHA and NIOSH and by his employees or their authorized representatives. One participant suggested that employers be required to give to each employee a notice of availability of the compliance program rather than merely making it available to the employee or his representative. OSHA feels that this would place an unnecessary burden upon the employer, and has not incorporated the suggestion.

Observation of monitoring; paragraph (m). The final standard requires that the employer provide affected employees or their designated representatives with an opportunity to observe the measuring of employee exposures. This opportunity is specifically required by section 8(c)(3) of the Act. The standard also sets forth certain procedures which must be complied with in connection with the observation of the monitoring. These procedures are designed to assure that the right to observe is meaningful and that the health and safety of the observer is protected during the observation.

A few industry participants requested that the observation of monitoring provision be deleted from the standard (Com. 65). Union participants objected

to any limitations on this requirement (Grosprion statement, Ex. 11.A, p. 12). The arguments by industry were several: (1) The requirement fails to limit the number of employees who can observe the monitoring; (2) it increases the employer's costs of monitoring; (3) employees lose time from their jobs; (4) it exposes employees to additional hazards; (5) it increases the liability potential for non-employees who are injured while observing; and (6) will result in labor/management confrontations (Com. 65, 70; L.C. 4). In view of the statutory mandate that "regulations shall provide employees or their representatives with an opportunity to observe such monitoring or measuring," OSHA has not adopted the suggestions to delete this provision.

One comment suggested that a one-time limit on observation of monitoring be established for each employee (Com. 60). OSHA has not adopted this suggestion since the statute does not impose any such limit and it does not appear to be reasonable. For example, a requirement to this effect would prohibit an employee or his representative who has observed the original monitoring to observe the redetermination of exposure which is required by the standard after a process or control change.

EFFECTIVE DATE

In order to assure that affected employers and employees will be informed of the existence of the provisions and terms of this standard, and that employers and employees are given an opportunity to familiarize themselves with any new requirements, the effective date of this standard will be March 13, 1978. Until such date, 29 CFR 1910.1000, Table Z-2 will continue to apply to those operations covered by the new 29 CFR 1910.1028. Subsequent to that date, 29 CFR 1910.1000, Table Z-2 will continue to apply to all operations exempted under the new 29 CFR 1910.1028.

APPENDICES

Three appendices have been included in this permanent standard. These appendices have been included primarily for information purposes. None of the statements contained therein should be construed as establishing a mandatory requirement not otherwise imposed by the standard or as detracting from an obligation which the standard does impose.

The information contained in Appendices A and B is designed to aid the employer in complying with requirements of the standard. The information in Appendix C primarily provides information needed by the physician to evaluate the results of the medical examination. Appendix C also lists other types of examinations, not required by the standard, which may

help the physician in making an accurate assessment as to whether continued exposure to benzene will place the employee at an increased risk. It should be noted that paragraph (j)(1) (i) and (iv) specifically require that the information contained in Appendix A and C be provided to employees as part of their information and training program.

Some suggestions were made by participants regarding the contents of these appendices. One participant suggested that Appendix A, Part III-A include the requirement as to frequency of change of respirator cartridges and canisters (Com. 8). OSHA has not adopted this suggestion since the requirement is clearly set forth in the standard, and the employer is required as part of the training program to give each employee a copy of the standard. Another participant (Com. 59) suggested that Appendix A, I, B2 state that eye contact and repeated skin contact "be avoided" instead of "prohibited." OASH does not agree since the standard prohibits such contact. This same participant suggested that the last sentence of Appendix A, IV, A be changed to indicate that medical assistance should be sought only if irritation of eye or face persists. This limitation has not been added for the reason that OSHA feels that the more conservative advice imparted by the proposed paragraph better alerts the employees to the possible hazards of this type of exposure. The third suggestion of this participant was that Appendix A state that "medical assistance" be sought rather than that "a doctor" be called when large quantities of benzene are breathed. A modification of this suggestion has been adopted and it is now recommended that medical assistance or a doctor be called for as soon as possible.

VII. AUTHORITY

This document was prepared under the direction of Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Accordingly, pursuant to sections 4(b)(2), 6(b), 6(c) and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1592, 1593, 1596, 1596, 29 U.S.C. 653, 655, 657), the specific statutes referred to in section 4(b)(2), Secretary of Labor's Order No. 8-76 (41 FR 25059), and 29 CFR Part 1911, Part 1910 of Title 29, Code of Federal Regulations, is hereby amended by deleting the emergency temporary standard for occupational exposure to benzene at § 1910.1028 and adding a new permanent standard for occupational exposure to benzene as § 1910.1028, and by amending Table Z-2 of § 1910.1000. In addition, pursuant to section 4(b)(2) of the Act (84 Stat.

1592; 29 U.S.C. 653), OSHA has determined that this new standard in § 1910.1028 is more effective than the corresponding standards now in Subpart B of Part 1910, and in Parts 1915, 1916, 1917, 1918, and 1926 of Title 29, Code of Federal Regulations. Therefore, these corresponding standards are superseded by this new § 1910.1028. This determination, and the application of the new standard to the maritime and construction industries, are implemented by adding a new paragraph (c) to § 1910.19 and by revoking § 1910.20.

Signed at Washington, D.C., this 31st day of January, 1978. These amendments are effective on March 13, 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

Part 1910 of Title 29 of the Code of Federal Regulations is hereby amended as follows:

1. A new paragraph (c) is added to § 1910.19, to read as follows:

§ 1910.19 *Special provisions for air contaminants.*

(c) Section 1910.1028 shall apply to the exposure of every employee to benzene in every employment and place of employment covered by §§ 1910.12, 1910.13, 1910.14, 1910.15, or § 1910.16, in lieu of any different standard on exposure to benzene which would otherwise be applicable by virtue of any of those sections.

§ 1910.20 [Revoked]

2. Section 1910.20 is revoked.

§ 1910.1000 [Amended]

3. Table Z-2 of § 1910.1000 is amended by adding a footnote following the words "Benzene (Z37.40-1969)," and by adding the following below Table Z-2:

4. Section 1910.1028 is revised to read as follows:

§ 1910.1028 Benzene.

(a) *Scope and application.* (1) This section applies to each place of employment where benzene is produced, reacted, released, packaged, repackaged, stored, transported, handled, or used.

(2) This section does not apply to:

(i) The storage, transportation, distribution, dispensing, sale or use as fuel of gasoline, motor fuels, or other fuels subsequent to discharge from bulk terminals; or

¹Occupational exposures to benzene are subject to the requirements of § 1910.1028 except as specifically exempted by § 1910.1028(a)(2). Exposures exempted by § 1910.1028(a)(2) are covered by this § 1910.1000

(ii) The storage, transportation, distribution or sale of benzene in intact containers sealed in such a manner as to contain benzene vapors or liquid, except for the requirements of paragraph (k) (2), (3), (4), and (5), and paragraph (j) of this section.

(b) *Definitions.* "Action level" means an airborne concentration of benzene of 0.5 ppm, averaged over an 8-hour work day.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Authorized person" means any person required by his duties to enter a regulated area and authorized to do so by his employer, by this section or by the Occupational Safety and Health Act of 1970. "Authorized person" includes a representative of employees who is designated to observe monitoring and measuring procedures under paragraph (m) of this section.

"Benzene" (C₆H₆) (CAS Registry No. 00071432) means solid, liquefied or gaseous benzene. It includes mixtures of liquids containing benzene and the vapors released by these liquids.

"Bulk terminal" means a facility which is used for the storage and distribution of gasoline, motor fuels or other fuels and which receives its petroleum products by pipeline, barge or marine tanker.

"Director" means the Director of the National Institute for Occupational Safety and Health, U.S. Department of Health, Education, and Welfare, or designee.

"Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which may, or does, result in a massive release of benzene.

"OSHA Area Office" means the office of the Occupational Safety and Health Administration having jurisdiction over the geographic area where the affected workplace is located.

(c) *Permissible exposure limits.*—(1) *Inhalation.*—(i) *Time-weighted average limit (TWA).* The employer shall assure that no employee is exposed to an airborne concentration of benzene in excess of 1 part benzene per million parts of air (1 ppm) as an 8-hour time-weighted average.

(ii) *Ceiling limit.* The employer shall assure that no employee is exposed to an airborne concentration of benzene in excess of 5 ppm as averaged over any 15 minute period.

(2) *Dermal and eye exposure limit.* The employer shall assure that no employee is exposed to eye contact with liquid benzene; or to skin contact with liquid benzene, unless the employer can establish that the skin contact is an isolated instance.

(d) *Regulated areas.* (1) the employer shall establish, within each place of

employment, regulated areas where benzene concentrations are in excess of the permissible airborne exposure limit.

(2) The employer shall limit access to regulated areas to authorized persons.

(3) *Notification of regulated areas.* Within 30 days following the establishment of a regulated area, the employer shall report the following information to the OSHA Area Office:

(i) The address of each establishment which has one or more regulated areas;

(ii) The locations, within the establishment, of each regulated area;

(iii) A brief description of each process or operation which results in employee exposure to benzene in regulated areas; and

(iv) The number of employees engaged in each process or operation within each regulated area which results in exposure to benzene, and an estimate of the frequency and degree of exposure within each regulated area.

(e) *Exposure monitoring and measurements.*—(1) *General.* (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to benzene over an eight (8) hour period.

(ii) For the purposes of this section, employee exposure is that exposure which could occur if the employee were not using a respirator.

(2) *Initial monitoring.* (i) Each employer, who has a place of employment where benzene is produced, reacted, released, packaged, repackaged, stored, transported, handled or used shall monitor each of these workplaces and work operations to accurately determine the airborne concentrations of benzene to which employees may be exposed.

(ii) The initial monitoring required under paragraph (e)(2)(i) of this section shall be conducted and the results obtained within 30 days of the effective date of this section. Where the employer has monitored after January 4, 1977 and the monitoring satisfies the accuracy requirements of paragraph (e)(6) of the section, the employer may rely on such earlier monitoring to satisfy the requirements of paragraph (e)(2)(i) of this section, unless there has been a production, process, personnel or control change which may have resulted in new or additional exposures to benzene or the employer has any other reason to suspect a change which may have resulted in new or additional exposures to benzene; and provided that the employer maintains a record of the monitoring in accordance with paragraph (i)(1) and notifies each employee in accordance with paragraph (e)(5).

(3) *Frequency.*—(i) *Measurements below the action level.* If the measurements conducted under paragraph (e)(2)(i) of this section reveal employee exposure to be below the action level, the measurements need not be repeated, except as otherwise provided in paragraph (e)(4) of this section.

(ii) *Measurements above the action level.* If the measurements reveal employee exposure to be in excess of the action level, but below the permissible exposure limit, the employer shall repeat the monitoring at least quarterly. The employer shall continue these quarterly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the action level, and thereafter the employer may discontinue monitoring, except as provided in paragraph (e)(4) of this section.

(iii) *Measurements above the permissible exposure limit.* If the measurements reveal employee exposure to be in excess of the permissible exposure limits, the employer shall repeat the measurements at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.

(4) *Additional monitoring.* Whenever there has been a production, process, personnel or control change which may result in new or additional exposure to benzene or whenever the employer has any other reason to suspect a change which may result in new or additional exposures to benzene, such as spills, leaks, ruptures, or breakdowns, the employer shall repeat the monitoring which is required by paragraph (e)(2)(i) of this section.

(5) *Employee notification.* (i) Within 5 working days after the receipt of the measurement results, the employer shall notify each employee in writing of the exposure measurements which represent that employee's exposures.

(ii) Where the results indicate that the employee's exposure exceeds the permissible exposure limits, the notification shall also include the corrective action being taken or to be taken by the employer to reduce exposure to or below the permissible exposure limit.

(6) *Accuracy of measurement.* The employer shall use a method of measurement which has an accuracy, to a confidence level of 95 percent, of not less than plus or minus 25 percent for concentrations of benzene greater than or equal to 1 ppm.

(f) *Methods of compliance.*—(1) *Priority of compliance methods.* The employer shall institute engineering and work practice controls to reduce and maintain employee exposures to benzene at or below the permissible exposure limits, except to the extent that the employer establishes that these controls are not feasible. Where feasible engineering and work practice controls are not sufficient to reduce employee exposure to or below the permissible exposure limits, the employer shall nonetheless use them to reduce exposures to the lowest level achievable by these controls, and shall supplement them by the use of respiratory protection.

(2) *Compliance program.* (i) The employer shall establish and implement a written program to reduce exposures to or below the permissible exposure limits solely by means of engineering and work practice controls required by paragraph (f)(1) of this section.

(ii) The written program shall include a schedule for development and implementation of the engineering and work practice controls. These plans shall be revised at least every six months to reflect the current status of the program.

(iii) Written plans for these compliance programs shall be submitted, upon request, to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, and the employees or their authorized representatives.

(iv) The employer shall institute and maintain at least the controls described in his most recent written compliance program.

(g) *Respiratory protection.*—(1) *General.* Where respiratory protection is required under this section, the employer shall select, provide and assure the use of respirators. Respirators shall be used in the following circumstances:

(i) During the time period necessary to install or implement feasible engineering and work practice controls;

(ii) During maintenance and repair activities in which engineering and work practice controls are not feasible;

(iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; or

(iv) In emergencies.

(2) *Respirator selection.* (i) Where respiratory protection is required under this section, the employer shall select and provide, at no cost to the employee, the appropriate respirator from Table 1 below and shall assure that the employee uses the respirator provided.

(ii) The employer shall select respirators from among those approved by the National Institute for Occupational Safety and Health under the program of 30 CFR Part 11.

(3) *Respirator program.* The employer shall institute a respiratory protection program in accordance with § 1910.134(b), (d), (e) and (f).

(4) *Respirator use.* (i) Where air purifying respirators (cartridge, canister, or gas mask) are used, the employer shall, except as provided in paragraph (g)(4)(ii) of this section, replace the air-purifying canisters or cartridges prior to the expiration of their service life or the end of shift in which they are first used, whichever occurs first.

(ii) Where a cartridge or canister of an air purifying respirator has an end of service life indicator certified by NIOSH for benzene, the employer may permit its use until such time as the indicator shows the end of service life.

(iii) The employer shall assure that the respirator issued to the employee exhibits minimum facepiece leakage and that the respirator is properly fitted.

(iv) The employer shall allow each employee who wears a respirator to wash his or her face and respirator facepiece to prevent skin irritation associated with respirator use.

able a medical surveillance program for employees who are or may be exposed to benzene at or above the action level and employees who are subjected to an emergency.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and provided without cost to the employee.

(2) *Initial examinations.* (i) Within thirty days of the effective date of this section, or before the time of initial assignment, the employer shall provide each employee who is or may be exposed to benzene at or above the action level with a medical examination, including at least the following elements:

(a) A history which includes past work exposure to benzene or any other hematologic toxins; a family history of blood dyscrasias including hematological neoplasms; a history of blood dyscrasias including genetically related hemoglobin alterations, bleeding abnormalities, abnormal function of formed blood elements; a history of renal or liver dysfunction; a history of drugs routinely taken, alcoholic intake and systemic infections; a history of exposure to marrow toxins outside of the current work situation, including volatile cleaning agents and insecticides;

(b) Laboratory tests, including a complete blood count with red cell count, white cell count with differential, platelet count, hematocrit, hemoglobin and red cell indices (MCV, MCH, MCHC), serum bilirubin and reticulocyte count; and

(c) Additional tests where, in the opinion of the examining physician, alterations in the components of the blood are related to benzene exposure.

(ii) No medical examination is required to satisfy the requirements of paragraph (i)(2)(i) of this section if adequate records show that the employee has been examined in accordance with the procedures of paragraph (i)(2)(i) of this section within the previous six months.

(3) *Information provided to the physician.* The employer shall provide the following information to the examining physician for each examination under this section:

(i) A copy of this regulation and its appendixes;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level or anticipated exposure level;

(iv) A description of any personal protective equipment used or to be used; and

(v) Information from previous medical examinations of the affected employee which is not readily available to the examining physician.

(i) *Medical Surveillance.*—(1) *General.* (i) The employer shall make avail-

TABLE 1.—Respiratory protection for benzene

Airborne concentration of benzene or condition of use	Respirator type
(a) Less than or equal to 10 p.p.m.	(1) Any chemical cartridge respirator with organic vapor cartridge; or (2) Any supplied air respirator.
(b) Less than or equal to 50 p.p.m.	(1) Any chemical cartridge respirator with organic vapor cartridge and full facepiece; (2) Any supplied air respirator with full facepiece; (3) Any organic vapor gas mask; or (4) Any self-contained breathing apparatus with full facepiece.
(c) Less than or equal to 1,000 p.p.m.	(1) Supplied air respirator with half mask in positive pressure mode.
(d) Less than or equal to 2,000 p.p.m.	(1) Supplied air respirator with full facepiece, helmet, or hood, in positive pressure mode.
(e) Less than or equal to 10,000 p.p.m.	(1) Self-contained breathing apparatus with full facepiece in positive pressure mode; or (2) Open circuit self-contained breathing apparatus with full facepiece in positive pressure mode.
(f) Escape	(1) Any organic vapor gas mask; or (2) Any self-contained breathing apparatus with full facepiece.

(h) *Protective clothing and equipment.* Where eye or dermal exposure may occur, the employer shall provide, at no cost to the employee, and assure that the employee wears impermeable protective clothing and equipment to protect the area of the body which may come in contact with liquid benzene. Eye and face protection shall meet the requirements of § 1910.133 of this Part.

(i) *Medical Surveillance.*—(1) *General.* (i) The employer shall make avail-

(4) *Physician's written opinions.* (i) For each examination under this section, the employer shall obtain and provide the employee with a copy of the examining physician's written opinion containing the following:

(a) The results of the medical examination and tests;

(b) The physician's opinion concerning whether the employee has any detected medical conditions which would place the employee's health at increased risk of material impairment from exposure to benzene;

(c) The physician's recommended limitations upon the employee's exposure to benzene or upon the employee's use of protective clothing or equipment and respirators.

(ii) The written opinion obtained by the employer shall not reveal specific findings or diagnoses unrelated to occupational exposures.

(5) *Periodic examinations.* (i) The employer shall provide each employee covered under paragraph (i)(1)(i) of this section with a medical examination at least semi-annually following the initial examination. These periodic examinations shall include at least the following elements:

(a) A brief history regarding any new exposure to potential marrow toxins, changes in drug and alcohol intake and the appearance of physical symptoms relating to blood disorders;

(b) A complete blood count with red cell count, white cell count with differential, platelet count, hemoglobin, hematocrit and red cell indices (MCV, MCH, MCHC); and

(c) Additional tests where in the opinion of the examining physician, alterations in the components of the blood are related to benzene exposure.

(ii) Where the employee develops signs and symptoms commonly associated with toxic exposure to benzene, the employer shall provide the employee with a medical examination which shall include those elements considered appropriate by the examining physician.

(6) *Emergency situations.* If the employee is exposed to benzene in an emergency situation, the employer shall provide the employee with a urinary phenol test at the end of the employee's shift. The urine specific gravity shall be corrected to 1.024. If the result of the urinary phenol test is below 75 mg/ml, no further testing is required. If the result of the urinary phenol test is equal to or greater than 75 mg/ml, the employer shall provide the employee with a complete blood count including a red cell count, white cell count with differential, and platelet count as soon as practicable, and shall provide these same counts one month later.

(7) *Special examinations.* (i) Where the results of any tests required by this section reveal that any of the fol-

lowing conditions exist, the employer shall have the test results of the employee evaluated by a hematologist:

(a) The red cell count, hemoglobin or platelet count varies more than 15 percent above or below the employee's most recent values;

(b) The red cell count is below 4.4 million or above 6.3 million per mm³, (for males), or below 4.2 million or above 5.5 million per mm³ (for females);

(c) The hemoglobin is below 14 grams percent or above 18 grams percent (for males) or below 12 grams percent or above 16 grams percent (for females);

(d) The white cell count is below 4,200 or above 10,000;

(e) The thrombocyte count is below 140×10³ cells per mm³ or above 440×10³ cells per mm³.

(ii) In addition to the information required to be provided to the physician under paragraph (i)(3) of this section, the employer shall provide the hematologist with the medical record required to be maintained by paragraph (i)(2) of this section.

(iii) The hematologist's evaluation shall include a determination as to the need for additional tests, and the employer shall assure that these tests are provided.

(j) *Employee information and training.*—(1) *Training program.* (i) The employer shall institute a training program for all employees assigned to workplaces where benzene is produced, reacted, released, packaged, repackaged, stored, transported, handled or used and shall assure that each employee assigned to these workplaces is informed of the following:

(a) The information contained in Appendices A and B of this section;

(b) The quantity, location, manner of use, release, or storage of benzene and the specific nature of operations which could result in exposure above the permissible exposure limits as well as necessary protective steps;

(c) The purpose, proper use, and limitations of personal protective equipment and clothing required by paragraph (h) of this section and of respiratory devices required by paragraph (g) of this section and § 1910.134 (b), (d), (e) and (f);

(d) The purpose and a description of the medical surveillance program required by paragraph (i) of this section and the information contained in Appendix C of this section; and

(e) The contents of this standard.

(ii) The training program required under paragraph (j)(1)(i) of this section shall be provided within 90 days of the effective date of this section or at the time of initial assignment to workplaces where benzene is produced, reacted, released, packaged, repackaged, stored, transported, handled or used, and at least annually thereafter.

(2) *Access to training materials.* (i) The employer shall make a copy of this standard and its Appendices readily available to all affected employees.

(ii) The employer shall provide, upon request, all materials relating to the employee information and training program to the Assistant Secretary and the Director.

(k) *Signs and labels.* (1) The employer shall post signs in regulated areas bearing the following legend:

DANGER
BENZENE
CANCER HAZARD
FLAMMABLE—NO SMOKING
AUTHORIZED PERSONNEL ONLY
RESPIRATOR REQUIRED

(2) The employer shall assure that caution labels are affixed to all containers of benzene and of products containing any amount of benzene, except:

(i) Pipelines, and

(ii) Transport vessels or vehicles carrying benzene or benzene products in sealed intact containers.

(3) The employer shall assure that the caution labels remain affixed when the benzene or products containing benzene are sold, distributed or otherwise leave the employer's workplace.

(4) The caution labels required by paragraph (k)(2) of this section shall be readily visible and legible. The labels shall bear the following legend:

CAUTION
CONTAINS BENZENE
CANCER HAZARD

(5) The employer shall assure that no statement which contradicts or detracts from the information required by paragraphs (k)(1) and (k)(4) of this section appears on or near any required sign or label.

(l) *Recordkeeping.*—(1) *Exposure measurements.* (i) The employer shall establish and maintain an accurate record of all measurements required by paragraph (e) of this section.

(ii) This record shall include:

(a) The dates, number, duration, and results of each of the samples taken, including a description of the procedure used to determine representative employee exposures;

(b) A description of the sampling and analytical methods used;

(c) Type of respiratory protective devices worn, if any; and

(d) Name, social security number, and job classification of the employee monitored and all other employees whose exposure the measurement is intended to represent.

(iii) The employer shall maintain this record for at least 40 years or the

duration of employment plus 20 years, whichever is longer.

(2) *Medical surveillance.* (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance required by paragraph (l) of this section.

(ii) This record shall include:

(a) The name, and social security number of the employee;

(b) A copy of the physician's written opinions, including results of medical examinations and all tests, opinions and recommendations;

(c) The peripheral blood smear slides of the initial test, the most recent test, and any test demonstrating hematological abnormalities related to benzene exposure;

(d) Any employee medical complaints related to exposure to benzene;

(e) A copy of this standard and its appendices, except that the employer may keep one copy of the standard and its appendices for all employees provided that he references the standard and its appendices in the medical surveillance record of each employee;

(f) A copy of the information provided to the physician as required by paragraphs (i)(3)(ii) through (i)(3)(v) of this section; and

(g) A copy of the employee's medical and work history related to exposure to benzene or any other hematologic toxins.

(iii) The employer shall maintain this record for at least 40 years or for the duration of employment plus 20 years, whichever is longer.

(3) *Availability.* (i) The employer shall assure that all records required to be maintained by this section shall be made available upon request to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall assure that employee exposure measurement records as required by this section be made available for examination and copying to affected employees or their designated representatives.

(iii) The employer shall assure that former employees and the former employees' designated representatives have access to such records as will indicate the former employee's own exposure to benzene.

(iv) The employer shall assure that employee medical records required to be maintained by this section be made available upon request for examination and copying to a physician or other individual designated by the affected employee or former employee.

(4) *Transfer of records.* (i) When the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by paragraph (l) of this section for the prescribed period.

(ii) When the employer ceases to do business and there is no successor employer to receive and retain the re-

ords for the prescribed period, the employer shall transmit these records by mail to the Director.

(iii) At the expiration of the retention period for the records required to be maintained under paragraph (l) of this section, the employer shall transmit these records by mail to the Director.

(m) *Observation of monitoring.*—(1) *Employee observation.* The employer shall provide affected employees, or their designated representatives, an opportunity to observe any measuring or monitoring of employee exposure to benzene conducted pursuant to paragraph (e) of this section.

(2) *Observation procedures.* (i) When observation of the measuring or monitoring of employee exposure to benzene requires entry into areas where the use of protective clothing and equipment or respirators is required, the employer shall provide the observer with personal protective clothing and equipment or respirators required to be worn by employees working in the area, assure the use of such clothing and equipment or respirators, and require the observer to comply with all other applicable safety and health procedures.

(ii) Without interfering with the measurement, observers shall be entitled to:

(a) Receive an explanation of the measurement procedures;

(b) Observe all steps related to the measurement of airborne concentrations of benzene performed at the place of exposure; and

(c) Record the results obtained.

(n) *Appendices.* The information contained in the appendices is not intended, by itself, to create any additional obligations not otherwise imposed or to detract from any existing obligations.

APPENDIX A—SUBSTANCE SAFETY DATA SHEET, BENZENE

1. SUBSTANCE IDENTIFICATION

A. *Substance.* Benzene.
B. *Permissible Exposure:* Except as to the use as fuels of gasoline, motor fuels and other fuels subsequent to discharge from bulk terminals.

1. *Airborne.* 1 part of benzene vapor per million parts of air (1 ppm); time-weighted average (TWA) for an 8-hour workday for a 40-hour week, with a 15 minute ceiling concentration of 5 ppm.

2. *Dermal.* Eye contact and skin contact with liquid benzene shall be prohibited.

C. *Appearance and odor.* Benzene is a clear, colorless liquid with a pleasant, sweet odor. The odor of benzene does not provide adequate warning of its hazard.

II. HEALTH HAZARD DATA

A. *Ways in which the benzene affects your health.* Benzene can affect your health if you inhale it, or if it comes in contact with your skin or eyes. Benzene is also harmful if you happen to swallow it.

B. *Effects of overexposure.* 1. Short-term (acute) overexposure: If you are overex-

posed to high concentrations of benzene, well above the levels where its odors are first recognizable, you may feel breathless, irritable, euphoric, or giddy; you may experience irritation in eyes, nose, and respiratory tract. You may develop a headache, feel dizzy, nauseous, or experience unsteadiness in walking. Severe exposures may lead to convulsions.

2. *Long-term (chronic) exposure.* Repeated or prolonged exposure to benzene, even at relatively low concentrations, may result in various blood disorders, ranging from anemia to leukemia, an irreversible, fatal disease. Many blood disorders associated with benzene exposure may occur without physical symptoms.

III. PROTECTIVE CLOTHING AND EQUIPMENT

A. *Respirators.* Respirators are required for those operations in which engineering controls or work practice controls are not feasible to reduce exposure to the permissible level. If respirators are worn, they must have a National Institute for Occupational Safety and Health (NIOSH) seal of approval, and cartridges or canisters must be replaced before the end of their service life, or the end of the shift, whichever occurs first. If you experience difficulty breathing while wearing a respirator, tell your employer.

B. *Protective Clothing.* You must wear impervious protective clothing (such as boots, gloves, sleeves, aprons, etc.) over any parts of your body that could be exposed to liquid benzene.

C. *Eye and Face Protection.* You must wear splash proof safety goggles if it is possible that benzene may get into your eyes. In addition, you must wear a face shield if your face could be splashed with benzene liquid.

IV. EMERGENCY AND FIRST AID PROCEDURES

A. *Eye and face exposure.* If benzene is splashed in your eyes, wash it out immediately with large amounts of water. Call a doctor as soon as possible.

B. *Skin exposure.* If benzene is spilled on your clothing or skin, remove the contaminated clothing and wash the exposed skin with large amounts of water and soap immediately. Wash contaminated clothing before you wear it again.

C. *Breathing.* If you or any other person breathes in large amounts of benzene, get the exposed person to fresh air at once. Apply artificial respiration if breathing has stopped. Call for medical assistance or a doctor as soon as possible.

D. *Swallowing.* If benzene has been swallowed and the patient is conscious, do not induce vomiting. Call for medical assistance or a doctor immediately.

V. MEDICAL REQUIREMENTS

If you are exposed to benzene at a concentration at or above 0.5 ppm on an 8-hour time-weighted average, your employer is required to provide a medical history and laboratory tests within 30 days of the effective date of this standard and semiannually thereafter if you are continually exposed at or above 0.5 ppm. These tests shall be provided without cost to you. In addition, if you are accidentally exposed to benzene (either by ingestion, inhalation, or skin/eye contact) under conditions known or suspected to be toxic exposure to benzene, your employer is required to make special tests available to you.

VI. OBSERVATION OF MONITORING

Your employer is required to perform measurements that are representative of your exposure to benzene and you or your designated representative are entitled to observe the monitoring procedure. You are entitled to receive an explanation of the measurement procedure, observe the steps taken in the measurement procedure, and to record the results obtained. When the monitoring procedure is taking place in an area where respirators or personal protective clothing and equipment are required to be worn, you or your representative must also be provided with, and must wear the protective clothing and equipment.

VII. ACCESS TO RECORDS

You or your representative are entitled to see the records of measurements of your exposure to benzene upon request to your employer. Your medical examination records can be furnished to your physician or designated representative upon request to your employer.

VIII. PRECAUTIONS FOR SAFE USE, HANDLING AND STORAGE

Benzene liquid is highly flammable. It should be stored in tightly closed containers in a cool, well ventilated area. Benzene vapor may form explosive mixtures in air. All sources of ignition must be controlled. Use nonsparking tools when opening or closing benzene containers. Ground or bond metal benzene containers. Fire extinguishers, where provided, must be readily available. Know where they are located and how to operate them. Smoking is prohibited in areas where benzene is used or stored. Ask your supervisor where benzene is used in your work area and for additional plant safety rules.

APPENDIX B—SUBSTANCE TECHNICAL GUIDELINES, BENZENE

I. PHYSICAL AND CHEMICAL DATA

- A. Substance identification.
 1. Synonyms: Benzol, benzole, coal naphtha, cyclohexatriene, phenic, phenyl hydride, pyrobenzol. (Benzine, petroleum benzene, and benzol do not contain benzene.)
 2. Formula: C_6H_6 , (CAS Registry Number: 000071432)
 3. Physical data.
 1. Boiling Point (760 mm Hg): 80.1°C (176°F)
 2. Specific Gravity (water = 1): 0.879
 3. Vapor Density (air = 1): 2.7
 4. Melting Point: 5.5°C (42°F)
 5. Vapor Pressure at 20°C (68°F): 75 mm Hg
 6. Solubility in Water: .06%
 7. Evaporation Rate (ether = 1): 2.8
 8. Appearance and Odor: Clear, colorless liquid with a distinctive sweet odor.

II. FIRE, EXPLOSION, AND REACTIVITY HAZARD DATA

- A. Fire.
 1. Flash Point (closed cup): -11°C (12°F)
 2. Autoignition Temperature: 580°C (1076°F)
 3. Flammable Limits in Air, % by Volume: Lower 1.3%, Upper: 7.5%
 4. Extinguishing Media: Carbon dioxide, dry chemical, or foam.
 5. Special Fire-Fighting Procedures: Do not use solid stream of water, since stream will scatter and spread fire. Water spray can be used to keep fire exposed containers cool.
 6. Unusual fire and explosion hazards: Benzene is a flammable liquid. Its vapors

can form explosive mixtures. All ignition sources must be controlled when benzene is used, handled, or stored. Where liquid or vapor may be released, such areas shall be considered as hazardous locations. Benzene vapors are heavier than air; thus the vapors may travel along the ground and be ignited by open flames or sparks at locations remote from the site at which benzene is handled.

7. Benzene is classified as a *1 B flammable liquid* for the purpose of conforming to the requirements of 29 CFR 1910.106. A concentration exceeding 3250 ppm is considered a potential fire explosion hazard. Locations where benzene may be present in quantities sufficient to produce explosive or ignitable mixtures are considered *Class I Group D* for the purposes of conforming to the requirements of 29 CFR 1910.309.

B. Reactivity.

1. Conditions contributing to instability: Heat.
2. Incompatibility: Heat and oxidizing materials.
3. Hazardous decomposition products: Toxic gases and vapors (such as carbon monoxide).

III. SPILL AND LEAK PROCEDURES

A. Steps to be taken if the material is released or spilled. As much benzene as possible should be absorbed with suitable materials, such as dry sand or earth. That remaining must be flushed with large amounts of water. Do not flush benzene into a confined space, such as a sewer, because of explosion danger. Remove all ignition sources. Ventilate enclosed places.

B. Waste disposal method. Disposal methods must conform to other jurisdictional regulations. If allowed, benzene may be disposed of: (a) Absorbing it in dry sand or earth and disposing in a sanitary land fill; (b) If small quantities, by removing it to a safe location from buildings or other combustible sources, pouring it in dry sand or earth and cautiously igniting it; (c) If large quantities, by atomizing it in a suitable combustion chamber.

IV. MONITORING AND MEASUREMENT PROCEDURES

A. Normal monitoring program: Measurements taken from the purpose of determining employee exposure are best taken so that the representative average 8-hour exposure may be determined from a single 8-hour sample or two (2) 4-hour samples. Short-time interval samples (or grab samples) may also be used to determine average exposure level if a minimum of five measurements are taken in a random manner over the 8-hour work shift. Random sampling means that any portion of the work shift has the same chance of being sampled as any other. The arithmetic average of all such random samples taken on one work shift is an estimate of an employee's average level of exposure for that work shift. Air samples should be taken in the employee's breathing zone (air that would nearly represent that inhaled by the employee). Sampling must be performed by gas adsorption tubes or alternative methods meeting the requirements of the standard with subsequent chemical analysis, by gas chromatography. Methods meeting the prescribed accuracy and precision and requirements are available in the "NIOSH manual of Analytical Methods."

V. MISCELLANEOUS PRECAUTIONS

A. High exposures to benzene can occur when transferring the liquid from one container to another. Such operations should be well ventilated and good work practices must be established to avoid spills.

B. Use non-sparking tools to open benzene containers which are effectively grounded and bonded prior to opening and pouring.

C. Employers must advise employees of all plant areas and operations where exposure to benzene could occur. Common operations in which high exposures to benzene may be encountered are: the primary production and utilization of benzene, and transfer of benzene.

APPENDIX C—MEDICAL SURVEILLANCE GUIDELINES FOR BENZENE

I. ROUTE OF ENTRY

Inhalation; possible skin absorption.

II. TOXICOLOGY

Benzene is primarily an inhalation hazard. Systemic absorption may cause depression of the hematopoietic system and leukemia. Inhalation of high concentrations can affect the central nervous system function. Aspiration of small amounts of liquid benzene immediately causes pulmonary edema and hemorrhage of pulmonary tissue. The extent of absorption through the skin is unknown. However, absorption may be accelerated in the case of injured skin, and benzene may be more readily absorbed if it is present in a mixture or as a contaminant in solvents which are readily absorbed. Defatting action of benzene may produce primary irritation upon repeated or prolonged contact with the skin. High concentrations are irritating to the mucous membranes of the eyes, nose, and respiratory tract.

III. SIGNS AND SYMPTOMS

It is not clear to what extent benzene is absorbed through the skin, however, direct contact may cause erythema or blistering. Repeated or prolonged contact may result in drying, scaling dermatitis, or precipitate development of secondary skin infections. Local effects of benzene vapor or liquid on the eye are slight. Only at very high concentrations is there any smarting sensation in the eye. Inhalation of high concentrations of benzene may have an initial stimulatory effect on the central nervous system characterized by exhilaration, nervous excitation, and/or giddiness, followed by a period of depression, drowsiness, fatigue, or vertigo. There may be sensation of tightness in the chest accompanied by breathlessness and ultimately the victim may lose consciousness. Convulsions and tremors occur frequently, and death may follow from respiratory paralysis or circulatory collapse in a few minutes to several hours following severe exposures.

The insidious effect on the blood-forming system of prolonged exposure to small quantities of benzene vapor is of extreme importance. The hematopoietic system is the chief target for benzene's toxic effects which are manifested by alterations in the levels of formed elements in the peripheral blood. These effects have been noted to occur at concentrations of benzene which may not cause irritation of mucous membranes, or any unpleasant sensory effects. Early signs and symptoms of benzene morbidity are varied and often not overtly apparent and not specific for benzene exposure. Subjective complaints of headache,

dizziness, and loss of appetite may precede or follow clinical symptomatology. Bleeding from the nose, gums, or mucous membranes and the development of purpuric spots may occur as the condition progresses. Rapid pulse and low blood pressure in addition to a physical appearance of anemia may accompany a subjective complaint of shortness of breath. Clinical evidence of leukopenia, anemia, and thrombocytopenia, singly or in combination, have been frequently reported.

Bone marrow may appear normal, aplastic, or hyperplastic and may not in all situations correlate with peripheral blood forming tissues. There are great variations in the susceptibility to benzene morbidity which prohibits the identification of "typical" blood picture. The onset of effects of prolonged benzene exposure may be significantly delayed after the actual exposure has ceased.

IV. TREATMENT OF ACUTE TOXIC EFFECTS

Remove from exposure immediately, give oxygen or artificial resuscitation if indicated. Flush eyes and wash contaminated skin. Symptoms of non-specific nervous disturbances may persist following severe exposures. Recovery from mild exposures is usually rapid and complete.

V. SURVEILLANCE AND PREVENTIVE CONSIDERATIONS

A. GENERAL

The principal effects of benzene exposure forming the basis for this regulation are alterations of the hematopoietic system as reflected by changes in the peripheral blood and leukemia. Consequently, the medical surveillance protocol is designed to observe on a regular basis, blood indices for early signs of these effects.

Tests must be performed frequently enough to discover individuals who may be unusually sensitive and likely to develop marrow abnormalities, to monitor those who experience accidental overexposure and to provide early detection of delayed evidence of toxicity.

All workers who are or will be exposed to 0.5 parts per million (ppm) or greater benzene as an eight-hour time-weighted average are to be given the opportunity for a medical examination. Initial examinations are to be provided within 30 days of the effective date of this standard or at the time of initial assignment and interval examinations semi-annually thereafter. There are special provisions for medical tests in the event of hematologic abnormalities or for emergency situations.

F. HEMATOLOGY GUIDELINES

The following information excerpted from the analysis of Dr. Jandi, Chief of Hematology, Harvard School of Medicine, may be useful to physicians in conducting the medical surveillance program.

"A minimum battery of tests is to be performed by strictly standardized methods in the circumstances described above.

1. Red cell, white cell, and platelet counts must be performed using an automated (Coulter) counter. The normal range for the red cell count is approximately 4.4 to 6.0 million cells/mm³, the values for women being about 0.4 million cells lower than for men. A decline from a normal to a subnormal value, or a rise to a supra-normal value, are indicative of potential toxicity, particularly should there be a decline. The normal

total white blood count is approximately 6,200 plus or minus 2,000/mm³. For cigarette smokers and white count will be higher, the upper range of "normal" being approximately 1,000 cells higher than 8,200. Either a decline from normal to subnormal or a rise from normal to supra-normal, should be regarded as a potential indication of benzene toxicity. The normal platelet count is 250,000 with a range of 140,000 to (at most) 400,000/mm³. A decline to below 140,000 or a rise to above 400,000 should be regarded as possible evidence of benzene toxicity.

The reticulocyte count is performed by technical assistants using a cover-slip smear (see below). In my opinion, the preferred technique for this purpose is the so-called "dry-method" employing brilliant cresyl blue (BCB) for staining the filaments of reticulum within red cell, and counter-staining with Wright's stain. The extreme range of normal for reticulocytes is 0.4 to 1.5 percent of the red cells, the usual range being 0.5 to 1.2 percent of the red cells, but the typical value is in the range of 0.8 to 1.0 percent. There is an advantage of using the BCB reticulocyte staining technique (followed by counter-staining with Wright's stain) in that visible evidence (i.e., the stained, mounted reticulocyte smears) may be stored, and if kept filed in the dark may later be retrieved for reexamination and comparisons. A decline in reticulocytes to levels of less than 0.4 percent is to be regarded as possible evidence (unless another specific cause is found) of benzene toxicity requiring accelerated surveillance. An increase in reticulocyte levels to above 1.5 percent may also be consistent with (but is not as characteristic of) benzene toxicity.

2. The single most important routine surveillance test is an expert technician's careful examination of the peripheral blood smear. As with the reticulocyte count, the smear should be with fresh uncoagulated blood obtained from a needle tip following venipuncture or from a drop of earlobe blood (capillary blood). If necessary, the smear may under certain limited conditions be made from a blood sample anticoagulated with EDTA (but never with oxalate or heparin). When the smear is to be prepared from a specimen of venous blood which has been collected by a commercial Vacutainer[®] type tube containing neutral EDTA, the smear should be made as soon as possible after the venesection. A delay of up to 12 hours is permissible between the drawing of the blood specimen into EDTA and the preparation of the smear if the blood is stored at refrigerator (not freezing) temperature. As with the reticulocyte preparations, the smear should be made on cover slips only. Under no circumstances should peripheral blood (or bone marrow aspirate) intended for examination be smeared on microscope slides, a technique which produces artifacts in blood cells and distorts the white cell differential count by severely maldistributing them. Dry blood smears should be stained with Wright's stain which should be filtered at least weekly to remove precipitated dye (saturated completely by methylene blue-eosin derivatives).

3. The minimum mandatory observations to be made from the smear and a discussion of their significance now follows. The observations are four:

- a. The differential white blood cell count.
- b. Description of abnormalities in the appearance of red cells.
- c. Description of any abnormalities in the platelets.

d. A careful search must be made by the technician throughout the better areas of every blood smear for immature white cells such as band forms (in more than normal proportion), any number of metamyelocytes, myelocytes. Any nucleated or multinucleated red blood cells should be reported. Very large "giant" platelets or fragments of megakaryocytes must be recognized. Should only a single one of these abnormalities be found, it should be reported.

An increase in the proportion of band forms among the neutrophilic granulocytes is an abnormality deserving special mention for it represents a very early change which should be considered as an early warning of benzene toxicity in the absence of other causative factors (most commonly infection). Likewise, the appearance of metamyelocytes in the absence of other probable cause is to be considered a possible indication of benzene-induced injury.

An upward trend in the number of basophils, which normally do not exceed about 2.0 percent of the total white cells, is to be regarded as possible evidence of benzene toxicity. A rise in the eosinophil count is less specific but also may be suspicious of toxicity if it rises above 6.0 percent of the total white count.

The normal range of monocytes is from 2.0 to 8.0 percent of the total white count an average of about 5.0 percent. About 20 percent of individuals reported to have mild but persisting abnormalities caused by exposure to benzene show a persisting monocytosis which is sometimes striking. The findings of a monocyte count which persists at more than 10 to 12 percent of the normal white cell count (when the total count is normal) or persistence of an absolute monocyte count in excess 800/mm³ should be regarded as a possible sign of benzene-induced injury.

A less frequent but more serious indication of benzene-induced injury to the bone marrow is the findings in the peripheral blood of the so-called "pseudo" (or acquired) Pelger-Huet anomaly. In this anomaly many, or sometimes the majority, of the neutrophilic granulocytes possess two round nuclear segments—less often one or three round segments—rather than three normally elongated segments. When this anomaly is not hereditary, it is often but not invariably predictive of subsequent leukemia. However, only about two percent of patients who ultimately develop acute myelogenous leukemia show the acquired Pelger-Huet anomaly.

An uncommon but ominous sign, one which cannot be detected from the smear, but can be suspected easily by a "sucrose water test" or peripheral blood, is transient paroxysmal nocturnal hemoglobinuria (PNH), which may first occur insidiously during a period of established aplastic anemia and maybe followed within one to a few years by the appearance of rapidly fatal acute myelogenous leukemia. Clinical detection of PNH, which occurs in perhaps only one or two percent of those destined to have acute myelogenous leukemia, may be difficult; if the presumptive "sucrose water test" for it is positive, the technician may perform the somewhat more definitive Ham test, also known as the acid-serum hemolysis test.

e. Individuals documented to have developed acute myelogenous leukemia years after initial exposure to benzene, have (see above) progressed through preliminary phases of hematologic abnormality. In

UMI

many instances pancytopenia (i.e., a lowering in the counts of all circulating blood cells of bone marrow origin—but not to the extent implied by the term "aplastic anemia") preceded leukemia for many years. Seldom does relative scarcity of a single type blood cell (or of platelets) represent a harbinger of imminent acute leukemia. However, the finding of two or more cytopenias, or of pancytopenia, must be regarded as highly suspicious of more advance although still reversible, benzene toxicity. When "pancytopenia" develops and becomes associated with the appearance of immature cells (myelocytes, myeloblasts, erythroblasts, etc.), with abnormal cells (pseudo Pelger-Huet anomaly, atypical nuclear heterochromatin, etc.), or with inappropriate elevations of monocytes, basophils, or eosinophils, the findings must be regarded as evidence of benzene overexposure unless proved otherwise. These and other aggregates of alterations are frequently termed "preleukemia," a term whose meaning is good when used retrospectively, but less good when used prospectively where it has only inferential value. Many severely aplastic patients manifested the ominous finding of 5-10 percent myeloblasts in the marrow, occasional myeloblasts and myelocytes in the blood and 20-30% monocytes;

these represented the beginning of recovery rather than the early stage of overt AML. Thus, a considerable proportion of "preleukemias" in benzene poisoning fall to progress to leukemia. Indeed, some have been observed to revert to normal after withdrawal of the afflicted person from toxic exposure. Nonetheless, the chance that "preleukemic" (changes in general) will evolve to leukemia is considerable: at least 20 to 40 percent of persons (only a few of whom were benzene-exposed) with these blood changes develop acute myelogenous leukemia. Certain tests may substantiate the person's prospects for progression or regression. One such test would be an examination of patient's bone marrow. But the decision to perform a bone marrow aspiration or needle biopsy is one that should be made by the hematologist. The findings to be sought there would be: hypoplasia or aplasia; an excess of immature forms; vacuolation in erythroblasts and myelocytes—a phenomenon induced by many toxins apart from benzene, including chloramphenicol and alcohol; and by infections.

The findings of basophilic stippling in circulating red blood cells (usually found in 1 to 5% of red cell during marrow injury), and detection in the bone marrow of what are termed "ringed sideroblasts" must be taken

seriously, as they have been noted in recent years to be frequent premonitory signs of subsequent acute leukemia.

In several recent reports dealing with relatively few patients, peroxidase-staining of circulating or marrow neutrophil granules, employing benzidine dihydrochloride, has revealed as a "preleukemic" finding the disappearance of, or diminution in, peroxidase in a sizable proportion of the granulocytes. Granulocyte granules are normally strongly peroxidase positive. A steady decline in leukocyte alkaline phosphatase is also suggestive of early acute leukemia. Exposure to benzene commonly causes an early rise in serum iron, often but not always associated with a fall in the reticulocyte count. Thus serial measurements of serum iron levels provide a means of determining whether or not there is a trend representing sustained suppress of erythropoiesis.

Measurement of serum iron, determination of peroxidase and of alkaline phosphatase activity in peripheral granulocytes can be performed by technical assistants.

(Secs. 4, 8, 8, 84 Stat. 1593, (29 U.S.C. 653, 655, 657); Secretary of Labor's Order 8-78 (41 FR 25059); 29 CFR part 1911.)

General Wage Determination
Decisions

[4510-27]

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND
FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of

NOTICES

publication in the FEDERAL REGISTER without limitation as to time, and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDES DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedes Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedes Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedes Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Alabama: AL77-1085, July 22, 1977.
Arkansas: AR77-4285, AR77-4286, September 30, 1977.
Georgia: GA77-1103, GA77-1104, GA77-1111, August 26, 1977; GA77-1139, November 11, 1977.
Kentucky: KY77-1134, November 11, 1977.
Maryland: MD77-3000, January 27, 1977.
Mississippi: MS76-1004, January 9, 1976.
Nebraska: NE77-4281, NE77-4282, September 30, 1977.
New Jersey: NJ77-3093, July 8, 1977.
North Dakota: ND77-5099, December 2, 1977.
Oklahoma: OK77-4273, OK77-4274, September 30, 1977.
Virginia: VA77-3082, June 24, 1977; VA77-3088, VA77-3090, July 1, 1977.
Wyoming: WY78-5008, January 27, 1978.

SUPERSEDES DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being superseded and their dates of publication in the FEDERAL REGISTER are listed with each State.

Kansas: KS77-4079(KS78-4010), April 8, 1977.
New Mexico: NM77-4039(NM78-4011), February 18, 1977; NM77-4218(NM78-4012), September 9, 1977.
Ohio: OH77-2073(OH78-2003), OH77-2076(OH78-2002), OH77-2080(OH78-2004), May 13, 1977; OH77-2133(OH78-2005), September 2, 1977.

Signed at Washington, D.C. this 3d day of February 1978.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

CLASSIFICATION DEFINITIONS

Group 1 - Boilers (2); boom cat, boring machine, ditching machine, concrete mixer, plant, crane, truck, clamshell, dragline, dozer, scraper, all types; fireman (when operating steam or air valve); gradall, hi-loaders (over 1 yd); hoist; two; locomotive; mechanic or welder; mixer; mobile; paver, or any other machine with power swing; piledriver operator; power shovel; pump, concrete or other material
 Group 2 - A-frame truck; barber greene loader or similar type; bob cat hi-loaders (1 yd. and under); boiler (1); ditching machine-small; elevator operator; fireman; fork lift; greaser, equipment; hoist, one active drum; hydra hammer; jeep ditcher; mixer, other than paver; power broom, pump, 4" or larger, small machine engineer; veiding machine (1)
 Group 3 - (a) Farm tractor (without attachments)
 (b) Farm tractor (with attachments)
 Group 4 - (a) Oiler
 (b) Motor crane oiler
 Group 5 - Tower cranes and derricks; frankl-type piledriving machines; (4) drum hoist
 Group 6 - Crane & shovels 100 ft of boom or over (including jib) or 2 yds capacity or over or .30 tons or over; (3) drum hoist

DECISION NO. KS78-4010

Group 7 - Crane & shovels booms 200 ft and over
 Group 8 - Cranes with lifting ring
 Group 9 - Master mechanic
 Hoist each additional drum over two - an additional .25c

PAINTERS' ZONE AND CLASSIFICATION DEFINITIONS

PAINTERS:

ZONE I - San Juan, McKinley, Bernalillo, Torrance, Guadalupe, Quay, Catron, Socorro, Lincoln, DeSaca, Roosevelt, Chaves, Valencia, Sierra, Grant, Hidalgo, Curry, Lea and Eddy Counties, New Mexico.

Zone 1-A - Painters, roller and hand textures

Zone 1-B - Painters, spray, sandblasting, painter on steel bridges, tanks towers, pipe and structural

Zone 1-C - Paperhanger

Zone 1-D - Drywall finisher, area tool operator

Zone 1-E - Blend finisher machine texture

ZONE II - Colfax, Hardin, Los Alamos, Mora, Sandoval, San Miguel, Rio Arriba, Taos, Union and Santa Fe Counties

Zone 2-A - Painters and roller

Zone 2-B - Paperhangers

Zone 2-C - Spray, sandblast, steel, special coating applicator

Zone 2-D - Vinyl hangers

Zone 2-E - Drywall finisher tool and machine texture

Zone 2-F - Hand texture

Zone 2-G - Band finisher

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (BUILDING & RESIDENTIAL)

GROUP I - Fireman, oiler, screedman, scale operator such as (bin-a-batch), rubber tired farm type tractor, tractors under 50 HP w/o attachments, breakman, concrete paving curing machine (bridge-type), helpers, mechanic, welder, grease truck

GROUP II - Roller, sheepfoot or pneumatic self propelled w/o dozer, concrete conveyor, service truck operator (head oiler), air compressor (300 CFM and over), pumps (6" and over), screening plants, concrete mixers (under 1 CY), concrete saw or grinder-span type, 1 drum hoists, air tugger, elevating belt type loaders, forklift, lumber stacker, tractor-farm type (under 50 hp w/attachments), motorman and industrial locomotive operator, winch trucks, front end loader (under 2 CY), power plants which generate over 15 KW, welding machines

GROUP III - Bituminous distributors, boilers, retort and hot oil heaters, concrete mixers (1 CY and over), concrete paver-single drum, drilling equipment, motor graders (rough), shaft and tunnel equipment (refrigeration, aluher, jumbo foral), trenching machines (all types), pumpcrete and gunite machines, slipform paver, mechanical bulfloats, concrete slab spreading machine, concrete slab finishing machines, crushing plants.

GROUP IV - Front end loader (2 thru 10 CY), rollers, steel wheeled-all types, bulldozers, scrapers, (motor or towed), elevating graders, concrete batching plants, self propelled rollers equipped with dozer. Twin bowl scrapers and quad 8 or 9 pushers (35¢ over basic rate). Three bowl scrapers (60¢ over basic rate). Tractor (farm type w/hydraulic backhoes).

GROUP V - Hydraulic cranes with less than 50 feet of boom (20 tons and under). Concrete paver double drum. 2 drum hoist, auto fine grader, cat cranes, hysters, side and swingboom cats.

GROUP VI - Mucking machines, all types; motor grader, finisher, mechanic, welder

GROUP VII - Steam engines/loader (front end over 10 CY); concrete pump (snorkel type)

GROUP VIII - All shovel type equipment; cranes, draglines, backhoes, derricks, guy and stiff leg, pipemobile (No. 2 op.), pile driver, hydraulic crane (20 tons and over), mine hoist, belt loader ("C.M.I." type), cranes & draglines, winch booms and jib over 150 feet - 25¢ per hour additions.

GROUP IX - Shovel (wheel type), boring machine (tunnel or shaft mole), pipemobile

PAID HOLIDAYS:

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;
E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:

- a. 2 paid holidays: B & D
b. 7 paid holidays: A through F, 6 Day after Thanksgiving
c. Employer contributes 8% of regular hourly rate to vacation pay credit for employee who has worked in business more than 5 years. Employer contributes 6% of regular hourly rate to vacation pay credit for employee who has worked in business less than 5 years.
d. 9 paid holidays: A through F, Washington's Birthday, Good Friday, & Christmas Eve providing employee has worked 45 full days during the 120 calendar days prior to the holiday, and the regular scheduled work days immediately preceding and following the holiday.
e. 1 paid holiday: D providing the employee has worked 5 consecutive days before and after the holiday.

LABORERS (Ashtabula County):
Sheeting & Shoring Men; Asphalt
Rakers & Tampers; Dumpmen
(Batch Truck); Signalmen;
Concrete Workers; Building
Wreckers; Tool Checkers;
Carpenters' Tenders; Con-
struction Laborers; All work
not mentioned in classifica-
tions below to be paid at the
rate of construction laborers

PART IV

DEPARTMENT OF
STATE

FISHERY
CONSERVATION AND
MANAGEMENT ACT
OF 1976

Applications for Permits To Fish
Off Coasts of U.S.

6008

NOTICES

[4710-01]

DEPARTMENT OF STATE

[Public Notice 592]

FISHERY CONSERVATION AND MANAGEMENT
ACT OF 1976Applications for Permits To Fish Off the Coasts
of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after Febru-

ary 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Additional applications for fishing during 1978 have been received from the Governments of Korea, Japan and Mexico and are published herewith.

Dated: February 6, 1978.

DONALD J. YELLMAN,
Acting Director,
Office of Fisheries Affairs.

NOTICES

FISHING VESSEL IDENTIFICATION FORM (FOREIGN)

NO. MX-78-0025

1. Name of Vessel ESPAÑOL I 2. Vessel Identifier (Call Sign) XCAL
3. Type of Vessel STERN TRAWLER 4. Length 45 mts.
5. Gross Tonnage 489 6. Net Tonnage 220 7. Speed (knots) 13
8. Owner's Name and Address COMPANIA IMPULSORA DEL CALAVAR, S.A.
CALLE 20/25 CIUDAD DEL CARMEN, CAMPECHE, MEXICO
9. Types of Processing Equipment FREELER

10. Fisheries for Which Permit is Requested:

Fishery	Target Species	Gear To Be Used	Catching	Processing	Other Support
N W A	LONG-FINNED SQUID	BOTTOM TRAWL	X	X	
N W A	SHORT-FINNED SQUID	BOTTOM TRAWL	X	X	

11. Are Fishing Activities Requested in Support of Vessels of a Different Flag:

☒ No ☐ Yes (If yes, attach supplemental sheet showing flag of other vessels, fishery, species, quantities, dates, locations and specific activities requested.)

FISHING VESSEL IDENTIFICATION FORM (FOREIGN)

NO. MX-78-0026

1. Name of Vessel FARFALLEIRO 2. Vessel Identifier (Call Sign) XCAZ
3. Type of Vessel STERN TRAWLER 4. Length 79 mts.
5. Gross Tonnage 1,330 6. Net Tonnage 775 7. Speed (knots) 15
8. Owner's Name and Address DESCARDOES DE MEXICO, S.A. DE C.V.
AV. TROTSKY 198, MATATLAN, SINALOA
9. Types of Processing Equipment FLASH FREEZER, HEADER, Eviscerator,
FILLETER, FISH MEAL PLANT, COD LIVER OIL PLANT.

10. Fisheries for Which Permit is Requested:

Fishery	Target Species	Gear To Be Used	Catching	Processing	Other Support
N W A	LONG-FINNED SQUID	BOTTOM TRAWL	X	X	
N W A	SHORT-FINNED SQUID	BOTTOM TRAWL	X	X	

11. Are Fishing Activities Requested in Support of Vessels of a Different Flag:

☒ No ☐ Yes (If yes, attach supplemental sheet showing flag of other vessels, fishery, species, quantities, dates, locations and specific activities requested.)

FISHING VESSEL IDENTIFICATION FORM (FOREIGN)

NO. JA-78-0091

1. Name of Vessel EBISU MARU NO.21 2. Vessel Identifier (Call Sign) JROU
3. Type of Vessel DANISH SEINER 4. Length 32 M.
5. Gross Tonnage 124 M.T. 6. Net Tonnage 42 M.T. 7. Speed (knots) 12 KT.
8. Owner's Name and Address KARUHO SUISEN CO., LTD.
3-7-5, SHIKINAI, OTARU-CITY, HOKKAIDO, JAPAN
9. Types of Processing Equipment FLASH FREEZER

10. Fisheries for Which Permit is Requested:

Fishery	Target Species	Gear To Be Used	Catching	Processing	Other Support

NOTICES

THE UNITED STATES OF AMERICA
DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
APPLICATION FOR VESSEL PERMITS TO FISH WITHIN THE
FISHERY CONSERVATION ZONE OF THE UNITED STATES

In accordance with the provisions of the Fishery Conservation and Management Act of 1976, the Government of the Republic of Korea hereby submits this application for permits to fish within the Fishery Conservation Zone of the United States, or beyond that zone for vessels subject to the jurisdiction of the United States, during the year 1978.

Fishing vessel identification forms will be submitted in support of this application. The fishery plans, species, and catch contemplated for vessels of the Korean flag are as follows:

Fishery Plans	Target Species	Area of Operation
GOA	Processing & Transporting	

Submitted January 23 1978
Date

Book Neung and Soo Gong No. 51
(KS-78-0079) (KS-78-0042)

Material for Question No. 11:

Specific Activities requested: Purchase of raw fish from U.S. vessels for processing and shipment to Korea.

Flag of other vessels: U.S.

Fishery: GOA - Bottomfish fishery.

Species: Primary Pollock and incidental species including POP, Pacific cod, flounders, rockfish and other species.

Quantity: Project Target is 130,000 MT. Realizing that TALFF has been distributed there is only approximately 72,800 MT of fish available for U.S. fishermen, 36,400 MT is requested for each vessel.

Locations: Various locations within the U.S. Fishery Conservation Zone in the Gulf of Alaska.

Dates: April 1 - December 31, 1978 which will depend upon culmination of arrangements with U.S. fishermen.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER J—HEALTH CARE DELIVERY SYSTEMS

PART 110—HEALTH MAINTENANCE ORGANIZATIONS

Interim Regulations

AGENCY: Public Health Service, HEW.

ACTION: Interim Regulations.

SUMMARY: The program requirements set out in the interim regulations published on June 8, 1977, in the FEDERAL REGISTER (42 FR 29400-29416) have been amended by these regulations. The purpose is to expand and clarify the requirements of the existing regulations with respect to entities requesting Federal financial assistance for feasibility surveys, planning and initial development, and initial operating costs of health maintenance organizations. Federal financial assistance for grant and loan support for the development and initial operating costs of health maintenance organizations is authorized under Title XIII of the Public Health Service Act, "Health Maintenance Organizations" (42 U.S.C. 300e et seq.), as amended by the Health Maintenance Organization Amendments of 1976 (Pub. L. 94-460).

EFFECTIVE DATE: February 10, 1978. Comments are due on or before April 11, 1978.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections to the amended Subpart C—Grants for Feasibility Surveys, Subpart D—Grants and Loan Guarantees for Planning and for Initial Development Costs, and Subpart E—Loans and Loan Guarantees for Initial Operating Costs, to the Director, Division of Health Maintenance Organizations Development, Office of the Assistant Secretary for Health, Room 12-05, 5600 Fishers Lane Rockville, Md. 20857. All comments timely received will be considered and will be available for public inspection at the above address during regular business hours. Following the close of the comment period, these regulations will be revised as warranted by the public comments received.

FOR FURTHER INFORMATION CONTACT:

Frank H. Seubold, Ph. D., Director, Division of Health Maintenance Organizations Development, 5600 Fishers Lane, Parklawn Building, Room 12-05, Rockville, Md. 20857, 301-443-4106.

SUPPLEMENTARY INFORMATION: The Health Maintenance Organization

Act of 1973, Pub. L. 93-222, was approved on December 29, 1973, and amended the Public Health Service Act to provide assistance and encouragement for the establishment and expansion of health maintenance organizations (HMOs). Final rules with respect to the HMO Act were published in the FEDERAL REGISTER on October 18, 1974. These rules set forth requirements for applicants requesting Federal financial assistance for the development and initial operation of HMOs. The Health Maintenance Organization Amendments of 1976, Pub. L. 94-460, became law on October 8, 1976, and extended the present Federal financial assistance program as follows:

1. Grants for feasibility surveys through September 30, 1978.

2. Grants and loan guarantees for planning projects through September 30, 1978.

3. Grants and loan guarantees for initial development projects through September 30, 1979.

4. Loans and loan guarantees for initial operating costs through September 30, 1980.

After the Health Maintenance Organization Amendments of 1976 became law, there was a need to revise the October 18, 1974, regulations as soon as possible, since the new law moderated certain restrictive provisions of the original Act. Accordingly, interim regulations were published on June 8, 1977. Since there was an urgency to issue these interim regulations, only minimal revisions necessary to eliminate conflicts with the new law were made in order to allow the activities of the health maintenance organization program to be administered under the authority of the 1976 amendments. In the preamble to the June 8 regulations, the Department stated that it intended to issue a notice of proposed rulemaking which would have proposed to revise those regulations and implement all of the provisions of the new law; however, it has been determined upon reconsideration that the Subparts C, D, and E set forth below could be issued without notice of proposed rulemaking since the changes made are largely administrative and technical and not substantive in nature.

Notice of proposed rulemaking has been omitted in the issuance of these regulations as impractical and contrary to the public interest. Subparts C, D, and E of the regulations are needed as soon as possible so applicants can meet statutory deadlines providing that initial development projects can be funded only through fiscal year 1979. If applicants are to meet this schedule, feasibility studies must be completed early in fiscal year 1978 and planning applications must be funded prior to fiscal year 1979. To submit these amendments to public

participation in rulemaking before making them effective would necessarily result in excessive delays in meeting this schedule.

In addition to revisions required by the Health Maintenance Organization Amendments of 1976, revisions have also been made as a result of 3 years of program experience in reviewing and evaluating over 500 applications requesting Federal financial assistance under Title XIII. Administrative and technical changes have been made by refining and clarifying certain tasks required of applicants in conducting feasibility surveys, and in carrying out planning and initial development projects. Appropriate revisions have been made in the respective evaluation and award sections to conform with the changes in the project element sections of the regulations.

Attention is called to the following revisions:

1. Section 110.403(f)(5). The program requirements for developing a sound marketing plan in the planning phase of the project have been defined and clarified. A study conducted by the Division of Health Maintenance Organizations noted marketing deficiencies as the major cause for denial or delay in determination of qualification in over 90 percent of the applications studied.

2. Section 110.407(b) Length and maturity of loans; Section 110.505 Reserve requirement; Section 110.508(b) Length and maturity of loans. The length and maturity of loans and the accumulation period for reserve requirements have been adjusted to conform with the statute, which added two years to the period for which the loan or loan guarantee assistance monies may be used. Accordingly, the allowable loan repayment period and the deadline for accumulating the restricted reserve have also been extended for two years.

3. Sections 110.405 (a)(2), (b)(3) and 110.503(b)(2). In order to be eligible for loan guarantees, private (other than nonprofit private) health maintenance organizations must serve or propose to serve medically underserved areas. To assure that health maintenance organizations receiving loan guarantees provide a significant level of service to such areas, the Department has amended §§ 110.405 (a)(2), (b)(3) and 110.503(b)(2) to set a 10 percent level as the requirement for eligibility for loan guarantees for private (other than nonprofit private) health maintenance organizations.

4. Section 110.507. The provision was added limiting the aggregate amount of principal of loans made or guaranteed under section 1305 of the Act for a health maintenance organization to an amount not to exceed \$2,500,000. This is a statutory requirement and

was inadvertently omitted from the existing interim regulations.

5. Delete former § 110.507(b). Program experience in making over 30 loans since December 1974 has proven the impracticability of the provision which limits loans and loan guarantees to two-thirds of the Secretary's projection of the amount by which operating costs during a period not to exceed the first 60 months of operation exceed revenues for such period. Health maintenance organizations' applications approved for loan or loan guarantee assistance to date, with only one exception, have requested and received a waiver of the two-thirds limitation requirement. These waivers were based on evidence that they could not obtain one-third of the projected loan needs from private sources. Since this provision is not a statutory requirement, it was deleted from the regulations.

6. The last sentence in § 110.407(c), relating to loan guarantees for planning and initial development assistance, had provided that "Principal repayment during the first 36-months of operation may be deferred, with payment of interest only by the applicant during such period." The 36 month deferral period has been deleted to make clear that a deferral of payment for 36 months of operation was not mandatory, inasmuch as this provision allowed for deferral of principal repayments during the first 36 months of operation in addition to the planning and initial development periods. It is felt that the financial interest of the Government would best be served by the Secretary negotiating a deferral period with each applicant.

7. In §§ 110.303(h) and 110.403(b), the requirement that the applicant shall assure cooperation was expanded to include both the appropriate health systems agency and the State health planning and development agency. Pub. L. 93-641, approved on January 4, 1975, amended the Act to make health maintenance organizations subject to State certificate of need programs (administered by State health planning and development agencies) under Section 1523(a)(4)(B) of the Act. Accordingly, applicants for feasibility and planning projects are now required to show evidence of their cooperation with both agencies.

8. The establishment of the individual practice association has been added as § 110.403(f)(12) as an essential planning activity for proposed health maintenance organizations planning to provide services through an individual practice association. Over three years of developmental assistance activity have been demonstrated that the actual establishment of an individual practice association is essential to facilitate transition into operational status.

The following is a status report on other provisions of the health maintenance organizations regulations under Part 110:

Regulations	Status
Subpart A—Requirements for a Health Maintenance Organization.	To be reorganized and new definitions to be added—to be issued as a notice of proposed rulemaking.
Subpart B—Federal Financial Assistance: General.	Health systems agency review criteria to be revised and procedures to be added—to be issued as a notice of proposed rulemaking.
Subpart F—Qualification of Health Maintenance Organizations.	Revisions of § 110.605 are being considered with respect to evaluation and determination of qualification.
Subpart G—Restrictive State Laws and Practices.	No changes under consideration.
Subpart H—Employees' Health Benefits Plans.	To be revised to conform with amended law—to be issued as a notice of proposed rulemaking.
Subpart I—Continued Regulation of Health Maintenance Organizations and Other Entities and.	Published as a notice of proposed rulemaking in the FEDERAL REGISTER (41 FR 40292-40295) on September 17, 1976.
Subpart J—Reconsiderations and Hearings.	To be revised to conform with amended law—to be issued as a notice of proposed rulemaking.

The Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, hereby amends the following Subparts of 42 CFR Part 110 as follows: Subpart C—Grants for Feasibility Surveys; Subpart D—Grants and Loan Guarantees for Planning and for Initial Development Costs; and Subpart E—Loans and Loan Guarantees for Initial Operating Costs.

NOTE.—The Department of Health, Education, and Welfare, has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: October 4, 1977.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: February 2, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary.

AUTHORITY: Sec. 215, 58 Stat. 690 (42 U.S.C. 216); secs. 1301-1316, as amended, 90 Stat. 1945-1960 (42 U.S.C. 300e-300e-15).

Subpart C—Grants for Feasibility Surveys

§ 110.301 Applicability.

The regulations of this subpart, in addition to the regulations of Subpart B of this part, are applicable to grants awarded pursuant to section 1303 of the Act for projects to conduct surveys or other activities to determine the feasibility of developing and operating or expanding the operation of health maintenance organizations.

§ 110.302 Eligibility.

(a) *Eligible applicants.* Any public or private nonprofit entity which is or proposes to develop or become a health maintenance organization is eligible to apply for an award under this subpart, except that in the case of applications for support of expansion, only organizations which have been found by the Secretary to be qualified health maintenance organizations are eligible to apply.

(b) *Eligible projects.* Awards may be made pursuant to section 1303 of the Act, the regulations of Subpart B of this part, and this subpart, to eligible applicants to assist in conducting surveys or other activities to determine the feasibility of developing or expanding the operation of organizations which meet or propose to meet the requirements under subpart A of these regulations.

§ 110.303 Project elements.

An approvable application must provide:

(a) Statements which describe concisely:

(1) The goals and objectives of the applicant organization and of the proposed health maintenance organization if the proposed health maintenance organization is different from the applicant organization; if it is different, describe the relationship between the two organizations;

(2) The administrative, managerial, and organizational arrangements;

(3) The resources to be used, including consultants whose tasks must be defined adequately to permit an evaluation of the need for such consultants;

(4) The existing or proposed composition of the Board of Directors of the applicant organization and its duties;

(5) The proposed service area and the surrounding community, the number of employed persons and number of primary care physicians located in the proposed service area; and

(6) Intended financial participation of the applicant, specifying the type of contribution, such as cash or services, loan of full- or part-time staff, equipment, space, materials, or other contributions.

(b) In the case of a proposed staff or medical group health maintenance organization, letters from at least three physicians expressing their interest in the health maintenance organization feasibility study in connection with their eventual participation in the health maintenance organization as providers of basic health services.

(c) In the case of a proposed individual practice association health maintenance organization, letters from the local medical society or societies, or from at least three individual physicians, expressing their interest in the health maintenance organization feasibility study in connection with their eventual participation in the health maintenance organization as providers of basic health services.

(d) Evidence that there is interest in the possible development of a health maintenance organization from one or more employers, or unions, or community leaders in the proposed service area.

(e) Plans for conducting the feasibility study which must include a consolidated time-phased milestone chart indicating proposed funding and manpower to be allocated to each of the six activities below, and a narrative explanation of work plans to accomplish the six activities:

(1) Identification of pertinent State laws, regulations, and practices relating to the intended organizational structure and operation as a health maintenance organization;

(2) Identification of major groups or other potential sources of enrollment to which marketing efforts will be directed, including their existing health plan benefits and payments and the level and scope of major health plan benefits and premiums in the community;

(3) Identification of potential providers and available health manpower necessary to provide basic health services to the number of enrollees projected to be served, and provision of evidence of their willingness to participate in the proposed health maintenance organization;

(4) Development of detailed estimates of expected utilization and the

amount to be charged for basic health services when the proposed health maintenance organization becomes operational;

(5) Development of detailed estimates of the enrollment and funds required to reach the financial break-even point. These estimates must take into account all potential sources of income; and

(6) Development of preliminary estimates of the type and number of facilities, if any, necessary to provide health services when the health maintenance organization becomes operational.

(f) In addition, in the case of an operational prepaid health plan which proposes to become a qualified health maintenance organization, an identification of gaps between its current operation and the requirements of subpart A of this Part.

(g) In addition, in the case of a qualified health maintenance organization requesting assistance for significant expansion:

(1) Data on prepaid membership totals for annual intervals over the past five years, or if the health maintenance organizations has not been operating for five years, such data on a quarterly basis for the time during which it has been in operation;

(2) A description of the current health service delivery facilities, including an estimate of their capacity;

(3) The number and specialties of current health professionals serving its members; and

(4) The plans for the proposed significant expansion which demonstrate that the definition of significant expansion in § 110.202(c) will be met.

(h) An assurance that the applicant will cooperate with the appropriate health systems agency and State health planning and development agency; and

(i) Written evidence of notification to the local medical society or societies of the applicant's intention to apply for assistance.

§ 110.304 Evaluation and award.

(a) Within the limits of funds available for such purpose, the Secretary may make awards to cover up to 90 percent of the cost of projects, or in the case of projects which will draw not less than 30 percent, not more than the appropriate percentage (as determined under § 110.108(c)), of their anticipated enrollment from medically underserved populations, up to 100 percent of the costs, to those applicants whose projects will, in his judgment, best promote the purposes of section 1303 of the Act and the regulations of this subpart, taking into account:

(1) The appropriateness and completeness with which the applicant addresses the project elements set forth above;

(2) The comments of the appropriate health systems agency or State health planning and development agency;

(3) The degree to which the goals and objectives of the proposed project will promote the purposes of the Act and are consistent with the generally recognized capability of effectively organized and managed health maintenance organizations to reduce inappropriate hospital utilization, to contain health care costs, to use effectively medical and other health manpower, to emphasize early detection and treatment of illness, and to contribute to a better distribution and quality of health care;

(4) Satisfactory evidence of understanding and commitment to the development of a qualified health maintenance organization on the part of the sponsors and the board of directors of the proposed project;

(5) The qualifications of the project director or proposed project director or other person responsible for completion of the feasibility study and a position description adequate to assure that a well-qualified person has been or will be selected;

(6) The thoroughness of the milestone chart and narrative plan for conducting the feasibility study by project staff and any proposed consultants;

(7) The indications of interest obtained from physicians with respect to their eventual participation as providers of basic health services;

(8) The probability of financial viability based on potential sources of financial support for development and operations, on potential sources of enrollment, and on the effect of competing health insurance plans;

(9) The inclusion of medically underserved populations in the projected enrollment;

(10) The location and the number of prepaid health plans already providing health services to a defined population in the applicant's proposed service area and to the extent known the number of organizations already studying health maintenance organization development in the proposed service area;

(11) The level of the applicant's intended contribution to the project;

(12) In the case of an existing prepaid health plan, the potential to become a qualified health maintenance organization;

(13) In the case of expansion projects, the potential rate of increase of expansion, or the potential increase in the area to be served by the expanded health maintenance organization.

(b) In considering applications under this subpart, the Secretary will give priority to applications which contain assurances satisfactory to the Secretary that when the organizations

become operational not less than 30 percent of their members will be members of a medically underserved population.

§ 110.305 Funding duration and limitation.

(a) The amount of any award shall be determined by the Secretary on the basis of his estimate of the sum necessary for project costs: *Provided, however*, That any single grant may not exceed \$75,000.

(b) Feasibility survey applicants may propose that the award period be 12 months or less. Feasibility survey projects shall be completed within the period of the award. The Secretary may make not more than one additional grant for a project for a feasibility survey for which a grant has previously been made, and may permit additional time (up to 12 months) for completion of the project if he determines that the additional grant or additional time, or both, is needed to complete the project adequately.

(c) Funds under grants for feasibility surveys shall be used only for activities set forth in § 110.303(e) and for activities designed to fill the gaps referred to in § 110.303(f).

Subpart D—Grants and Loan Guarantees for Planning and Initial Development Costs

§ 110.401 Applicability.

The regulations of this subpart, in addition to the regulations to Subpart B of this part, are applicable to:

(a) Grants awarded pursuant to section 1304 of the Act for projects for planning, and initial development of health maintenance organizations or for significant expansion, as defined in § 110.202(c), of the membership of, or areas served, by qualified health maintenance organizations, and

(b) Guarantees made to non-Federal lenders of payment of the principal of and the interest on loans made to—

(1) Nonprofit private entities for such projects for the establishment or expansion of health maintenance organizations, or

(2) Private entities (other than nonprofit private entities) for such projects for health maintenance organizations which will serve medically underserved populations.

§ 110.402 Eligibility.

(a) *Eligible applicants.* (1) Any public entity which is or which proposes to become a health maintenance organization is eligible to apply for a grant under this subpart, except that in the case of applications for support of expansion, only organizations which have been found by the Secretary to be qualified health maintenance organizations are eligible to apply.

(2) Any nonprofit private entity which is or which proposes to become

a health maintenance organization is eligible to apply for a grant or a loan guarantee under this subpart, except that in the case of applications for support of expansion, only organizations which have been found by the Secretary to be qualified health maintenance organizations are eligible to apply.

(3) Any private entity (other than a nonprofit private entity) which is or which proposes to become a health maintenance organization and which proposes to serve a medically underserved population is eligible to apply for a loan guarantee under this subpart, except that in the case of applications for support of expansion, only organizations which have been found by the Secretary to be qualified health maintenance organizations are eligible to apply.

(b) *Eligible projects.* (1) *Grants.* Awards of grants may be made pursuant to section 1304 of the Act and the regulations of Subpart B of this part and this subpart to eligible applicants for planning for the establishment of health maintenance organizations, or for the significant expansion of the membership of, or areas served by the health maintenance organizations meeting the requirements of Subpart A of this part, or for the initial development or significant expansion of such organizations;

(2) *Loan guarantees.* (i) In the case of nonprofit private entities, guarantees may be made pursuant to section 1304 of the Act and the regulations of Subpart B of this part and this subpart to eligible applicants for the payment of the principal of and the interest on loans for planning projects for the establishment of health maintenance organizations, or the significant expansion of existing organizations which have been found by the Secretary to meet the applicable requirements of Title XIII of the Act and the applicable regulations of this part, or for the initial development or significant expansion of such health maintenance organizations.

(ii) In the case of private entities (other than nonprofit private entities), guarantees may be made pursuant to section 1304 of the Act and the regulations of Subpart B of this part and this subpart to eligible applicants for the payment of the principal of and the interest on loans for planning projects for the establishment of health maintenance organizations, or the significant expansion of existing organizations which have been found by the Secretary to meet the applicable requirements of Title XIII of the Act and the applicable regulations of this part, or for the initial development or significant expansion of such health maintenance organizations: *Provided*, That at least 30 percent of the projected members of such organizations are

from medically underserved populations.

§ 110.403 Project elements for planning.

An approvable application must provide:

(a) Statements which describe in detail:

(1) The goals and objectives of the proposed health maintenance organization;

(2) The administrative, managerial, and organizational arrangements;

(3) The resources to be used including consultants whose tasks must be defined adequately to permit an evaluation of the need for such consultants;

(4) The existing or proposed composition of the Board of Directors of the applicant organization and its duties;

(5) The proposed service area and the surrounding community, the number of employed persons and number of primary care physicians located in the proposed service area; and

(6) The intended financial participation of the applicant, specifying the type of contribution such as cash or services, loans of full- or part-time staff, equipment, space, materials, facilities, or other contributions.

(b) An assurance that the applicant will cooperate with the appropriate health systems agency and State health planning and development agency.

(c) Written evidence of notification to the local medical society or societies of the applicant's intention to apply for assistance.

(d) Evidence that there is support for the project by organizations, or institutions, or employer groups which may participate in the development of the proposed health maintenance organization.

(e) A detailed report of the results of the activities performed during the feasibility survey or study which established the feasibility of developing the health maintenance organization, as well as of any other activities relating to the development of the health maintenance organization undertaken prior to application for planning assistance. With regard to the report of the feasibility survey, information on the following must be included:

(1) Status of the applicant in terms of pertinent State laws, regulations, and practices relating to operating as a health maintenance organization;

(2) Organizational structure of the proposed health maintenance organization;

(3) The types of population groups which would be sources of prepayment for an operational health maintenance organization and other potential sources of payment for services when operational;

(4) Providers of basic health services who have agreed or might reasonably be expected to agree to provide health benefits;

(5) Sources of payment and operational support including:

(i) Preliminary estimate of the amount to be charged for basic health benefits when the proposed health maintenance organization becomes operational; and

(ii) Estimate of enrollment and income required to reach the financial breakeven point; and

(6) A preliminary estimate of facilities required for operational status.

(f) Concise plans for accomplishing planning stage activities, which must include at a minimum, a description of tasks for each activity listed below, accompanied by a time-phased milestone chart indicating proposed funding and manpower to be allocated to each such activity (where circumstances indicate that it would be appropriate and consistent with the intent of the Act, additional activities may be proposed):

(1) Recruitment of key project staff which shall include the employment of a full-time project director;

(2) Planning for, and when appropriate, initiation of action relating to compliance with all applicable State requirements, including State certificate of need programs, and with section 1513(e) of the Public Health Service Act;

(3) Development of formal organization;

(4) Establishment and documentation of community support;

(5) Development of a marketing plan which must include the following:

(A) Market assessment;

(A) Precise description of the service area;

(B) Information about prospects for enrollment of groups, including analysis of competing health benefits plans;

(C) Evidence of a willingness on the part of key prospects to offer the health maintenance organization when operational;

(D) An estimate of market potential for a five year period, including a five year enrollment projection.

(ii) Marketing strategy:

(A) Select the major prospects for enrollment;

(B) Develop alternatives to meet the enrollment projections;

(C) Estimate the level and type of marketing effort required to meet the enrollment projection;

(D) Develop a marketing effort and a detailed budget including staffing requirements.

(iii) Marketing materials:

(A) Develop detailed description of specifications for marketing and enrollment literature;

(B) Develop prototype membership materials including membership cards, subscriber agreements, handbooks and certificates, health questionnaires, etc.

(6) Definition of the health services and options, if any to be offered;

(7) Identification of providers of basic health services needed to provide

those services to the projected enrollment, and drafting of proposed agreements to negotiate with these providers;

(8) Planning for necessary facilities and equipment and their financing;

(9) Development of premium structure;

(10) Development of budget and financial plan, including alternative plans if enrollment varies significantly from projections;

(11) Obtaining of required health systems agency or agencies and State health planning and development agency determinations; and

(12) Establishment of the individual practice association entity if appropriate to the intended organizational structure when operational as a health maintenance organization.

(g) In addition, in the case of an operational prepaid health plan which proposes to become a qualified health maintenance organization, an identification of gaps between its current operation and the requirements of Subpart A of this part.

(h) In addition, in the case of a qualified health maintenance organization requesting assistance for significant expansion:

(1) Data on prepaid membership totals for annual intervals over the past five years, or if the health maintenance organization has not been operating for five years, such data on a quarterly basis for the time during which it has been in operation;

(2) A description of the current health service delivery facilities, including an estimate of their capacity;

(3) The number and specialties of current health professionals serving its members; and

(4) The plans for the proposed significant expansion which demonstrate that the definition of significant expansion in § 110.202(c) will be met.

§ 110.404 Project elements for initial development.

An approvable application must provide:

(a) Written evidence satisfactory to the Secretary that the feasibility of the establishment and operation or expansion has been established by the applicant and that sufficient planning for the establishment or expansion has been conducted by the applicant. In addition, applicants must provide the information, assurances and evidence required by § 110.403 (a), (b), (c), (d), and (e), and must report all other activities relating to the development of the health maintenance organization undertaken prior to application for initial development assistance.

(b) Detailed plans, which must include, at a minimum, tasks designed to accomplish the activities listed below, accompanied by a time-phased milestone chart indicating proposed fund-

ing and manpower to be allocated to each (where circumstances indicate that it would be appropriate and consistent with the intent of the Act, additional activities may be proposed in the application):

(1) Development of a schedule to meet the requirements of Subpart A of this part;

(2) Completion of activities related to resolution of legal issues;

(3) Recruitment and training of personnel essential for operation as a health maintenance organization;

(4) Development of a comprehensive financial plan;

(5) Organization of physician health services;

(6) Organization of other basic health services;

(7) Development of a schedule to construct, lease, renovate or otherwise obtain health maintenance organization facilities;

(8) Organization of ambulatory care facility;

(9) Implementation of a staffing plan that demonstrates compliance with the appropriate 15 or 30 percent limitation on contracts for basic and supplemental health services (see § 110.104(a)), and formalization of contract arrangements;

(10) Further refinement of the projected market to be served by obtaining specific evidence of employer or union willingness to offer the health maintenance organization option on specific dates;

(11) Initiation of enrollment plan; and

(12) Establishment of any working capital or reserves or both as may be required by State authorities.

(c) Evidence from physicians and from one or more hospitals indicating that they intend to become providers of basic health services for the proposed health maintenance organization:

(1) In the case of an individual practice association-type health maintenance organization, there must be such evidence from a number of physicians adequate to serve the proposed enrollment; and

(2) In the case of a non-individual practice association-type health maintenance organization, there must be such evidence from at least three physicians, indicating that they are willing to be employed by or to contract with the proposed health maintenance organization.

(d) In the case of an applicant which intends to serve Title XIX eligibles or Title XVIII beneficiaries as a part of the planned enrollment, as appropriate:

(1) Evidence that the State Title XIX agency is willing to negotiate a prepaid capitation contract in the form of a letter or other document from the State Title XIX agency; or

(2) Evidence that the applicant is planning to or has entered into a contract under Title XVIII as a health maintenance organization.

(e) In addition, in the case of an operational prepaid health plan which proposes to become a qualified health maintenance organization, an identification of gaps between its current operation and the requirements of Subpart A of this part.

(f) In addition, in the case of qualified health maintenance organizations requesting assistance for significant expansion:

(1) Data on prepaid membership totals for annual intervals over the past five years, or if the health maintenance organization has not been operating for five years, such data on a quarterly basis for the time during which it has been in operation;

(2) A description of the current health service delivery facilities, including an estimate of their capacity;

(3) The number and specialties of current health professionals serving its members; and

(4) The plans for the proposed significant expansion which demonstrate that the definition of significant expansion in § 110.202(c) will be met.

§ 110.405 Funding duration and limitation.

(a) *Planning projects.* (1) The amount of any award shall be determined by the Secretary on the basis of his estimate of the sum necessary for project costs: *Provided*, That any single grant and the amount of principal of any single loan guaranteed under section 1304 of the Act may not exceed \$200,000.

(2) In considering applications for grants for planning projects under this subpart, the Secretary will give priority to applications which contain assurances satisfactory to the Secretary that when the organization becomes operational, not less than 30 percent of its members will be members of a medically underserved population. In considering applications for loan guarantees for planning projects under this subpart, the Secretary will give special consideration to applications for projects for health maintenance organizations which will have at least 10 percent of their projected membership from medically underserved populations. Applicants may propose that the award period be for one year or less, as appropriate to the planning activities to be accomplished. Planning projects shall be completed within the period of the award. The Secretary may not make more than one additional grant or loan guarantee for a planning project for which a grant or loan guarantee has previously been made, and may permit additional time (up to 12 months) for completion of the project if he determines that

the additional grant or loan guarantee (as the case may be) or additional time, or both, is needed to complete the project adequately.

(3) Funds under grants and loans guaranteed for planning projects shall be used only for the activities set forth in § 110.403(f) and for activities required to fill the gaps referred to in § 110.403(g).

(b) *Initial development projects.* (1) The amount of any award shall be determined by the Secretary on the basis of his estimate of the sums necessary for project costs: *Provided, however*, That the aggregate amount of loan guarantees and grants for any initial development project may not exceed \$1,000,000 or, in the case of a project for a health maintenance organization which will provide services to an additional service area or which will provide services in two or more areas which are not contiguous \$1,600,000.

(2) Applicants may propose that the award period for initial development activities be one year or less, as appropriate to the initial development activities to be accomplished. Initial development projects shall be completed within the period of the award beginning on the first day of the month in which such award was made, and the number of grants made for any initial development project under section 1304 of the Act may not exceed a total of three. A loan guarantee for an initial development project may only be made for a loan (or loans) for initial development costs incurred in a period not to exceed three years.

(3) In considering applications for grants for initial development projects under this subpart, the Secretary will give priority to applications which contain assurances satisfactory to the Secretary that when the organization becomes operational, not less than 30 percent of its members will be members of a medically underserved population. In considering applications for loan guarantees for initial development projects under this subpart, the Secretary will give special consideration to applications for projects for health maintenance organizations which will have at least 10 percent of their projected membership from medically underserved populations.

(4) Funds under grants and loans guaranteed for projects for initial development shall be used only for activities set forth in § 110.104(b) (except that such funds may not be used for the costs of construction or for recruitment of personnel who will not engage in practice principally for the health maintenance organization) and for activities required to fill gaps referred to in § 110.404(e).

§ 110.406 Evaluation and award.

(a) Within the limits of funds available for such purpose, the Secretary

may make awards to cover up to 90 percent of the cost of projects, or in the case of projects which will draw not less than 30 percent nor more than the appropriate percentage (as determined under § 110.108(c)) of its anticipated enrollment from medically underserved populations, up to 100 percent of the costs, to those applicants whose projects will, in his judgment, best promote the purposes of section 1304 of the Act and the regulations of this subpart, taking into account:

(1) The degree to which the proposed project satisfactorily provides for the elements set forth in § 110.403 or § 110.404.

(2) The comments of the appropriate health systems agency or State health planning and development agency.

(3) Whether the feasibility of the project has been established, and in the case of initial development applications, whether all required planning activities have been accomplished.

(4) The appropriateness of the goals and objectives of the proposed project.

(5) The effectiveness the proposed organization may reasonably be expected to have in reducing inappropriate hospital utilization, containing health care costs, using medical and other health manpower, emphasizing early detection and treatment of illnesses, and achieving a better distribution and quality of care.

(6) The capability of the applicant to organize and manage the project successfully.

(7) Evidence of the applicant's intended contribution to the project.

(8) Evidence by letters or similar statements of intent from providers expressing a willingness to be employed by or contract with the proposed health maintenance organization for the provision of basic health services and evidence that providers as necessary, will contract with the health maintenance organization other than as members of its staff or through medical groups or individual practice associations.

(9) Evidence, in form of letters, from individuals, groups, or organizations indicating that they support the development and operation of the proposed health maintenance organization.

(10) The results of the Secretary's assessment of marketing capability and the prospects for eventual financial viability as an operational health maintenance organization without continued Federal support.

(11) The inclusion of medically underserved populations in groups to be enrolled.

(12) Location relative to the number of organizations providing health services to a defined population on a prepaid capitation basis, which are already operating in the area.

(13) The percentage of anticipated total enrollment to be drawn from nonmetropolitan areas to be served.

(14) In the case of an existing organization operating on a prepaid capitation basis, the applicant's potential for expeditious transition into a qualified health maintenance organization.

(15) In the case of expansion projects, the potential rate of increase of expansion, or the potential increase in the area to be served by the expanded health maintenance organization.

(b) In considering applications under this subpart the Secretary will give priority to applications which contain assurances satisfactory to the Secretary that when the organizations become operational, not less than 30 percent of their members will be members of a medically underserved population.

§ 110.407 Loan guarantee provisions.

(a) *Disbursement of loan proceeds.* The principal amount of any loan guaranteed by the Secretary under this subpart shall be disbursed to the applicant in accordance with an agreement to be entered into between the parties to the loan and approved by the Secretary.

(b) *Length and maturity of loans.* The principal amount of each loan guarantee, together with interest thereon, shall be repayable over a period of 22 years, beginning on the date of endorsement of the loan guarantee by the Secretary. The Secretary may however, approve a shorter repayment period where he determines that a repayment period of less than 22 years is more appropriate to an applicant's total financial plan.

(c) *Repayment.* The principal amount of each loan guarantee, together with interest thereon, shall be repayable in accordance with a repayment schedule which is to be agreed upon by the parties to the loan and approved by the Secretary prior to or at the time of his endorsement of the loan. Unless otherwise specifically authorized by the Secretary, each loan guaranteed by the Secretary shall be repayable in substantially level combined installments of principal and interest, to be paid at intervals not less frequently than annually, sufficient to amortize the loan through the final year of the life of the loan. Principal repayment may be deferred, with payment of interest only by the applicant during a period to be specified in an agreement between the applicant and the Secretary.

Subpart E—Loans and Loan Guarantees for Initial Operating Costs

§ 110.501 Applicability.

The regulations of this subpart, in addition to the regulations of Subpart B, of this part are applicable to loans

and loan guarantees awarded pursuant to section 1305 of the Act.

§ 110.502 Definitions.

(a) "Operating cost" means any cost which under generally accepted accounting principles or under accounting practices prescribed or permitted by State regulatory authority is not a capital cost and which is incurred on or after the first day of the applicable period of operation or expansion as defined in paragraph (b) of this section: *Provided*, That payments made by a health maintenance organization during such applicable period to reduce balance sheet liabilities existing at the beginning of such period are operating costs to the extent that they are expressly approved by the Secretary at the time the loan or loan guarantee is made. In addition, when deposits of funds to restricted reserve accounts are required by State authority, deposits made during such applicable period are operating costs.

(b) "First 60 months of operation or expansion" means the 60-month period beginning on the first day of the month during which the health maintenance organization first provides services to members, or in the case of significant expansion, first provides services in accordance with its expansion plan.

§ 110.503 Eligibility.

(a) *Eligible applicants.* (1) Any public qualified health maintenance organization is eligible to apply for a loan under this subpart.

(2) Any nonprofit private qualified health maintenance organization is eligible to apply for a loan or a loan guarantee under this subpart.

(3) Any private (other than a nonprofit private) qualified health maintenance organization which will serve a medically underserved population is eligible to apply for a loan guarantee under this subpart.

(b) *Eligible projects.*—(1) *Loans.* In the case of public or nonprofit private qualified health maintenance organizations, loans may be made pursuant to section 1305 of the Act and the regulations of Subpart B of this part and this subpart to eligible applicants to assist them in meeting the amount by which their operating costs during a period not to exceed the first 60 months of their operation exceed their revenues in such period, or in meeting the amount by which their operating costs, which the Secretary determines are attributable to significant expansion in their membership or area served, as defined in § 110.202(c), and which are incurred during a period not to exceed the first 60 months of their operation after such expansion, exceed their revenues in that period which the Secretary determines are attributable to such expansion.

(2) *Loan guarantees.* Loan guarantees may be made pursuant to section 1305 of the Act, and the regulations of Subpart B of this part and this subpart to guarantee to non-Federal lenders payment of the principal of and the interest on loans made to any nonprofit private qualified health maintenance organization or any private (other than a nonprofit private) qualified health maintenance organization for the amounts referred to in paragraph (b)(1) of this section: *Provided*, That at least 10 percent of the projected members of any such private (other than nonprofit private) qualified health maintenance organization are from a medically underserved population.

§ 110.504. Project elements.

An approvable application must provide:

(a) Statements which describe in detail:

(1) The applicant's adequate accomplishment of feasibility survey, planning, and development activities; and

(2) The health maintenance organization's management capability.

(b) Detailed information on the health maintenance organization's marketing plan and enrollment forecasts and experience.

(c) A detailed narrative statement describing:

(1) All existing and planned provider arrangements including copies of all executed contracts; and

(2) All facilities to be used in the delivery of health services.

(d) Financial information in such detail as the Secretary may prescribe.

(e) Evidence that any certificate of need required under State law for the operation of the health maintenance organization has been obtained by the applicant.

§ 110.505 Reserve requirement.

The applicant receiving a loan or loan guarantee under section 1305 of the Act shall establish a restricted reserve account beginning at the point when the revenues and operating costs of the health maintenance organization reach the break-even point, or by the end of the 60 month period following the making of the loan or the guarantee under section 1305 of the Act, whichever is sooner, unless a longer period is approved by the Secretary. This reserve shall be so constituted as to accumulate no later than twelve (12) years following the endorsement of the loan or loan guarantee, an aggregate amount equal to one year's principal of and interest on the loan, as determined under the terms of the loan made or guaranteed.

§ 110.506 Evaluation and award.

Within the limits of funds available for such purposes, the Secretary may

award loans or loan guarantees to those applicants whose projects will, in his judgment, best promote the purposes of section 1305 of the Act and the regulations of this part, taking into account:

(a) The ability of the health maintenance organization to achieve financial viability;

(b) The ability of the health maintenance organization to make repayments of the principal and interest when due and to have additional funds to defray the remaining operating deficits;

(c) The comments, if any, of the appropriate health systems agency or State health planning and development agency;

(d) The relative distribution of qualified applicants with respect to the following factors:

(1) The inclusion of medically underserved populations in the groups to be enrolled;

(2) Location relative to the number of organizations providing health services to a defined population on a prepaid capitation basis, which are already operating in the proposed area; and

(3) The percentage of anticipated total enrollment drawn from nonmetropolitan areas served or to be served by the applicant.

§ 110.507 Funding duration and limitation.

(a) The aggregate amount of principal

of loans made or guaranteed, or both, under section 1305 of the Act for a health maintenance organization shall not exceed \$2,500,000. In any fiscal year the amount disbursed to a health maintenance organization under section 1305 of the Act and this subpart (either directly by the Secretary or by an escrow agent under the terms of an escrow agreement or by a lender under a loan guaranteed under section 1305 of the Act and this subpart) may not exceed \$1,000,000.

(b) The approval of any loan or loan guarantee shall not obligate the United States in any way to make any additional loan or loan guarantee with respect to the approved application or portion thereof, except as may be otherwise set forth in the agreement between the United States and the approved applicant.

(c) In considering applications for loan guarantees under section 1305 of the Act and this subpart, the Secretary will give special consideration to applications for health maintenance organizations which will serve medically underserved populations.

§ 110.508 Loan provisions.

(a) *Disbursement of loan proceeds.* The principal amount of any loan made or guaranteed by the Secretary under this subpart shall be disbursed to the applicant in accordance with an

agreement to be entered into between the parties to the loan and approved by the Secretary.

(b) *Length and maturity of loans.* The principal amount of each loan or loan guarantee, together with interest thereon, shall be repayable over a period of 22 years, beginning on the date of endorsement of the loan, or loan guarantee by the Secretary. The Secretary may, however, approve a shorter repayment period where he determines that a repayment period of less than 22 years is more appropriate to an applicant's total financial plan.

(c) *Repayment.* The principal amount of each loan or loan guarantee, together with interest thereon, shall be repayable in accordance with a repayment schedule which is to be agreed upon by the parties to the loan or loan guarantee and approved by the Secretary prior to or at the time of his endorsement of the loan. Unless otherwise specifically authorized by the Secretary, each loan made or guaranteed by the Secretary shall be repayable in substantially level combined installments of principal and interest to be paid at intervals not less frequently than annually, sufficient to amortize the loan through the final year of the life of the loan. Principal repayment during the first 60 months of operation may be deferred, with payment of interest only by the applicant during such period.

WATER RESOURCES
COUNCIL

FLOODPLAIN
MANAGEMENT

Guidelines
for Implementing
Executive Order 11988

[8410-01]

WATER RESOURCES COUNCIL

FLOODPLAIN MANAGEMENT

Guidelines for Implementing Executive Order 11988

AGENCY: Water Resources Council.

ACTION: Notice of Guidelines Adoption.

SUMMARY: This notice incorporates the Guidelines for Implementing Executive Order 11988—Floodplain Management adopted by the Water Resources Council on January 25, 1978 to assist Federal agencies in preparation of their regulations and procedures for implementing the Order.

FOR FURTHER INFORMATION CONTACT:

Frank H. Thomas, Floodplain Management Specialist, Policy Division, U.S. Water Resources Council, 2120 L Street NW., Washington, D.C. 20037, phone 202-254-6352.

SUPPLEMENTARY INFORMATION: These guidelines provide: (1) explanation of key terms and floodplain management concepts; (2) section-by-section analyses of the Order; and (3) procedures in the form of a decision-making process leading from the determination that a proposed action is or is not located in the base floodplain, through the implementation of agency actions.

Dated: February 3, 1978.

LEO M. EISEL,
Director.

PREFACE

These guidelines result from recognition in two Executive Orders that the Nation's floodplains are the scene of: (1) unacceptable and increasing flood losses and (2) degradation of natural and beneficial values. The 1966 Executive Order 11296—*Flood Hazard Evaluation*, represented Presidential recognition that structural flood control measures alone were inadequate to stem rising flood losses. It was followed by establishment of flood insurance, disaster assistance and related Federal programs, and some State and local government floodplain management programs. Yet, a decade later, annual flood losses were estimated to approach \$3 billion and continuing to rise.

In the decade following Executive Order 11296, there developed widespread recognition that the natural and beneficial values of floodplains, wetlands and coastal barrier islands must be restored and preserved. Thus, on May 24, 1977, the President issued a comprehensive environmental message accompanied by Executive Order

11988—*Floodplain Management*, to replace the 1966 Order. The new order is a significant policy initiative tying together the need to protect lives and property with the need to restore and preserve natural and beneficial floodplain values. The *Unified National Program for Floodplain Management* (1976) of the Water Resources Council is cited by the Order to provide direction. Federal agencies are directed to lead the Nation by exemplary demonstration of a comprehensive approach to floodplain management and to prepare procedures for achieving the goals of the Order.

The objective of these guidelines is to provide broad guidance in the interpretation of the Order to assist each agency which will be developing its own individual procedures for compliance with the Order. It is recognized that agency procedures will necessarily vary to meet legislatively prescribed missions as well as the requirements of the Order. This guidance should prove useful to State and local governments and interested members of the public.

The guidelines have been developed over a 12-month period by the efforts of an interagency task force of floodplain specialists. Comments and suggestions for improvement are welcomed.

GUY R. MARTIN,
Alternate to the Chairman.

EXECUTIVE SUMMARY

THE OBJECTIVE OF EXECUTIVE ORDER 11988 IS:

- • • • to avoid to the extent possible the long- and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct and indirect support of floodplain development wherever there is a practicable alternative • • • •

THE ORDER APPLIES TO:

- **ALL AGENCIES** that: (1) acquire, manage, or dispose of Federal lands and facilities; (2) undertake finance, or assist construction and improvements; and (3) conduct activities and programs affecting land use, including planning, regulating, and licensing.
- **ALL FEDERAL ACTIONS:** described in the preceding sentence.
- **ALL FLOODPLAIN LOCATIONS:** whether they are along or near to rivers, streams, oceans, ponds, or related water bodies—as a minimum, areas subject to inundation by a flood with a one percent chance of occurring in any year (i.e., "100-year or base flood").

THE ORDER REQUIRES THAT AGENCIES:

- **AVOID THE BASE FLOODPLAIN:** unless it is the only practicable alternative.
- **ADJUST TO THE BASE FLOODPLAIN:** if the base floodplain cannot be avoided, adjust to it in order to: (1) reduce the hazard and the risk of flood loss; (2) minimize the impact of floods on human safety, health, and welfare; and (3) restore and preserve the natural and beneficial floodplain values. The framework for meeting these requirements is the Water Resources Council's *Unified National Program for Flood Plain Management*.
- **EVALUATE, DESIGN, AND IMPLEMENT ALL AGENCY ACTIONS:** to meet the policies of the Order.
- **NOTIFY THE PUBLIC:** if the head of an agency finds there is no practicable alternative. This will usually occur after there has been early notice to the public on plans and proposals and alternative courses of action.
- **AMEND OR ISSUE REGULATIONS AND PROCEDURES:** (1) to avoid the base floodplain if at all practicable; (2) to provide for actions to **ADJUST TO THE BASE FLOODPLAIN**, if it cannot be avoided; and (3) to keep the public informed of proposed actions in the base floodplain and encourage participation in floodplain decisionmaking. Each agency shall issue or amend existing regulations within one year to comply with this Order. Agencies shall prepare their procedures in consultation with the Water Resources Council, the Federal Insurance Administration and the Council on Environmental Quality, and shall update such procedures as necessary.

THESE GUIDELINES ARE INTENDED:

- **TO BE USED BY AGENCIES:** in preparing their procedures in consultation with the WRC, CEQ, and FIA.
- **TO FURNISH:** (1) explanations of key terms and floodplain management concepts; (2) analyses of the Order, section by section, for agency use in developing their regulations and procedures for complying with the intent of each section; and (3) procedures in the form of a decision-making process leading from the determination that a proposed action is or is not located in the base floodplain through the implementation of agency action.
- **TO ASSIST AGENCIES:** by providing broad guidance in the implementation of the Order for use in the preparation of individual agency

procedures. It is recognized that agency procedures will necessarily vary to meet legislatively prescribed missions as well as the requirements of the Order.

ACKNOWLEDGEMENT

Preparation of these Guidelines began in December 1976 by a work group of the Floodplain Management Technical Committee of the Water Resources Council, in anticipation of an Executive Order. In October 1977 when the Water Resources Council's technical committees were abolished as part of a restructuring of the Council, a first draft of the Guidelines had been completed. In November 1977, a 60-day task force of essentially the same membership as the work group was appointed to complete the Guidelines.

The members of these two groups and colleagues who provided specialized assistance are listed below. We are indebted to all of these persons for their professional dedication and especially to the members of the drafting team whose overtime efforts secured completion of the Guidelines.

LEO M. EISEL,
Director.

GLOSSARY

Throughout this document, the following basic definitions shall apply:

- **Action**—any Federal activity including: "• • • (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.
- **Agency**—an executive department, a government corporation, or an independent establishment and includes the military departments.
- **Base Flood**—is that flood which has a one percent chance of occurrence in any given year (also known as a 100-year flood). This term is used in the National Flood Insurance Program (NFIP) to indicate the minimum level of flooding to be used by a community in its floodplain management regulations.

- **Base Floodplain**—the 100-year floodplain (one percent chance floodplain). Also see definition of floodplain.
- **Channel**—a natural or artificial watercourse of perceptible extent, with a definite bed and banks to confine and conduct continuously or periodically flowing water.
- **Critical Action**—any activity for which even a slight chance of flooding would be too great.
- **Facility**—any man-made or man-placed item other than a structure.
- **Flood or Flooding**—a general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland and/or tidal waters, and/or the unusual and rapid accumulation or runoff of surface waters from any source.
- **Flood Fringe**—that portion of the floodplain outside of the regulatory floodway (often referred to as "floodway fringe").
- **Floodplain**—the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year. The base floodplain shall be used to designate the 100-year floodplain (one percent chance floodplain). The critical action floodplain is defined as the 500-year floodplain (0.2 percent chance floodplain).
- **Floodproofing**—the modification of individual structures and facilities, their sites, and their contents to protect against structural failure, to keep water out or to reduce effects of water entry.
- **Minimize**—to reduce to the smallest possible amount or degree.
- **One Percent Chance Flood**—the flood having one chance in 100 of being exceeded in any one-year period (a large flood). The likelihood of exceeding this magnitude increases in a time period longer than one year. For example, there are two chances in three of a larger flood exceeding the one percent chance flood in a 100-year period.
- **Practicable**—capable of being done within existing constraints. The test of what is practicable depends upon the situation and includes consideration of the pertinent factors, such as environment, cost or technology.
- **Preserve**—to prevent modification to the natural floodplain environment or to maintain it as closely as possible to its natural state.
- **Regulatory Floodway**—the area regulated by Federal, State or local requirements; the channel of a river or other watercourse and the adjacent land areas that must be reserved in an open manner, i.e., unconfined or unobstructed either horizontally or vertically, to provide for the discharge of the base flood so the cumulative increase in water surface elevation is no more than a designated amount (not to exceed one foot as set by the NFIP).
- **Restore**—to re-establish a setting or environment in which the natural functions of the floodplain can again operate.
- **Structures**—walled or roofed buildings, including mobile homes and gas or liquid storage tanks that are primarily above ground (as set by the NFIP).
- **Wetlands**—"those areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds" (as defined in Executive Order 11990, *Protection of Wetlands*).

INTRODUCTION

Executive Order 11988—*Floodplain Management*, signed May 24, 1977, revokes and replaces Executive Order 11296, issued August 10, 1966. It establishes a new general policy and cites specific requirements for compliance by Federal executive agencies (hereafter referred to as agencies). Executive Order 11988 (hereafter referred to as the Order) requires agencies to avoid, to the extent possible, the long- and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid the direct or indirect support of floodplain development whenever there is a practicable alternative. The preferred method for satisfying this requirement is to avoid sites on the base floodplain. If an action must be located on the base floodplain, the Order requires that agencies minimize potential harm to people and property and to natural and beneficial floodplain values.

Executive Order 11988 is based in part on the National Environmental Policy Act of 1969, and adds new prominence to the environmental aspects of floodplain management which were not present in the old Executive order. To achieve this, the Order requires that decision-making by Federal agencies clearly recognize that floodplains have unique and significant public values. Consideration must be given, therefore, to natural and beneficial floodplain values and to the public benefit to be derived from their restoration or preservation.

Throughout these guidelines the concept of the floodplain is expressed using varying terminology depending on the context of the discussion. When referring to the floodplain in a descriptive sense, such as in the discussion of natural values (Part II—Step 4.C.), the term floodplain refers to any land area susceptible to being inundated from any source of flooding. When referring to the floodplain from the standpoint of the Order's mandatory provisions, the terms used in these guidelines are "base floodplain," in most cases, and "500-year floodplain" when referring to critical actions (Part II—Step 1.C.). The base floodplain is the area subject to inundation from a flood having a one percent chance of occurring in any given year (100-year flood). The critical action floodplain is the area subject to inundation from a flood having a 0.2 percent chance of occurring in any given year (500-year flood).

Executive Order 11988 directs implementation of the *Unified National Program for Flood Plain Management* (U.S. Water Resources Council, 1976) which sets forth a conceptual framework and recommends Federal and State actions for a continuing unified program for planning and action at all levels of government to reduce the risk of flood losses through floodplain management. The Unified National Program includes a broad Federal effort, both directly and by example, to pursue the wise and nonhazardous use of floodplains including recognition of natural and beneficial floodplain values.

To assure compliance with the Order, provision is made for both public and Federal review of proposed actions. Early public notice, Office of Management and Budget (OMB) Circular A-95 Notice, an environmental impact statement or its equivalent, and notice of findings are specified vehicles for providing information and opportunity for public participation. Budgetary review of compliance with the Order and periodic review of agency procedures by the Water Resources Council provide for further review. In providing opportunity for these reviews, the potential for withholding of budget approval should be minimized.

Agency procedures are required to be prepared in consultation with the Council on Environmental Quality (CEQ), the Water Resources Council (WRC), and the Federal Insurance Administration (FIA). These guidelines provide a basis for this consultation. These guidelines have been prepared to provide broad guidance in the implementation of the Order and to offer a common point of reference for each agency to prepare implementing procedures for compliance with the Order. The interpretations in the guidelines are built upon a strong Executive Order and directed at development of demonstrable Federal leadership in floodplain management in the immediate future. In preparing these guidelines, the Water Resources Council recognized: (1) the impossibility of anticipating the full range of individual program situations affected by the Order, and (2) the responsibility for individual agencies to tailor their procedures to meet both their legislatively prescribed missions and the requirements of the Order.

Because these guidelines are advisory and the agencies will draft their own rules and regulations, there is some concern that reasonable consistency will exist among agencies. Therefore, by October 1, 1978, the WRC will: (1) review the rules and regulations promulgated by the various agencies with respect to consistency with the guidelines and reasonable consistency among agencies, and (2) make recommendations for suggested actions.

These guidelines are presented in two parts. Part I provides a section-by-section interpretation basic on an overall understanding of the Order. Part II discusses the decision-making process required by Section 2 of the Order and is critical to the development of agency procedures. The guidelines do not intend to prohibit floodplain development in all cases, but rather to create a consistent government policy against such development under most circumstances.

Appended to the guidelines are descriptions of agency programs providing floodplain information, related programs and references, and the President's Policy Statement and copies of the complete Executive orders, *Floodplain Management*, *Protection of Wetlands*, and *Protection and Enhancement of Environmental Quality*.

Executive Order 11990—*Protection of Wetlands* has been included because most of the Nation's wetlands are located on floodplains. Also, both the floodplain and wetland orders were issued as part of the President's *Message on the Environment*, May 24, 1977. Thus the guidance provided in this document and the agency procedures for floodplain management will frequently apply to wetlands. Agencies may wish to develop a single set of procedures for these orders.

Executive Order 11514—*Protection and Enhancement of Environmental Quality* has been included to clarify the public notice aspects of the Order.

Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

The basic concepts expressed in Section 1 of the Order are: (1) all agencies are covered; (2) all actions are covered; (3) all agencies are to affirmatively carry out efforts to, and provide a good example of, sound floodplain management practices; and (4) all agencies are required to act, not merely consider, reducing risk, minimizing adverse impacts, and restoring and preserving floodplain values.

The comprehensiveness of the Order recognizes that each agency, in carrying out the various types of actions enumerated in this section, can affect the floodplain through any of its actions. The mandate that the agencies take a leadership role places them in a unique position relative to state, regional and local levels of government in carrying out actions which affect the floodplain. This role requires the agencies to lead other public and private entities in achieving the goals of the Order by setting a good example. (The concepts of reducing risk, minimizing impact, and restoring and preserving floodplain values are discussed in Part II—Step 5.)

PART I—INTERPRETATION OF EXECUTIVE ORDER 11988

This part of the guidelines provides detailed section-by-section discussion of the Order as interpreted by CEQ, WRC, and HUD/FIA. Key concepts are discussed and reference is made to the decision-making process (Part II).

INTRODUCTION

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 *et seq.*), and the Flood Disaster Protection Act of 1973 (Pub. L. 93-234, 87 Stat. 975), in order to avoid to the extent possible the long and short term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative, it is hereby ordered as follows:

The Introduction establishes the broad scope of the Order derived from NEPA and the flood insurance legislation. (Part II—Step 4, discusses impacts associated with the occupancy and modification of floodplains and support of floodplain development. Part II—Step 3 discusses the practicability of alternatives.)

SECTION 1

Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

The basic concepts expressed in Section 1 of the Order are: (1) all agencies are covered; (2) all actions are covered; (3) all agencies are to affirmatively carry out efforts to, and provide a good example of, sound floodplain management practices; and (4) all agencies are required to act, not merely consider, reducing risk, minimizing adverse impacts, and restoring and preserving floodplain values.

The comprehensiveness of the Order recognizes that each agency, in carrying out the various types of actions enumerated in this section, can affect the floodplain through any of its actions. The mandate that the agencies take a leadership role places them in a unique position relative to state, regional and local levels of government in carrying out actions which affect the floodplain. This role requires the agencies to lead other public and private entities in achieving the goals of the Order by setting a good example. (The concepts of reducing risk, minimizing impact, and restoring and preserving floodplain values are discussed in Part II—Step 5.)

SECTION 2

In carrying out the activities described in Section 1 of this Order, each agency has a responsibility to evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management; and to prescribe procedures to implement the policies and requirements of this Order, as follows:

Three concepts are introduced in this section: evaluation, construction vs. planning programs, and implementation. Evaluation as discussed in these guidelines goes beyond identifying the impacts of a specific proposal and includes an ongoing analysis of the effects of agency policies and programs and the development of new or improved policies and programs to carry out this Order. (The analysis of the full range of their effects is discussed in Part II—Step 4.A.) By including planning programs as a separate item, the Order emphasizes that all actions, even those which do not result in a physical change, must be evaluated for their impacts to or within the floodplain. Implementation means that agencies must adopt and carry out evaluation procedures. The results of this evaluation should be included in any environmental assessment prepared under NEPA. (See Part II—Step 7.)

SECTION 2(a)(1)

Before taking an action, each agency shall determine whether the proposed action will occur in a floodplain—for major Federal actions significantly affecting the quality of the human environment, the evaluation required below will be included in any statement prepared under Section 102(2)(C) of the National Environmental Policy Act. This determination shall be made according to a Department of Housing and Urban Development (HUD) floodplain map or a more detailed map of an area, if available. If such maps are not available, the agency shall make a determination of the location of the floodplain based on the best available information. The Water Resources Council shall issue guidance on this information not later than October 1, 1977.

The intent of this subsection is that agencies use the best available information in determining whether a proposed action will be located in a floodplain. HUD/FIA floodplain maps are established as the minimum standards for making this determination. Even if no map data exists, the intent is that the agency proposing the action perform or have performed a determination of whether a proposed action is located in a floodplain. Guidance for

this determination was published in the *FEDERAL REGISTER*, (Vol. 42, No. 190, Friday, September 30, 1977) entitled "Guidance for Floodplain Management." (See Part II—Step 1.)

SECTION 2(a)(2)

If an agency has determined to, or proposes to, conduct, support, or allow an action to be located in a floodplain, the agency shall consider alternatives to avoid adverse effects and incompatible development in the floodplains. If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in this Order requires siting in a floodplain, the agency shall, prior to taking action, (i) design or modify its action in order to minimize potential harm to or within the floodplain, consistent with regulations issued in accord with Section 2(d) of this Order, and (ii) prepare and circulate a notice containing an explanation of why the action is proposed to be located in the floodplain.

The major issues here include: (1) consideration of alternatives which will avoid the floodplain, wherever practicable, and alternatives which will avoid adverse effects and incompatible development (development which has adverse effects); (2) minimization of harm to or within the floodplain resulting from proposed actions; and (3) circulation of a notice ("finding")—to the general public and affected agencies that siting in the floodplain is the only practicable alternative. The notice requirement introduced in this subsection is part of a larger concern for public notice and review carrying through to Section 4.

This section does not provide a standard for minimizing harm because of the great variety of actions and environments subject to the requirement. Instead, the Order expressly recognizes that it is more appropriate for agency procedures to spell this out for specific programs and activities.

Two important points should be noted about the standards to be embodied in agency procedures. First, while minimize means reduce to the smallest amount or degree, there is an implicit acceptance of practical limitations. Agencies are required to use all *practicable* means and measures to minimize harm. The Order does not expect agencies to employ unworkable means to meet this goal. Second, agency procedures are intended to be consistent with the standards in the Flood Insurance Program of the Federal Insurance Administration (FIA). For this reason, agencies are required to consult with FIA before issuing their procedures, and agencies with control over Federal property are required to follow the standards in FIA's regulations unless they are demonstrably inappropriate.

Avoidance is discussed in Part II—Steps 3 and 4. Minimization is discussed in Part II—Step 5. Findings and

NOTICES

public notice are discussed in Part II—Steps 2 and 7.)

SECTION 2(a)(3)

For programs subject to the Office of Management and Budget Circular A-95, the agency shall send the notice, not to exceed three pages in length including a location map, to the state and areawide A-95 clearinghouses for the geographic areas affected. The notice shall include: (i) the reasons why the action is proposed to be located in a floodplain; (ii) a statement indicating whether the action conforms to applicable state or local floodplain protection standards and (iii) a list of the alternatives considered. Agencies shall endeavor to allow a brief comment period prior to taking any action.

Items (i), (ii), and (iii) are the minimum to be included in the notice. (The notice requirements set out in this subsection are discussed in Part II—Step 7.)

SECTION 2(a)(4)

Each agency shall also provide opportunity for early public review of any plans or proposals for actions in floodplains, in accordance with Section 2(b) of Executive Order No. 11514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

This section requires public notice much earlier than the finding requirement, including notice for actions which do not require environmental impact statements. (The notice requirements set out in this subsection are discussed in Part II—Step 2.)

SECTION 2(b)

Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in a floodplain, whether the proposed action is in accord with this Order.

This subsection complements the public review element in the Order (Subsections 2(a) (2), (3), and (4)). It provides for Federal review and raises the possibility that agency funds may be withheld from proposed actions which are not in accord with the intent of the Order. "In accord with" means in compliance with the policy and mandatory provisions (the letter and spirit) of the Order.

SECTION 2(c)

Each agency shall take floodplain management into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate to the degree of hazard involved. Agencies shall include adequate provision for the evaluation and consideration of flood hazards in the regulations and operating procedures for the licenses, permits,

loan or grants-in-aid programs that they administer. Agencies shall also encourage and provide appropriate guidance to applicants to evaluate the effects of their proposals in floodplains prior to submitting applications for Federal licenses, permits, loans or grants.

Each agency shall take floodplain management, as provided for in Section 2(d), into account when: (1) formulating its own water and land use plans, and (2) evaluating the water and land use plans of others.

In the operation of a license, permit, loan, or grant-in-aid program, each agency must make adequate provision for the evaluation and consideration of flood hazards. These provisions shall be included in agency's regulations and procedures. When the action involves more than one Federal agency, the "lead agency" will be responsible and will obtain input from all agencies. In all cases, as a minimum, the "practicability" and "minimization" standards of Section 2(a) of the Order apply. Therefore, as a precondition for an agency's approval of an application for a license, permit, loan, or grant-in-aid, the agency must assure that the requirements of Section 2(a) have been met. To the extent that an agency deems the requirements of Section 2(a) not to constitute adequate provision for evaluation and consideration of the flood hazard, the agency shall impose additional requirements.

The flood hazard aspects and to the degree they are quantifiable, the floodplain value aspects should be expressed in terms of: (1) potential (or residuals) for monetary loss; (2) human safety, health, and welfare; (3) shifting of costs or damage to others; and (4) potential for affecting the natural and beneficial floodplain values.

Agencies shall encourage and provide appropriate guidance to applicants to enable them to evaluate the effects of their proposals in floodplains prior to submitting applications for Federal licenses, permits, loans, or grants. It is important that applicants be made aware early in their planning process of the floodplain management parameters which the agency must consider when reviewing the proposed action. In this way, applicants will not go to the trouble of putting together completed plans and submitting them formally before being made aware of the standards to which the agency is subject in reviewing such plans. Agencies are encouraged to refer applicants to the agencies listed in Part II—Table 1 for guidance on floodplain management matters.

SECTION 2(d)

As allowed by law, each agency shall issue or amend existing regulations and procedures within one year to comply with this Order. These procedures shall incorporate

the Unified National Program for Floodplain Management of the Water Resources Council, and shall explain the means that and the agency will employ to pursue the nonhazardous use of riverine, coastal and other floodplains in connection with the activities under its authority. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order. Agencies shall prepare their procedures in consultation with the Water Resources Council, the Federal Insurance Administration, and the Council on Environmental Quality, and shall update such procedures as necessary.

Agency regulations and procedures will systematically address each section of the Order, and their procedures will define the extent to which responsibility for compliance is to be delegated by the agency head.

Each agency is to reflect the conceptual framework of floodplain management as set out in the *Unified National Program for Flood Plain Management* in its regulations and procedures developed in response to provisions of the Order. Floodplain management according to the Unified National Program has as its goals the "wise use, conservation, development, and utilization of interrelated land and water resources to serve objectives of economic efficiency, environmental quality, and social well-being as consonant with responsibilities" This concept requires that the floodplain be viewed as having a role to play in the future of its surroundings. Within it, further adjustments in the way floodplain land is used or in the way floods behave must be made in a manner that is supportive of this future. From the standpoint of this Order, the Federal posture in floodplain management would be one of overcoming the apparent inertia in environmental value recognition when the appropriate floodplain role is being determined, as well as one of avoiding hazardous and uneconomic uses as part of this future role. The term "uneconomic" also includes the concept of costs shifted by floodplain users to others, both directly and indirectly.

In order to comply with the requirement that the means to be employed to pursue nonhazardous use be identified, each agency will be required to assess the degree of hazard associated with its program activities under a possible range of flood conditions. Then the agency must state the specific kinds of actions or adjustments that would be employed to comply with this section.

To the extent possible, agencies will utilize existing processes established under the NEPA directives of CEQ and WRC's Principles and Standards in addition to these guidelines.

Each agency shall consult with WRC, CEQ, and FIA in the preparation of their regulations and proce-

dures in response to the Order. This consultation will, of course, include any issue relevant to compliance with the Order. WRC will be the point of contact, and will arrange for consultation as needed with an interagency panel including members from the three agencies cited. Contact WRC Policy Office, 202-254-6352, for arrangements. Each agency's procedures should identify those actions, if any, which: (1) typically do not create adverse effects or incompatible development, or (2) normally will not require specific agency and public review under the Order.

To ensure that the public will be informed of agency procedures, the proposed agency regulations and procedures should be published in the *FEDERAL REGISTER* within a minimum 30-day review period provided. However, each agency must consult with CEQ, WRC and FIA prior to making procedures available for public review or prior to publishing them in the *FEDERAL REGISTER*.

Agency regulations or procedures should include relevant material in the following areas: (1) *mechanical requirements* that an agency will use to meet the procedural requirements of the Executive Order, such as timing, routing of documents, preparation and circulation of findings and notices, and specific links between the Order and other planning decision-making processes and requirements (e.g., budget process, NEPA, P&S, A-95); (2) *substantive requirements*, such as the standards for determining which alternatives are practicable, and the criteria and methods for minimizing harm (using FIA regulations as a guide wherever applicable); (3) *policy direction*, such as incorporation by reference of the Executive Order, Unified Program, NEPA, and other relevant requirements; general policies on the agency's approach to implementing the Order; program-specific policies; and commitments to research monitoring and evaluation; and (4) *other information*, such as appendices identifying the agency contacts in Washington and in the field who are principally responsible for implementing the Order, cross-references to other relevant agency procedures and manuals, and other material that will assist agencies and the public to understand just what the agency is doing to comply with the Order.

SECTION 3

In addition to the requirements of Section 2, agencies with responsibilities for Federal real property and facilities shall take the following measures:

The requirements of this section of the Order are *supplemental* to those of Sections 1 and 2, and must be met by agencies having responsibilities for

Federal real property, structures and facilities.

SECTION 3(a)

The regulations and procedures established under Section 2(d) of this Order shall, at a minimum, require the construction of Federal structures and facilities to be in accordance with the standards and criteria and to be consistent with the intent of those promulgated under the National Flood Insurance Program. They shall deviate only to the extent that the standards of the Flood Insurance Program are demonstrably inappropriate for a given type of structure or facility.

There are three key concepts expressed in this subsection: (1) the relationship of the NFIP requirements to the Order's minimization requirement; (2) the scope and nature of the NFIP requirements; and (3) situations where the NFIP requirements are not applicable to the agency actions.

The intent of this subsection is twofold; first, to assure that the Federal government will require itself no less than it requires of non-Federal entities for the protection of property from flood hazards, and second, to assure that the NFIP is not undermined by the actions of the Federal agencies. Both the positioning of the reference to the NFIP requirements following the avoidance and minimization responsibilities set out in Section 2, as well as the emphasis on the NFIP as the *minimum*, is most significant in that it recognizes the precedence of the requirements of Section 2 and limited scope of the NFIP requirements. Of the three areas of concern which the Order addresses (minimization of harm to lives, property and floodplain values), the NFIP requirements are primarily directed towards the protection of property. Thus, an agency's application of the NFIP requirements to proposed actions does not comprise full compliance with the minimization responsibilities of the Order.

The standards and criteria of the NFIP are directed towards the protection of structures and facilities from the flood hazard and the protection of existing development from the effects of new development. Under the NFIP, residential structures (including basements) are required to be elevated to or above the base flood level. Nonresidential structures may be elevated as described above, or floodproofed watertight to or above the base flood level. For the protection of existing development, the NFIP standards and criteria rely on a regulatory floodway (see Glossary).

Under the NFIP, actions involving the placement of facilities are subject to the requirements that the cumulative effect of the proposed action, when combined with all existing and anticipated development, will not increase the water surface elevation of

the base flood more than one foot at any point within the community wherein the action is proposed. It should be noted that the NFIP's one foot stage rise standard is a minimum standard, and more restrictive stage rise standards that are in effect in States and local communities take precedence over the NFIP standard as set out in Section 1910.1(d) of the NFIP regulations.

This subsection allows deviation from the NFIP requirements only to the extent that its standards and criteria are "demonstrably inappropriate" for a given type of structure or facility. Where this can be demonstrated, the proposed structure or facility must satisfy the requirements of Section 2, and must not endanger existing development, encourage development which would result in harm to or within the floodplain, or itself be vulnerable to flood damage.

SECTION 3(b)

If, after compliance with the requirements of this Order, new construction of structures or facilities are to be located in a floodplain, accepted floodproofing and other flood protection measures shall be applied to new construction or rehabilitation. To achieve flood protection, agencies shall, wherever practicable, elevate structures above the base flood level rather than filling in land.

The key concepts in this subsection are: (1) requirements for new construction and existing structures; (2) accepted floodproofing measures and other flood protection measures; and (3) the requirement to achieve flood protection for structures, wherever practicable, without the use of fill.

For the purposes of the Order, the term "new construction" includes construction associated with: (1) new structures and facilities; (2) the reconstruction of existing structures and facilities following damage caused by fire, flood or other hazard; and (3) the improvement of existing structures and facilities by rehabilitation, repair, alteration or addition. The application of the Order's requirements to existing structures is emphasized in this section.

Floodplain management approaches have in the past set varying thresholds for what constitutes a major improvement. In most cases a market value threshold has been relied on which varies from 50 percent to 80 percent of the pre-improvement value of the structure or facility (see, for instance, the NFIP definition of substantial improvement (24 CFR 1909.1). In the case of major improvements, agencies are offered an opportunity to compensate for previous siting and design decisions which did not reflect the intent of the Order. In meeting the responsibility to apply the Order's requirement to existing structures, the agen-

cies shall consider whether the proposed action would: (1) result in an increase in the useful life of the structure or facility in question; (2) maintain the investment at risk and the exposure of lives to the flood hazard; or (3) eliminate an opportunity to restore the natural and beneficial floodplain values.

Accepted floodproofing measures for structures are defined under the NFIP regulations and are set out in the discussion under Subsection 3(a), above. The Order further limits what constitutes accepted floodproofing for structures through additional language in this subsection which requires that, wherever practicable, all structures shall be elevated using open works, e.g., columns, walls, piers, etc., rather than fill (see Appendix B). Accepted floodproofing measures for facilities vary considerably, since the scope of the term facility, as defined in the Glossary, is extremely broad. Floodproofing measures for certain types of facilities, e.g., sewer interceptor lines and other types of piping, and bridges and roads have been developed, and are familiar to agencies having responsibilities in those areas. Other flood protection measures including warning and evacuation plans, etc. are discussed in the *Unified National Program for Flood Plain Management*.

SECTION 3(c)

If property used by the general public has suffered flood damage or is located in an identified flood hazard area, the responsible agency shall provide on structures, and other places where appropriate, conspicuous delineation of past and probable flood height in order to enhance public awareness of and knowledge about flood hazards.

The conspicuous delineation of past and probable flood heights is required on property which has been or could be subjected to flooding and is used by the general public. This delineation responsibility applies to all types of property (land, structures and facilities). Agencies must identify in their regulations and procedures the areas where this requirement will be most effective in minimizing the adverse impacts of floods, especially on human safety. The 100-year flood level and the flood of record should be shown where available. The 500-year flood should also be shown where appropriate.

SECTION 3(d)

When property in floodplains is proposed for lease, easement, right-of-way, or disposal to non-Federal public or private parties, the Federal agency shall (1) reference in the conveyance those uses that are restricted under identified Federal, State, or local floodplain regulations; and (2) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successors, except where prohibited by law;

or (3) withhold such properties from conveyance.

Three requirements are set out for agencies which dispose of Federal properties (land, structures or facilities) in the base floodplain. Of these three, the agencies must meet both requirements 3(d)(1) and 3(d)(2), or they must meet Section 3(d)(3). That is, if both 3(d)(1) and (2) cannot be satisfied, or if the agency does not choose to implement both, then the property must be withheld from conveyance.

Under Section 3(d)(1), the agencies' regulations or procedures must provide for the identification of those uses that are restricted, and how they are restricted under state and local floodplain regulations. Such restrictions are generally set out in state shoreline or coastal management plans or regulations, local plans and building codes, zoning and subdivision ordinances. If no such restrictions exist, the agency must note this when it implements the finding and public notice procedures (see Part II—Step 7). Then it still must satisfy either 3(d)(2) or 3(d)(3).

Under Section 3(d)(2), the agencies are required to provide appropriate restrictions to the uses of properties by the grantee or purchaser and any successors, which would augment those restrictions referred to in (d)(1), above, or if none, adequately stand on their own. For the purpose of this Order, the term "appropriate" as it refers to restrictions, means restrictions equal in scope and strictness to those of this Order. Since the property in question is located in the floodplain, then the agency must assure through these restrictions that harm to lives and property and to floodplain values is identified, and such harm is minimized and floodplain values are restored and preserved. Section 3(d)(2) recognizes that these additional restrictions need not be applied to the conveyance where prohibited by law.

Section 3(d)(3) requires that where an agency cannot or does not choose to meet the requirements of either 3(d)(1) or (2), or both, it is prohibited from making the conveyance. Even where the option is open to meet 3(d)(1) or (2), withholding the conveyance may be the most appropriate approach to meeting the Order's intent. Where, for instance, the existing use is not compatible with the intent of the Order, or the area in question is not subject to meaningful floodplain management requirements, withholding the land or facility from conveyance may be required.

This section makes it clear that each agency now has a mandate to condition or withhold the conveyance of Federal property, unless a specific law expressly prohibits such activity.

SECTION 4

In addition to any responsibilities under this Order and Sections 202 and 205 of the

Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4106 and 4128), agencies which guarantee, approve, regulate, or insure any financial transaction which is related to an area located in a floodplain shall, prior to completing action on such transaction, inform any private parties participating in the transaction of the hazards of locating structures in the floodplain.

This section applies to the Federal Housing Administration, the Veterans Administration, and the six agencies enumerated in the Flood Disaster Protection Act of 1973: the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Comptroller of the Currency, the Federal Home Loan Bank Board, the Federal Savings and Loan Insurance Corporation, and the National Credit Union Administration (to the extent that an Executive Order may be binding on them). Other agencies that have responsibilities similar to those described in this section are also subject to its requirements. The notice requirements of this section are in addition to the other responsibilities of these agencies under the Order and under Sections 202 and 205 of the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4106 and 4128).

This section covers any financial transaction guaranteed, approved, regulated or insured by a Federal agency which is and which pertains to an area located in a floodplain. If an agency does not operate on an individual transaction basis with private parties, but rather guarantees, approves, regulates or insures the institutions conducting such transactions, then it is the agency's responsibility to require that the institution provide the requisite notice.

The private parties must be informed of the hazards of locating in the base floodplain. Such notice should be given in a way which: (1) explains the chances of being flooded in language readily understandable to the private party; (2) indicates if the property is in a floodway, or coastal high hazard area; (3) indicates if there is a flood insurance purchase requirement; and (4) indicates if the transaction involves the sale of unimproved real estate, that the property may be subject to floodplain management regulations which dictate the manner, and in some cases the location of new construction.

SECTION 5

The head of each agency shall submit a report to the Council on Environmental Quality and to the Water Resources Council on June 30, 1978, regarding the status of their procedures and the impact of this Order on the agency's operations. Thereafter, the Water Resources Council shall periodically evaluate agency procedures and their effectiveness.

Agencies may be called on to furnish documentation covering revisions or

special applications of procedures in years subsequent to 1978. WRC will involve interested and affected agencies in the review.

SECTION 6

As used in this Order:

(a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting floodplains.

(b) The term "base flood" shall mean that flood which has a one percent or greater chance of occurrence in any given year.

(c) The term "floodplain" shall mean the lowland and relatively flat areas adjoining inland and coastal waters including flood-prone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year.

The terms "agency," "base flood," and "floodplain" are defined in the Glossary. The 100-year floodplain is used as the base or minimum floodplain for these guidelines.

SECTION 7

Executive Order No. 11296 of August 10, 1966, is hereby revoked. All actions, procedures, and issuances taken under that Order and still in effect shall remain in effect until modified by appropriate authority under the terms of this Order.

The previous Executive Order 11296 is revoked, but agencies are allowed to operate under existing procedures until they can be revised to reflect this Order. At the latest, this revision must be accomplished by May 24, 1978.

SECTION 8

Nothing in this Order shall apply to assistance provided for emergency work essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

Although Section 8 exempts flood-related and other emergency activities "essential to save lives and protect property and public health and safety" from the provisions of the Order, (e.g., the requirement to prepare and circulate notice of proposed activity), it doesn't exempt them from the spirit of the Order expressed in Section 1. Activities under portions of legislatively directed emergency programs, (e.g., under P.L. 84-99), covering the same kinds of situations as those sections specifically cited in the Order, are clearly within the meaning and intent of Section 8, and therefore are subject to the same interpretation.

SECTION 9

To the extent the provisions of Section 2(a) of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decision-making, and action pursuant to the National Environmental Policy Act of 1969, as amended.

This section allows units of general purpose, local government which may assume the status of Federal agencies for purposes of NEPA compliance under the HUD Community Development Block Grant (CDBG) Program to assume the responsibility for carrying out the provisions of Section 2(a) of this Order for specific projects under CDBG as part of their overall NEPA responsibilities. Thus, the provisions of Section 2(a) of this Order will be carried out in conjunction with NEPA compliance, and one responsibility may not be assumed without the other also being assumed by a grantee. Compliance with Section 2(a) of the Order will be completed prior to the grantee's certification of compliance with NEPA.

PART II—DECISION-MAKING PROCESS

This part of the guidelines is structured in eight steps to reflect the decision-making process (Figure 1) required in Section 2(a) of the Order. The eight steps are summarized below.

1. The first step of the decision process is to determine if a proposed agency action is located in the base* floodplain. (As reflected in Figure 2, the base* floodplain is the 100-year floodplain. Also, the term 500-year floodplain should be substituted for base* floodplain for critical actions—see Step 1.C.) This discussion identifies various types of floodplains and their boundaries. If the proposed action is not in the base* floodplain, proceed to Step 4.

2. The agency must make public its intent to locate a proposed action in the base* floodplain. This notice must provide a description of the proposed action with ample lead time for meaningful input from the public.

3. If the action is in the base* floodplain, the third step is to identify and value the practicable alternatives to locating in the base* floodplain. This determination requires the agency to consider whether the base* floodplain can be avoided either through alternative siting; through alternate actions which would perform the intended function but would minimize harm to or within the floodplain; or by taking no action.

4. For the proposed alternative, the agency must identify if the action has

impacts in the base* floodplain or directly or indirectly supports floodplain development that has additional impacts. If the proposed action is outside the base* floodplain and has no identifiable impacts or support, the action can be implemented, Step 8.

5. If the proposed action has identifiable impacts or support, these effects must be minimized. Further, natural and beneficial floodplain values must be restored and preserved.

6. The proposed alternative can now be reevaluated taking into account the

identified impacts, the steps necessary to minimize these impacts and opportunities to restore and preserve floodplain values.

In the base floodplain:* If this reevaluation shows that the proposed action is no longer feasible, consider limiting the action to make a non-floodplain site practicable or taking no action.

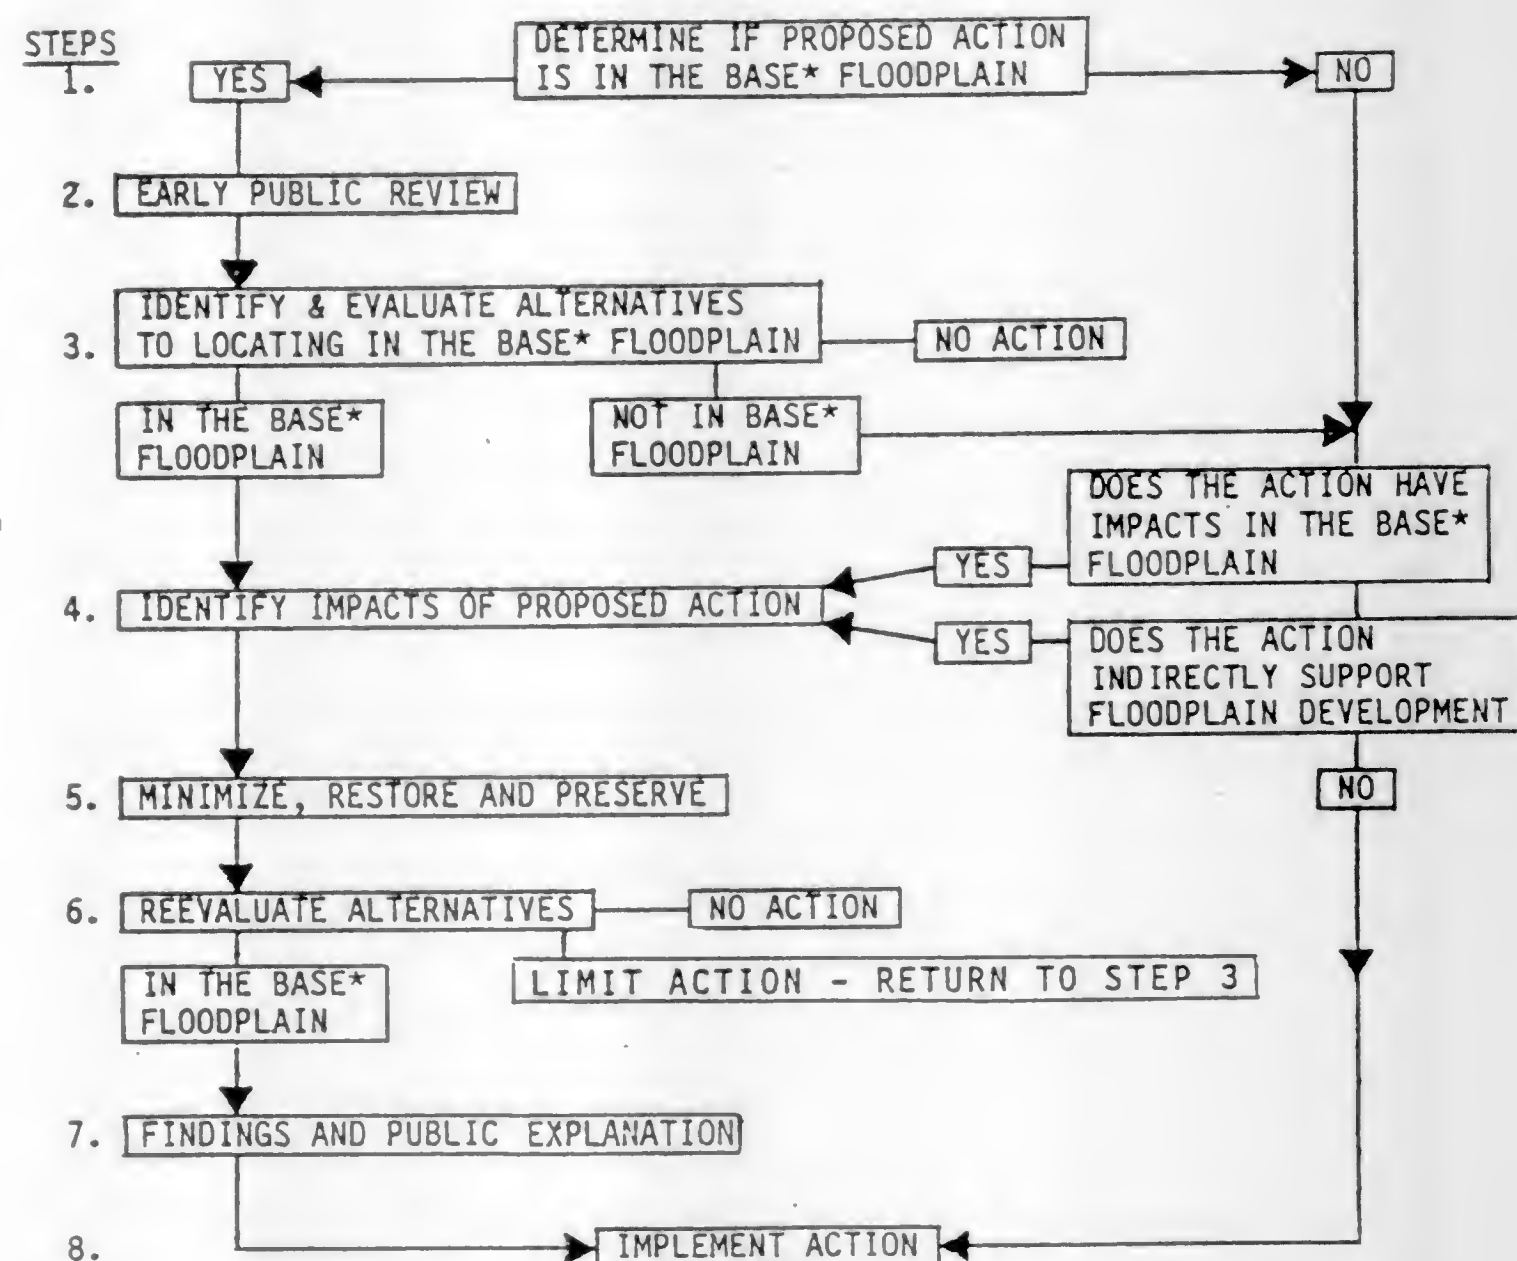

Outside the base floodplain:* If the action has impacts or support, consider modifying or relocating the action to eliminate or reduce these effects or taking no action.

7. If the agency head finds that the only practicable alternative is locating in the base* floodplain, public notice of the reasons must be given for this finding (including the alternatives considered).

8. After a reasonable period to allow for public response, the proposed action can be implemented.

Note that depending on the situation, this process may be carried out with fewer steps if all of the objectives of the decision-making process can be achieved.

DECISION-MAKING PROCESS FOR E.O. 11988
FIGURE 1

* FOR CRITICAL ACTIONS SUBSTITUTE "500 YEAR" FOR "BASE".

STEP 1—DETERMINE IF A PROPOSED ACTION IS IN THE BASE FLOODPLAIN

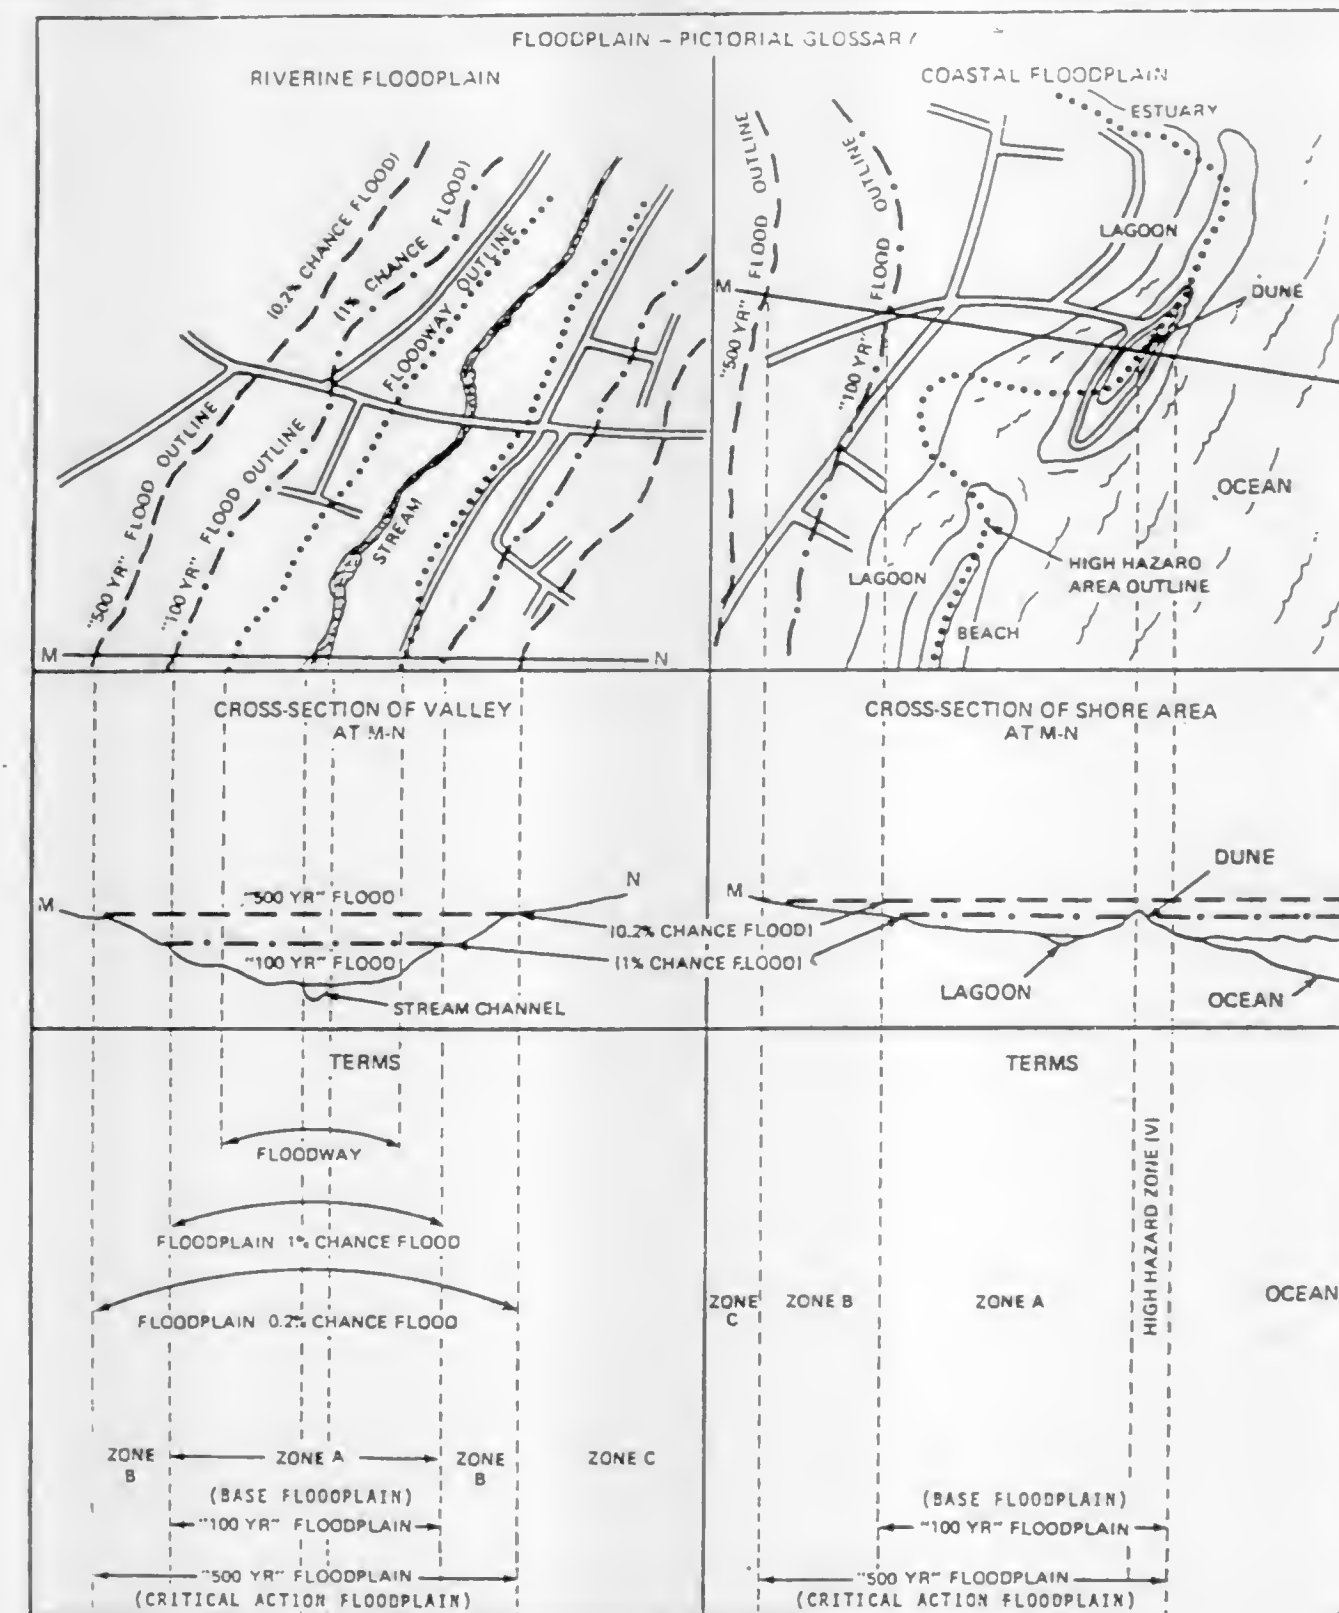

The first step in complying with the Order is to determine whether or not a proposed action is located in the base floodplain. This procedure was published in the *FEDERAL REGISTER* (Vol. 42, No. 190, Friday, September 30, 1977). The following discussion includes types of floodplains (I.A.), limits of flooding (I.B.) and critical action (I.C.).

I.A. Types of Floodplain

The general types of land area where flood hazards are encountered

are riverine floodplains and coastal floodplains. The term floodplain is not limited only to areas surrounding large bodies of water such as coastal areas and the shores of large rivers. In this document, the term floodplain refers to any land area susceptible to being inundated from any source of flooding including those which can be flooded from small and often dry watercourses. Small watercourses can become sources of major flood damage when their watersheds experience rapid runoff from intense rain or melting snow. At some locations the flood hazard results from several sources.

Aggravating factors contribute to the flood hazard in many riverine, coastal, and sheet flow areas. This is particularly true in riverine situations where high velocity flow causes flood-related erosion. In other areas where sheet flow has high velocity, sheet flow erosion may occur. Unusually high waves and tides are the most frequent agents of coastal erosion. Ice also contributes to structural damages. Land subsidence may occur with extensive withdrawals of ground water or other substances producing a relative increase in flood levels.

6041

NOTICES

FEDERAL REGISTER, VOL. 43, NO. 29—FRIDAY, FEBRUARY 10, 1978

1.A.1. RIVERINE FLOODPLAINS

Riverine floodplains are valley areas adjacent to any size stream or river which can be covered by floodwaters (Figure 2). Flooding in these areas results from excessive rainfall, snowmelt, or a combination thereof. If runoff is increased to the point that the carrying capacity of the channel is exceeded, flooding occurs. Flooding also occurs when the capacity of the stream channel is reduced by natural obstructions (ice or debris dams, sediment, and vegetation) and man-placed obstruction (structures and facilities). Some areas flood either from tributary stream overflow, backwater from a major stream, or from both simultaneously.

1.A.2. COASTAL FLOODPLAINS

Coastal floodplains border lakes, estuaries, oceans, or similar bodies of standing water (Figure 2). Flooding in these areas is due to landward flows caused by unusually high tides, waves from high winds, storm surges, tsunamis (large waves in the sea associated with very strong earthquakes or other impulsive disturbances), or by a combination of these causes.

1.A.3. SPECIAL FLOODPLAIN AREAS

Special floodplain areas encompass sheet flow or shallow flooding areas, wetlands, and sinkholes. Sheet flow occurs where a clearly defined channel is absent and where the path of flooding is unpredictable and indeterminate. In some cases, high velocity flow may occur with sheet flow, as it does commonly on debris cone floodplains (alluvial fans). These cones build up from eroded geological debris that is carried by mountain streams and deposited when the stream encounters an abrupt decrease in slope. Other flood problems are caused when development occurs in areas drained by sinkholes which often become plugged.

1.B. Limits of Flooding

For purposes of the Order, all agency heads will be concerned at a minimum with the floodplain area which would be inundated by a flood having a one percent chance of occurring in any year—the so-called "100-year or base flood"—because they must support any decision to conduct, support, or allow an action (i.e., "structure", "facility" or "activity") to be located within this area. The pictorial glossary (Figure 2) depicts and defines the 100-year or base floodplain and other portions of floodplains. The base floodplain is delineated by Zone A on the examples of flood insurance maps shown in Figures 3 and 4.

Within the base floodplain, extreme hazard is associated with those portions of riverine and coastal floodplains nearest to flood sources, where depths and velocities of flood waters are greatest. These areas are usually referred to as a "floodway" and "coastal high hazard area", and with few exceptions, are locations to be avoided. These are the floodplain areas where flooding is not only most frequent and damaging, but where natural and beneficial values of the land and water interface are at their maximum.

In addition, agency heads should consider the implications of the occurrence of a flood larger than the base flood on the economics and safety of a proposed floodplain action. If a proposed action would be especially dangerous when exposed to larger floods, consideration must be given to the larger floodplain area. (See Step 1.C. "Critical Actions".) Herein, such larger floodplains are identified as those of a flood with a 0.2 percent chance of occurring in any year—the so-called "500-year flood"—shown as Zone B on the Flood Insurance Rate Maps issued by the Federal Insurance Administration. Larger floods are also used to delineate floodplains in flood hazard studies by other agencies. (Examples are the Standard Project Flood (SPF) used in the U.S. Army Corps of Engineers' studies, and the Maximum Probable Flood (MPF) used in Tennessee Valley Authority (TVA) studies which are computed from basin runoff potentials rather than through statistical analyses of flow frequencies.) In summary, the key question is: How does the agency decision-maker ascertain if his decision involves a floodplain location, particularly a site within the floodplain of the one percent chance flood?

1.B.1. PROCEDURES FOR DETERMINING A FLOODPLAIN LOCATION

The Order states that "this determination shall be made according to a Department of Housing and Urban Development (HUD) floodplain map or a more detailed map of an area, if

available." Two cautions are suggested in using flood insurance maps: (1) they generally do not delineate portions of the floodplain less than 200 feet wide where headwater flooding may be a concern, and (2) possible adverse consequences from future urbanization are difficult to infer from the maps. Thus, technical assistance may be desirable for interpreting flood insurance maps. In addition, decision-makers seeking flood insurance maps may find them unavailable for areas of extensive public land holdings.

The following is a guide for obtaining the floodplain information needed to make a determination.

Areas of Predominantly Private Land Ownership: If a decision involves a publicly or privately owned site within an area of predominantly private ownership, a map showing the flood hazard areas will usually be available from the National Flood Insurance Program administered by the Federal Insurance Administration (FIA), HUD. Detailed maps showing the elevations and boundaries of the "100-year" (Zones A and V) and "500-year" (Zone B) floodplains are known as "Flood Insurance Rate Maps" (FIRM). A sample is shown as Figure 3. Such maps have been published by the FIA for over 1,300 communities and maps for more communities continue to be published for FIA's program to provide maps of all flood prone areas by 1983. Many of the communities which have a FIRM also have a Flood Insurance Study Report (FIS) containing detailed flood information. Some 13,000 less detailed maps showing the approximate areas of the base (Zone A) floodplain are available for most of the remaining communities. These are called "Flood Hazard Boundary Maps" (FHBMs). A sample is shown as Figure 4. Similar information, some very detailed, is also available from the agencies described in Appendix A. The search for flood hazard information should follow the sequence below.

- The detailed map (FIRM) or the Flood Insurance Study (FIS) report should be consulted first. Information on how to request single maps, FIS reports, and how to be placed on the FIA mailing list to receive new or revised FIRM's, FHBMs, and FIS reports is detailed in Appendix A.

- If a detailed map (FIRM) is not available—obtain an approximate boundary map (FHBMs) from the same source as in the preceding step. If the proposed site is at or near the "100-year" boundary, if data on flood elevations are needed, or if the map does not delineate the flood hazard boundaries in the vicinity of the proposed site—seek detailed information and assistance from the agencies listed in Table 1. (There are additional agencies with professional competence not listed in Table 1 which can perform their own floodplain studies when needed.)
- If an approximate boundary map (FHBMs) is not available or if the map does not delineate the flood hazard boundaries in the vicinity of the proposed site—seek detailed information and assistance from the agencies listed in Table 1.
- If the agencies listed do not have or know of detailed information and are unable to assist in determining whether or not the proposed site is in the base floodplain—seek the services of a licensed consulting engineer experienced in this type of work. The quality of information obtained from the consulting engineer

must be comparable to that required of flood insurance study contractors for the FIA. A list of experienced consulting engineers from which a selection can be made may be provided by the agencies in Table 1.

Areas of Predominantly Federal and State Land Holdings: If a decision involves an area or location within extensive Federal or State holdings, it is unlikely that FIS reports and FIRM or FHBMs maps would be available. In this event, information should be sought from the land administering agency before information and/or assistance is sought from the agencies listed in Table 1. If none of these agencies has information or can provide assistance, the services of an experienced consulting engineer should be sought as described above.

Actions located out of the base floodplain as shown on either the FIRM or FHBMs would meet the minimum requirements and no further action is required for compliance with the Order, unless the action impacts the base floodplain (Step 4), indirectly supports floodplain development (Step 4.A.), or is a critical action (Step 3.C.).

1.B.3. PROCEDURES IF SITE IS IN THE BASE FLOODPLAIN

If the location is within Zones A or V as shown on a FIRM, or in Zone A on a FHBMs, as verified by other detailed information, alternative sites outside of these zones and alternative actions are to be identified and evaluated (Step 3.) in an initial attempt to avoid the floodplain.

1.C. Critical Actions

As indicated previously, the mini-

mum floodplain of concern for certain critical actions is the area subject to inundation from a flood having a 0.2 percent chance of occurring in any given year (500-year floodplain). This floodplain includes both Zones A and B as shown on FIRM's. Critical actions are those for which even a slight change of flooding would be too great. Some key questions in this regard are:

- If flooded, would the proposed action create an added dimension to the disaster as could be the case for

liquefied natural gas terminals and facilities producing and storing highly volatile, toxic, or water-reactive materials?

- Given the flood warning lead-time available, would the occupants of buildings such as hospitals, schools, and nursing homes be insufficiently mobile to avoid loss of life and injury?

- Would essential and irreplaceable records, utilities, and/or emergency services be lost or become inoperative if flooded?

If the answer to questions such as these is "yes", an alternative location must be sought completely outside the larger floodplain. Agencies listed in Table 1 may be in a position to provide information and assistance in evaluation of proposed locations for critical actions. If neither the base floodplain nor larger floodplain for certain critical actions can be avoided, the next responsibility (Step 2) is to provide an opportunity for public review and comment on the proposed floodplain location.

STEP 2—EARLY PUBLIC REVIEW

Early public review is one of several requirements of the Order directed at the objective of public involvement. It should be considered in the context of the whole public involvement process.

The objective of public involvement is to provide sufficient information early enough in the process of making decisions affecting floodplains so that the public can have impact on the decision outcome. The order includes requirements that the public be provided adequate information, opportunity for review and comment, and an accounting for the rationale for proposed actions affecting floodplains. These requirements are stated in Section 2 of the order, which:

- requires agencies to provide opportunity for early public review of any plans or proposals for actions in floodplains;
- requires agencies subject to the OMB A-95 Budget Circular to provide notice explaining a proposed action;
- requires preparation and circulation of a notice of findings and explanation prior to taking an action.

An overview of these sections suggests that agency procedures should provide an integrated procedure for involvement of the public in the floodplain management decision-making process. Thus, to insure that adequate information and opportunities are provided for the public to effectively participate in floodplain decisions, and to

meet the requirements of the Order, the following elements should be incorporated in agency public involvement procedures:

- A description of the overall audience, including specific segments to whom public notice information will be targeted (e.g., floodplain residents, elected officials, basin residents, interest groups, other agencies, etc.). The responsibility is to reach as broad an audience as possible.
- A description of the vehicles or public information mechanism which will be utilized to reach the target audience (e.g., public hearings, newsletters, workshops, advisory groups, etc.). The responsibility is to provide continuous interaction and involvement opportunities for the public during the floodplain decision-making process.
- A description of the purpose for which various public notice actions will be undertaken and assurance that public input will be integrated into the decision-making process (e.g., specific efforts to provide one-way information dissemination, two-way public communication or interaction, etc.). The responsibility is to provide information which promotes the fullest understanding of the proposed plan or action.
- A statement explaining the timing of public notice actions to promote public understanding and provide opportunities for the public to affect a proposed action or plan before alternative actions have been precluded.

It is recognized that the public involvement process must be tailored to specific program types (permits, direct and federally assisted projects, etc.) and will vary. Nevertheless, agency procedures must be compatible with Section 2(b) of Executive Order 11514 (Appendix E), and must also apply to actions which do not require preparation of an EIS under Section 102(2)(C) of NEPA.

If there is a reasonable likelihood that a plan or proposed action or its alternatives will impact a floodplain, then it should be announced as early as that is known, and not delayed until much more detailed information is developed.

It is recognized that variations in program types will determine the earliest time in the floodplain decision-making process when the public can be notified. For example, in the case of a private developer applying for a permit to construct a housing complex with floodplain impact, the earliest public notice may not come until a point very late in the decision-making process. At that point, the only options may be no project, or the project

as designed and proposed. In another example, a major facility such as a proposed regional wastewater treatment facility requires considerable expenditure for site evaluation, engineering and design. Public notice must precede major site identification and analysis so the public can have an input early in the decision-making process of preliminary site screening and selection. If not, public choice options may be foreclosed, or decisions will not be based on similarly detailed information bases.

Early public notice is the first in a series of public information and involvement activities. This would logically be followed by continuing public communication at Step 4, in identifying impacts, Step 6, reevaluating alternatives through the environmental review process, and at Step 7, in the issuance of findings and explanation of why the proposed plan or action must impact the floodplain.

STEP 3—IDENTIFY AND EVALUATE PRACTICABLE ALTERNATIVES TO LOCATING IN THE BASE FLOODPLAIN

Having determined that a proposed action is located in the base floodplain, the agency is required by the Order to identify and evaluate practicable alternatives to locating in the base floodplain. Alternatives to be evaluated include: (1) carrying out the proposed action at a location outside the base floodplain (alternative sites); (2) other means which accomplish the same purpose as the proposed action (alternative actions); and (3) no action.

3.A. Alternative Sites

Alternative sites must be identified and the practicability of such sites evaluated. If a practicable site exists outside the base floodplain, the proposed action must not be located in the base floodplain. Whenever a floodplain site is the only practicable alternative, the agency analysis leading to this conclusion should be fully documented. In determining the practicability of a non-floodplain site, the general concepts of site feasibility apply. At a minimum, site practicability shall be addressed in the light of the following:

- natural (topography, habitat, hazards, etc.);
- social (aesthetics, historic and cultural values, land use patterns, etc.);
- economic (cost of space, construction, services, relocation); and
- legal (deeds, leases, etc.).

3.B. Alternative Actions

Alternative actions must be considered before a decision is made to carry out an action in the base floodplain. These are actions which substitute for

the proposed action in that they comprise new solutions or approaches which serve the same function or purpose as that proposed, but which have less potential for harm. For example, where an agency has proposed the construction of a document storage facility within the floodplain to handle expanding record keeping needs, the alternative of microfilming the documents could allay the need for a new structure. Similarly, rather than providing expanded waste treatment capacity for an area by constructing a new or larger facility in the floodplain, the alternative of using surplus capacity in a neighboring locale could serve the need for a new or expanded facility.

3.C. No Action

No action is also an alternative, and assessment of this course is required. The alternative of no action probably can not be fully evaluated until a determination has been made in Step 4 of the harm to or within the floodplain resulting from the proposed action.

STEP 4—IDENTIFY IMPACTS OF THE PROPOSED ACTION

If the agency has determined that the only practicable alternative is located in the base floodplain, the impacts of the proposed action must be identified. Similarly, where actions proposed to be located out of the floodplain will affect the base floodplain, impacts resulting from these actions must be identified. Since the Order is based primarily on NEPA, the agencies can draw upon the impact identification and assessment experience and guidance which they have developed in their implementation of NEPA. The concepts of impact assessment applicable to both NEPA and the Order are identical, with the Order's focus being narrower. The following discussion addresses general concepts of impact identification and assessment (Step 4.A.), and the two areas of concern which are impacted as a result of the occupancy and modification of floodplains: lives and property (Step 4.B.), and floodplain values (Step 4.C.).

4.A. General Concepts

In their regulations and procedures, the agencies must identify the means by which they will address the following impact-related issues:

- All agency actions can have impacts associated with the modification of floodplains. Although the modification of floodplains and ensuing impacts most clearly result from actions located in the floodplain or at its periphery, it can also result from actions out of the floodplain.
- Certain types of agency actions may support subsequent actions which

have additional impacts of their own;

- The Order focuses on the adverse impacts of proposed actions on lives and property, and on natural and beneficial floodplain values.
- The three basic types of impacts are: (a) positive and negative; (b) concentrated and dispersed; and (c) short- and long-term.

4.A.1. DIRECT AND INDIRECT SUPPORT OF FLOODPLAIN DEVELOPMENT

The Order requires the agencies to avoid the direct and indirect support of floodplain development. For the purposes of these guidelines, an action supports floodplain development if it encourages, allows, serves or otherwise facilitates additional floodplain development. The agencies may also reflect in their regulations and procedures, the manner in which agency actions similarly accommodate the maintenance of existing uses in the floodplain. That is, a proposed action can reinforce existing land use patterns which generally have developed without reflecting the concepts of hazard and risk minimization and restoration and preservation of natural floodplain values which form the basis of the Order.

Direct support results from actions located on the floodplain, while indirect support results from those outside the floodplain. For example, the location of a major public service structure or facility (a post office, library or office building), in the floodplain, requires new or additional investment in or construction of support facilities for food service, parking, etc. Further, simply through their location, such actions would foster additional developments in the floodplain. Floodplain development could be indirectly supported by the provision of infrastructure (water and waste water systems, power supplies, highway and secondary road networks, mass transit systems and airports) outside the floodplain.

Clearly, it is the intent of the Order that the impacts of Federal actions and the impacts of actions supported by Federal actions be evaluated. However, the identification and evaluation of these positive and negative changes to the systems of flood losses, threats to life and health, and environmental values are often both difficult and even speculative. Moreover, the process by which an agency tries to describe the actions supported by their actions is both complex and often not well addressed in accepted methodologies, without a clear conceptualization of the supported action, there is little chance that the impacts can be identified. On the other hand, when the supported actions are describable in terms of growth experience in the area or from experience with similar actions elsewhere, the impacts of the

supported actions can be identified as they are for the proposed Federal action.

4.A.2. TYPES OF IMPACTS

The three basic types of impacts which must be addressed are: (a) positive and negative; (b) concentrated and dispersed; and (c) short and long term.

Positive and negative impacts: both must be identified, even though the focus of impact identification and assessment is on negative or adverse impacts. This is necessary in order to identify the full range of impacts against which to weigh the practicability of a proposed action. In addition, it must be recognized that impacts which are beneficial to some, may be harmful to others. For example, draining wetlands establishes an environment which is suitable for certain uses, but at the expense of the beneficial values of the wetland.

Concentrated and dispersed impacts: both may result from any action. The impact is concentrated if it occurs at or near the site of the action and is dispersed if it occurs at a site remote from the action. For example, a concentrated impact of constructing a building on a wooded area is the loss of vegetation at the site. A dispersed impact of the same action could be sedimentation downstream caused by erosion at the site.

Short- and long-term impacts: both must be analyzed in order to evaluate the total impact of an action. Short-term impacts are temporary changes occurring during or immediately following an action and usually persist for a short while. Long-term impacts occur during or after an action and may take the form of delayed changes or changes resulting from the cumulative effects of many individual actions. Long-term impacts may persist for a considerable time and may continue indefinitely. An example of a short-term impact could be sedimentation at or below a construction site. A long-term impact could be the loss of valley floodwater storage resulting from the cumulative effect of floodplain development.

4.A.3. SOURCES OF IMPACTS

Regardless of the source of impacts, the agencies are required to identify the types of impacts discussed above which arise from their actions when these impacts affect the floodplain. Thus, this requirement applies to actions proposed both in and out of the base floodplain (or the 500-year floodplain where a critical action is proposed). The location of the action causing the impact determines which of the requirements of the Order must be met by the agencies. For actions proposed in the base floodplain (or the 500-year floodplain where a critical

action is proposed), all of the requirements of the Order must be met as outlined (Figure 1). For actions proposed out of the base floodplain, however, the Order does not require that the public notice and findings discussed in Steps 2 and 7 be prepared. Similarly, since in these cases the action causing the impacts in the base floodplain is located outside of it, the practicability test (Step 3) is not required. As a minimum, however, the agencies must identify these impacts and minimize ensuing harm to or within the floodplain which would result if the action is taken as proposed. Because there is no requirement for public notice or the practicability test, the minimization responsibility (Step 5) takes on added significance. This should be reflected in agency procedures.

The agencies are strongly encouraged to apply the public notice procedures and alternate site and action evaluations to actions proposed out of the floodplain which will result in impacts to the floodplain. It has been recognized that public input in agency decision-making processes through NEPA has improved the environmental soundness of these decisions. It is even more reasonable to apply the alternate site and action evaluation to actions taking place outside the floodplain. The evaluation of alternatives to the proposed action as discussed in Step 3, provides a better opportunity to explore the range of possibilities for avoiding adverse impacts to or within the floodplain than the more narrowly focused concepts of minimization, restoration and preservation discussed in Step 5. For example, the overall costs involved in locating a highway interchange, sewer interceptor line, airport facility, etc., at a location less directly affecting the floodplain could be less than the costs incurred in attempting to minimize the impacts of the proposed action and to restore and preserve floodplain values.

4.B. Lives and Property

After determining that a proposed action is in the base floodplain, the risk to lives and property involved in using that site must be determined. This requires an understanding of the magnitude and consequences of flooding that can be expected.

4.B.1. NATURE OF HAZARD AND RISK

Two basic types of floods are used in determining flood hazards: observed or historic floods and probability floods.

Historic Floods: Often these can be the basis for deciding whether a proposed site is in a hazardous area. However, the fact that a certain level of flooding has been observed indicates little about how floods are likely to occur in the future. Even where records extend over a long period of time,

the highest observed flood must not be used as the only guide for decision-making. With very few exceptions, flooding at any site can be expected to reach higher levels than those previously recorded because larger storms, urbanization, flood plain encroachment, or other factors affect flooding.

Probability Floods: These are statistically derived floods. The one percent chance (100-year or base) flood is the term which describes the magnitude of flooding used by FIA as the minimum acceptable level to which a community must regulate the floodplain in order to qualify for the National Flood Insurance Program. As stated previously, this magnitude flood has a one percent chance of being exceeded in any one year period. The likelihood of exceeding the one percent chance flood magnitude increases with time periods longer than one year. For example, the probability is about one in four that the one percent chance flood will be exceeded during the life of a 30-year mortgage.

Large floods occur each year in many parts of the United States. No part of the country is immune from large floods. Consequently, it has become standard practice for agencies dealing with flood problems to calculate elevations of a greater flood to indicate the range of flooding which can and will occur.

4.B.2. HIGH HAZARD AREAS

High hazard areas are those portions of riverine and coastal floodplains nearest the source of flooding. These are the frequently flooded areas that become arenas of major flood dynamics during large floods. Here, floodwaters exert their maximum pressures, erosion is greatly accelerated and loss potential is increased. Additionally, these are the areas of coastal and riverine floodplains within which many of the most critical floodplain values are concentrated. In riverine situations, the high hazard area is that portion of the floodplain where impedance to flood flow resulting from man's occupancy can increase flood heights and consequently the area subject to flooding. In coastal floodplains, the high hazard area is usually confined to the beach area in front of high bluffs or the crest of primary or foredunes, where wave impact is the most significant inducing factor. In light of the high loss potential and the likelihood of significant adverse effects to floodplain values associated with the conduct, support or allowance of actions in these portions of the floodplain, the agencies must rigorously apply the Order's charge to avoid these areas.

4.B.3. EVALUATION OF FLOOD HAZARD

Evaluation procedures must be established in writing by all agencies.

This evaluation serves to express clearly the hazard involved and provides the basis for carrying out the succeeding phases of the analysis. Key questions which must be addressed by the agencies in establishing their regulations and procedures for the evaluation of flood hazard include the following:

- Is the proposed action to be located in the floodway portion of the riverine floodplain, or the coastal high hazard area?
- Is the proposed action in a flood-fringe area such as the flood-fringe portion of a riverine floodplain or the backwater areas of a coastal floodplain?
- Is the flood hazard aggravated by the presence of, or potential for, destructive velocity flows, flood-related erosion, subsidence or sinkholes, or other special problems?
- Is there a combination of flood sources present which may flood simultaneously in the area (e.g., river and ocean, or shallow overland runoff and river, etc.)?

4.C. Natural and Beneficial Floodplain Values

Water and the adjacent floodplain exist in nature in a state of dynamic equilibrium. If one part of a coastal or riverine system is disturbed, the entire system usually readjusts toward a new equilibrium. The environmental effects of this readjustment may affect areas far from the original site of the disturbance and can last for decades. Thus, floodplain actions must be viewed with caution and a careful assessment made of their impact on natural and beneficial floodplain values.

Floodplains in their natural or relatively undisturbed state serve water resources values (natural moderation of floods, water quality maintenance, and groundwater recharge), living resource values (fish, wildlife, and plant resources), cultural resource values (open space, natural beauty, scientific study, outdoor education, and recreation), and cultivated resource values (agriculture, aquaculture, and forestry).

4.C.1. WATER RESOURCES

Floodplains provide for the natural storage of surface and ground waters and the natural improvement of water quality.

Natural Moderation of Floods: The characteristics of the floodplain and of flooding are closely interdependent. Floods shape floodplain topography, soils, and ecology. In turn, the physical characteristics of the floodplain shape flood flows. Except for some steep valley and coastal bluff situations, naturally vegetated floodplains can provide a broad area to spread and slow floodwaters, thereby reducing ve-

locities and flood peaks. Stream meander, dune formation in coastal areas and other natural processes which reduce the force of floodwaters are also accommodated in undisturbed floodplains.

Floodplain encroachment modifies these processes. The effects of such modification are complex and not fully understood. Although in some cases encroachments may interact with natural processes to aid in the reduction of flood forces, their predominant effect has been to aggravate the flood hazard.

In coastal floodplains natural barriers exist in the form of sand dunes and certain vegetation, e.g., mangrove stands, which reduce the impact of high tides and storm surges. Alteration or removal of the barriers themselves, or the vegetative and drainage systems which support them, reduces or eliminates their role in the reduction of flood forces. In addition, excessive withdrawal of groundwater may result in land subsidence thereby increasing flood depths and exposing greater areas to flooding.

Water Quality Maintenance: Floodplain vegetation functions in maintaining the physical and chemical integrity of the water that ultimately supports biological communities. Runoff is slowed by vegetation, allowing the water to deposit not only sediments originating on land but also those scoured from the channel bank and bed. Sediment deposition may add rich nutrients to the floodplain soil and keeps sediment-associated pathogens from the water.

However, siltation can destroy biological communities supported on the floodplain because it contributes to eutrophication (nutrient overloading), decreased dissolved oxygen, increased water temperature, and serious impairment of photosynthetic productivity. Vegetation shades stream banks and decreases daily water temperature fluctuations thereby alleviating temperature stress to the biota. Vegetation slows the flow of water and provides slack waters that give the aquatic biota a greater chance to survive flooding. In addition, flood-plain storage and vegetation reduces siltation in downstream reservoirs.

Groundwater Recharge: An additional value of floodplain vegetation's role in slowing runoff is in groundwater recharge. Slowing the floodwater allows it to infiltrate through the generally porous floodplain soil. Base stream-flow and the level of standing water bodies is regulated naturally by groundwater. During periods of excessive precipitation, runoff enters the groundwater system as well as stream channels and standing water bodies, thereby reducing peak flows; during the dry season, water generally flows from the groundwater system into surface waters, augmenting low flows.

4.C.2. LIVING RESOURCES

The Nation's coastal and riverine floodplains support large and diverse populations of flora and fauna which represent valuable, renewable resources of great importance to man.

The floodplain is biologically very productive because it is here that land and water meet and the elements of both terrestrial and aquatic habitats interact. For example, unspoiled tidal marshes rank well above intensively farmed croplands in the magnitude and diversity of biological productivity. Marsh-rimmed estuaries and adjacent floodplains are vital to marine fisheries as breeding, nursery, and feeding grounds. Inland ponds, pot-holes, marshes and other wetland areas may provide highly important habitat for waterfowl and other wildlife.

Fish and wildlife resources are highly susceptible to man-induced disruption of the floodplain because of their high sensitivity to the resulting impacts. For example, drainage of wetlands, channelization of natural water courses, clearing of vegetation, especially bottomland forests, all have short and long term indirect impacts on plant and animal communities. Other changes that limit food, water supplies, or protective cover have similar effects. Modification of the floodplain at one location can affect living resources elsewhere on the floodplain.

4.C.3. CULTURAL RESOURCES

Floodplains contain cultural resources important to the Nation and to individual localities. They provide many cultural values if left in their natural state. Because native American settlements and early cities were located along coasts and rivers for access to water transportation, supply, and power, floodplains include most of the Nation's earliest archeological and historical sites. In addition to cultural richness, floodplains may be valuable sources for scientific research. For example, because they may contain unique habitats, they are ideal areas for ecological study. Floodplains are used for open space and green belt parks in cities to vary the pattern of the urban scene, to absorb noise, to clean air, to lower air temperatures, and to serve as nature centers and outdoor experience labs. Floodplains are often attractive areas, a base for recreation (hiking and camping), and a base for water-oriented sports such as boating and swimming. In addition, floodplain wildlife resources can be managed for recreational hunting and fishing. Where they remain in essentially pristine condition, floodplains can be valued as a part of the "wilderness experience" so important to the American Culture.

4.C.4. AGRICULTURAL, AQUACULTURAL, AND FORESTRY RESOURCES

Floodplains generally provide excellent resources for agricultural, aquacultural and forestry production.

The natural processes of sediment renewal which take place in floodplains replenish soil and their nutrients. Thus with proper management, floodplain soils generally require less artificial fertilization than upland sites. Level or gently rolling floodplain terrain facilitates agricultural operations. Surface and groundwater sources are usually easily accessible. Well-drained, deep soil suitable to most economic crops are often prevalent in the floodplain. Soils well suited to specialty crops are also found on floodplains (e.g., the poorly drained areas of the Sacramento Valley where rice is a major crop).

However, certain agricultural uses and practices in the floodplain may adversely affect natural floodplain values. They may be incompatible with wildlife production; may induce aggravated erosion and sedimentation; or may result in the drainage of inland and tidal wetlands to increase the amount of arable land. Excessive fertilization and poor feedlot practices can result in nutrient pollution in local water bodies. Thus, proper management practices are essential where agriculture is proposed in sensitive floodplain areas.

The use of floodplain areas for aquacultural operations has grown into a viable industry producing a wide variety of aquatic crops. Aquaculture is subject to similar limitations to those noted for agriculture, but if properly managed, it can be compatible with the natural values of floodplains, and may offer opportunities for the restoration of damaged floodplain values.

Many of the Nation's valuable forest resources are found within floodplains. Bottomland hardwoods and other riparian species (those which can only flourish in close proximity to water) are important to the timber industry and the overall economy of the country. Thus, sound management of forest resources in the floodplain is also essential.

STEP 5—MINIMIZE, RESTORE, PRESERVE

The requirements of the Order to minimize, restore, and preserve apply to a proposed action will result in harm to or within the floodplain. The term "harm," as used in the context of the Order, applies to both lives and property (Step 4.B.), and natural and beneficial floodplain values (Step 4.C.). The concept of minimization (Step 5.A.), applies to harm. The concept of restoration and preservation (Step 5.A.) applies only to floodplain values. Step 5.C. discusses some mechanisms

which may be applied to achieve these three requirements.

5.A. Minimize

Minimize is a demanding standard and requires the agency to reduce harm to the smallest possible degree, thus establishing a far more rigorous standard than other terms which often are used in similar contexts, e.g., alleviate (to lessen), mitigate (to moderate the severity of), ameliorate (to improve), etc. From the standpoint of lives and property, potential harm to or within the floodplain must be reduced to the smallest possible amount or degree. The goal is to avoid increasing the flood loss potential associated with the level of the base flood prior to the proposed action. Where a critical action is proposed (see Step 2.C.) the goal is associated with higher levels of flooding. Similarly, from the standpoint of floodplain values, minimization requires that harm to such values be reduced to the smallest possible amount or degree. The Order's requirement to minimize potential harm applies to (1) the investment at risk, or the flood loss potential of the action itself, (2) the impact the action may have on others, and (3) the impact the action may have on floodplain values. The agencies must specify in their regulations and procedures, how actions will be designed and modified to minimize harm to or within the floodplain. (Also see page I-4 on the requirements to minimize harm.)

5.B. Restore and Preserve

In the context of this Order, "restore" focuses upon conditions existing as a result of prior actions, while "preserve" focuses upon the impacts of a proposed action.

Restore means to reestablish a setting or environment in which the natural and beneficial floodplain values can again operate. Where floodplain values have been degraded by past actions, the agency must identify, evaluate, and implement measures to restore the values diminished or lost. The functions of many of the Nation's degraded floodplains can be partially or fully restored through remedial action.

Preserve means to prevent modification to the natural floodplain environment, or to maintain it as closely as possible to its natural state. This term applies foremost to floodplains showing little or no disruption by man. If an action will result in harm to or within the floodplain, the agency must design or modify the action to assure that it will be carried out in a manner which preserves as much of the natural and beneficial floodplain values as is possible.

5.C. Methods to Minimize, Restore and Preserve

A wide range of methods have been developed over time to minimize harm to lives and property from flood hazards. In the recent past, other methods directed toward minimizing harm to natural and beneficial environmental values, including those associated with the floodplain, have also been developed. The technology and methodologies for achieving restoration and preservation are not as well documented nor understood, but currently are receiving increasing attention. The tools and approaches, which are directed toward attaining these three goals of the Order, should be considered and applied at all stages of a proposed action, as appropriate, e.g., during the planning, design, construction, operation and maintenance of a proposed project.

Although the Order emphasizes avoidance of the floodplain as the preferred manner for meeting its intent to avoid harm to or within the floodplain, the following examples are provided as additional guidance. The agencies should not be limited by the scope and level of detail of these examples.

5.C.1. NATURAL MODERATION OF FLOODS

- Minimize floodplain fills and actions that require fills such as construction of dwellings, factories, highways, etc.
- Require that structures and facilities on wetlands provide for adequate flow circulation.
- Use minimum grading requirements and save as much of the site from compaction as possible.
- Relocate nonconforming structures and facilities out of the floodplain.
- Return site to natural contours.
- Preserve free natural drainage when designing and constructing bridges, roads, fills, and large built-up centers.
- Prevent intrusion on and destruction of beach and estuarine ecosystems and restore damaged dunes and vegetation.

5.C.2. WATER QUALITY

- Maintain wetland and floodplain vegetation buffers to reduce sedimentation and delivery of chemical pollutants to the water body.
- Control agricultural activities to minimize nutrient inflow.
- Control urban runoff, other storm water, and point and nonpoint discharges.
- Control methods used for grading, filling, soil removal and replacement, etc., to minimize erosion and sedimentation during construction.

- Prohibit the location of potential pathogenic and toxic sources on the floodplain, such as sanitary land fills and septic tank, etc.

5.C.3. GROUNDWATER RECHARGE

- Require the use of previous surfaces where practicable.
- Design construction projects for runoff detention.
- Dispose of spoils and waste materials so as not to contaminate ground or surface water or change land contours.

5.C.4. LIVING RESOURCES

- Identify and protect wildlife habitat and other vital ecologically sensitive areas from disruption.
- Require topsoil protection programs during construction.
- Control wetland drainage, channelization, and water withdrawal.
- Reestablish damaged floodplain ecosystems.
- Minimize tree cutting and other vegetation removal.
- Design floodgates and seawalls to allow natural tidal activity and estuarine flow.

5.C.5. CULTURAL RESOURCES

- Provide public access to and along the waterfront for recreation, scientific study, educational instruction, etc.
- Locate and preserve from harm historical cultural resources; consult with appropriate governmental agency or private group.

5.C.6. AGRICULTURAL RESOURCES

- Minimize soil erosion on cropped areas within floodplains.
- Control use of pesticides, herbicides, and fertilizer.
- Limit the size of fields, promote fence rows, shelter belts and strip-cropping.
- Strengthen water bank and soil bank type programs to be consistent with alternate demands for the use of agricultural land.
- Minimize irrigation return flows and excessive applications of water.

5.C.7. AQUACULTURAL RESOURCES

- Construct impoundments to minimize any alteration in natural drainage and flood flow. Existing natural impoundments such as oxbow lakes and sloughs could be utilized under proper management.
- Limit the use of exotic species, both plant and animal, to those organisms already common to the area or those known not to compete unfavorably with existing natural populations.

- Discourage mechanized operations. Machinery such as dredges, weeders, and large-scale harvesting equipment may lead to environmental problems such as sediment loading to adjacent watercourses.

5.C.8. FORESTRY RESOURCES

- Control the practice of clear-cutting, depending upon the species harvested, topography, and location.
- Complement state law governing other aspects of harvest operations; proximity to watercourses, limits on roadbuilding, equipment intrusions, etc.
- Include fire management in any overall management plans. Selective fire use may reduce the probability of major destructive fires.

- Require erosion control plans on all timber allotments, roads, and skidways.

Implementing the above mechanism may be achieved through many types of administrative measures, depending in part upon the agency programs and authority.

Some examples are:

- Engineering and realty section standards and procedures.
- Contract, grant, loan, permit, and license stipulations.
- Application of appropriate encumbrances during land conveyance.
- Information transfer and education of employees and public.
- Delegation of responsibility for floodplain activities to a specific office with sufficient authority to play an active leadership role both within and outside of the agency.
- Systematic review of existing agency programs to identify opportunities for floodplain value preservation and restoration.
- Site surveys to identify opportunities for floodplain preservation and restoration; and
- Provision of coordination methods within and outside of agency to enable the implementation of unified floodplain management measures.

STEP 6—REEVALUATE ALTERNATIVES

Having identified the impacts the proposed action would have on the floodplain (Step 4), methods to minimize these impacts, and opportunities to restore and preserve floodplain values (Step 5); the proposed action should not be reevaluated. For proposed actions in the base floodplain, the reevaluation should consider if the action is still feasible at this site. If not, consider limiting the action to

make non-floodplain sites practicable. If neither is acceptable, the alternative is no action. If the proposed action is outside the base floodplain but has impacts which cannot be minimized (Step 5), consider whether the action can be modified or relocated to eliminate or reduce the identified impacts, or if the no action alternative should be chosen.

The reevaluation should also include a provision for comparison of the relative adverse impacts associated with the proposed action located in and out of the floodplain. The comparison should emphasize floodplain values. However, a site out of the floodplain should not be chosen if the overall harm is significantly greater than that associated with the floodplain site.

6.A. Location in the Base Floodplain

In determining whether the proposed action will be located in the base floodplain, the agency must ascertain that the floodplain site is the only practicable alternative. Further, the importance of the location, must clearly outweigh the requirements of the Order to:

- Avoid direct or indirect support of floodplain development wherever there is a practicable alternative;
- Reduce the risk of flood loss;
- Minimize the impact of floods on human safety, health and welfare; and
- Restore and preserve the natural and beneficial floodplain values.

6.B. Limit Action

If an action proposed to be located in the floodplain cannot satisfy the four requirements in Step 6.A., consider reducing the criteria for the proposed action. This would lower the threshold for what constitutes a practicable alternative. New alternative actions and sites could then be identified and previously rejected ones reevaluated for practicability based on scaled-down expectations.

6.C. No Action

If neither of the above courses of action are feasible, the agency should reevaluate the no action alternative.

STEP 7—FINDINGS AND PUBLIC EXPLANATION

If reevaluation results in the determination that there is no practicable alternative to locating in or impacting the floodplain, a statement of findings and public explanation must be provided for the proposed action. Each agency should explain how any tradeoff analysis was conducted by the agency in making its findings. Some existing agency public notice procedures may already satisfy part of the

requirements of the Order (Section 2(a)(2)(ii)) through such mechanisms as OMB A-95 and NEPA procedures, or other public involvement programs. However, agency procedures must incorporate the development and issuance of a written statement of findings and public explanation which includes:

1. A description of why the proposed action must be located in the floodplain;
2. A description of all significant facts considered in making the determination including alternative sites and actions;
3. A statement indicating whether the actions conform to applicable State or local floodplain protection standards;

In addition, and in keeping with the concept of the overall public involvement process discussed in Step 2, the following items should be included in the statement of findings and public explanation:

4. A statement indicating why the NFIP criteria are demonstrably inappropriate for the proposed action;
5. A provision for publication in the FEDERAL REGISTER or other appropriate vehicle;
6. A provision for a brief comment period prior to agency action (15 to 30 days);
7. A description of how the activity will be designed or modified to minimize harm to or within the floodplain;
8. A statement indicating how the action affects natural or beneficial floodplain values;
9. A statement listing other involved agencies and individuals.

7.A. Interagency Notice

Certain public review procedures already exist with which the Order's review requirements are to be integrated.

7.A.1. PROGRAMS SUBJECT TO OMB CIRCULAR A-95

For programs subject to OMB Circular A-95, the agency shall send a notice, not to exceed three pages in length including a location map, to the State and areawide A-95 clearinghouse for the areas affected. The notice shall include (as a minimum) 1, 2, and 3 from above. It would also be helpful to the reviewer, and consistent with the intent of the Order, to include items 4 through 9.

7.A.2. OTHER PROGRAMS

For programs not subject to OMB-95 review procedures, agencies must develop procedures to provide for similar notice and explanation of why a proposed action is to be located in a floodplain. This notice must be circulated among agencies and also made available to the public for review.

7.B. Actions Subject to NEPA

For agency actions subject to NEPA which take place in the base floodplain, the public review requirements discussed above as set out in Section 2(b) of Executive Order 11514, as amended, should include the nine items listed in the introduction to this step. Section 2(a)(4) of the Order requires the same public notice procedures for Federal actions in the floodplain even though impacts are not significant enough to require the preparation of an environmental impact statement (EIS) under Section 102(2)(C) of NEPA (Public Law 91-190).

Under NEPA procedures, a final EIS is circulated for public and interagency review and comment. A minimum of 30 days is required to allow a review and to receive responses from the public and governmental agencies. These comments must then be considered. The findings must be made in conjunction with a final agency decision, and the formal statement of findings required by the Order must be issued prior to initiating the proposed action. A final EIS should explain, if appropriate, why the responsible official has recommended or why the agency might support an action located in a floodplain.

7.C. All Actions Located in the Base Floodplain

A statement of findings (including the explanatory information discussed in 7.A.) must be issued by the agency head in compliance with Section 2(a)(2) of the Order. This applies to all proposed actions located within or impacting the floodplain, including proposed actions whose impacts are not significant enough or are not otherwise required to complete an EIS.

STEP 8—IMPLEMENT ACTION

With the conclusion of the decision-making process described in Steps 1-7, the proposed action can be implemented. However, there is a continuing responsibility for insuring that the action is carried out in compliance with the Order. This is especially important for projects with long-term operation, maintenance and repair programs such as reservoirs or waste treatment facilities.

APPENDIX A—FLOODPLAIN SERVICES AVAILABLE FROM LISTED AGENCIES

DEPARTMENT OF AGRICULTURE Soil Conservation Service (SCS)

As part of the SCS's Floodplain Management Assistance Program each State Conservationist carries out cooperative Flood Hazard Analyses upon request of local governments, in accordance with a Joint Coordination

Agreement with the responsible State agency. SCS flood hazard reports contain floodplain delineations on aerial photomaps, flood profiles, and discharge and floodway data. In addition, SCS provides continuing technical assistance to local governments, after completion of a flood hazard or insurance study, to help them implement their local floodplain management program. Each SCS State Office has additional flood elevation and related floodplain data on file from Watershed Project and Resource and Conservation Development Project investigations, River Basins Surveys, and detailed soil surveys. If the State or field office address is not known contact: Chief, Floodplain Management and Special Projects Branch, River Basins Division, SCS: P.O. Box 2890, Washington, D.C. 20013. Telephone 202-447-7697.

DEPARTMENT OF THE ARMY Corps of Engineers

The Corps' separately funded Flood Plain Management Services Program has units in 47 District and Division offices located throughout the country which provide information and assistance in flood-related matters. They maintain a file of floodplain information, survey, and other reports containing floodplain delineations, flood profiles, and data on flood discharges and hydrographs. Each office provides: (1) Interpretations as to flood depths, velocities and durations from existing data; (2) develops new data through field and hydrologic studies for interpretation; and (3) provides guidance on adjustments to minimize the adverse effects of floods and floodplain development. If the nearest District office address is not known, contact Chief, Flood Plain Management Services (FPMS), U.S. Army Corps of Engineers, HQDA (DAEN-CWP-F), Washington, D.C. 20314, telephone 202/893-1691, or the nearest Division office.

North Atlantic Division, New York, NY, 212-264-7483
South Atlantic Division, Atlantic, GA, 404-221-8702
Southwestern Division, Dallas, TX, 214-787-2310
South Pacific Division, San Francisco, CA, 415-556-5660
Lower Mississippi Valley Division, Vicksburg, MS, 601-636-1311 Ext. 385
Missouri River Division, Omaha, NB, 402-221-7270
North Central Division, Chicago, IL, 312-353-6531
Ohio River Division, Cincinnati, OH, 513-684-3012
North Pacific Division, Portland, OR, 503-221-3823
New England Division, Waltham, MA, 617-894-2400 Ext. 545
Pacific Ocean Division, APO San Francisco, 808-438-2883

DEPARTMENT OF COMMERCE NOAA-National Weather Service

Floodplain information and interpretative assistance for specific points on larger rivers of the United States can be obtained from the National Weather Service. Information available consists of the flood stage for selected communities (the stage above which flood damage occurs), and historical flood information for that location. An annual publication entitled *River Forecasts Provided by the National Weather Service*, lists the points for which data are compiled and includes that flood stage at each point and the current year's maximum stage as well as the maximum state of record. This publication is for sale by the National Climatic Center of NOAA, Asheville, North Carolina 28801. The National Weather Service provides flood forecasts and warnings on larger rivers and provides flash flood warnings on smaller streams. Interested communities are assisted in establishing Flash Flood Warnings Systems.

For information and assistance contact the following National Weather Service Regional Offices:

Eastern Region, Garden City, NY, 212-995-8639
Southern Region, Ft. Worth, TX, 817-334-2874
Central Region, Kansas City, MO, 816-374-3229
Western Region, Salt Lake City, UT, 801-524-5137
Alaskan Region, Anchorage, AK, 907-265-4718
Pacific Region, Honolulu, HA, 808-546-5680

Storm surge frequency information and interpretative assistance are available for the Gulf of Mexico and Atlantic coasts. Studies have been completed for the Gulf of Mexico coast from the Alabama-Florida border to southern Florida; and along the Atlantic coast from southern Florida to Cape Henlopen, the southern boundary of Delaware Bay. The National Weather Service also provides warnings of storm surges associated with tropical and extratropical storms. For storm surge frequency information and interpretative assistance contact: Chief, Water Management Information, NWS Office of Hydrology (W21), 8060-13th Street, Silver Spring, MD 20910. Telephone: 301-427-7543.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Housing Administration

The civil engineer at the 78 local or regional offices has specific knowledge of flood elevations for many urban locations and can provide knowledge of material available to assist in making a determination of floodplain location. The location of the nearest office may be obtained from one of HUD's 10 re-

gional offices or by contacting: Federal Housing Administration, 451 7th Street SW., Washington, D.C. 20410. Telephone: 202-755-5111.

Federal Insurance Administration

Request for insurance maps or studies should be addressed as follows:

(1) *FIA Mailing List*. Copies of new or revised FHBMs, FIRMs and FIS reports are distributed upon publication to organizations on the FIA mailing list. In requesting to be added to the mailing list, the agency should specify the number and distribution of maps required (for example, two copies of each map for Maine and New Hampshire communities to Boston regional office). Mailing list inquiries should be sent to:

Engineering Division, Federal Insurance Administration, Room 5150, HUD Building, 451 7th Street, SW., Washington, D.C. 20514. Telephone: 202-755-7510.

(2) *Requests for a Single Map*. Request(s) for a previously published FFBM or FIRM may be made by calling FIA's toll free number 800-424-8872 from outside of the Washington, D.C. area, or 755-9096 from within the Washington, D.C. area.

(3) *Flood Insurance Study Reports*. These detailed engineering reports are distributed to those on the mailing list when a FIRM is initially published. However, because there has not been a recurring demand for this information, FIA does not have a system for supplying copies to interested organizations at a later date. Copies are available at: (1) FIA's Engineering Division (address above); (2) FIA Regional Offices (see list below) and (3) Chief Executive Officer of the local community within which the action is proposed to be carried out.

Region I—Boston, 617-223-2616
Region II—New York City, 212-264-4734
Region III—Philadelphia, 215-597-9581
Region IV—Atlanta, 404-257-2391
Region V—Chicago, 312-353-0757
Region VI—Dallas, 214-749-7412
Region VII—Kansas City, 816-374-2181
Region VIII—Denver, 303-837-5041
Region IX—San Francisco, 415-556-3543
Region X—Seattle, 206-442-1028

Requests for floodplain management services, and a list of experienced consulting engineers may be obtained from the Director, Floodplain Management Division, Federal Insurance Administration 451 7th Street, S.W., Washington, D.C. 20410. Telephone 202-426-1891.

DEPARTMENT OF THE INTERIOR

Geological Survey

User Assistance Centers at 48 locations can provide (a) factual information on flood peaks and discharges, flood depths, and velocities, profiles of the water surface during major floods, areas inundated during major floods,

time-of-travel of flood wave, and sediment transport data; (b) interpretive information regarding flood-frequency relations, estimates of 10-, 50-, 100-, and 500 years flood discharges, computed water surface profiles, and flood-prone areas delineated on topographic maps, in most communities in the United States, with known flood problems; and (c) assistance in minimizing flood losses by quickly identifying areas of potential flood hazards. If the User Assistance Center address is not known, contact: Chief, Surface Water Branch, Water Resources Division, U.S. Geological Survey, National Center, Reston, VA. 22092. Telephone: 703-860-6837.

Bureau of Land Management

The Bureau of Land Management (BLM) has District Offices located in the 11 Western States and Alaska involved in land use planning for public lands. Floodplain protection and flood prevention is a significant element in the BLM planning system, and each District Office maintains a file of existing floodplain maps which are available for public inspection. If the location of the District Office is not known, contact: Bureau of Land Management, U.S. Department of the Interior, 18th & C Streets, NW., Washington, D.C. 20240. Telephone: 202-343-5717.

Bureau of Reclamation

The flood hydrologist at the seven regional offices has knowledge of flooding and flood elevation for related locations associated with Bureau projects and can provide interpretive assistance for existing data.

For information contact one of the seven regional or nearby project offices or the Flood Hydrology Section, U.S. Bureau of Reclamation, P.O. Box 25007, Denver Federal Center, Denver, CO. 80225. Telephone: 303-234-2035.

Fish and Wildlife Service

The Fish and Wildlife Service provides expertise on questions relating to fish, wildlife, and habitat resource, preservation, and maintenance. It functions through six regional, area and field offices. For information contact any of these offices, or the Fish and Wildlife Service, U.S. Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240. Telephone: 202-343-5715.

TENNESSEE VALLEY AUTHORITY

Activities in water resources are confined to portions of the seven States in the Tennessee Valley Watershed. Since 1953, TVA has conducted a program of floodplain management assistance to local governments. Reports have been published for more than 130 communities, and have provided

profiles and flood data to at least 70 others. Detailed information in files pertains to large floods which have occurred in the Valley since the 1930's, and in less detail, dating back to the large flood of 1867. TVA's Flood Plain Management Services Staff provides technical assistance to help those who propose developments in floodplains to use the floodplain wisely. Contact: Flood Plain Management Services, 100 Liberty Building, Tennessee Valley Authority, Knoxville, TN. 37902. Telephone: 615-632-4451.

DELAWARE RIVER BASIN COMMISSION

The Commission maintains a file of floodplain information, delineation and flood data studies prepared by the Commission, Federal agencies and others. Where data exist, assistance with interpretation will be provided. Contact: Head, Branch of Operations, Delaware River Basin Commission, P.O. Box 7360, West Trenton, N.J. 08628. Telephone: 609-883-9500.

SUSQUEHANNA RIVER BASIN COMMISSION

The Commission maintains a file of detailed hydrologic and hydraulic information for 245 basin communities studied under the National Flood Insurance Program for HUD. Limited additional hydrological data for other areas also is available. The Commission can provide general information and guidance on floodplain management measures. Contact: Chief, Planning and Operations, Susquehanna River Basin Commission, 1721 North Front Street, Harrisburg, PA. 17102. Telephone: 717-238-0425.

STATES

Many (but not all) States have active floodplain management programs. They have on file or access to most floodplain information generated by Federal and State agencies, regional organizations, special districts and private consultants. State agencies are usually staffed and funded to: (1) coordinate floodplain management activities; (2) develop minimum standards for floodplain regulations; (3) assist local units of government (counties, cities, etc.) in developing floodplain management programs; and (4) interpret available floodplain information. For most States, the appropriate contact is the Department of Natural Resources or the Water Resources Division. At the substate level, regional agencies such as conservancy districts and multi-county planning agencies may be a source of floodplain data and interpretation.

APPENDIX B—RELATED PROGRAMS AND REFERENCES Publications

Useful information on many of the subjects discussed in this document is

found in the following publications, which describe programs and studies related to the objectives of Executive Order 11988:

"A Unified National Program for Managing Flood Losses," *House Document 465*, 89th Congress, 2nd Session. A report by the Task Force on Federal Flood Control Policy, August, 1966.

Rules and Regulations of the National Flood Insurance Program. 41-FR 207, Oct. 26, 1976, at CFR 1909, et seq. Copies of the rules and regulations can be obtained from the U.S. Department of Housing and Urban Development, Federal Insurance Administration, Washington, D.C. 20410.

Regulation of Flood Hazard Areas to Reduce Flood Losses. A 2-volume work published by the Water Resources Council in 1971-1972. It contains legal aspects of and draft legislation for riverine and coastal floodplain regulation programs of states and local governments.

Flood proofing Regulations. U.S. Army Corps of Engineers, June, 1972 (EP1165-2-314).

A unified National Program for Flood Plain Management. U.S. Water Resources Council. July, 1976.

A Perspective on Flood Plain Regulations for Flood Plain Management. U.S. Army Corps of Engineers, June, 1976 (EP1165-2-304).

Elevated Residential Structures, HUD, Federal Insurance Administration. September, 1976.

Relevant Legislative Authority and Statement of Congressional Purpose for Minimizing Floodplain Encroachment

There is a large body of Federal legislation relevant to preservation or restoration of floodplains. Some of the major items of legislation are listed below.

Title and Lead Agency

Water Resources Planning Act (42 USC 1962), WRC
Watershed Protection and Flood Prevention Act (16 USC 1001), SCS
River and Harbor Act of 1899 (33 USC 001), COE
Flood Control Act of 1944 (16 USC 460d, et al.), COE
Flood Disaster Protection Act of 1973 (42 USC 4001),
Federal Water Pollution Control Act Amendments of 1972 (33 USC 1251), EPA
Coastal Zone Management Act (16 USC 1451), OCZM
Surface Mining Control and Reclamation Act of 1977, OSM
"1890 Organic Act" of the National Weather Service (15 USC 311) NOAA
National Environmental Policy Act (42 USC 4321), CEQ
Wild and Scenic Rivers Act (16 USC 1271), NPS

National Trail Systems Act (16 USC 1241), NPS
Fish and Wildlife Coordination Act (16 USC 661) Fish and Wildlife Restoration Projects (16 USC 777 and 669), FWS
Endangered Species Act (16 USC 1531), FWS
The Wilderness Act (16 USC 1131), Various Land and Water Conservation Fund Act (16 USC 4601), HCRS
Antiquities Act of 1906 (16 USC 431), HCRS
Archaeological and Historic Preservation Act of 1974 (16 USC 469), HCRS

Agencies should consider reviewing this body of legislation, act by act, in light of the Order to uncover opportunities within their existing programs for protecting the natural and beneficial floodplain values under the powers of these acts as well as to uncover problem areas in meeting mandates (lack of guidance, ceiling, budgets, etc.)

APPENDIX C—E.O. 11988, FLOODPLAIN MANAGEMENT

Statement by the President
Accompanying E.O. 11988, May 24, 1977

The floodplains which adjoin the Nation's inland and coastal waters have long been recognized as having special values to our citizens. They have provided us with wildlife habitat, agricultural and forest products, stable ecosystems, and park and recreation areas. However, unwise use and development of our riverine, coastal, and other floodplains not only destroy many of the special qualities of these areas but pose a severe threat to human life, health, and property.

Since the adoption of a national flood control policy in 1936, the Federal Government has invested about \$10 billion in flood protection works. Despite substantial efforts by the Federal Government to reduce flood hazards and protect floodplains, annual losses from floods and adverse alteration of floodplains continue to increase.

The problem arises mainly from unwise land use practices. The Federal Government can be responsible for or can influence these practices in the construction of projects, in the management of its own properties, in the provision of financial or technical assistance including support of financial institutions, and in the uses for which its agencies issue licenses or permits. In addition to minimizing the danger to human and nonhuman communities living in floodplains, active floodplain management represents sound business practice by reducing the risk of flood damage to properties benefiting from Federal assistance.

Because unwise floodplain development can lead to the loss of human and other natural resources, it is simply a bad Federal investment and should be avoided. In order to avoid to the extent possible the long and short-

term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative, I have issued an Executive order on floodplain management.

E.O. 11988—Floodplain Management

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 *et seq.*), and the Flood Disaster Protection Act of 1973 (Public Law 93-234, 87 Stat. 975), in order to avoid to the extent possible the long and short term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative, it is hereby ordered as follows:

SECTION 1. Each agency shall provide leadership and shall take action to reduce the risk of flood loss to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

Sec. 2. In carrying out the activities described in Section 1 of this Order, each agency has a responsibility to evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management; and to prescribe procedures to implement the policies and requirements of this Order, as follows:

(a) (1) Before taking an action, each agency shall determine whether the proposed action will occur in a floodplain—for major Federal actions significantly affecting the quality of the human environment, the evaluation required below will be included in any statement prepared under Section 102(2)(C) of the National Environmental Policy Act. This determination shall be made according to a Department of Housing and Urban Development (HUD) floodplain map or a more detailed map of an area, if available. If such maps are not available, the agency shall make a determination of the location of the floodplain based on

the best available information. The Water Resources Council shall issue guidance on this information not later than October 1, 1977.

(2) If an agency has determined to, or proposes to, conduct, support, or allow an action to be located in a floodplain, the agency shall consider alternatives to avoid adverse effects and incompatible development in the floodplain. If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in this Order requires siting in a floodplain, the agency shall, prior to taking action, (i) design or modify its action in order to minimize potential harm to or within the floodplain, consistent with regulations issued in accord with Section 2(d) of this Order, and (ii) prepare and circulate a notice containing an explanation of why the action is proposed to be located in the floodplain.

(3) For programs subject to the Office of Management and Budget Circular A-95, the agency shall send the notice, not to exceed three pages in length including a location map, to the state and areawide A-95 clearing-houses for the geographic areas affected. The notice shall include: (i) the reasons why the action is proposed to be located in a floodplain; (ii) a statement indicating whether the action conforms to applicable state or local floodplain protection standards and (iii) a list of the alternatives considered. Agencies shall endeavor to allow a brief comment period prior to taking any action.

(4) Each agency shall also provide opportunity for early public review of any plans or proposals for actions in floodplains, in accordance with Section 2(b) of Executive Order No. 11514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

(b) Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in a floodplain, whether the proposed action is in accord with this Order.

(c) Each agency shall take floodplain management into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate to the degree of hazard involved. Agencies shall include adequate provision for the evaluation and consideration of flood hazards in the regulations and operating procedures for the licenses, permits, loans or grants-in-aid programs that they administer. Agencies

shall also encourage and provide appropriate guidance to applicants to evaluate the effects of their proposals in floodplains prior to submitting applications for Federal licenses, permits, loans or grants.

(d) As allowed by law, each agency shall issue or amend existing regulations and procedures within one year to comply with this Order. These procedures shall incorporate the Unified National Program for Floodplain Management of the Water Resources Council, and shall explain the means that the agency will employ to pursue the nonhazardous use of riverine, coastal and other floodplains in connection with the activities under its authority. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order. Agencies shall prepare their procedures in consultation with the Water Resources Council, the Federal Insurance Administration, and the Council on Environmental Quality, and shall update such procedures as necessary.

Sec. 3. In addition to the requirements of Section 2, agencies with responsibilities for Federal real property and facilities shall take the following measures:

(a) The regulations and procedures established under Section 2(d) of this Order shall, at a minimum, require the construction of Federal structures and facilities to be in accordance with the standards and criteria and to be consistent with the intent of those promulgated under the National Flood Insurance Program. They shall deviate only to the extent that the standards of the Flood Insurance Program are demonstrably inappropriate for a given type of structure or facility.

(b) If, after compliance with the requirements of this Order, new construction of structures or facilities are to be located in a floodplain, accepted floodproofing and other flood protection measures shall be applied to new construction or rehabilitation. To achieve flood protection, agencies shall, wherever practicable, elevate structures above the base flood level rather than filling in land.

(c) If property used by the general public has suffered flood damage or is located in an identified flood hazard area, the responsible agency shall provide on structures, and other places where appropriate, conspicuous delineation of past and probable flood height in order to enhance public awareness of and knowledge about flood hazards.

(d) When property in floodplains is proposed for lease, easement, right-of-way, or disposal to non-Federal public or private parties, the Federal agency shall (1) reference in the conveyance

those uses that are restricted under identified Federal, State, or local floodplain regulations; and (2) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successors, except where prohibited by law; or (3) withhold such properties from conveyance.

Sec. 4. In addition to any responsibilities under this Order and Sections 202 and 205 of the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4106 and 4128), agencies which guarantee, approve, regulate, or insure any financial transaction which is related to an area located in a floodplain shall, prior to completing action on such transaction, inform any private parties participating in the transaction of the hazards of locating structures in the floodplain.

Sec. 5. The head of each agency shall submit a report to the Council on Environmental Quality and to the Water Resources Council on June 30, 1978, regarding the status of their procedures and the impact of this Order on the agency's operations. Thereafter, the Water Resources Council shall periodically evaluate agency procedures and their effectiveness.

Sec. 6. As used in this Order:

(a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting floodplains.

(b) The term "base flood" shall mean that flood which has a one percent or greater chance of occurrence in any given year.

(c) The term "floodplain" shall mean the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year.

Sec. 7. Executive Order No. 11296 of August 10, 1966, is hereby revoked. All actions, procedures, and issuances taken under that Order and still in effect shall remain in effect until modified by appropriate authority under the terms of this Order.

Sec. 8. Nothing in this Order shall apply to assistance provided for emergency work essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

Sec. 9. To the extent the provisions of Section 2(a) of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended

(88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended.

JIMMY CARTER.

The White House,
May 24, 1977.

APPENDIX D—E.O. 11990 PROTECTION OF WETLANDS Statement by the President Accompanying E.O. 11990

The Nation's coastal and inland wetlands are vital natural resources of critical importance to the people of this country. Wetlands are areas of great natural productivity, hydrological utility, and environmental diversity, providing natural flood control, improved water quality, recharge of aquifers, flow stabilization of streams and rivers, and habitat for fish and wildlife resources. Wetlands contribute to the production of agricultural products and timber, and provide recreational, scientific, and aesthetic resources of national interest.

The unwise use and development of wetlands will destroy many of their special qualities and important natural functions. Recent estimates indicate that the United States has already lost over 40 percent of our 120 million acres of wetlands inventoried in the 1950's. This piecemeal alteration and destruction of wetlands through draining, dredging, filling, and other means has had an adverse cumulative impact on our natural resources and on the quality of human life.

The problem of loss of wetlands arises mainly from unwise land use practices. The Federal Government can be responsible for or can influence these practices in the construction of projects, in the management of its own properties, and in the provisions of financial or technical assistance.

In order to avoid to the extent possible the long and short term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative, I have issued an Executive order on the protection of wetlands.

Executive Order 11990—Protection of Wetlands

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), in

order to avoid to the extent possible the long and short term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative, it is hereby ordered as follows:

SECTION 1. (a) Each agency shall provide leadership and shall take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; and (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

(b) This Order does not apply to the issuance by Federal agencies of permits, licenses, or allocations to private parties for activities involving wetlands on non-Federal property.

Sec. 2. (a) In furtherance of Section 101(b)(3) of the National Environmental Policy Act of 1969 (42 U.S.C. 4331(b)(3)) to improve and coordinate Federal plans, functions, programs and resources to the end that the Nation may attain the widest range of beneficial uses of the environment without degradation and risk to health or safety, each agency, to the extent permitted by law, shall avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds (1) that there is no practicable alternative to such construction, and (2) that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use. In making this finding the head of the agency may take into account economic, environmental and other pertinent factors.

(b) Each agency shall also provide opportunity for early public review of any plans or proposals for new construction in wetlands, in accordance with Section 2(b) of Executive Order No. 11514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

Sec. 3. Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in wetlands, whether the proposed action is in accord with this Order.

Sec. 4. When Federally-owned wetlands or portions of wetlands are proposed for lease, easement, right-of-way or disposal to non-Federal public or private parties, the Federal agency shall (a) reference in the conveyance those uses that are restricted under identified Federal, State or local wetlands regulations; and (b) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successor, except where prohibited by law; or (c) withhold such properties from disposal.

Sec. 5. In carrying out the activities described in Section 1 of this Order, each agency shall consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are:

(a) public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion;

(b) maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and

(c) other uses of wetlands in the public interest, including recreational, scientific, and cultural uses.

Sec. 6. As allowed by law, agencies shall issue or amend their existing procedures in order to comply with this Order. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order.

Sec. 7. As used in this Order:

(a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting wetlands.

(b) The term "new construction" shall include draining, dredging, channelizing, filling, diking, impounding, and related activities and any structures or facilities begun or authorized after the effective date of this Order.

(c) The term "wetlands" means those areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds.

Sec. 8. This Order does not apply to projects presently under construction, or to projects for which all of the funds have been appropriated through Fiscal Year 1977, or to projects and programs for which a draft or final environmental impact statement will be filed prior to October 1, 1977. The provisions of Section 2 of this Order shall be implemented by each agency not later than October 1, 1977.

Sec. 9. Nothing in this Order shall apply to assistance provided for emergency work, essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

Sec. 10. To the extent the provisions of Sections 2 and 5 of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended.

JIMMY CARTER

The White House,
May 24, 1977.

APPENDIX E—E.O. 11514 PROTECTION AND ENHANCEMENT OF ENVIRONMENTAL QUALITY

Excerpts From E.O. 11514 (March 5, 1970),
as Amended by E.O. 11991 (May 24,
1977), Secs. 2(g) and 3(h)

By virtue of the authority vested in me as President of the United States and in furtherance of the purpose and policy of the National Environmental Policy Act of 1969 (Public Law No. 91-190, approved January 1, 1970), it is ordered as follows:

Section 1. *Policy.* The Federal Government shall provide leadership in protecting and enhancing the quality of the Nation's environment to sustain and enrich human life. Federal agencies shall initiate measures needed to direct their policies, plans and programs so as to meet national environmental goals. The council on Environmental Quality, through the Chairman, shall advise and assist the President in leading this national effort.

Sec. 2. *Responsibilities of Federal agencies.* Consonant with Title I of the National Environmental Policy Act of 1969, hereafter referred to as the "Act", the heads of Federal agencies shall:

(a) Monitor, evaluate, and control on a continuing basis their agencies' activities so as to protect and enhance the

quality of the environment. Such activities shall include those directed to controlling pollution and enhancing the environment and those designed to accomplish other program objectives which may affect the quality of the environment. Agencies shall develop programs and measures to protect and enhance environmental quality and shall assess progress in meeting the specific objectives of such activities. Heads of agencies shall consult with appropriate Federal, State and local agencies in carrying out their activities as they affect the quality of the environment.

(b) Develop procedures to ensure the fullest practicable provision of timely public information and understanding of Federal plans and programs with environmental impact in order to obtain the views of interested parties. These procedures shall include, whenever appropriate, provision for public hearings, and shall provide the public with relevant information, including information on alternative courses of action. Federal agencies shall also encourage State and local agencies to adopt similar procedures informing the public concerning their activities affecting the quality of the environment.

(c) Insure that information regarding existing or potential environmental problems and control methods developed as part of research, development, demonstration, test, or evaluation activities is made available to Federal agencies, States, counties, municipalities, institutions, and other entities, as appropriate.

(d) Review their agencies' statutory authority, administrative regulations, policies, and procedures, including those relating to loans, grants, contracts, leases, licenses, or permits, in order to identify any deficiencies or inconsistencies therein which prohibit or limit full compliance with the purposes and provisions of the Act. A report on this review and the corrective actions taken or planned, including such measures to be proposed to the President as may be necessary to bring their authority and policies into conformance with the intent, purposes, and procedures of the Act, shall

be provided to the Council on Environmental Quality not later than September 1, 1970.

(e) Engage in exchange of data and research results, and cooperate with agencies of other governments to foster the purpose of the Act.

(f) Proceed, in coordination with other agencies, with actions required by section 102 of the Act.

(g) In carrying out their responsibilities under the Act and this Order, comply with the regulations issued by the Council except where such compliance would be inconsistent with statutory requirements.

Sec. 3. *Responsibilities of Council on Environmental Quality.* The Council on Environmental Quality shall:

(a) Evaluate existing and proposed policies and activities of the Federal Government directed to the control of pollution and the enhancement of the environment and to the accomplishment of other objectives which affect the quality of the environment. This shall include continuing review of procedures employed in the development and enforcement of Federal standards affecting environmental quality. Based upon such evaluations the Council shall, where appropriate, recommend to the President policies and programs to achieve more effective protection and enhancement of environmental quality and shall, where appropriate, seek resolution of significant environmental issues.

(b) Recommend to the President and to the agencies priorities among programs designed for the control of pollution and for enhancement of the environment.

(c) Determine the need for new policies and programs for dealing with environmental problems not being adequately addressed.

(d) Conduct, as it determines to be appropriate, public hearings or conferences on issues of environmental significance.

(e) Promote the development and use of indices and monitoring systems (1) to assess environmental conditions and trends, (2) to predict the environmental impact of proposed public and private actions, and (3) to determine the effectiveness of programs for pro-

tecting and enhancing environmental quality.

(f) Coordinate Federal programs related to environmental quality.

(g) Advise and assist the President and the agencies in achieving international cooperation for dealing with environmental problems, under the foreign policy guidance of the Secretary of State.

(h) Issue regulations to Federal agencies for the implementation of the procedural provisions of the Act (42 U.S.C. 4332(2)). Such regulations shall be developed after consultation with affected agencies and after such public hearings as may be appropriate. They will be designed to make the environmental impact statement process more useful to decisionmakers and the public; and to reduce paperwork and the accumulation of extraneous background data, in order to emphasize the need to focus on real environmental issues and alternatives. They will require impact statements to be concise, clear, and to the point, and supported by evidence that agencies have made the necessary environmental analyses. The Council shall include in its regulations procedures (1) for the early preparation of environmental impact statements, and (2) for the referral to the Council of conflicts between agencies concerning the implementation of the National Environmental Policy Act of 1969, as amended, and Section 309 of the Clean Air Act, as amended, for the Council's recommendation as to their prompt resolution.

(i) Issue such other instructions to agencies, and request such reports and other information from them, as may be required to carry out the Council's responsibilities under the Act.

(j) Assist the President in preparing the annual Environmental Quality Report provided for in section 201 of the Act.

(k) Foster investigations, studies, surveys, research, and analyses relating to (i) ecological systems and environmental quality, (ii) the impact of new and changing technologies thereon, and (iii) means of preventing or reducing adverse effects from such technologies.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture
SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Revision of Delegations of Authority
AGENCY: Department of Agriculture.
ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary to reflect realignment of certain functions to the Assistant Secretary for Administration. The Department has determined that the functions performed by the Office of Automated Data Systems, the Office of Operations, and the Office of Finance should be combined into a new Office of Operations and Finance. This will bring together related administrative functions and provide the potential for reduced overhead in management.

EFFECTIVE DATE: February 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Preston Davis, Management Division, Office of Budget, Planning and Evaluation, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-5301.

Subpart C—Delegations of Authority to the Deputy Secretary, Assistant Secretaries, the Director of Economics, Policy Analysis and Budget, and the Director, Office of Governmental and Public Affairs

1. Section 2.25 is amended by revoking and reserving paragraphs (c) and (f) and by revoking paragraph (b) and substituting the following in lieu thereof:

§ 2.25 Delegations of Authority to the Assistant Secretary for Administration.

(b) *Related to operations and finance.* (1) Promulgate departmental policies, standards, techniques, and procedures, and represent the Department in the following areas:

(i) Contracting for and the procurement of administrative and operating supplies, services, and construction.

- (ii) Socioeconomic programs related to contracting, including Small Business Assistance, Labor Surplus Area Assistance, Disadvantaged Business Assistance, and Labor Standards.
- (iii) Utilization of the resources of State and local governments and of the private sector in domestic program operations.
- (iv) Selection, standardization, and simplification of program delivery processes utilizing grants, contracts, and/or agreements.
- (v) Acquisition, leasing, utilization, value analysis, construction, maintenance, and disposition of real and personal property including control of space assignments and use.
- (vi) Acquisition, storage, distribution, and disposition of forms and supplies.
- (vii) Telecommunications.
- (viii) Mail management.
- (ix) Motor Vehicle Fleet and other vehicular transportation.
- (x) Transportation of things.
- (xi) Prevention, control, and abatement of air and water pollution at Federal facilities (Executive Order 11507).
- (xii) Implementation of the Uniform Relocation Assistance and Real Property Policies Act of 1970 (Pub. L. 91-646).
- (xiii) Develop and implement energy management actions related to the internal operations of the Department. Maintain liaison with other Government agencies in these matters.
- (2) Operate or provide for the operation of centralized departmental services to provide printing, copy reduction, offset composition, supply, telephone, telegraph, mail, automated mailing lists, excess property pool, space allocation, central Secretary's records, departmental administrative regulations and Secretarial issuances, and related management support.
- (3) Exercise following special authorities.
- (i) Designate Department debarring officer to perform the functions of 41 CFR Subpart 1-1.6 and 41 CFR 4-1.601-1(a).
- (ii) Promulgate Department schedule of fees and charges for reproductions, furnishing of copies and making searches for official records pursuant to the Freedom of Information Act, 5 U.S.C. 552.
- (iii) Conduct liaison with the Office of the Federal Register including the

- making of required certification pursuant to 1 CFR Part 4.
- (iv) Maintain custody and permit appropriate use of the official seal of the Department.
- (v) Promulgate policy for use of the official flags of the Secretary and the Department.
- (vi) Coordinate collection of historical materials for Presidential Libraries.
- (vii) Oversee the safeguarding of unclassified materials designated "For Official Use Only."
- (viii) Establish standards for and coordinate the issuance of employee identification credentials within the Department.
- (4) Exercise authority to:
- (i) Make determinations and findings authorizing the use of negotiation in accordance with 41 U.S.C. 252(c) (11), (12), and (13) with respect to purchases and contracts:
- (a) For experimental, developmental, or research work, or for the manufacture, or furnishing of property for experimentation, development, research, or test.
- (b) For property or services when the character, ingredients, or components thereof are such that the contract should not be publicly disclosed.
- (c) For technical equipment when it is determined that the procurement thereof without advertising is necessary in special situations or in particular localities in order to assure standardization of equipment and interchangeability of parts and where such standardization and interchangeability is necessary in the public interest.
- (ii) Make determinations and findings authorizing the omission of the examination of records clause from contracts with foreign contractors and foreign subcontractors under the authority granted in 41 U.S.C. 304(c) (41 CFR 1-3.303; 1-6.1004).
- (5) Exercise general responsibility and authority for all matters related to the administration of the Department's accounting and finance operations including:
- (i) Financial administration, including accounting and related activities.
- (ii) Development, maintenance and operation of Department-wide payroll and personnel statistics, payment, billing and collection, and accounting and related reporting systems.
- (6) Formulate and promulgate departmental financial policies, procedures, and regulations.

(7) Provide staff assistance for the Secretary, general officers, and other Department and agency officials.

(8) Review financial aspects of agency operations and proposals.

(9) Represent the Department in contacts with the General Accounting Office, the Treasury Department, the Office of Management and Budget, and other organizations or agencies on matters related to assigned responsibilities.

(10) Designate the Department's Director of Finance.

(11) Provide management support services for the National Finance Center and, by agreements with agency heads concerned, provide such services for other USDA tenants housed in the same facility. As used herein, such management support service shall include:

(i) Personnel services, as listed in § 2.25 (e) (10), and organizational support services, with authority to take actions required by law or regulation to perform such services.

(ii) Procurement, property management, space management, communications, messenger, paperwork management, and related administrative services, with authority to take actions required by law or regulation to perform such services.

(12) Administer the Department's records, forms, reports, and directives management programs.

(13) Manage and operate the total USDA data processing program through all stages of the data processing management cycle: advance planning, feasibility, design, equipment selection and acquisition readiness effort, systems installation, system impact appraisal, time sharing and service center arrangement, systems monitoring, evaluation, and security.

(14) Exercise full Department-wide contracting and procurement authority for automatic data processing and data transmission equipment, software, services maintenance, and related supplies. This authority includes the promulgation of departmental directives regulating the management of contracting and procurement functions related to the above.

(15) Plan, develop, install, and manage departmental data bases and assist in maintenance of such systems to satisfy agency needs.

(16) Develop an integrated computer network for use by Department agencies and offices.

(c) [Revoked and reserved.]

(f) [Revoked and reserved.]

Subpart J—Delegations of Authority by the Assistant Secretary for Administration

2. Section 2.76 and 2.79 are revoked and reserved and § 2.75 is revoked and

the following substituted in lieu thereof:

§ 2.75 Director, Office of Operations and Finance.

(a) *Delegations.* Pursuant to § 2.25 (b) and (d), the following delegations of authority are made by the Assistant Secretary for Administration to the Director, Office of Operations and Finance:

(1) Promulgate departmental policies, standards, techniques, and procedures, and represent the Department, in the following:

(i) Contracting for and the procurement of administrative and operating supplies, services, and construction.

(ii) Socioeconomic programs relating to contracting, including Small Business, Labor Surplus Area Assistance, Labor Standards, and Disadvantaged Business Assistance: *Provided*, That with respect to Disadvantaged Business Assistance this delegation is limited to promulgating departmental policies, standards, techniques, and procedures, in consultation with the Director, Office of Equal Opportunity.

(iii) Selection, standardization, and simplification of program delivery processes utilizing grants, contracts, and/or agreements.

(iv) Acquisition, leasing, utilization, value analysis, construction, maintenance, and disposition of real and personal property including control of space assignments and use.

(v) Acquisition, storage, distribution, and disposition of forms and supplies.

(vi) Telecommunications.

(vii) Mail management.

(viii) Motor Vehicle fleet and other vehicular transportation.

(ix) Transportation of things.

(x) Prevention, control, and abatement of air and water pollution at Federal facilities (E.O. 11507).

(xi) Implementation of the Uniform Relocation Assistance and Real Property Policies Act of 1970 (Pub. L. 91-646).

(xii) Develop and implement energy management actions related to the internal operations of the Department. Maintain liaison with other Government agencies in these matters.

(2) Operate, or provide for the operation of, centralized departmental services to provide printing, copy reproduction, offset composition, supply, telephone, telegraph, mail, automated mailing lists, excess property pool, space allocation, central Secretary's records, departmental administrative regulation and secretarial issuances, and related management support.

(3) Exercise the following special authorities:

(i) The Director, Office of Operations and Finance is designated as the Department's debarring officer, and authorized to perform the functions of 41 CFR Subpart 1-1.6 and 41 CFR Subpart 4-1.601-1(a).

(ii) Promulgation of Department schedule of fees and charges for reproductions, furnishing of copies, and making searches for official records pursuant to the Freedom of Information Act, 5 U.S.C. 552.

(iii) Conduct liaison with the Office of the Federal Register including the making of required certifications pursuant to 1 CFR Part 4.

(iv) Maintain custody and permit appropriate use of the official seal of the Department.

(v) Promulgate policy for the use of the official flags of the Secretary and the Department.

(vi) Make determinations and findings authorizing use of negotiation in accordance with 41 U.S.C. 252(c)(11) for purchases and contracts for experimental, developmental, or research work, or for the manufacture or furnishing of property for experimentation, development, research, or test which will not require the expenditure of more than \$25,000 (41 CFR 1-3.211; 1-3.303).

(vii) Coordinate collection of historical material for Presidential Libraries.

(viii) Oversee the safeguarding of unclassified materials designated "For Official Use Only."

(ix) Establish standards for and coordinate the issuance of employee identification within the Department.

(4) Provide procurement, property management, space management, communications, messenger, paperwork management, and related services (with authority to take actions required by law or regulation to perform such services) for:

(i) The Secretary of Agriculture;

(ii) The general officers of the Department;

(iii) The offices and agencies reporting to the Assistant Secretary for Administration; and

(iv) Provide such of the above services, as may be agreed, for any other officers or agencies of the Department not included in subdivisions (i), (ii), or (iii) of this subparagraph.

(5) Exercise full Department-wide contracting and procurement authority for automatic data processing and data transmission equipment, software, services, maintenance, and related supplies. This authority includes the promulgation of departmental directives regulating the management of contracting and procurement functions related to the above.

(6) Provide support services normally furnished by the Office of Operations and Finance and needed by the Department in carrying out defense responsibilities.

(7) Exercise general responsibility and authority for all matters related to the administration of the Department's accounting and finance operations including:

(i) Financial administration, including accounting and related activities.

(ii) Development, maintenance, and operation of Department-wide payroll and personnel statistics, payment, billing and collection, and accounting and related reporting systems.

(8) Formulate and promulgate departmental financial policies, procedures, and regulations.

(9) Provide staff assistance for the Secretary, general officers, and other Department and agency officials.

(10) Review financial aspects of agency operations and proposals.

(11) Represent the Department in contacts with the General Accounting Office, the Treasury Department, the Office of Management and Budget, and other organizations or agencies on matters related to assigned responsibilities.

(12) The Director, Office of Operations and Finance is designated as the Department's Director of Finance.

(13) Provide management support services for the National Finance Center, and by agreements with agency heads concerned, provide such services for other USDA tenants housed in the same facility. As used herein, such management support services shall include:

(i) Personnel services, as listed in § 2.25(e)(10), and organizational support services, with authority to take actions required by law or regulation to perform such services.

(ii) Procurement, property management, space management, communications, messenger, paperwork management, and related administrative services, with authority to take actions required by law or regulation to perform such services.

(14) Administer the Department's records, forms, reports, and directive management programs.

(15) Provide budget, accounting, and related financial management services, with authority to take action required by law or regulation to provide such services for working capital funds and general appropriated and trust funds for

(i) The Secretary of Agriculture

(ii) The general officers of the Department

(iii) The Offices and agencies reporting to the Assistant Secretary for Administration, and

(iv) Provide such of the above services, as may be agreed, for any other officers and agencies of the Department not included in paragraph (a)(15), (i), (ii), or (iii) of this section.

(16) Manage and operate the total USDA data processing program through all stages of the data processing management cycle: Advance planning, feasibility, design, equipment selection and acquisition readiness effort, systems installation, system impact appraisal, time sharing and service center arrangements, systems monitoring, evaluation, and security.

(17) Plan, develop, install, and manage departmental data bases and assist in the maintenance of such systems to satisfy agency needs.

(18) Develop an integrated computer network for use with Department agencies and offices.

(b) *Reservations.* The following authorities are reserved to the Assistant Secretary for Administration:

(1) Make determinations and findings authorizing the use of negotiation in accordance with 41 U.S.C. 252(c) (11), (12), and (13) with respect to purchase and contracts:

(i) For experimental, developmental, or research work, or for the manufacture or furnishing of property for experimentation, development, research, or test which will require the expenditure of more than \$25,000.

(ii) For property or service when the character, ingredients, or components thereof are such that the contract should not be publicly disclosed.

(iii) For technical equipment when it is determined that the procurement thereof without advertising is necessary in special situations or in particular localities in order to assure standardization of equipment and interchangeability of parts and where such standardization and interchangeability is necessary in the public interest.

(2) Make determinations and findings authorizing the omission of the examination of records clause from contracts with foreign contractors and foreign subcontractors under the authority granted in 41 U.S.C. 304(c) (41 CFR 1-3.303; 1-6.1004).

§ 2.76 [Revoked and reserved.]

§ 2.79 [Revoked and reserved.]
(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953.)

For Subpart C:

Dated: January 31, 1978.

BOB BERGLAND,
Secretary of Agriculture.

For Subpart J:

Dated: December 31, 1977.

JOAN S. WALLACE,
Assistant Secretary
for Administration.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-CE-2-AD; Amdt. 39-3139]

PART 39—AIRWORTHINESS DIRECTIVES

Beech 19, 23 and 24 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Beech 19, 23 and 24 series airplanes having manually operated wing flaps. The AD requires installation of a new improved wing flap control weld assembly on affected airplanes. This action will prevent possible unwanted retraction of the wing flaps which could have an adverse effect on aircraft controllability.

DATES: This amendment becomes effective February 20, 1978.

COMPLIANCE SCHEDULE—Required within the next 50 hours time-in-service after the effective date of this AD.

ADDRESSES: Beechcraft Service Instructions No. 0940, applicable to this AD, may be obtained from local Beechcraft Aviation and Aero Centers or Beech Aircraft Corp., Commercial Service Department, 9709 East Central, Wichita, Kans. 67201. A copy of the Service Instructions cited above are contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Mo., 64106 and at Room 916, 800 Independence Avenue, Southeast, Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

William L. Schroeder, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3446.

SUPPLEMENTARY INFORMATION: There have been eight reports of Beech P/N 169-524024-37 wing flap control weld assemblies failing on Beech 19 and 23 series airplanes. Two of the failures resulted in unwanted in-flight retraction of wing flaps and one failure is suspected as being the cause of an accident. Failure of the wing flap control weld assembly can result in sudden and unexpected retraction of the wing flaps that may have an adverse effect on aircraft controllability. Subsequent to this investigation the manufacturer has determined that some P/N 169-524024-37 and -81 flap control weld assemblies may have welds with insufficient penetration which can cause the assemblies to be under strength. As a result, the manufacturer has issued Beechcraft Service Instructions No. 0940 recommending installation of a new improved P/N 169-524024-85 wing flap control weld assembly on certain Beech 19, 23 and 24 series airplanes having manually operated wing flaps. The FAA has concluded that wing flap control weld assemblies having welds with improper penetration is an unsafe condition that may exist on other airplanes of the same type

RULES AND REGULATIONS

design. Accordingly, an AD is being issued applicable to certain serial numbers of the above-mentioned Beech series airplanes making installation of the new P/N 169-524024-85 wing flap control weld assembly mandatory. This AD was coordinated with the manufacturer prior to issuance. The FAA has determined that there is an immediate need for a regulation to assure safe operation of the affected airplanes. Therefore, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest, and good cause exists for making the amendment effective in less than thirty (30) days after the date of publication in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal authors of this document are: William L. Schroeder, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, section 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

BEECH: Applies to the following models and serial number airplanes, equipped with manually operated wing flaps, certificated in all categories:

Model and serial numbers

23, A23, A23A, B23 and C23—M-1 through M-1979.

A23-19, 19A and B19—MB-1 through MB-866.

A23-24 and A24—MA-1 through MA-368.
A24R, B24R and C24R—MC-2 through MC-536.

COMPLIANCE: Required as indicated unless already accomplished.

To prevent failure of the wing flap control weld assembly and resulting possible unwanted in-flight retraction of the wing flaps, within the next 50 hours time-in-service after the effective date of this AD, accomplish the following in accordance with Beechcraft Service Instructions No. 0940 or later approved revisions:

(A) Remove flap control weld assembly and install Beech P/N 169-524024-85 flap control weld assembly.

(B) Any equivalent means of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This amendment becomes effective on February 20, 1978.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89).)

NOTE:—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring

preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Mo. on February 2, 1978.

JOHN E. SHAW,
Acting Director,
Central Region.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5904, 34-14445, 35-20404, IC-10112; S7-736]

PART 231—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 241—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 271—INTERPRETATIVE RELEASES RELATING TO THE INVESTMENT COMPANY ACT OF 1940 AND GENERAL RULES AND REGULATIONS THEREUNDER

Disclosure of Management Remuneration

AGENCY: Securities and Exchange Commission.

ACTION: Interpretation and request for comments.

SUMMARY: This release supplements the Commission's interpretive release on disclosure of management remuneration, Securities Act Release No. 5856 (August 18, 1977), 42 FR 43058 (August 26, 1977), in order to provide further guidance to registrants. Some of the more frequently raised questions regarding the status as remuneration of benefits received by officers and directors are set forth together with the interpretive responses of the Commission's Division of Corporation Finance. Comments are requested on both Securities Act Release No. 5856 and the interpretive responses included in this release.

DATE: Comments should be submitted on or before April 15, 1978.

ADDRESS: Comments should refer to File S7-736 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Registrants with specific questions should contact the staff members directly responsible for reviewing the documents they file with the Com-

mission. General questions may be directed to Linda L. Griggs, Division of Corporation Finance, 202-755-1750 or Glen Payne, Division of Investment Management, 202-755-0230, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

The Commission hereby issues Securities Act Release No. (33-5904, 34-14445, 35-20404, IC-10112; S7-736), Parts 231, 241 and 271 of Title 17, Chapter II of the Code of Federal Regulations as given below.

DISCLOSURE OF MANAGEMENT REMUNERATION

On August 18, 1977, the Commission issued a release, Securities Act Release No. 5856 (42 FR 43058), which emphasized its view that the existing disclosure provisions require registrants to include within the aggregate remuneration reported in registration statements, annual reports and proxy and information statements all forms of remuneration received by management from the corporation, including personal benefits sometimes referred to as perquisites. Since the publication of that release, the staff has received many requests for guidance in identifying and valuing some of the personal benefits received by officers and directors and others for whom remuneration information is required.

This release is published to provide current information on the interpretations of the Commission's Division of Corporation Finance (the "Division") of the remuneration reporting requirements in view of the volume of these requests for interpretations of such provisions as they relate to specific fringe benefits. The questions included in the release represent some of those more frequently brought to the attention of the staff by registrants, their counsel, and other interested persons. The Division of Investment Management will follow the Division's interpretations to the extent they relate to disclosure by registered investment companies.

Corporations make a great variety of expenditures which relate to management, many of which result in benefits to executives. Whether these constitute remuneration usually depends upon the facts and circumstances involved in each situation. In general, expenditures which simply assist an executive in doing his job effectively or which reimburse him for expenses incurred in the performance of his functions are not remuneration while expenditures made for his personal benefit or for purposes unrelated to the business of the company would constitute remuneration. In some instances, expenditures may serve both purposes, and if neither is predominant, allocation to the extent reasonably feasible may be called for. In view

of the difficulties in applying these, and other general principles, the Commission believes that this statement of the Division's responses to specific questions should be useful to registrants.

In determining whether the value of specific benefits should be included in aggregate remuneration, registrants should keep in mind that full disclosure of the remuneration received by officers and directors is important to informed voting and investment decisions. In particular, remuneration information is necessary for an informed assessment of management and is significant in maintaining public confidence in the corporate system. Of course, accurate and sufficiently detailed books and records are prerequisites to the appropriate disclosure of remuneration information.¹

Whereas the following questions and interpretive responses relate generally to the presentation of remuneration information pursuant to specific disclosure provisions, the anti-fraud provisions of the Securities Act of 1933 (15 U.S.C. 77a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and the Securities Exchange Act of 1934 ("Exchange Act") may require registrants to present additional information about benefits received by officers and directors.² For example, the anti-fraud provisions may require disclosure of any unauthorized receipt of benefits by officers and directors.

The analysis of the benefits received by management requires consideration of the specific reporting requirements, Securities Act Release No. 5856 and the approach illustrated by the questions and responses set forth below. The following topics are addressed by these questions:

I. Remuneration reporting requirements	Questions 1 to 4.
II. General disclosure questions:	
A. Identification.....	5 to 6.
B. Valuation.....	7.
III. Format for disclosure.....	8 to 12.
IV. Types of benefits received by management:	
A. Use of company property.....	13 to 21.
Company cars.....	14 to 16.
Company planes.....	17 to 19.
Other corporate assets.....	20.
Valuation.....	21.
B. Memberships in clubs and professional associations.....	22 to 24.
C. Medical, insurance and other reimbursement plans.....	25 to 29.

¹See the recently enacted amendments to section 13(b) of the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)), title I of Pub. L. No. 95-213 (Dec. 19, 1977) and section 31 of the Investment Company Act of 1940 (15 U.S.C. 80a-30) and Rule 31a-1 thereunder (17 CFR 270.31a-1) which set forth detailed record keeping requirements for registered investment companies.

²See Securities Act §§ 12(2), and 17(a); Exchange Act § 10(b) and Rules 10b-5 and 14a-9.

RULES AND REGULATIONS

G. Company products.....	43.
H. Business expenses.....	44 to 47.

I. REMUNERATION REPORTING REQUIREMENTS

1. **Question.** For which persons must registrants report remuneration information?

Interpretive Response. The remuneration reporting provisions require registrants to report in various registration statements, annual reports, and proxy and information statements the amount of remuneration paid or to be paid by the registrant and its subsidiaries to the following persons:

(a) Each of the registrant's directors and each of its three highest paid officers (and other persons specified in the investment company reporting provisions) whose aggregate direct remuneration exceeded a certain amount specified in the disclosure form or rule; and

(b) All officers and directors (and certain persons specified in the investment company reporting provisions) as a group.³

2. **Question.** What is the term "remuneration" intended to include?

Interpretive Response. The term "remuneration" is intended to include both cash and non-cash forms of remuneration received by management, including the value of personal benefits.

3. **Question.** How should the remuneration information be presented?

Interpretive Response. Generally, the reporting provisions require separate disclosure of the following types of remuneration received by officers and directors or benefits which result in remuneration to such persons:

(a) Aggregate direct remuneration paid by the registrant and its subsidiaries during the registrant's last fiscal year;

(b) Annuity, pension or retirement benefits proposed to be paid by the registrant or any of its subsidiaries under any existing plan in the event of retirement at normal retirement date;

(c) Other remuneration payments proposed to be made in the future by

³See Securities Act Release No. 5856, footnotes 7-13. Hereinafter the persons as to which remuneration disclosure is required will be referred to as officers, directors, management or executives although remuneration information is required also for certain other persons by the investment company forms.

the registrant or any of its subsidiaries pursuant to any existing plan or arrangement;

(d) Options granted to certain officers and directors; and

(e) Benefits received by certain persons as a result of transactions to which the registrant is a party.⁴

4. **Question.** What forms of remuneration is the term "direct remuneration" intended to encompass?

Interpretive Response. The term "direct remuneration" is intended to include all forms of remuneration, including personal benefits, except annuity, pension or retirement benefits, payments proposed to be made in the future, options and the interest of management in certain corporate transactions because these forms of remuneration are required to be reported under separate disclosure provisions.

II. GENERAL DISCLOSURE QUESTIONS—IDENTIFICATION AND VALUATION

A. IDENTIFICATION

5. **Question.** What indirect benefits received by officers and directors should be considered by registrants in aggregating the forms of remuneration?

Interpretive Response. Registrants should analyze both those benefits conferred directly to officers and directors and those that may benefit such persons indirectly because they are provided to relatives and friends who do not perform services for the corporation or to any other persons upon the request of or on behalf of the officer or director.

6. **Question.** Do all benefits received by executives result in forms of remuneration which should be included in aggregate remuneration?

Interpretive Response. No. The value of those benefits received by management which are directly related to the performance of their job is not required to be included in aggregate remuneration.

B. VALUATION

7. **Question.** Once a registrant identifies a benefit as a form of remuneration, how should it be valued?

Interpretive Response. Registrants should value benefits on the basis of valuation methods which they believe are most reasonable. Alternative valuation methods include the following: (a) Cost to the company unless the cost to the company is disproportionate to the alternative cost of the benefit to the recipient, that is the amount the recipient would have had to pay to obtain the benefit himself; (b) apprais-

⁴The indebtedness to the registrant of officers, directors and certain other persons is required to be disclosed by another reporting provision.

als (for property given to or used by an executive); (c) the alternative cost of the benefit to the recipient, that is the amount the recipient would have had to pay to obtain the benefit himself; (d) the valuation assigned by the registrant or executive for tax purposes; or (e) some other standard for valuing which is reasonable in the opinion of management.

III. FORMAT FOR DISCLOSURE

8. *Question.* Should the personal benefits received by officers and directors be described separately in documents which require disclosure of the remuneration received by management?

Interpretive Response. Personal benefits are not required to be described when their value is included in the aggregate remuneration reported, unless disclosure about the benefit is otherwise required by another reporting provision. For example, if an officer or a director receives an interest free loan from a corporation, the value of the benefit should be included in the reported aggregate remuneration received by the individual and the loan itself should be described pursuant to the provisions of the reporting requirements relating to indebtedness to the company of various persons.¹ The more general anti-fraud provisions, of course, may require additional information to be disclosed about personal benefits received or to be received by management.

9. *Question.* May a registrant describe a benefit in addition to including its value in the aggregate remuneration reported?

Interpretive Response. Yes.
10. *Question.* May a registrant exclude the value of some or all of the benefits from the reported aggregate remuneration and state an approximate or maximum value of such benefits in a footnote to the remuneration table?

Interpretive Response. Yes, provided this disclosure is not misleading.

11. *Question.* May a registrant describe the personal benefits in a footnote to the remuneration table rather than including the values of such benefits in the tabular presentation of reported aggregate remuneration?

Interpretive Response. A registrant may describe a benefit which is a form of remuneration and exclude its value from reported remuneration whenever the dollar value of the benefit is not reasonably ascertainable or when a description of the benefit results in disclosure which is more meaningful to investors than the inclusion of an amount in aggregate remuneration.

¹ Item 7(c), Schedule 14A, 17 CFR 240.14a-101; Item 9(b), Form 10, 17 CFR 249.210; Items 18(b), Form 10-K, 17 CFR 249.310. See also Question 34.

provided it is clear that the value of the benefit has not been included in the aggregate remuneration reported in the table and the disclosure is not misleading.

12. *Question.* What information should be included in a footnote which describe a benefit?

Interpretive Response. The footnote should include a description of the benefit and, to the extent possible, information about its value and the basis for valuation. In addition, the footnote should state any other information as is reasonably necessary to apprise investors fully of what management is receiving.

IV. TYPES OF BENEFITS RECEIVED BY MANAGEMENT

A. USE OF COMPANY PROPERTY

13. *Question.* Is the use by management of company property such as cars, planes, apartments, houses, and other corporate assets a form of remuneration?

Interpretive Response. The use of corporate assets by officers or directors for reasons unrelated to the conduct of company business results in a form of remuneration to the executive. Where the assets are used in connection with job related matters, however, this usage would not result in remuneration to the executive. Where an executive uses an asset for both personal and business purposes, a value should be allocated to the personal use for remuneration reporting purposes.

COMPANY CARS

14. *Question.* Is the use of a company owned car a form of remuneration?

Interpretive Response. The personal use of a company car is a form of remuneration to such executive.

15. *Question.* How should the personal use of a company's automobile be valued?

Interpretive Response. The Division would express no objection if the value of this benefit were a percentage of the cost to the company of leasing or owning the car based upon the amount of time an executive used the car for personal purposes or the number of miles the car was used for personal purposes.

16. *Question.* Is the use by management of a chauffeur-driven limousine a form of remuneration?

Interpretive Response. It depends upon the reason why the limousine is used. The use by an executive of a chauffeur-driven car in connection with job related matters does not result in a form of remuneration to the executive. If the executive uses the chauffeur-driven car time for personal reasons, however, this use of the car is a form of remuneration.

COMPANY PLANE

17. *Question.* Is the use of a company plan for commuting purposes a form of remuneration?

Interpretive Response. Yes.

18. *Question.* If the company plane is flown someplace for a business reason and an executive who does not have company business to transact at such place hitches a ride or tags along on the plane, does the executive receive a form of remuneration?

Interpretive Response. Yes.

19. *Question.* Should this benefit be valued for remuneration reporting purposes?

Interpretive Response. Although the corporation may have incurred little cost as a result of providing air transportation to the extra person(s), the value of this personal benefit should be included in aggregate remuneration or otherwise reported.

OTHER CORPORATE ASSETS

20. *Question.* Would the use of company owned or leased apartments, houses, villas, lodges, etc. result in a form of reportable remuneration to management?

Interpretive Response. Whether or not the use by management of company owned or leased assets such as apartments, houses, villas, lodges, yachts and other facilities results in a form of remuneration to the executive depends upon the nature of the use of the assets. If the executive uses the facilities in connection with entertaining business clients, transacting business or engaging in internal business related activities, he would not be receiving remuneration as a result of such usage. If, however, the facilities are used for recreation or other personal purposes and no business is transacted, the usage by management would result in a form of remuneration to the executive. Where some of the usage is for business and some for personal purposes, only the personal usage would result in a form of remuneration.

VALUATION

21. *Question.* How should the personal use of company assets such as planes, apartments, houses, lodges, etc. be valued for remuneration reporting purposes?

Interpretive Response. The Division would express no objection if the personal use of company assets were valued using one of the following methods:

(a) Determining the recipient's cost if he had obtained the use of equivalent assets independently of the corporation; or

(b) Allocating a portion of the cost to the corporation of owning and maintaining the facility during a particular year on the basis of the time

the asset was used for personal purposes or the mileage of such usage unless this amount is disproportionate to the amount which the recipient would have paid if he had obtained the use of equivalent assets himself.

B. MEMBERSHIPS IN CLUBS AND PROFESSIONAL ASSOCIATIONS

22. *Question.* Is the use of clubs of which the corporation is a member or in which an executive's membership is paid for by the company a form of remuneration?

Interpretive Response. If the clubs are used solely for business related matters, the usage does not result in remuneration to the executive. If, however, the club is used for personal activities, this usage results in a form of remuneration.

23. *Question.* How should this usage be valued?

Interpretive Response. The Division would raise no objection if the value of the personal use of clubs of which the corporation is a member or in which an executive's membership is paid for by the company were the sum of:

(1) A portion of the annual dues allocated on the basis of percentage of personal use;

(2) All personal expenses incurred by the executive but paid for by the company;

(3) A portion of the initiation fee in the year in which paid based upon the amount of personal usage.

24. *Question.* Is the payment of professional organization fees for officers and directors a form of remuneration to them?

Interpretive Response. The payment of fees of professional organizations is not a form of remuneration to the officers or directors if membership in the organization is necessary to such person's performance of his duties for the company.

C. MEDICAL, INSURANCE AND OTHER REIMBURSEMENT PLANS

MEDICAL AND INSURANCE PRACTICES

25. *Question.* Is the payment by a corporation of expenses incurred in connection with physical examinations given executives a form of remuneration to them?

Interpretive Response. Payments for physical examinations for executives generally do not result in a form of remuneration to the executives. If the physical examination is given at a resort, however, and in part results in a paid vacation for the executive and/or his spouse and if the cost of the physical examination vacation is disproportionate to the cost of a physical examination at a clinic in a non-resort area, then a portion of the cost to the company for the physical examination would be a form of remuneration.

26. *Question.* How should the amount of this remuneration be determined?

Interpretive Response. The Division would express no objection if the amount of remuneration were:

(a) That portion of the cost to the company of the physical examination resort stay represented by the non-medical expenses; or

(b) The difference between the cost of a physical examination at a clinic in a non-resort area and the cost of the physical at the resort.

27. *Question.* Are payments made for or benefits to be received by management under life or accident insurance, hospitalization, medical expense reimbursement or other similar plans forms of remuneration?

Interpretive Response. Benefits paid under and payments and premiums made for group life or accident insurance, group hospitalization or similar group payments or benefits need not be included in reported remuneration nor are corporations required to describe such plans or arrangements. These plans or arrangements are considered to be group plans if they provide benefits to all or substantially all of the employees who satisfy certain minimum eligibility criteria or to such employees as qualify under a classification set up by the employer which does not discriminate in favor of employees who are officers, shareholders or highly compensated. For example, if a plan does not cover union members, this fact alone would not be determinative of non-group status of the plan. Premiums and any other amounts paid by a corporation for such plans or arrangements which are not group plans should be included in aggregate remuneration and the plans or arrangements should be described.

LIABILITY INSURANCE AND INDEMNIFICATION

28. *Question.* Are premiums paid by corporations for liability insurance for officers and directors forms of remuneration received by the executives?

Interpretive Response. Premiums paid for liability insurance for officers and directors and benefits paid under such insurance plans are not forms of remuneration to the extent that the insurance plan is intended to relieve officers and directors of liability relating to their job performance.

29. *Question.* Are indemnification payments forms of remuneration?

Interpretive Response. Indemnification payments are not forms of remuneration to the recipient executive if the company treats the payments as ordinary and necessary to the conduct of company business. The anti-fraud provisions, however, may require separate disclosure about indemnification payments, particularly those payments relating to securities violations because the Commission believes that such payments are against public policy.

D. PAYMENTS FOR LIVING AND RELATED EXPENSES

LIVING EXPENSES

30. *Question.* Is the payment by a corporation of housing or other ordinary living expenses at principal, temporary, vacation or other residences owned or used by an officer or director a form of remuneration?

Interpretive Response. Yes, provided the expenses were not incurred by an executive in connection with a business matter nor for the convenience of the corporation.

31. *Question.* Is the occasional use of a company maintained apartment, house or other dwelling a form of remuneration to him?

Interpretive Response. No, provided the dwelling is used by an officer or director for the purpose of facilitating his conduct of company business.

REPAIRS AND IMPROVEMENTS TO HOME OF PROPERTY

32. *Question.* Are payments for maintenance, repairs or improvements to an executive's home forms of remuneration to him?

Interpretive Response. Yes, generally.

SECURITY DEVICES

33. *Question.* Are the installation of security devices in an executive's home and/or car and the providing of bodyguards, chauffeur-driven limousines, and/or any other appropriate security measures forms of remuneration to officers and directors?

Interpretive Response. The taking of various security measures for the protection of executives may not result in any remuneration to such executive if the individual's life has been threatened because of his position in the company or if the company reasonably believes that the individual's safety is in jeopardy. If the security measures are provided solely for the convenience or comfort of the executive, however, they result in remuneration to the recipient.

LOW INTEREST OR INTEREST FREE LOANS

34. *Question.* Is the providing of loans to executives a form of remuneration to them?

Interpretive Response. Officers or directors receive remuneration as a result of their receipt of a loan from the corporation if the terms of the loan, including the security required and the interest rate charged, are not commercially reasonable as compared with the terms of a loan which the executive might have obtained from a lending institution.² In addition, if the

² Disclosure of the indebtedness of officers, directors and certain other persons to a company is required by a separate reporting provision if the individual's aggregate in-

Footnote continued on next page.

loan is commercially reasonable under this analysis but its grant is not a reasonable use of corporate funds because the corporation must pay a higher rate of interest on its own borrowings, the loan would result in remuneration to the officer or director. Low interest or interest free loans provided to executives by their employer result in remuneration to them regardless of whether the loan itself must be reported under the separate reporting provisions relating to the indebtedness of officers and directors to a company.

35. *Question.* How should the value of this remuneration be determined?

Interpretive Response. The Division would express no objection if the value of the remuneration received by an executive as a result of the favorable loan was based upon:

(a) The difference between the amount of interest to be paid and the amount of interest which the executive would have paid if the loan had been granted by an unaffiliated person; or

(b) The difference between the amount of interest the executive will pay and the amount which he would have paid if the interest rate were equivalent to the rate of interest the corporation pays on its borrowings, if the loan is on terms more favorable than the corporation could have obtained.

E. USE OF THE CORPORATE STAFF

36. *Question.* If employees on the corporation's professional staff provide financial, accounting, legal or other professional services to an officer or director, does this result in remuneration to the individual?

Interpretive Response. If the services are rendered with respect to a purely personal matter, such as the preparation of a will or United States tax return, this usage of the corporate staff would result in a form of remuneration to the officer or director. Where the matter relates to company business, the individual's compensation package or the individual's legal responsibilities as a result of his position in the company, the providing of the service may not result in remuneration to the officer or director.

37. *Question.* How should the use of the corporation's staff be valued for remuneration reporting purposes?

Interpretive Response. The Division would express no objection if the use of the corporate staff by an officer or

director for personal business were valued in one of the following ways:

(a) The amount the officer or director would have had to pay if he had hired unrelated persons to do the work for him; or

(b) The full cost to the company of the employees for the period of time they worked for the officer or director.

F. BENEFITS FROM THIRD PARTIES'

BANK LOANS

38. *Question.* Does the receipt by an officer or director of a loan from the corporation's bank result in a form of remuneration to such person?

Interpretive Response. The receipt of a loan from the corporation's bank may result in remuneration to the officer or director depending upon the facts and circumstances. Where the corporation compensates the bank either directly or indirectly for extending the loan to the executive, the officer or director receives remuneration to the extent of the benefit derived from such compensation.

39. *Question.* When does a corporation directly or indirectly compensate a bank for granting a favorable loan to an officer or director?

Interpretive Response. A company may compensate a bank directly or indirectly for granting a favorable loan to an officer or director in various different ways including but not limited to:

(a) Maintaining or increasing accounts or compensating balances at the bank as a result of the loan;

(b) Undertaking in writing or orally to increase its requests for loans from the bank as a result of the loan; and

(c) Paying a higher rate of interest on its loans as a result of the loan of the officer or director.

PROFESSIONAL AND OTHER SERVICES

40. *Question.* If a company's outside auditors, counsel or other professional consultants perform financial, accounting, legal or other professional services for an officer or director which are paid for by the company, does this result in remuneration to the executive from the company?

Interpretive Response. Whether or not the receipt by an officer or director of professional services rendered by a company's outside consultants results in remuneration to the executive depends upon the reason the services are rendered and its cost to the company. If the services are rendered in connection with a matter which is purely personal to the executive, the receipt of the services would result in remuneration to the officer or director

¹Disclosure of benefits received from third parties may be required pursuant to the reporting provision regarding transactions with management. See, e.g., Item 7(f), Schedule 14A, 17 CFR 240.14a-101.

depending upon whether the company compensates the professional directly or indirectly for conferring the service.

41. *Question.* If an officer or director does personal business with a customer or client of the company, does this relationship result in any remuneration to the officer or director from the company?

Interpretive Response. A business relationship between an officer or director and a customer or client of his company does not result in any remuneration from the company to the officer or director unless the company compensates the customer directly or indirectly for performing a service for the executive.

42. *Question.* When does a company compensate a client or an outside professional for providing personal services to an officer or director?

Interpretive Response. A company may compensate its client or an outside professional directly or indirectly for providing its executive with a service in various ways including:

(a) Paying or agreeing to pay a higher than market rate for its purchases or services obtained from the client or professional as a result of the executive's relationship with the client; and

(b) Increasing or undertaking to increase its business dealings with the client as a result of the executive's relationship with the client.

G. COMPANY PRODUCTS

43. *Question.* Should the purchase by an officer or director of the corporation's products at a discount be valued for the purposes of reporting remuneration received by an executive?

Interpretive Response. The purchase by officers or directors of the corporation's products at a discount need not be valued for the purposes of reporting remuneration received by an executive provided:

(a) All or substantially all of the corporation's employees may make purchases at the same discount or at a discount based upon eligibility criteria which precludes individual selection; and

(b) The price of the product as a result of the discount is not less than the cost to the corporation of producing it.

H. BUSINESS EXPENSES

44. *Question.* Do itemized expense accounts result in remuneration to executives?

Interpretive Response. The availability of an itemized expense account to an officer or director generally does not result in a form of remuneration to the executive provided the account is used for business related expenses.

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to require that a special invoice be presented to Customs for each shipment of certain articles of steel having an aggregate purchase price over \$2,500. The additional information provided on the special invoice will be used in the administration and enforcement of the Antidumping Act, 1921, as amended.

EFFECTIVE DATE: February 21, 1978.

FOR FURTHER INFORMATION CONTACT:

With respect to the trigger price mechanism (described under "Supplementary Information," below), Peter D. Ehrenhaft, Deputy Assistant Secretary and Special Counsel (Tariff Affairs), Department of the Treasury, Washington, D.C. 20220, 202-566-2806. With respect to other aspects of the amendments, Ben L. Irvin, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW, Washington, D.C. 20229, 202-566-8121.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On December 30, 1977, notice was published in the FEDERAL REGISTER (42 FR 65214) of a proposal to amend the Customs Regulations to require that a special invoice be presented to Customs for each shipment of certain articles of steel having an aggregate purchase price over \$2,500. As explained in the supplementary information to that notice, the additional information provided by the special invoice would be used in the administration and enforcement of the Antidumping Act, 1921, as amended.

In addition, the notice announced that the Secretary of the Treasury would implement a "trigger price mechanism" (TPM) as recommended to and approved by the President and that "trigger prices" for certain steel mill products would be established as the basis upon which imports of such products would be monitored for the purpose of determining whether investigations under the Antidumping Act,

1921, as amended, would be appropriate.

Written comments were invited from all interested persons on the proposed amendments to be received on or before January 27, 1978. Many comments were received in response to that notice. As explained below, the comments have resulted in minor changes in the proposed amendments.

With respect to the trigger price mechanism, the Department of the Treasury announced the base prices to be used for certain importations of steel mill products in a notice published in the FEDERAL REGISTER on January 9, 1978 (43 FR 1464).

Subsequently, in a notice published in the FEDERAL REGISTER on February 3, 1978 (43 FR 4703), the Department announced "extras" to be used in the trigger price mechanism for 16 of the 17 steel mill products for which base prices were published in the FEDERAL REGISTER of January 9, 1978.

DISCUSSION OF MAJOR COMMENTS

SOME IMPORTERS WILL BE REQUIRED TO FILE BOTH THE NEW SPECIAL SUMMARY STEEL INVOICE (SSSI) AND THE SPECIAL CUSTOMS INVOICE (CF 5515)

Under amended section 141.83, importers of those steel products specified in section 141.83(b)(2) will be required to file both the SSSI and the Special Customs Invoice (SCI), unless the filing of the SCI is waived by the district director of Customs. Several commenters stated that, when applicable, only the SSSI should be required. One commenter suggested that all the data necessary to the TPM should be included in the SCI without the adoption of a new form.

The reason for retaining the optional requirement of an SCI is that certain information in the SCI is applicable only to a limited number of importations and it is impracticable to incorporate these items into the SSSI because of space limitation on the new form. Therefore, there will be a continuing need for both the SCI and the SSSI in a limited number of cases. District directors will be instructed to require both forms only when necessary. Because of the specialized nature of the information required for purposes of the TPM, the adoption of the new form is essential. Further, importers could not furnish this information readily on the SCI because that form has no space for providing it.

THE IMPORTER WILL BE REQUIRED TO PRESENT THE SSSI AT THE TIME ENTRY IS MADE

Several comments were directed to the requirement that the SSSI must be available in proper form at the time entry is made. It was suggested that this requirement would interfere with the immediate delivery system which

45. *Question.* Does an unitemized expense account result in remuneration to an executive?

Interpretive Response. The total amount of an unitemized expense account would be a form of remuneration to an executive except to the extent specific amounts spent by an executive using such an expense account can be identified as relating to valid business related expenses.

46. *Question.* If an itemized expense account includes a miscellaneous item, would this result in remuneration to an officer or director?

Interpretive Response. If the miscellaneous item is comparable to an unitemized expense account, it should be treated in the same way as an unitemized expense account.

47. *Question.* If officers and directors receive first class travel arrangements which are related to job performance, should this result in a form of remuneration?

Interpretive Response. No.

REQUESTS FOR COMMENTS

Interested persons are invited to comment on both the Commission's interpretation expressed in Securities Act Release No. 5856 and the Interpretive responses of its Division of Corporation Finance included in this release. Comments should make reference to File S7-736. These comments will be considered by the staff both for use in connection with its on-going efforts to review the quality and usefulness of information required to be disclosed in documents filed with the Commission* and in considering possible amendments to the disclosure rules relating to management remuneration.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 6, 1978.

*Comments relating to the disclosure of management remuneration have previously been requested in Securities Act Release No. 5758 (November 2, 1976) (41 FR 49495) and Securities Exchange Act Release Nos. 13482 (April 28, 1977) (42 FR 23901) and 13901 (August 29, 1977) (42 FR 44860). All comments received in connection with these requests are available for public inspection at the Commission's Public Reference Room, 1100 L Street NW, Washington, D.C. 20549. The comments are available for inspection in Files S7-658 and S7-693 respectively.

(FR Doc. 78-3930 Filed 2-10-78; 8:45 am)

RULES AND REGULATIONS

REFERENCE TO ACCOMPANYING DOCUMENTS

permits the release of merchandise to the importer in certain circumstances before the formal entry form is presented (19 CFR Part 142).

Commenters requested that the importer be allowed additional time in which to file the SSSI. In this connection, one commenter suggested that the importer could be required to furnish a bond for subsequent delivery of the SSSI. Another commenter suggested that the importer should be allowed to enter the shipment for warehouse if he could not produce the SSSI at the time of entry.

The effectiveness of the TPM will depend upon the immediate availability of information in the SSSI. Prompt submission of the SSSI is therefore essential to the program. Under the immediate delivery procedure, the importer will have up to 10 working days after the date of release of the shipment to file the SSSI. This delay provides a reasonably sufficient time for compliance with the SSSI requirements. It is highly unlikely that redelivery of the merchandise to Customs custody for failure to supply the SSSI will be required in a significant number of cases. Warehousing of the merchandise upon arrival would be impracticable because of the handling costs involved for steel products. Further, the delay would preclude timely submission of the information for purposes of the TPM.

IMPORTERS WHOSE SHIPMENTS HAVE AN AGGREGATE PURCHASE PRICE OF NOT MORE THAN \$2,500 NEED NOT FILE AN SSSI

Comments were directed to the provisions in section 141.89(b)(1) which will limit the requirement of an SSSI to any shipments (i) containing steel mill products, as defined in section 141.89(b)(2), and (ii) having an aggregate purchase price of over \$2,500. The commenters generally suggested revision of the language describing the limitations. Some commenters would expand the scope of the limitation and some would require a more narrow definition. One comment suggested further clarification of the term "purchase price".

This provision was added to provide an exemption for the small number of shipments of limited value which may contain steel mill products. Such shipments can be regarded as non-commercial quantities, as commercial shipments of these types of products usually are valued over \$2,500. Further, such shipments are not significant for purposes of the TPM. The \$2,500 figure will be based in the purchase price as shown in the invoice filed in connection with entry.

One comment requested that importers be allowed to provide the information called for by the SSSI in summary form and refer to accompanying documents for more detailed information.

The space provided in the SSSI will be sufficient in most cases for the importers to provide the requested information. To expedite examination of the form and compilation of the submitted information for purposes of the TPM, it will be necessary that the use of accompanying documents be minimized.

SHOULD IMPORTERS BE REQUIRED TO SUBMIT SALES CONTRACTS IN CERTAIN CIRCUMSTANCES?

In connection with Item 8 (Date Price Terms Agreed), it was suggested that if the importer claims that the contract was entered into before the effective date of the TPM, he should be required to attach a copy of the pertinent contract to the SSSI. The commenter suggested that an instruction to Item 8 be added for this purpose.

Although confirmation of the contract date stated in the SSSI may be necessary in some cases, this possibility does not appear to justify imposing this added burden upon importers. If an antidumping investigation ensues, the contracts can be examined to confirm this information.

INFORMATION CONCERNING THE DATE OF EXPORTATION WILL NOT BE REQUIRED

Concerning proposed Item 8b (Dated of exportation), several commenters made the point that this information generally will not be known at the time the SSSI is being prepared by the foreign exporter. This information will be set forth in the entry filed in conjunction with the SSSI and accordingly it is deleted from the SSSI.

IMPORTERS WILL BE REQUIRED TO INDICATE THE CURRENCY USED AND EXCHANGE RATE

Several commenters suggested that the currency and the applicable rate of currency exchange used to arrive at the sales price be stated on the SSSI.

This information will be necessary for comparison of sales prices with the published trigger prices and the information accordingly will be requested under Item 8b of the SSSI as finally adopted.

INFORMATION CONCERNING EXTRAS PROVIDED BY THE MANUFACTURER

A significant number of comments were directed to the proposed provisions of Item 17 (Base Price), Item 18 (Extras) and Item 11 (Code for Other

Extras). Generally, the commenters suggested the use of more specific descriptive terms to ensure that all of the usual extras are covered. Clarification of Item 15 (Description of Goods) also was requested so that the descriptive information would identify the extras applicable to each shipment.

Items 11 and 18 have been revised to specify that heat treating, inspection and testing, coating, chemical and other qualities are also extras for purposes of the SSSI. The scope of Item 15 also has been expanded to require that the specifications be included in the description of the goods.

DESCRIPTIONS OF SALES TRANSACTIONS NOT CUSTOMARY IN THE TRADE

One commenter requested that instructions be added to the SSSI to provide for circumstances in which the imported products were sold at a negotiated base price without extras. The same commenter asked that the form be revised to better accommodate f.o.b. transactions.

The SSSI was designed to reflect prevailing trade practices for steel mill products as sold in the U.S. market. It would be impracticable to attempt to accommodate in detail on the form practices in less widely used transactions. However, the form contains ample space for a description of any sales made under other terms.

IMPORTATIONS NOT INVOLVING A SALE

A number of comments were directed at transactions in which the product is imported by a party related to the foreign shipper or is otherwise imported under circumstances in which an arms-length sale price may not exist. It was suggested that in any case in which these circumstances apply, the importer be required to furnish a written undertaking that he would later provide Customs with information as to the first resale price in the United States. It was noted that price information in connection with importations not involving a sale is now required of the importer in Item 27 of the Special Customs Invoice (CF 5515).

Customs believes that imposing the suggested undertaking at the time of entry would be impracticable. If the information is needed for purposes of the TPM, the district director can require the filing of the Special Customs Invoice. Further, under the Antidumping Act, resale information can be requested to determine "exporter's sales price."

OTHER COMMENTS SUGGESTING THAT MORE DETAILED INFORMATION BE REQUIRED

A number of comments recommended revision of the following items of the SSSI to obtain more detailed information:

- Item 7—Origin of Goods.
- Item 12(b)—Declaration of Seller/Shipper (or Agent).
- Item 16—Quantity.
- Item 24—Domestic Freight Charges.
- Item 26—Other Costs.

The provisions of the SSSI were adopted after a thorough study of the needs of the TPM, and it is believed that the information requested by these items of the SSSI will be sufficient for purposes of the TPM. More detailed information can be obtained by direct inquiry in specific cases, if necessary. The limited space available in the form and the marginal benefit of the additional details in most cases also were considered.

RULES AND REGULATIONS

COMMENTS ON THE TRIGGER PRICE MECHANISM

A large number of comments were received concerning the merits of the TPM. The Department of the Treasury will respond to these comments in a series of Questions and Answers to be issued from time to time.

EDITORIAL CHANGES

In Item 9 of the SSSI, the word "payment" is added so that the provisions of the item will conform to the corresponding item in the SCI. The order of Items 23 and 24 on the SSSI have been reversed. Other nonsub-

stantive corrections have been made to the regulations and SSSI.

SPECIAL SUMMARY STEEL INVOICE

Copies of the Special Summary Steel Invoice (SSSI) designated as Customs Form 5520, may be obtained from any district director of Customs, the U.S. Government Printing Office, Washington, D.C. 20402, or through any U.S. Consul or U.S. Embassy. Copies may also be printed privately or by facsimile as long as they are identical in contents and size and not inferior in paper quality to that available from U.S. Government sources. A sample of the Special Summary Steel Invoice (SSSI) CF 5520, as revised, follows:

Customs Form 5520 (2-7-78)

FEDERAL REGISTER, VOL. 43, NO. 30—MONDAY, FEBRUARY 13, 1978

INSTRUCTIONS FOR PREPARATION OF SPECIAL SUMMARY STEEL INVOICE
(Required for all shipments of steel valued over \$2,500)

NOTE.—Where this summary invoice covers several types of merchandise priced in different ways, each should be shown separately. Prepare in duplicate.

Sections 1-7, 8b, 9, 10, 12, 13, 16, and 19-26 may be completed in the same manner as the equivalent sections on Special Customs Invoice, Customs Form 5515.

Section 8A.—Date Price Terms Agreed: Show here the date on which the final sales price for this shipment was agreed.

Section 11.—Codes for Extras: This section refers to the additional price charged for extras (other than width and length which are provided for in 18a and 18b). The code(s) for the extras shown should be reflected in section 18c, and the amount for each extra should be shown in 18d. The extras listed are expressed in terms as now understood in the U.S. market.

Section 12B.—Declaration of Seller/Shipper: Complete and explain if any payment or other thing of value other than shown on this invoice has been or will be made or granted.

Section 14.—AISI Category: This column should be completed with the appropriate category number from the following list.

Section 15.—Description of Goods: In addition to the full description of goods as usually required on the Special Customs Invoice, steel specifications which this merchandise meets must be shown.

Section 17.—Base Price: Show here for each steel category the base price on which the total sales price was based.

Section 18.—Extras: Show here the charge for each category of any extra added to the base price. Use appropriate codes from section 11 where appropriate.

Category Number and Products

- 1—Ingots, blooms, billets, slabs, etc.
- 2—Wire rods.
- 3—Structural shapes—plain 3 inches and over.
- 4—Sheet piling.
- 5—Plates.
- 6—Rail and track accessories.
- 7—Wheels and axles.
- 8—Concrete reinforcing bars.
- 9—Bar shapes under 3 inches.
- 10—Bars—hot rolled—carbon.
- 11—

RULES AND REGULATIONS

§ 141.91 Entry without required invoice.

If a required invoice, other than a special summary invoice, is not available in proper form at the time of entry and a waiver in accordance with § 141.92 is not granted, the entry shall be accepted only under the following conditions: . . .

The introductory clause of § 141.92(a) is amended to read as follows:

§ 141.92 Waiver of invoice requirements.

(a) When waiver may be granted. The district director may waive production of a required invoice, except a special summary invoice required by § 141.83(b), when he is satisfied that either: . . .

(R.S. 251, as amended, sec. 407, 42 Stat. 18; secs. 481, 484, 624, 46 Stat. 719, 722, as amended, 759, 77A Stat. 14, Tariff Schedules of the United States (general headnote 11) (19 U.S. 66, 173, 1202, 1481, 1484, 1624).)

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-3875]

PART 1915—IDENTIFICATION AND MAPPING OF SPECIAL HAZARD AREAS

Communities With Detailed Engineering Data (Flood Insurance Rate Maps)

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to provide a list of communities for which the Federal Insurance Administrator has recently issued a new or revised Flood Insurance Rate Map (FIRM), usually providing water surface elevations for Special Flood Hazard Areas. The engineering data on the FIRM is used by local community officials as the basis for flood plain management measures to reduce future flood losses; it is also the basis for actuarial rates for flood insurance.

EFFECTIVE DATE: The effective date of the most recent FIRM revision is listed in the last column.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard W. Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room, 5270, 451

Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The effective date of the most recent revision of the FIRM for the communities listed will not appear in the Code of Federal Regulations except for the page number of this entry in

the FEDERAL REGISTER. This listing supplements the previous lists under § 1915.4 of Title 24 of the Code of Federal Regulations, published at 42 FR 33203-33237 on June 29, 1977.

The entry reads as follows:

§ 1915.4 List of communities with detailed engineering data (FIRM's).

[Docket No. FI-2402]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Bethlehem, Lehigh and Northampton Counties, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Bethlehem, Lehigh and Northampton Counties, Pa.

These base (100-year) elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of Bethlehem, Lehigh and Northampton Counties, Pa.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Bethlehem, Lehigh and Northampton Counties, Pa., are available for review at the City Hall, 10 East Church Street, Bethlehem, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of

Bethlehem, Lehigh and Northampton Counties, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, above mean sea level
Lehigh River	Freemansburg Rd	224
	Minist Trail	231
	New St	235
	Hill to Hill Bridge	237
	8th Avenue (extended)	239
	Upstream corporate limit	243

RULES AND REGULATIONS

[4210-01]

[Docket No. FI-2988]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Borough of Derry, Westmoreland County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Borough of Derry, Westmoreland County, Pa.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Borough of Derry, Westmoreland County, Pa.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Borough of Derry, Westmoreland County, Pa., are available for review at the Borough Municipal Building, 620 North Chestnut Street, Derry, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Borough of Derry, Westmoreland County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, above mean sea level
McGee Run.....	Upstream corporate limits.	1,228
	East 3rd Avenue....	1,206
	East 1st Avenue....	1,194
	Canadaway.....	1,157
	4th Street—Route 217.	1,146
Garlane Mills Run	Downstream corporate limits.	1,136
	Upstream corporate limits.	1,297
	West Utopia Street.	1,240
	West 4th Avenue..	1,209
	West Kelly Way....	1,192
	Confluence with McGee Run.	1,155

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: November 29, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the Village of Cleveland, Manitowoc County, Wis.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Village of Cleveland, Manitowoc County, Wis. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Village of Cleveland, Wis.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final

elevations for the Village of Cleveland, are available for review at the Veterans of Foreign Wars Building, Park Lane, Cleveland, Wis.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Village of Cleveland, Wis.

The final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Village of Franklinville, Cattaraugus County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Village of Franklinville, Cattaraugus County, N.Y. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the Na-

tional Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Village of Franklinville, Cattaraugus County, N.Y.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Village of Franklinville, Cattaraugus County, N.Y. are available for review at the Village Clerk's Office, Franklinville, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Village of Franklinville, Cattaraugus County, N.Y.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Gates Creek.	Upstream corporate limits.	1,618
	Fourth Ave.	1,586
	Route 18.	1,578
Ischua Creek.	Bakerstand Rd.	1,583
	Downstream corporate limits.	1,581

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: January 17, 1978.

PATRICIA ROBERTS HARRIS,
Secretary.

insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
North branch, Hoosic River.	Southern town boundary.	1,074
	250 ft downstream of the Lane Bridge.	1,086
	The Lane Bridge ..	1,094
	Confluence of Roaring Brook.	1,111
	125 ft upstream of confluence of Brown Brook.	1,119
	Confluence of Harris-Goodrich Brook.	1,131
	100 ft downstream of East Street Bridge.	1,146
	East Street Bridge.	1,152
	Confluence of Fuller Brook.	1,174
	Confluence of Sumner Brook.	1,201
	Route 8 Bridge near Sumner Brook.	1,215
	Confluence of Basin Brook.	1,251
	Route 8 above Basin Brook.	1,284
	Old Route 100 Bridge near Basin Brook.	1,285
	425 ft upstream of Old Route 100 Bridge near Basin Brook.	1,297
	Route 8 Bridge 0.6 mi south of Collins Rd.	1,318
	Route 8 Bridge 0.2 mi south of Collins Rd.	1,362
	Confluence with Crazy John Stream.	1,371
	Old Route 100 Bridge near Collins Rd.	1,388
	1,500 ft upstream of Old Route 100 Bridge near Collins Rd.	1,431
	Bridge off Old Route 100 0.3 mi south of Fred Tatro Rd.	1,506
	Private driveway bridge 0.1 mi south of Fred Tatro Rd.	1,518

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
North branch, Hoosic River.	Route 8 culvert, 150 ft north of Fred Tatro Rd.	1,537
Roaring Brook.....	Confluence with north branch, Hoosic River.	1,111
	500 ft downstream of Route 8 Bridge.	1,121
	Route 8 Bridge.....	1,136
	600 ft upstream of Route 8 Bridge.	1,145
	1,500 ft upstream of Route 8 Bridge.	1,174
	2,250 ft upstream of Route 8 Bridge.	1,198
	2,800 ft upstream of Route 8 Bridge.	1,216
	3,250 ft upstream of Route 8 Bridge.	1,232

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Title 41—Public Contracts and Property Management

CHAPTER 8—VETERANS ADMINISTRATION

PART 8-1—GENERAL

Miscellaneous Changes

AGENCY: Veterans' Administration.

ACTION: Final regulation.

SUMMARY: This part is being revised to make administrative changes, provide guidance in the handling of contract appeals, require prior technical review of specified contracts, change the priority of certain supply sources, and to delete an obsolete reference to a functional element within the Department of Commerce. It is intended that these revisions will add clarity and effectiveness to the VA Procurement Regulations.

EFFECTIVE DATE: February 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Clyde C. Cook, Supply Service, Veterans' Administration, Washington, D.C. 20420, 202-389-3808.

SUPPLEMENTARY INFORMATION: Section 8-1.302-1 is revised to list Fed-

eral Prison Industries (FPI) and blind-made products as higher priority sources than mandatory Federal Supply Schedules (FSS). This change should not have an impact on Veterans' Administration buying activities inasmuch as FPI and blind-made supply items are normally not duplicated in mandatory FSS. Section 8-1.311 is revised to eliminate reference to the Business and Defense Services Administration (BDSA) of the Department of Commerce. BDSA is now an inappropriate reference.

Sections 8-1.318-50 and 8-1.318-51 are added to require the contracting office to forward notices of appeal to the Veterans' Administration Contract Appeals Board, and to prescribe transmittal of documents relating to appeals. Section 8-1.403-60 is added to require technical review by the Director, Supply Service, prior to award of certain contracts.

Since the proposed changes revise internal administrative procedures and make editorial modifications, compliance with the provisions of 38 CFR 1.12 relating to regulatory development is considered unnecessary.

Approved: February 6, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

1. In § 8-1.302-1, paragraph (a) (6) and (7) is revised to read as follows:

§ 8-1.302-1 General.

(a) *General.* Procurement will be effected from the following sources in the descending order of priority indicated:

(6) Federal Prison Industries and blind-made products except as indicated in paragraph (d) of this section.

(7) Mandatory Federal supply schedule contracts.

2. In § 8-1.311, paragraphs (a), (b), and (c) (introductory portion preceding subparagraph (1)), (3) (6) are revised to read as follows:

§ 8-1.311 Priorities, allocations, and allotments.

(a) Priorities, allocations, and allotments of critical materials are controlled by the Department of Commerce. Essentially such priorities, etc., are restricted to projects having a direct connection with supporting current defense needs. The Veterans' Administration does not possess and therefore, is not authorized to assign a priority rating to its purchase orders or contracts involving the acquisition or use of critical materials.

(b) In those instances where it has been technically established that it is

not feasible to use a substitute material, the Department of Commerce has agreed to assist us in obtaining critical materials for maintenance and repair projects. They will also, where possible, render assistance in connection with the purchase of new items, which may be in short supply because of their use in connection with the defense effort.

(c) Contracting officers having problems in acquiring critical materials will ascertain all the facts necessary to enable the Department of Commerce to render assistance to the Veterans' Administration in acquiring, if possible, these materials. The contracting officer will submit a request for assistance containing the following information to the Chief Medical Director (134):

(3) The contractor's source(s) of supply including address(es). If this source is other than the manufacturer or producer list the manufacturer or producer and address.

(6) The additional time the contractor claims will be necessary to effect delivery if unable to get priority assistance.

3. Sections 8-1.318-50 and 8-1.318-51 are added to read as follows:

§ 8-1.318-50 Forwarding of appeals.

When a notice of appeal in any form has been received by the contracting officer, that officer will endorse thereon the date of mailing (or date of receipt, if otherwise conveyed), and within 10 days will forward said original notice of appeal and a copy of the contracting officer's final decision letter to the Veterans' Administration Contract Appeals Board (VACAB). Copies of the notice of appeal and the final decision letter will be transmitted concurrently to the Director, Supply Service (134C), and Assistant General Counsel (025). (In cases of construction contracts administered by the Office of Construction, copies of appeal and final decision letter need not be transmitted to the Director, Supply Service.)

§ 8-1.318-51 Preparation, contents and forwarding of appeal file.

Within 20 days of receipt of an appeal, or advice that an appeal has been filed, the contracting officer will assemble and transmit to the VACAB, through the Office of General Counsel (025), an appeal file consisting of all documents pertinent to the appeal, including:

(a) The decision and findings of fact from which the appeal is taken.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21405; FCC 78-68]

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Prohibiting the Transmission of Radio Communications by Ship Stations in the Maritime Services When the Vessels Are on Land

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: The amendment of the Commission's rules will specifically prohibit the transmission of radiocommunications by ship stations in the maritime services when the vessels are on land. An increasing number of inquiries and complaints have been received concerning the operation of ship stations on land. This action is intended to clarify the rules and avoid confusion regarding the utilization of such shipboard stations on land.

EFFECTIVE DATE: March 20, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert H. McNamara, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: January 31, 1978.

Released: February 7, 1978.

In the matter of amendment of Part 83 of the rules to specifically prohibit the transmission of radio communications by ship stations in the maritime services when the vessels are on land, Docket No. 21405.

1. A notice of proposed rulemaking in the above-captioned matter was released September 30, 1977, and published in the FEDERAL REGISTER on October 6, 1977 (423 FR 54436). The specified time for filing comments and reply comments has expired.

2. The subject rule amendment was proposed in response to an increasing number of inquiries and complaints concerning the transmission of radio communications by ship stations aboard vessels located on land. Most often transmissions of this nature involve recreational boats parked in driveways, backyards, adjacent to marinas, traveling along roadways, and the like. Part 83 (Stations on Shipboard in the Maritime Services) of the Commission's rules does not provide

for, nor specifically forbid, the operation of ship stations while they are on land. The utilization of scarce maritime frequencies by ship stations under such circumstances is generally not within the intent or scope of service delineated in the rules governing maritime mobile communications. Rather than rely on a case-by-case interpretation, the Commission proposed that specific language in the rules, prohibiting ship stations from transmitting signals while on land, would best resolve any confusion concerning this mode of operation. It was further indicated that vessels aground as a result of a distress situation or in drydock undergoing repairs would not be considered to be on land for the purposes of the proposed rule.

3. No comments were filed in response to the notice of proposed rulemaking in this proceeding. Therefore, for the reasons expressed above, and in the notice of proposed rulemaking, we believe it is in the public interest and convenience to amend the rules as proposed.

4. Accordingly, it is ordered, That, pursuant to the authority contained in section 4(i) and 303(r) of the Communications Act of 1934, as amended, the Commission's rules are amended, as set forth below, effective March 20, 1978.

5. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1086, 1082 (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

Part 83—Stations on Shipboard in the Maritime Services

Section 83.178(f) is added to read as follows:

§ 83.178 Unauthorized transmissions.

• • • • •

(f) Transmit signals or communications while on board vessels being transported, stored, parked or otherwise located on land. (Vessels which are aground as a result of a distress situation or in drydock undergoing repairs are not considered to be located on land for the purposes of this subparagraph.)

[FR Doc. 78-3900 Filed 2-10-78; 8:45 am]

(b) The contract, including specifications and pertinent amendments, plans and drawings.

(c) All correspondence between the parties pertinent to the appeal, including the letter or letters of claim in response to which decision was issued.

(d) Transcripts of any testimony taken during the course of proceedings, and affidavits or statements of any witnesses on the matter in dispute made prior to the filing of the notice of appeal with the VACAB.

(e) Any additional information considered pertinent.

4. Sections 8-1.403-60 is added to read as follows:

§ 8-1.403-60 Technical review.

Certain contracts not subject to the legal review requirements of § 8-1.403-51 are subject to a prior technical review for compliance with procurement regulations as provided in this section. Negotiated contracts expected to exceed \$50,000 and formally advertised contracts expected to exceed \$100,000 will be reviewed by the Director, Supply Service, prior to award, except that the requirement for a review is not applicable to contracts related to the Loan Guaranty Program, to construction contracts, or to architect-engineer contracts.

(a) The procedure for obtaining the technical review will be the same as that specified for legal review in § 8-1.403-52 except that where paragraphs (b) and (c) of that section indicate submission of documents to the General Counsel, the documents will be forwarded to the Director, Supply Service.

(b) The documents to be submitted for review are the same as for legal review as specified in § 8-1.403-53.

(c) Upon completion of the technical review, the Director, Supply Service, will advise the appropriate Central Office activity (for field station contracts) or contracting officer (for Central Office contracts) as to approval or as to any changes required to comply with procurement regulations. Where changes are required, immediate action will be taken to amend the solicitation or proposed contract.

(d) The technical review will be completed as expeditiously as possible with due regard to the date by which the contract is needed. Conversely, contemplated effective dates of proposed contracts will take into consideration the need for technical review.

Title 50—Wildlife and Fisheries

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 651—ATLANTIC FISHERIES: HADDOCK, COD, YELLOWTAIL FLOUNDER

Emergency Regulations Repromulgated

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Emergency regulations.

SUMMARY: This rule extends the emergency regulation of the Atlantic groundfish fishery for an additional 45-days from February 15, 1978 to March 31, 1978, inclusive. The emergency described in the initial FEDERAL REGISTER publication (42 FR 65186) on December 30, 1977 continues to exist.

RULES AND REGULATIONS

EFFECTIVE DATE: 0001 hours EST, February 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Mass. 01930, telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: On December 30, 1977, the Acting Deputy Assistant Administrator for Fisheries published emergency regulations in the FEDERAL REGISTER (42 FR 65186) to implement the fishery management plan concerning Atlantic groundfish. The Secretary has determined that the current regulations should be continued for an additional 45 days as authorized by section 305(e) of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq, as amended, because the Secretary recognizes the critical conserva-

tion needs of those fisheries and has determined that the emergency which required the December 30, 1977 promulgation of emergency regulations continues to exist. The Secretary also finds that formal notice of proposed rulemaking is impractical, unnecessary, and contrary to the public interest because of the emergency described above.

Therefore, the emergency regulations adopted on December 30, 1977, are continued in full force and effect for an additional 45 days beginning 0001 hours EST, February 15, 1978, and ending 2400 hours EST, March 31, 1978, unless sooner amended or terminated by appropriate notice.

Signed at Washington, D.C. this day of February, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.
(FR Doc. 78-3853 Filed 2-10-78; 8:45 am)

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 77-AEA-94]

STATE COLLEGE, PA.

Proposed Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This notice proposes to alter the State College, Pa., Transition Area. These alterations will provide protection to aircraft executing a new instrument approach which has been developed for the University Park Airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before March 23, 1978.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Adminis-

tration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone, 212-995-3391. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. All communications received on or before March 23, 1978, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area over University Park Airport, State College, Pa. The alteration will add an area of approximately 4½ miles in depth and 7 miles in width northeast of the airport to the transition area.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

§ 71.181 [Amended]

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the State College, Pa., transition area by inserting after the phrase, "extending clockwise from a 280° bearing to a 020° bearing from the airport," the following; "within 3.5 miles each side of the University Park Airport ILS Runway 24 localizer course, extending from the OM to 10.5 miles northeast of the OM;"

Section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, N.Y., on January 26, 1978.

L. J. CARDINALI,
Acting Director, Eastern Region.
(FR Doc. 78-3891 Filed 2-10-78; 8:45 am)

[8010-01]

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 275]

(Release No. 1A-615; File No. S7-7351)

INVESTMENT ADVISERS

Requirements Governing Payments of Cash Referral Fees

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The purpose of this document is to solicit public comments on the advisability of issuing a rule under the Investment Advisers Act of 1940 ("Act") which would prohibit cash payments by investment advisers to persons who solicit clients for the adviser. As an alternative to a complete

prohibition on such payments, the Commission is also soliciting public comments on a proposed rule under the Act which would set forth clear guidelines concerning when and under what circumstances an investment adviser can make a cash payment to a person who has solicited clients for the adviser. Because the Commission regularly receives inquiries concerning the applicability of the federal securities laws to the use of cash referral fees as a method of soliciting clients, the Commission believes a rule setting forth the applicability of the Act to such payments is appropriate.

DATE: Comments must be received on or before March 31, 1978.

ADDRESSES: Interested persons should submit their views and comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All submissions will be made available for public inspection at the Commission's Public Reference Section, Room 6101, 1100 L Street NW., Washington, D.C. 20005, and should refer to File No. S7-735.

FOR FURTHER INFORMATION CONTACT:

Michael Berenson, Esq., Office of the Chief Counsel, Division of Investment Management, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202-376-8053.

SUPPLEMENTARY INFORMATION: The Commission regularly receives interpretive requests concerning the applicability of the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.) ("Act") to arrangements pursuant to which an investment adviser compensates another person for recommending clients to the investment adviser. In view of the frequency of such requests, the Commission believes that it would be more efficient for both the Commission and the investment advisory industry for the Commission to adopt a rule which specifically addresses the applicability of the Act to the payment of such fees.

Because of the inherent conflicts of interest which can be present in arrangements pursuant to which an individual receives compensation, even on a fully disclosed basis, for referring someone to an investment adviser, one possible resolution of the question would be a rule adopted pursuant to section 206(4) of the Act (15 U.S.C. 80b-6(4)) which contained a prohibition, either complete or subject to specified exceptions, on the payment of referral fees of any kind or in any manner to a solicitor who is not an employee of the investment adviser. Section 206(4) of the Act authorizes the Commission to define, and pre-

scribe means reasonably designed to prevent, such acts, practices, and courses of business as are fraudulent, deceptive, or manipulative. Because referral arrangements are fraught with possible abuses inconsistent with the fiduciary relationships which frequently exist in the investment advisory industry, the Commission believes that such a prohibition may be a means reasonably designed to prevent fraudulent practices. The Commission specifically invites public comments on the advisability of such a rule and comments on what its effects would be on the investment advisory industry as it currently operates.

If, after considering the public comments received in response to this release, the Commission concludes that a complete prohibition on the payment of referral fees is appropriate, it will consider the need to adopt a rule reflecting such decision.

An alternative resolution would be to permit such payments, but only under narrowly circumscribed conditions. Accordingly, the Commission is also soliciting public comments on a proposal to adopt Rule 206-(4)-3 (17 CFR 275.206(4)-3) (the "Rule") and new paragraph (k) of Rule 204-2 (17 CFR 275.204-2(k)) under the Act which would set forth when and in what circumstances an investment adviser can make a cash payment to someone who solicits clients for the investment adviser.

PROVISIONS OF THE PROPOSED RULE

Paragraph (a) of the Rule makes it unlawful for an investment adviser to pay a cash referral fee except in one of three circumstances. The first is a payment to an employee of the investment adviser who either is primarily engaged in performing duties relating to the investment advisory business of the investment adviser or is someone clearly identified as a sales representative for the investment advisory services of the investment adviser. In these circumstances, the prospective client should be aware of the solicitor's natural predilection to recommend his own employer and knowledge of the existence of a compensation arrangement would not, the Commission believes, affect the prospective client's evaluation of the employee's recommendation. However, this exception would not be available to an employee who is not primarily engaged in activities relating to his employer's advisory business or who is not identified as a sales representative, for example, a registered representative who recommends advisory services furnished by the broker-dealer-investment adviser firm with which he is associated. While, of course, a prospective client would expect that a registered representative would have a natural bias toward recommending all of his em-

ployer's services, the prospective client would not necessarily realize that the registered representative was being additionally compensated for his solicitation activities.

The Rule also provides that it is not unlawful for a cash referral fee to be paid in connection with solicitation of clients for an investment adviser who provides:

(a) Written materials or oral statements which are not individually tailored;

(b) Statistical information which does not comment on the investment merits of particular securities; or

(c) A combination of the two foregoing services.

The advisory services which could be offered pursuant to this exception are of an impersonal nature. The Commission believes that sales of such services will frequently be made by individuals who are clearly identifiable as salesmen and that prospective clients would normally be aware that such salesmen are compensated on a commission basis.

Those investment advisers whose referral arrangements do not fall into either of the two categories described above will be required to adhere to a series of conditions. These conditions govern who can receive a referral fee, the timing and nature of the disclosures the solicitor must make to prospective clients, the investment adviser's responsibilities with respect to the solicitor's activities and the investment adviser's continuing responsibilities under the Rule.

Because it would be inappropriate for an investment adviser to be permitted to employ indirectly, as a solicitor, someone whom it might not be able to hire as an employee, the Rule prohibits payment of a referral fee to someone who is the subject of a Commission order barring or suspending the right of such person to be associated with an investment adviser or who has engaged in any of the conduct set forth in Section 203(e) of the Act (15 U.S.C. 80b-3(e)) or been the subject of the type of injunction described in Section 203(e)(3) of the Act and therefore could be the subject of a Commission order barring or suspending the right of such person to be associated with an investment adviser.¹

During the course of the solicitation, the prospective client must receive a written document containing the in-

¹However, since a finding that a person has engaged in the conduct specified in this section only authorizes and does not require the Commission to bar such person from being associated with a registered investment adviser, the Commission would entertain, and be prepared to grant in appropriate circumstances, requests for permission to employ as a solicitor a person who is subject to a statutory bar.

formation set forth in paragraph (b) of the proposed Rule. These disclosures consist, for the most part, of basic information relating to the solicitation, such as the name of the solicitor and the investment adviser on whose behalf he is working, the nature of the relationship between the investment adviser and the solicitor and a description of the compensation to be paid to the solicitor. While these requirements and their rationales should be easily understandable, particular attention should be given to the content of and the intent behind the requirements of paragraph (b)(7).

The Commission believes that a prospective client should know whether he will be compelled to pay a specific charge, similar to a sales load, or a higher advisory fee because a solicitor recommended him to the investment adviser. Accordingly, if the prospective client will be required to pay a specific charge in addition to the advisory fee to compensate the investment adviser for the cost of obtaining his account or will be required to pay a higher advisory fee than other clients with similar sized accounts receiving similar services and such charge or differential is due to the existence of a referral arrangement, paragraph (b)(7) requires that the disclosure statement set forth the amount of the additional charge or advisory fee increment.

One of the major obligations which an investment adviser who uses solicitors will have to bear is a duty to supervise the solicitation activities of these individuals as though they were the investment adviser's own employees. Although an investment adviser may not be able to exercise as much direct control over a solicitor as it could over its own employees, the Commission believes that the contractual relationships between the two parties can be structured so that the investment adviser can effectively supervise the solicitor's solicitation activities. Furthermore, the problems of supervising a solicitor who is operating in an area geographically remote from the investment adviser would not seem to be appreciably greater than those attendant to supervising a branch office's activities. In addition, because payment of referral fees is not an essential feature of operating an advisory service, an investment adviser who does not believe he can adequately supervise the solicitation activities of his solicitors presumably can decide to rely on other methods of obtaining new clients.

Certain staff interpretive positions concerning the applicability of the Act to referral arrangements have stated that a solicitor must either himself be a registered investment adviser or be an associated person of an investment

adviser.² In light of an investment adviser's responsibility to supervise his solicitors, it is the Commission's opinion that a solicitor who engages in solicitation activities in accordance with the provisions of the Rule will be, at least with respect to these activities, an associated person of an investment adviser and therefore would not be required to register under the Act individually solely as a result of these activities.

If an investment advisory relationship which was initiated as the result of a solicitor's activities continues beyond the initial contract period or one year, whichever is less, and additional referral fees are to be paid, the investment adviser must furnish the client a new disclosure statement prior to the commencement of each additional period. In addition to the information contained in the initial disclosure statement, this new statement must describe all compensation the solicitor received during the preceding contract period for his solicitation of the client to whom the disclosure is being made. The Commission believes that having this information available each time the client must decide whether to renew an advisory relationship will enable the client to make this decision fully cognizant of the circumstances which originally brought him to the adviser.

Before entering into an advisory relationship with a client who has been recommended by a solicitor, the investment adviser must have a reasonable basis for believing that the client has been provided the required disclosure statement in a form the prospective client can understand and must receive from the client a written acknowledgment that he has received the disclosure statement. The investment adviser must retain in accordance with the provisions of proposed paragraph (k) of Rule 204-2 a copy of these acknowledgments, a written agreement with each of its solicitors in which the solicitor undertakes to act consistent with the Rule, and all documents and correspondence relating to its solicitation arrangements.

A solicitor who has a pre-existing relationship with the prospective client, e.g., a registered representative of a broker-dealer, may, depending on the nature of his relationship with his client, have fiduciary obligations to such client which require him to make a reasonable attempt to find the investment adviser best suited to the particular client. So that it is clear

²As relevant, sec. 202(a)(17) of the act (15 U.S.C. 80b-2(a)(17)) defines an "associated person" to include "any partner, officer, or director of such investment adviser (or any person performing similar functions), or any person directly or indirectly controlling or controlled by such investment adviser, including any employee"

that this obligation continues to exist even if the solicitor complies with all provisions of the Rule, paragraph (d) of the Rule expressly provides that the standards set forth in the Rule are not intended to relieve any solicitor of any fiduciary or other obligation applicable to such person in connection with the solicitation activities covered by the Rule.

It may be difficult for investment advisers who direct their client's brokerage transactions to particular broker-dealers as compensation for client referrals to disclose to their prospective clients meaningfully and in a manner which can be evaluated the existence of such arrangements. In addition, investment advisers and broker-dealers have statutory and common law obligations to their clients which may preclude their participating in an arrangement which, among other things, might require an investment adviser to direct a client's transactions to a particular broker-dealer, irrespective of the broker-dealer's ability to execute the transaction competently and at an appropriate cost. Therefore, in certain circumstances, it may be a fraudulent course of business, within the meaning of Section 206(2) of the Act (15 U.S.C. 80b-6(2)), for an investment adviser to use client commission dollars for this purpose³ and this rule proposal only addresses the applicability of the Act to those investment advisers who make cash payments to individuals who solicit clients for them. The Commission is in the process of reviewing its position with respect to various uses of client commission dollars which in the past have been common in the securities industry, but are now prohibited. When the review is completed, the Commission will consider whether it is appropriate to amend this rule so that it explicitly addresses the applicability of the Act to investment advisers who use directed brokerage as compensation for client referrals. However, the Commission wishes to emphasize that nothing which is stated in this release or this rule proposal should be taken as an expression of its views on the question of whether directed brokerage can be used in this manner.⁴

AUTHORITY

Rule 206(4)-3 and paragraph (k) of Rule 204-2 would be adopted pursuant

³Cf. In the Matter of Consumer Investor Planning Corp., Securities Exchange Act Release No. 8542 (February 20, 1969).

⁴This release and rule proposal should also not be taken as an expression of the Commission's views on any potentially related questions, such as the use of the assets of a registered investment company to bear expenses associated with the distribution of its shares or the rules the Commission has proposed pursuant to section 11(a) (15 U.S.C. 78k(a)) of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) relating to trading by members of exchanges, brokers, and dealers.

to the authority contained in sections 204, 206(4), and 211(a) of the Act (15 U.S.C. 80b-4, 80b-6(4) and 80b-11(a)).

I. It is proposed to amend Part 275 of Chapter II of Title 17 of the Code of Federal Regulations by adding new § 275.206(4)-3 as follows:

§ 275.206(4)-3 Cash payments for client solicitations.

(a) It shall constitute a fraudulent, deceptive, or manipulative act, practice or course of business within the meaning of section 206(4) of the act for any registered investment adviser to pay a cash fee to a person who solicits or recommends any client for or to the investment adviser unless such payment (1) is made to an employee of the investment adviser who is primarily engaged in performing duties relating to the investment advisory business of the investment adviser or is clearly identified as a sales representative for the investment advisory services of the investment adviser; (2) is made with respect to the solicitation or recommendation of clients for or to an investment adviser who furnishes such clients only (i) written materials or oral statements which do not purport to meet the objectives or needs of the specific clients, or (ii) statistical information containing no expressions of opinions as to the investment merits of particular securities, or (iii) any combination of the foregoing services; or (3) is made pursuant to an arrangement which complies with the following:

(i) The recipient of such fee (a "solicitor") is not a person who is the subject of a Commission order barring or suspending the right of such person to be associated with an investment adviser or a person who has engaged in any of the conduct set forth in section 203(e) of the act or been the subject of the type of injunction set forth in section 203(e)(3) of the act which could allow such person to be the subject of an order issued by the Commission barring or suspending the right of such person to be associated with an investment adviser;

(ii) The investment adviser supervises the solicitation activities of the solicitor as if the solicitor were one of its own employees;

(iii)(A) The investment adviser has a reasonable basis for believing that the client has received from the solicitor during the course of the solicitation or recommendation a written disclosure document containing the information required by paragraph (b) of this section and that the client is capable of evaluating the information set forth in the disclosure document; and (B) the investment adviser receives from the client prior to the inception of the advisory relationship with the investment adviser a written acknowledgment of receipt of the disclosure document;

NOTE.—The investment adviser shall retain a copy of each such acknowledgment, as well as the acknowledgments referred to in paragraph (iv) below, as part of the records required to be kept by Rule 204-2(k) under the act.

(iv) If additional fees are to be paid by the investment adviser to the solicitor with respect to an advisory relationship with a client obtained as a result of a solicitation or recommendation by the solicitor which has continued beyond the period covered in the initial advisory agreement or one year, whichever is less, the investment adviser must furnish the client in writing prior to the commencement of each additional period or year, whichever is less, a new current disclosure document containing the information required by paragraph (b) of this section and the investment adviser shall receive from the client a written acknowledgment of receipt of the disclosure document.

(b) The written disclosure document required by this rule shall contain the following information:

(1) The name of the solicitor.

(2) The name of the investment adviser.

(3) The nature of the relationship between the solicitor and the investment adviser.

(4) A statement that the solicitor has a financial interest in the selection of the investment adviser.

(5) The terms of such financial interest, including a description of the compensation paid or to be paid to the solicitor.

(6) A statement as to whether such compensation is to be paid on a one-time or a continuing basis in respect of such client.

(7) The amount, if any, for the cost of obtaining his account the client will be charged in addition to the advisory fee, and/or the differential, if any, among clients with respect to the amount or level of advisory fees charged by the investment adviser if such differential is attributable to the existence of any arrangement pursuant to which the investment adviser has agreed to compensate the solicitor for soliciting or recommending clients for or to the investment adviser.

(8) If, pursuant to the provisions of paragraph (a)(3)(iv) of this section, such statement is delivered in respect of any additional period of such advisory relationship, a statement describing the nature and amount of all compensation received by the solicitor in the immediately preceding period for his solicitation of such client as a client.

(c) An investment adviser shall enter into, and retain as part of the records required to be kept by Rule 204-2(k) under the Act, a written agreement with each of its solicitors in which the solicitor accepts the investment adviser's supervision with respect to his solicitation activities and undertakes to act consistently with the provisions of this section.

(d) Nothing in this section shall be deemed to relieve any solicitor of any fiduciary or other obligation to which such solicitor is subject under law with respect to recommending an investment adviser best suited to any of his clients.

II. It is proposed to amend Part 275 of Chapter II of Title 17 of the Code of Federal Regulations by adding new paragraph (k) to § 204-2 as follows:

§ 275.204-2 Books and records to be maintained by investment advisers.

(a) Every investment adviser who makes use of the mails or of any means or instrumentality of interstate commerce in connection with his or its business as an investment adviser (other than one specifically exempted from registration pursuant to section 203(b) of the Act) shall make and keep true, accurate and current the following books and records relating to his investment advisory business:

(k) If an investment adviser subject to paragraph (a) of this section utilizes a solicitor pursuant to an arrangement of the type contemplated by paragraph (a)(3) of Rule 206(4)-3 under the Act, the records required to be made and kept under paragraph (a) of this section shall include true, accurate and current copies of all agreements relating to such arrangement, all documents and correspondence delivered by the solicitor in connection with such arrangement, all required acknowledgements, and full and complete records of all transactions effected pursuant thereto.

PUBLIC COMMENT

Persons wishing to make written comments should file three copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549, not later than March 31, 1978. In filing such submissions, commentators should make reference to Commission File No. S7-735. Copies of all submissions will be available for public inspection in the Commission's Public Reference Section, Room 6101, 1100 L Street NW., Washington, D.C. 20005.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3876]

THE CITY OF UNION, UNION COUNTY, OREG.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Union, Union County, Oregon. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, Union, Oregon. Send comments to: Mr. Floyd Parrott, City Administrator, City of Union, City Hall, Union, Oregon 97883.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Union, Oregon, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change

any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

THE TOWNSHIP OF ALLEGHENY,
WESTMORELAND COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Allegheny, Westmoreland County, Pa. These base (100-

year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Kiski Park Plaza, R.D. No. 3, Leechburg, Pa. Send comments to: Mr. Robert A. Fuller, Township Supervisor of Allegheny, R.D. No. 3, Box 475A, Leechburg, Pa. 15656.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Allegheny, Westmoreland County, Pa., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

[Docket No. FI-3878]
Proposed Flood Elevation Determinations
THE TOWNSHIP OF BEAR CREEK, LUZERNE
COUNTY, PA.

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or
comments are solicited on the pro-
posed base (100-year) flood elevations
listed below for selected locations in
the Township of Bear Creek, Luzerne
County, Pa.

These base (100-year) flood eleva-
tions are the basis for the flood plain
management measures that the com-
munity is required to either adopt or
show evidence of being already in
effect in order to qualify or remain
qualified for participation in the Na-
tional Flood Insurance Program (NFIP).

DATES: The period for comment will
be ninety (90) days following the
second publication of this proposed
rule in a newspaper of local circulation
in the above-named community.

ADDRESSES: Maps and other infor-
mation showing the detailed outlines
of the flood-prone areas and the pro-
posed base (100-year) flood elevations
are available for review at the Muni-
cipal Building, R.D. No. 1, Trailwood,
Wilkes-Barre, Pa. 18702.

Send comments to: Mr. Willard
Kresge, Chairman of the Board of Su-
pervisors of Bear Creek, R.D. No. 1,
Box 331, Trailwood, Wilkes-Barre, Pa.
18702.

FOR FURTHER INFORMATION
CONTACT:

Mr. Richard Krimm, Assistant Ad-
ministrator, Office of Flood Insur-
ance, 202-755-5581 or toll free line
800-424-8872, Room 5270, 451 Sev-
enth Street SW., Washington, D.C.
20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of the proposed determi-
nations of base (100-year) flood eleva-
tions for the Township of Bear Creek,
Luzerne county, Pa. in accordance
with section 110 of the Flood Disaster
Protection Act of 1973 (Pub. L. 93-
234), 87 Stat. 980, which added section
1363 to the National Flood Insurance
Act of 1968 (Title XIII of the Housing
and Urban Development Act of 1968
(Pub. L. 90-448)), 42 U.S.C. 4001-4128,
and 24 CFR 1917.4(a).

These elevations, together with the
flood plain management measures re-
quired by Section 1910.3 of the pro-
gram regulations, are the minimum
that are required. They should not be
construed to mean the community
must change any existing ordinances
that are more stringent in their flood
plain management requirements. The
community may at any time enact
stricter requirements on its own, or
pursuant to policies established by
other Federal, State, or regional enti-
ties. These proposed elevations will
also be used to calculate the appropri-
ate flood insurance premium rates for
new buildings and their contents and
for the second layer of insurance on
existing buildings and their contents.

The proposed base (100-year) flood
elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Ten Mile Run	Confluence with Bear Creek.	1,530
	0.5 mi from confluence with Bear Creek.	1,563

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of the proposed determi-
nations of base (100-year) flood eleva-
tions for Doylestown Township, Bucks
County, Pa. in accordance with section
110 of the Flood Disaster Protection
Act of 1973 (Pub. L. 93-234), 87 Stat.
980, which added section 1363 to the
National Flood Insurance Act of 1968
(Title XIII of the Housing and Urban
Development Act of 1968 (Pub. L. 90-
448)), 42 U.S.C. 4001-4128, and 24 CFR
1917.4(a).

These elevations, together with the
flood plain management measures re-
quired by section 1910.3 of the pro-
gram regulations, are the minimum
that are required. They should not be
construed to mean the community
must change any existing ordinances
that are more stringent in their flood
plain management requirements. The
community may at any time enact
stricter requirements on its own, or
pursuant to policies established by
other Federal, State, or regional enti-
ties. These proposed elevations will
also be used to calculate the appropri-
ate flood insurance premium rates for
new buildings and their contents and
for the second layer of insurance on
existing buildings and their contents.

The proposed base (100-year) flood
elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Neshaminy Creek .	Corporate limits...	185
	Easton Rd	199
	Lower State Rd...	217
	Confluence with Mill Creek.	222
Central tributary ..	Edison Rd	201
	Saurman Rd	230

PROPOSED RULES

THE BOROUGH OF EAST STROUDSBURG,
MONROE COUNTY, PA.
Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or
comments are solicited on the pro-
posed base (100-year) flood elevations
listed below for selected locations in
the Borough of East Stroudsburg,
Monroe County, Pa. These base (100-
year) flood elevations are the basis for
the flood plain management measures
that the community is required to
either adopt or show evidence of being
already in effect in order to qualify or
remain qualified for participation in
the National Flood Insurance Program
(NFIP).

DATES: The period for comment will
be ninety (90) days following the

second publication of this proposed
rule in a newspaper of local circulation
in the above-named community.

ADDRESSES: Maps and other infor-
mation showing the detailed outlines
of the flood-prone areas and the pro-
posed base (100-year) flood elevations
are available for review at the East
Stroudsburg Borough Office, 24 Ana-
lomink Street, East Stroudsburg, Pa.
Send comments to: Mr. Donald C.
Gage, Borough Manager of East
Stroudsburg, P.O. Box 303, East
Stroudsburg, Pa. 18301.

FOR FURTHER INFORMATION
CONTACT:

Mr. Richard Krimm, Assistant Ad-
ministrator, Office of Flood Insur-
ance, 202-755-5581 or toll free line
800-424-8872, Room 5270, 451 Sev-
enth Street SW., Washington, D.C.
20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of the proposed determi-
nations of base (100-year) flood eleva-
tions for the Borough of East Strouds-
burg, Monroe County, Pa., in accor-
dance with section 110 of the Flood
Disaster Protection Act of 1973 (Pub.
L. 93-234), 87 Stat. 980, which added
section 1363 to the National Flood In-
surance Act of 1968 (Title XIII of the
Housing and Urban Development Act
of 1968 (Pub. L. 90-448)), 42 U.S.C.
4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the
flood plain management measures re-
quired by section 1910.3 of the pro-
gram regulations, are the minimum
that are required. They should not be
construed to mean the community
must change any existing ordinances
that are more stringent in their flood
plain management requirements. The
community may at any time enact
stricter requirements on its own, or
pursuant to policies established by
other Federal, State, or regional enti-
ties. These proposed elevations will
also be used to calculate the appropri-
ate flood insurance premium rates for
new buildings and their contents and
for the second layer of insurance on
existing buildings and their contents.

The proposed base (100-year) flood
elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Brodhead Creek	I-80 Bridge'	393

[Docket No. FI-3383]

BOROUGH OF JOHNSONBURG, ELK COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the pro-

posed base (100-year) flood elevations listed below for selected locations in the Borough of Johnsonburg, Elk County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Community Center, 600 Market Street, Johnsonburg, Pa. Send comments to: Mr. Richard Beaver, Manager of the Borough of Johnsonburg, 600 Market Street, Johnsonburg, Pa. 15845.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Johnsonburg, Elk County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Clarion River	Confluence of Powers Run.	1,431
	Grant St.	1,434
	Confluence of Johnson Run.	1,436

L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lehigh River	Downstream corporate limits.	437
	ConRail	511
	Upstream corporate limits.	522

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mahoning Creek	Confluence with Lehigh River.	459
	Dam No. 1	464
	Route 443	466
	East Penn St.	469
	9th St.	472
	Bridge St.	481
	Mertztown Rd.	500
Stewart Creek	Footbridge	496
	Route 902 and Mertztown Rd. connection.	505
	Private driveway	547
	Route 902	582

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 27, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

TOWNSHIP OF MOORE, NORTHAMPTON COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Moore, Northampton County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Moore Township Municipal Building, R.D. No. 2, Bath, Pa. Send comments to: Mr. Edward Tanczos, Chairman of the Board of Supervisors of Moore, R.D. No. 2, P.O. Box 95, Bath, Pa. 18014.

PROPOSED RULES

[4210-01]

[24 CFR Part 1917]
[Docket No. FI-3886]

CITY OF NEW KENSINGTON, WESTMORELAND COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of New Kensington, Westmoreland County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Clerk's Office, New Kensington City Hall, 2400 Leechburg Road, New Kensington, Pa. Send comments to: Hon. Verle N. Bevan, Mayor of New Kensington, City Hall, 2400 Leechburg Road, New Kensington, Pa. 15068.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of New Kensington, Westmoreland County, Pa., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances

that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Allegheny River ...	Confluence with Pucketa Creek.	762
	Pennsylvania Route 56.	753
	Pennsylvania Route 366.	756
Pucketa Creek	Downstream corporate limits.	752
	Upstream corporate limits.	752
Little Pucketa Creek.	2d St.....	752

BOROUGH OF PALMERTON, CARBON COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the pro-

posed base (100-year) flood elevations listed below for selected locations in the Borough of Palmerton, Carbon County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Borough of Palmerton, 443 Delaware Avenue, Palmerton, Pa. Send comments to: Honorable John L. Faust, Mayor of Palmerton, 443 Delaware Avenue, Palmerton, Pa. 18071.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Palmerton, Carbon County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

PLUMSTEAD TOWNSHIP, BUCKS COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Plumstead Township, Bucks County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the pro-

posed base (100-year) flood elevations are available for review at the home of the Plumstead Township Secretary, Ferry Road, Fountainville, Pa. Send comments to: Mr. James S. Kiel, Jr., Chairman of the Board of Plumstead Township, P.O. Box 14, Fountainville, Pa. 18923.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Plumstead Township, Bucks County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

THE TOWNSHIP OF RIDGWAY, ELK COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Ridgway, Elk County, Pa.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Municipal Building, Ridgway Drive, Ridgway, Pa.

Send comments to: Mr. Fred Lenze, Chairman of the Board of Supervisors of Ridgway Township, Municipal Building, Ridgway Drive, Ridgway, Pa. 15853.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Ad-

ministrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Ridgway, Elk County, Pa., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

PROPOSED RULES

listed below for selected locations in the Township of Warwick, Bucks County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Warwick Township Building, 2045 Ginny Lane, Jamison, Pa. Send comments to: Mr. Joseph A. Woll, Chairman of the Board of Supervisors of Warwick, P.O. Box 364, Jamison, Pa. 18929.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Warwick, Pa., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (42 U.S.C. 4001-4128)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

BOROUGH OF WEST ELIZABETH, ALLEGHENY COUNTY, PA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of West Elizabeth, Allegheny County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to

either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at West Elizabeth Borough Building, 815 4th Street, West Elizabeth, Pa. Send comments to: Mr. Charles McDevitt, Borough Secretary of West Elizabeth, 815 4th Street, West Elizabeth, Pa. 15088.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of West Elizabeth, Allegheny County, Pa., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Monongahela River.	Upstream corporate limits.	749
	State Route 51	749

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Monongahela River.	Downstream corporate limits.	749

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 28, 1977.

POSTAL SERVICE

[39 CFR Part 111]

POSTAL AND POST CARDS

Clarification of Requirements and Restrictions on the Use of the Postal and Post Cards

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: Present postal regulations on the preparation and use of postal and post cards need clarification. It is the intent of this proposed rule to rewrite these regulations without making any substantive changes, with one exception: the proposed new regulations would specify the exact minimum dimensions of the address portion of a card. Existing regulations on this point simply provide that in certain circumstances the address portion may be smaller than the remainder of the card.

DATE: Comments must be received on or before March 20, 1978.

ADDRESS: Written comments should be directed to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, 475 L'Enfant Plaza SW., Washington, D.C. 20260.

Copies of all written comments received will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in the Office of Mail Classification, Room 1610, 475 L'Enfant Plaza SW., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Eugene R. McGill, 202-245-4749.

SUPPLEMENTARY INFORMATION: The Postal Service, for the purposes described above, is proposing to rewrite and combine into new section

PROPOSED RULES

131.223 existing sections 131.223 and 131.224 of the Postal Service Manual, chapter I of which has been incorporated by reference in the FEDERAL REGISTER, see 39 CFR 111.1. In addition, it may be noted that the rewrite deletes the material in 131.224e dealing with the thickness of a card, since that subject is covered elsewhere. See 131.222b.

There are also several changes in cross-referencing and redesignating resulting from the rewrite. Thus, existing 131.225 and .226 would be redesignated .224 and .225 respectively. Existing 131.227 would be deleted, since it deals with presorted first-class mail and is covered elsewhere. See 131.217.

Although exempt from the requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revision of the Postal Service Manual:

PART 131—FIRST CLASS

1. In 131.22 of the Postal Service Manual revise .223 and .224 to read as follows:

131.22 Postal and post cards.

.
.223 Restrictions on the use of postal and post cards.

a. The users of postal and post cards must comply with the following rules: (1) Double cards must be folded before mailing. The first half must be detached when the reply half is mailed for return.

(2) The reply portion of a double card must be used for reply purposes only. It must not be used to convey a message to the original addressee of the double card, to cover up the message on the original portion, or to send statements of account.

(3) Double cards must be prepared so that the address on the reply portion is on the inside when the double card is mailed.

(4) Plain stickers or seals or a single wire stitch may be used to fasten the edges, provided they are so fixed that the inner folds of the cards can be readily examined.

(5) Enclosures are prohibited.

(6) The face of the card may be divided by a vertical line, the left half to be used for the message and the right half for the address only. More than one-half of the face may be used for the message, but a space of at least 2½ inches in length, measured from the right edge of the card, must be reserved for the address, postage, and postal endorsement and such cards must be prepared in accordance with 131.223b.

(7) Aside from the address and any postal endorsements, only accounting information may be shown in the ad-

dress side of cards, the information must be shown on a shaded background, and the cards must be prepared in accordance with 131.223b. The area reserved for the address of cards prepared in this manner must be unshaded and at least 2½ inches long and 1 inch high. Permit imprints, meter stamps or postal endorsements must be shown on an unshaded background.

(8) Cards bearing attachments are not mailable at the rates for postal cards or post cards. Labels affixed by adhesive for the purpose of showing the address and the return address are permitted.

(9) Postal cards and post cards which have holes or vertical tearing guides are mailable only if the holes and tearing guides do not result in the elimination of any letters or numbers in the address and the cards are prepared in accordance with 131.223b.

b. Postal cards and post cards, not mailed as presorted first-class mail, which are required by 131.223a (6), (7), or (9) to be prepared under the provisions of this subsection must meet the following conditions:

(1) The mailings must consist of not less than 200 cards which are identical as to size and weight.

(2) The addresses on the cards must include ZIP Code numbers.

(3) Postage must be paid by permit imprints, by meter stamps, or by pre-canceled stamps.

(4) The mailer must separate the cards to the finest extent possible and sack them in the manner prescribed by 134.43.

2. In 131.22 of the Postal Service Manual redesignate .225 and .226 as .224 and .225 respectively, delete .227, and strike out in the second sentence of redesignated .224 the words "and 131.224".

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401(2).)

ROGER P. CRAIG,
Deputy General Counsel.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[BC Docket No. 78-35; RM-2964]

FM BROADCAST STATION IN YUCCA VALLEY, CALIF.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a class A channel to Yucca Valley, Calif., as a first FM assignment. Petitioner, Israel Sinofsky, states that the proposed station could provide a first local aural broadcast service to the community.

DATES: Comments must be filed on or before April 3, 1978, and reply comments on or before April 24, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: January 31, 1978.

Released: February 3, 1978.

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations (Yucca Valley, Calif.), BC Docket No. 78-35, RM-2964.

1. *Petitioner, proposal, and comments.* (a) Petition for rulemaking, filed on August 29, 1977, by Israel Sinofsky (petitioner), proposing the assignment of channel 296A as a first FM assignment to Yucca Valley, Calif.

(b) The channel could be assigned in conformity with the minimum distance separation requirements.¹

(c) Petitioner states that, if the channel is assigned, he will file an application for authority to construct in FM broadcast station.

2. *Community data.*—(a) *Location.* Yucca Valley, an unincorporated community in San Bernardino County, is located approximately 164 kilometers (102 miles) east of Los Angeles and 34 kilometers (21 miles) north of Palm Springs, Calif.

(b) *Population.* Yucca Valley—3,893; San Bernardino County—684,072.²

3. *Local broadcast service.* There is no local broadcast service in Yucca Valley. Petitioner states that it receives service from stations in Twentynine Palms, Palms Springs, Palm Desert, and Cathedral City.

4. *Economic considerations.* Petitioner states that although Yucca Valley is an unincorporated community, it has its own post office, schools, churches, library, and hospital. He notes that there are plans to incorporate Yucca Valley which are before the County Board of Supervisors for public hearing. Petitioner states that Yucca Valley is a year-round retire-

¹Public notice of the petition was given on September 19, 1977 (report No. 1075).

²Mexican concurrence must be obtained before the channel is assigned to Yucca Valley.

³Population figures are taken from the 1970 U.S. Census.

PROPOSED RULES

ment and tourist center whose population has increased from 800 to 3,893 during the period 1960-1970. With this in mind, he asserts that there is a need for more information that the local weekly newspaper can provide which the station can offer through over-the-air reports of local events, referendums, and school information.

5. In light of the above information and the fact that the proposed FM station would provide the community with a first full-time local aural broadcast service, the Commission proposes to amend the FM table of assignments, § 73.202(b) of the rules, with regard to Yucca Valley, Calif., as follows:

City and Channel No.

Yucca Valley, Calif., present: —; proposed: 296A.

6. Authority to institute rulemaking proceedings; showings required; cutoff procedures; and filing requirements are contained in the attached appendix below and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the appendix below before a channel will be assigned.

7. Interested parties may file comments on or before April 3, 1978, and reply comments on or before April 24, 1978.

FEDERAL COMMUNICATIONS
COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM table of assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking to which this appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking to which this appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cutoff procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

¹Based on petitioner's showing Yucca Valley does appear to be community for purposes of making an assignment.

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking to which this appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[47 CFR Part 73]

[BC Docket No. 78-39; RM-2996]

FM BROADCAST STATION IN HAINES, ALASKA

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a class A FM channel to Haines, Alaska, for non-commercial educational use. Petitioner, Alaska Public Broadcasting Commission, states the proposed assignment would provide Haines with its first noncommercial educational aural broadcast service.

DATES: Comments must be received on or before April 4, 1978, and reply comments must be received on or before April 25, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: February 1, 1978.

Released: February 7, 1978.

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations (Haines, Alaska), BC Docket No. 78-39, RM-2996.

1. The Commission here considers a petition for rulemaking filed on behalf of the Alaska Public Broadcasting Commission ("APBC") which seeks the assignment of FM channel 272A to Haines, Alaska, to be used there on a reserved basis for noncommercial educational purpose.¹

2. APBC avers that, if the channel is assigned, APBC or a nonprofit educational corporation functioning under its aegis will apply for its use. APBC asserts that channel 272A could be assigned to Haines in compliance with the minimum distance separation requirements, and would have little impact on the future assignment of FM channels to other communities in this very sparsely populated area of Alaska.

3. Haines (pop. 463)² is located approximately 121 kilometers (75 miles) north of Juneau, Alaska. APBC claims that neither Haines nor any community between Juneau to the south and Yakutat to the northwest—roughly a distance of 320 kilometers (200 miles)—has an FM assignment of its own.

4. The assignment of channel 272A to Haines would create preclusion on channel 272A and the adjacent channels, however, APBC states that many other FM channels are available for assignment to communities in the precluded areas.

5. Since Haines is located within 402 kilometers (250 miles) of the United States-Canada border, the proposed assignment of channel 272A to Haines requires coordination with the Canadian Government.

6. In view of the fact that the proposed FM station could provide the community with a first noncommercial educational aural broadcast service, the Commission proposes to amend the FM table of assignments, § 73.202(b) of the rules, with regard to Haines, Alaska, as follows:

City and Channel No.

Haines, Alaska, present: —; proposed: *272A.

7. The Commission's authority to institute rule making proceedings; show-

¹Public notice of the petition was given on November 29, 1977 (report No. 1091).

²Due to other demands upon the available radio spectrum in Alaska, only FM channels 261 through 300 are available for assignment. These channels may be assigned for either commercial or noncommercial educational use.

³Population figures are taken from the 1970 U.S. Census.

PROPOSED RULES

ings required; cutoff procedures; and filing requirements are contained in the attached appendix below and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the appendix below before a channel will be assigned.

8. Interested parties may file comments on or before April 4, 1978, and reply comments on or before April 25, 1978.

FEDERAL COMMUNICATIONS
COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in section 4(i), 5(d)(1), 303 (g), and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM table of assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking to which this appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking to which this appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cutoff procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking to which this appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comment to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's

rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

TELEVISION BROADCAST STATIONS IN MARION AND URBANA, ILL., AND MADISON, WIS.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making and order to show cause.

SUMMARY: Action taken herein proposed the assignment of UHF TV channel 27 to Marion, Ill., as that community's first television assignment. Petitioner, Dennis F. Doelitzsch, states that the proposed channel would provide for a station which could render a first television service to Marion, Ill., and provide a second commercial television station to the southern Illinois area. An order to show cause is directed to the licensee of station WKOW-TV, Madison, Wis., to show why the offset on channel 27, on which it operates, should not be changed from minus to plus.

DATES: Comments must be filed on or before March 29, 1978, and reply comments on or before April 19, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

NOTICE OF PROPOSED RULEMAKING AND ORDER TO SHOW CAUSE

Adopted: January 25, 1978.

Released: February 3, 1978.

In the matter of amendment of § 73.606(b), table of assignments, television broadcast stations (Marion, Ill.), BC Docket No. 78-32, RM-2970.

1. The commission has before it for consideration a petition for rulemaking filed by Dennis F. Doelitzsch (petitioner), seeking the amendment of § 73.606(b) of the Commission's rules. It proposes that television channel 27

¹Public notice of the petition was given on September 30, 1977 (report No. 1080).

be assigned to Marion, Ill., for commercial use as that community's first television assignment. No responses to the proposal were received.

2. Marion (pop. 11,724), in Williamson County (pop. 49,021),^{*} is located in the extreme south central part of Illinois. There are no television channels assigned to Marion. It receives service from WSIL-TV, Harrisburg, Ill., WPSD-TV, Paducah, Ky.; and KFVS-TV, Cape Girardeau, Mo.

3. Petitioner notes that Marion is the largest city in southern Illinois without a television channel. He points out that southern Illinois is not dominated by any one large city, but instead, numerous medium-sized cities are spread throughout the area. He asserts that, if the proposed channel were to be assigned, it would bring a second commercial channel to the southern Illinois area and increase the number of program choices for area residents. Petitioner contends that the area he proposes to serve receives no independent (non-network) television service.

4. Channel 27 may be assigned to Marion, Ill., in compliance with the minimum distance separation requirements and other technical criteria, provided a change in channel offsets are made on unoccupied channel 27 in Urbana, Ill., from zero to minus and on channel 27 (WKOW-TV), Madison, Wis., from minus to plus. Therefore, a show cause order is being issued to the licensee of the affected station.

5. Petitioner, as the owner of the FM station in Marion, would have to demonstrate that his being the licensee of both stations would not create an undue concentration of control under the provisions of § 73.636(a)(1) of the Commission's rules. However, issuance of this notice is not intended to indicate any view on that situation which will have to be examined when an application is filed.

6. In view of the foregoing, and the fact that the proposed assignment would provide Marion with a first television service and southern Illinois with a second commercial television channel, the Commission finds that it would serve the public interest to seek comments in rulemaking.

7. Therefore, notice is hereby given that the Commission proposed to amend the television table of assignments, § 73.606(b), of the Commission's rules, with respect to the communities listed below, as follows:

City and Channel No.
Marion, Ill., present: —; proposed: 27.

^{*}Population figures were taken from the 1970 U.S. Census.

Urbana, Ill., present: *12—, 27; proposed: *12—, 27—.

Madison, Wis., present: 3, 15, *21—, 27—, 47+; proposed: 3, 15, *21—, 27+, 47+.

8. It is ordered, That, pursuant to section 316 of the Communications Act of 1934, as amended:

(a) Horizons Communications Corp. of Wisconsin, licensee of television station WKOW-TV, Madison, Wis., shall show cause why its license should not be modified to specify operation on channel 27+ instead of channel 27—, if the Commission in this proceeding finds it in the public interest to assign channel 27 to Marion, Ill.; this order being made with the understanding that the ultimate licensee at Marion, Ill., will pay reasonable reimbursement of expenses incurred in the change of channel offset of station WKOW-TV at Madison, Wis.

(b) Pursuant to § 1.87 of the Commission's rules, the licensee of station WKOW-TV, Madison, Wis., may, not later than March 29, 1978, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to request a hearing is waived, Horizons Communications Corp. of Wisconsin may, not later than March 29, 1978, file a written statement showing with particularity why its license should not be modified as proposed in the order to show cause. In this case, the Commission may call on Horizons Communications Corp. of Wisconsin to furnish additional information, designate the matter for hearing, or issue without further proceedings, an order modifying the license as provided in the order to show cause. If the right to a hearing is waived, and no written statement is filed by the date referred to above, Horizons Communications Corp. of Wisconsin will be deemed to consent to modification as proposed in the order to show cause and a final order will be issued by the Commission, if the channel offset change on channel 27 is found to be in the public interest.

9. It is directed, that the Secretary of the Commission shall send a copy of this notice of proposed rulemaking and order to show cause by certified mail, return receipt requested, to Horizons Communications Corp. of Wisconsin, Box 100, Madison, Wis. 53701, the party to whom the order to show cause is directed.

10. The Commission's authority to institute rulemaking proceedings; showings required; cutoff procedures; and filing requirements are contained in the attached appendix and are incorporated by reference herein.

11. Interested parties may file comments on or before March 29, 1978,

and reply comments on or before April 19, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the TV table of assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking to which this appendix is attached.

2. Showings required. Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking to which this appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. Cutoff procedures. The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. Comments and reply comments; service. Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking to which this appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission rules.)

5. Number of copies. In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. Public inspection of filings. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

[6110-01]

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON RULEMAKING AND PUBLIC INFORMATION

Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Rulemaking and Public Information of the Administrative Conference of the United States, to be held at 10:30 a.m., March 10, 1978, in the library of the Administrative Conference, the Gelman Building, 2120 L Street NW., Suite 500, Washington, D.C.

The committee will meet to be briefed on the Conference's ongoing study of the Federal Trade Commission's trade regulation rulemaking procedures and a new study involving a close examination of existing and desirable rulemaking practices governmentwide, with particular reference to the manner in which rulemaking issues are prepared for agency decisions.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact Joseph b. Scott, 202-254-7020. Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

February 6, 1978.

Farmers Home Administration

[Notice of Designation No. A5651]

PENNSYLVANIA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Tioga County, Pa., as a result of drought May 1 through May 31, 1977, excessive rainfall September 7 through November 30, 1977, and a crippling snow October 16, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904, subpart C, exhibit D, paragraph V B, including the recommendation of Gov. Milton J. Shapp that such designation be made.

Applications for emergency loans must be received by this Department no later than August 1, 1978, for physical losses and January 31, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, DC, this 6th day of February, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

Soil Conservation Service

BRIDGETON CITY PARK PUBLIC WATER-BASED RECREATION RC&D MEASURE, NEW JERSEY

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Bridgeton City Park Public Water-Based Recreation RC&D Measure, Cumberland County, N.J.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Warren J. Fitzgerald, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of water-based recreational facilities and the stabilization of critically eroding area within the Bridgeton City Park in Cumberland County, N.J. The planned works of improvements include installation of picnic shelters, bathhouses, a boat ramp, a fishing pier, hiking trails, parking lots, and associated service facilities.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Warren J. Fitzgerald, State Conservationist, Soil Conservation Service, 1370 Hamilton Street, P.O. Box 219, Somerset, N.J., 08873, 201-246-1205. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until March 15, 1978.

Dated: February 6, 1978.

CITY OF PETOSKEY WINTER SPORTS PARK CRITICAL AREA TREATMENT RC&D MEASURE, MICHIGAN

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the City of Petoskey Winter Sports Park Critical Area Treatment RC&D Measure, Emmet County, Mich.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Arthur H. Cratty, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include the installation of approximately 800 feet of corrugated metal pipe, riprapping, and seedings to control erosion and sedimentation at the park. The construction costs are approximately \$47,300; \$35,475 RC&D funds and \$11,825 local funds.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Arthur H. Cratty, State Conservationist, Soil Conservation Service, 1405 South Harrison Road, East Lansing, Mich. 48823, 517-372-1910. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are avail-

able to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until March 15, 1978.

Dated: February 6, 1978.

HOMER AIRPORT CRITICAL AREA TREATMENT RC&D MEASURE, LOUISIANA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Homer Airport Critical Area Treatment RC&D measure, Claiborne Parish, La.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Alton Mangum, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned improvement includes establishing vegetation on 23 acres at the Homer Airport site to control erosion.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Alton Mangum, State Conservationist, Soil Conservation Service, 3737 Government Street, P.O. Box 1630, Alexandria, La. 71301, 318-448-3421. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interest-

ed parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until March 15, 1978.

SPRING CREEK WATERSHED PROJECT, DAWSON COUNTY, NEBR.

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (40 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Spring Creek Watershed Project, Dawson County, Nebr.

The environmental assessment of the federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Benny Martin, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection, flood prevention to agricultural lands and the city of Lexington, and a reduction in sheet and rill erosion. The planned works of improvement include a system of six floodwater detention structures, five of which have been built. The remaining structure to be built replaces six floodwater detention structures that were in the original plan. An additional 33.7 miles of channel improvement and 1.77 miles of dike around the city of Lexington are deleted from the plan.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environ-

mental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, Room 343, Federal Building—U.S. Courthouse, Lincoln, Nebr. 68508; CML 402-471-5301. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal is available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until March 15, 1978.

Agreement CAB	IATA resolution designator No.	Title of IATA resolution affected
26973-R2.....	171/002z, 268/002z, 357/002z.....	Special readoption resolution (amending).
26996-R1.....	181/815a, 277/815a, 368/815a.....	Industry incentive scheme (supplementary provisions) (new).
26996-R7.....	181/815, 277/815, 368/815.....	Industry incentive scheme for approved passenger sales agents (amending).

In Order 75-12-141, December 29, 1975, the Board deferred action on Agreements CAB 25600-R1 through R4. In Order 76-7-56, July 16, 1976, it refused to grant interim approval of the agreements and instituted an investigation into the principal issue raised by the agreements, viz., whether or not the establishment of a uniform commission rate payable to agents for the sale of international air transportation is adverse to the public interest. In Order 77-8-14, August 3, 1977, the Board denied a request by National Airlines, Inc. (National) for interim approval of the agreements, finding that the apparent effects of the current open commission rate situation did not warrant a reversal of its

The agreements at issue are Agreements CAB 25606-R1 through R4, which respectively establish or amend IATA Resolutions 002z, 016d, 815, and 860. Resolution 002z, among other things, amends Resolution 820a to establish a uniform commission rate for the sale of air transportation and reinstates that section of Resolution 810e stating the conditions to be eligible for the sale of inclusive tours. Resolution 815 establishes an industry incentive scheme for approved agents. Resolution 860 establishes commissions on interline sales. Resolution 016d provides for a study of tour and travel organizer operations. The texts of these agreements are reproduced in an appendix to Order 75-12-141. See also, Order 76-3-83, March 12, 1976.

CIVIL AERONAUTICS BOARD

[Order No. 78-2-24; Docket Nos. 27813; 30777; Agreements CAB 25973-R2; 26996-R1 & R7]

MEMBERS OF THE INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Deferring Action

FEBRUARY 2, 1978.

There have been filed, under section 412(a) of the Federal Aviation Act of 1958, as amended (the Act), and Part 261 of the Board's Economic Regulations, certain agreements among the members of the International Air Transport Association (IATA) to establish, amend, or revalidate certain IATA resolutions on agency matters. The resolutions were adopted by the Composite Passenger Traffic Conference held in Hartford in June 1976 and in Cannes in October 1977.

The individual resolutions with their subject matter and area of applicability are listed below:

Agreement CAB	IATA resolution designator No.	Title of IATA resolution affected
26973-R2.....	171/002z, 268/002z, 357/002z.....	Special readoption resolution (amending).
26996-R1.....	181/815a, 277/815a, 368/815a.....	Industry incentive scheme (supplementary provisions) (new).
26996-R7.....	181/815, 277/815, 368/815.....	Industry incentive scheme for approved passenger sales agents (amending).

earlier determination not to grant interim approval. Reaffirming that decision in Order 77-9-127, September 27, 1977, we deferred action on certain other IATA agreements which are related substantively to those under investigation.

Upon review of agreements subsequently filed by IATA for Board approval, it appears that the agreements listed above relate in a substantive manner to issues which ultimately will be determined by the investigation being conducted in Docket 28672. In denying National's motion for interim approval of Agreements 25606-R1 through R4, the Board found that there had been no concrete showing that the public interest had been adversely affected by the open commission rate situation. With respect to the agreements listed above, IATA has presented no new supporting argument which would suggest a decision different from that reached by the Board in Order 74-12-121 and reiterated.

*Agreements CAB 26096, 26157-R1 through R3, 26260-R17, and 26291.

*Agreement CAB 25973-R2 amends Resolution 002z. Agreement CAB 26996-R1 establishes Resolution 815a, which provides procedures for determining whether an approved agent qualifies for incentive commission payments by IATA members under Resolution 815. Agreement CAB 26996-R7 amends Resolution 815.

ed in Orders 76-3-83, 76-7-56, 77-8-14 and 77-9-127.

Therefore, pursuant to authority duly delegated by the Board in the Board's Economic Regulations, 14 CFR 385.3, it has been decided to defer action on these agreements, pending completion of the investigation of the IATA commission rate structure. Upon completion of the investigation, the agreements will be considered on their merits.

Accordingly, *it is ordered*, That: 1. Action on Agreements CAB 25973-R2, 26996-R1 and R7 be deferred; and

2. This order shall be served on IATA and its U.S. member air carriers, the Air Traffic Conference of America and its member air carriers, the American Society of Travel Agents, Inc., the Association of Retail Travel Agents, the American Automobile Association, the Association of Bank Travel Bureaus, the International Air-freight Agents Association, the Travel Agents' Legal Action Committee, Unitours, Inc., and the U.S. Departments of Justice and Transportation.

Persons entitled to petition the Board for review of this order pursuant to the Board's Economic Regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[6320-01]

[Order No. 78-2-19; Docket No. 32021]

WESTERN AIR LINES, INC.

Order Dismissing Complaint

On December 30, 1977, Western Air Lines, Inc. (Western) filed tariff revisions proposing new United States-Mexico fares for effect February 17, 1978. Western proposes to increase first-class fares by 5 to 6 percent, retain normal economy fares unchanged, and increase promotional fares by amounts ranging from 6.4 to 11.2 percent. It estimates the increase will average about 5.8 percent. The carrier also proposes to introduce a new advance-purchase excursion (APEX) fare in the Los Angeles-Mexico City, Los Angeles-Acapulco, and San Diego-Mexico City markets at discounts ranging from 32 to 39 percent from the normal economy fare. The rules applicable to the APEX fares would not permit return travel before the first Sunday following the date of departure; have a maximum stay of 30 days; prohibit stopovers; require advance reservations and payment at least 7 days before departure;

and would limit APEX seats on each flight to 33 to 38 percent of the capacity of the particular aircraft type.

Western argues that the proposed increases are justified by eroding profitability attributable to cost increases, particularly in labor and landing fees, and declining traffic; its return on investment (ROI) in United States-Mexico passenger service has steadily declined from 14.3 percent for Calendar year 1976 to -9.8 percent for the year ended September 1977; its costs have risen at least 29 percent per available seat-mile since January 1974, the last time Western was granted a fare increase; its United States-Mexico traffic has fallen due to currency fluctuations affecting northbound travelers; the decrease in tourist traffic and greater competition from Mexican-flag carriers; and it forecasts an ROI of -6.45 percent during the year ending September 1978 at present fares, and 4.89 percent at the proposed fares.

In support of the APEX fares, Western states that they are needed to fill seats that would otherwise go empty, especially northbound, in view of the present traffic stagnation, and to compete with existing lift against specialized services such as Mexicana's night coach; the APEX fare is similar to the domestic "Super-Saver" level and "Freedom Fare" rules and will accomplish its goal as well as smoothing out traffic flow and minimizing self-diversion and inconvenience to normal fare passengers; as a matter of policy it will limit initial availability of the fare to an even smaller amount of capacity than allowed by its tariff; it would not be economic for Western to add a night-coach flight to compete with Mexicana between Los Angeles and Mexico City, since the night-coach fare of \$69 one-way would require a breakeven load factor of over 90 percent; the fares will provide additional competitive opportunities vis-a-vis Aeromexico's Tijuana-Mexico City DC-10 operations; the APEX will not divert normal-fare passengers, who already have access to other promotional fares but have continued to opt for full fares; the APEX will improve Western's operating profit by \$243,000, assuming a 45/55 generation/diversion ratio; and finally, its response to competitive pressure from the Mexican carriers is to introduce, as a competitive pricing effort, a truly generative discount fare which will benefit the consumer, rather than engaging in a capacity or commissions war.¹⁶⁸

A complaint requesting suspension pending investigation of Western's

¹The Los Angeles-Mexico APEX is proposed at \$158 or 5.02 cents per mile; the existing night-coach fare equates to 4.44 cents per mile.

²Western states that Mexican domestic fares are considerably lower than San Diego-Mexico City fares.

tariff has been received from Compania Mexicana de Aviacion, S.A. (Mexicana). Mexicana alleges that the APEX fare will be extremely diversionary and will reduce carrier revenues; the fare is a mere "sweetener." Western has added to its package of "exorbitant" increases in other fares; it is subject to no significant restrictions such as a weekend surcharge or meaningful advance-purchase or minimum-stay requirements; the minimum-stay requirement (Sunday after departure) is so loose as to insure diversion of normal-fare business travelers; the APEX fare would be significantly lower than existing 40-passenger group fares, which have rigid minimum-stay requirements, travel-together rules, and longer advance-payment periods; if Western desires to compete with Mexicana's night-coach service, it should offer a parallel service rather than introducing an uneconomic daytime discount fare, while the APEX fare is allegedly intended to promote northbound traffic, it discriminates against Mexico-originating passengers by prohibiting open-jaw travel; Western's comments about competing with Aeromexico's Tijuana-Mexico City operation do not sufficiently identify the fares in question; and it is impossible to understand how the APEX fares could smooth traffic flows since they have no weekend or peak-period differential levels and, on the contrary, they worsen peaking problems with resulting inconvenience to higher-fare traffic.

The Board has decided to dismiss the complaint.

We have repeatedly stated our position that carriers should be given the widest possible latitude in exercising their commercial judgment to improve their economic position. In its justification in support of its proposed United States-Mexico fares, Western states that it has experienced a substantial decline in traffic in this market since the first quarter of 1977; and in its judgment, traffic will respond to a reduced fare such as the one it proposes. We see no reason to prevent the carrier from experimenting with this solution, and we find no merit in the argument that the proper response to competition from other carriers is to match their service.⁴ Mexicana's night coach might be well-suited for its type of operation but not a suitable approach for Western's attempt to increase traffic while maintaining capacity at its present level. Further, since the west-coast charter

³Mexicana states that, even applying the lowest diversion rate Western estimates for any promotional fare (7.58 percent for off-peak inclusive-tour fares) to normal-fare traffic would result in diversion producing a net loss from the APEX fare of \$124,000.

⁴See Order 77-9-55, September 16, 1977.

market to Mexico is very limited, the fare is not likely to have a significant impact on that segment of the industry.

The thrust of the complaint is that the APEX proposal will result in serious diversion of higher-rated traffic and cause a fall in overall revenues. This is certainly possible, but the efficient test of the idea is in the marketplace. Since the discount offered from the normal economy fare, 32 to 39 percent, is relatively small compared with those offered in other markets, diversion may not be a significant problem.⁵ Further, it is in the carrier's own self-interest not to let this happen. While we might have preferred a price differential for peak travel, its absence does not prevent the carrier from allocating capacity for this fare in such a way as to accomplish the same result and, of course, the carrier has every incentive to do so.⁶

Accordingly, *It is ordered*, That: The complaint of Mexicana in Docket 32021 be dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of

⁵We give weight to Western's contention that the fare will divert existing promotional-fare traffic rather than normal fare traffic since the latter have had access to similarly discounted fares in the past and have continued to use the higher fare.

⁶As indicated above, Western has demonstrated the revenue need which will flow from the fare increases and that they will not be sufficient to result in excess earnings.

Commerce, Washington, D.C. 20230, on or before March 6, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00091. Applicant: Georgetown University, School of Medicine, Department of Pathology, 3900 Reservoir Road NW., Washington, D.C. 20007. Article: Electron Microscope, Model JEM-100S, Haskris Water Recirculator with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in the study of ultrastructure of pathological material (human and animal) during experiments involving characterization of cell surface antigens. The objective pursued in the course of these experiments will be diagnosis of diseases, and obtaining new information relevant to immune functioning of cell types. In addition, the article will be used for graduate instruction in ultrastructural technique. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00092. Applicant: DHEW, PHS, NIH, National Institute of Dental Research, Building 30, Room B-20, 9000 Rockville Pike, Bethesda, Md. 20014. Article: LKB 2128-010/Ultratome IV Ultramicrotome complete with Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for electron microscopical studies of the neurons of trigeminal nucleus caudalis, a region of the brain which receives pain and temperature input from the face and oral cavity. These studies examine the morphology, synaptic connections, development of neurons in trigeminal pain pathways as well as their response to the loss of input from the teeth. The objectives of these studies are to understand basic pain mechanisms and mechanisms of chronic pathological pain states. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00093. Applicant: Colorado State University, Department of Biochemistry, Fort Collins, Colo. 80523. Article: LKB 2127-001 Tachophor complete with Power Supply Unit. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigation of purity of protein in snake venoms and lizard venoms which will contribute to more efficient treatment in envenomation. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00094. Applicant: McGee Eye Institute, 608 Stanton L. Young Dr., Oklahoma City, Okla. 73104. Article: Electron Microscope, Model H-500 with Goniometer. Manufacturer: Hitachi, Japan. Intended use of article: The article is intended to be used to examine eye tissue from both humans and animals. Connective tissue and biochemical, biophysical and pathological properties of the eye will be studied. Investigations will be conducted to: (1) Determine the role proteoglycans play in the normal physiology of vision; (2) Demonstrate any differences that may occur between the proteoglycan content of the normal cornea versus corneas with known pathology; (3) Demonstrate any difference of enzyme levels between normal and diseased corneas, and other eye tissues; (4) Demonstrate the effect lysosomal proteases may have on the melting syndrome; (5) Demonstrate antigen-antibody complexes in autoimmune diseases of the eye; and (6) Develop clinical applications of the electron microscope to pathology. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00095. Applicant: Sandia Laboratories, 1515 Eubank Boulevard SE., P.O. Box 5800, Albuquerque, N. Mex. 87115. Article: Cintheadolite System. Manufacturer: Contraves Ag, Switzerland. Intended use of article: The article is intended to be used for studies of aerodynamic characteristics of Weapon System Flight Vehicles. The phenomena to be investigated will be accelerations, velocities, and space position versus time. Experiments will be conducted to conform characteristics obtained from model studies, to determine the interface characteristics between vehicles and delivery system and to investigate effects of component retrofits on existing systems. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00096. Applicant: North Carolina State University, Department of Botany, 2214 Gardner Hall, Raleigh, N.C. 27607. Article: Combination Scanning Microinterferometer and Scanning Microdensitometer, Model M860010 with camera accessories. Manufacturer: Vickers Instrument Inc., United Kingdom. Intended use of article: The article is intended to be used for the measurement of amounts of biological macromolecules DNA, RNA, proteins, and enzyme substrate precipitates at the cell level in order to procure quantitative data on the behavior of genetic material during growth and differentiation of prokaryotic and ukaryotic organisms. Other phenomena to be studied will include endopolyploidy, polyploidy pattern recognition, intra and interspecific plant and avian DNA

values, sex determination and internal DNA reference standard establishment. In addition, the article will be used to provide basic understanding of quantitative cytochemistry and its application to both basic and applied plant science and biomedical research in the courses: Botany/Zoology 414 Cell Biology, Botany 421-510 Plant Anatomy, Botany 620 Advanced Plant Taxonomy, and Botany 590 Quantitative Microscopy. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00097. Applicant: University of Michigan, Ann Arbor, Mich. 48109. Article: Electron Microscope, Model JEM-100CX with side entry goniometer stage and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the following research in the fields of biological, physical, mineralogical and engineering sciences: (1) Microstructural Factors Influencing the Strength of the Bonding of Dental Porcelain to Base Metal Alloys. (2) Study of Exsolution Relations in Manganese Pyroxenes. (3) Characterization of the Crystal Chemistry and Structure of Minerals Using the Sten. (4) Character of Twinning in Pyrrhotite Minerals. (5) Study of Crystalline Polymers. (6) Solid State Deformation of Polymers: Extrusion of Polyethylene. (7) Preferred Orientation Textures in Very Thin Films of Drawn and Recrystallized Polyethylene. (8) Cell Interactions in Hereditary Tumors: Cell Surface Structures. (9) Subcellular Localization of Heavy Metals. (10) Lectin Binding on Neoplastic Cells. Application received by Commissioner of Customs: January 19, 1978.

Docket No. 78-00098. Applicant: University of Illinois Urbana—Champaign Campus, Purchasing Division, 223 Administration Building, Urbana, Ill. 61801. Article: Far Infra-red Spectrometer System, Model IR-720M. Manufacturer: Beckman-RIIC Ltd., United Kingdom. Intended use of article: The article is intended to be used for research on various properties of materials which will include: (1) Optical band structure studies. (2) Infrared studies of adsorbed surface species—understanding the detailed mechanisms of both heterogeneously and homogeneously catalyzed reactions. (3) Far infrared optical properties of materials. (4) Far spectroscopy of high-spin Fe²⁺ and Fe³⁺ complexes: fine structure, magnetic moment and exchange interaction. (5) Far infrared quantum electronics—study of quantum electronics techniques in the far infrared (FIR) spectral region. (6) Electron transfer in metalloproteins—understanding of the fundamental nature of electron transfer between transition metal ion sites in metalloproteins. (7) Identification of residual impurities and the

study of impurity interactions in high purity compound semiconductors. (8) Far infrared diagnosis of Tokamak fusion plasmas. (9) Impurity, donor and free carrier states in Si MIS structures. (10) Structure and dynamics of inorganic and related crystals. Application received by Commissioner of Customs: January 19, 1978.

JACKSONVILLE CHILDREN'S MUSEUM

Decision on Application for Duty-Free Entry of
Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No.: 75-00392-00-66700. Applicant: Jacksonville Children's Museum, 1025 Gulf Life Drive, Jacksonville, Fla. 32207. Article: Planetarium Projector, MS-10. Manufacturer: Minolta Camera Co. Ltd., Japan. Intended use of article: The article is intended to be used to demonstrate astronomical phenomena and to allow student participation and involvement in the following courses:

Celestial Navigation
Principles of Stellar Photography
General Astronomy
Concepts in Contemporary Astronomy
General and Practical Astronomy
Concepts in Science, Grades 3 through 12
Our Galaxy and the Universe
Astronomy Workshops for Teachers

Comments: No comments have been received with respect to this application.

Decision: Application denied. An instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (June 5, 1970).

Reasons: This application is a resubmission of Docket Nos. 71-00025-00-66700, 72-00210-00-66700, and 73-00258-00-66700 which were denied without prejudice to resubmission on

April 9, 1971, July 27, 1972 and October 10, 1974, respectively. Denial without prejudice to resubmission (DWOP) is the procedure whereby the Department of Commerce permits the applicant to correct any deficiencies which prevent or severely restrict consideration of an application on its merits by submitting additional information in a new application limited to the same article and the same intended purposes set forth in the application found deficient. Thus the material considered by the Department in a resubmission is that which falls within the scope and context of the deficiencies specifically stated to the applicant in writing. In the DWOP of the second submission¹ (Docket No. 72-00210-00-66700) the applicant was specifically asked to provide more detailed information in reply to Question 8 which might establish a pertinent feature (within the meaning of §§ 301.2(n) and 301.5) upholding duty-free entry from the list of features claimed to be essential to the applicant's needs. These features as set forth in the applicant's second submission essentially consisted of: 5,000 stars; accuracy of star positions (± 2 minutes of arc); accuracy of star magnitudes (± 0.2 magnitude); projection of star images as well defined circular dots; annual-diurnal-latitude motion coupling, Keplerian planet motions; dual starballs; complete star dimming capability; moon crescent within 2 degrees of sun; dual planet projectors; high efficiency moon and sun projectors; azimuth

¹In the second submission, the applicant included much stereotyped material of questionable relevance. Some of this material referred to projects which individuals not directly connected with the applicant institution "would like to see presented." These projects were proposed over a year after the article was ordered. This delay supports a finding that the institution was not involved in these projects at the time of order. Such projects could, therefore, not be considered by the Department in accordance with § 301.5 of the regulations. Despite these deficiencies (and others such as heavy reliance on cultural as opposed to educational programs), it is clear that the applicant did attempt to respond to the DWOP of the original application. For example, prior to resubmission the applicant called the Department at least twice, received a ninety day extension of the deadline for resubmission and exchanged correspondence with the Department in the attempt to clear up possible misunderstandings and better prepare the application. Then, in the resubmitted application, the applicant identified numerous specific tasks and/or demonstrations that could be performed with the foreign article (although it was not clear that these were to be performed with the article in view of the applicant's reference to tables, planetarium committee reports, etc.) in support of the application. Thus the Department had every reason to believe that the specific purposes and features identified and described in the second submission (although lacking in certain details) defined the limits of the applicant's case.

circle; moveable altitude circle; precession circle; and remote control capability. In the recommendation relating to this second submission, our planetarium consultant advised that the most closely comparable domestic instrument, the Model A-4, manufactured by Spitz Laboratories Inc. (Spitz), matched most of the features claimed by the applicant to be essential and that any unmatched features were not pertinent to the purposes of the applicant as described in the application. Our consultant carefully pointed out the deficiencies found in the large quantity of material submitted by the applicant in the attempt to justify duty-free entry on the basis of these features. In addition, the Department advised in the DWOP, that in its evaluation it could not consider programs which the applicant did not intend to perform when the initial application was submitted or which were conceived by the applicant subsequent to the date the article was ordered. It was also pointed out that these limitations might well have been exceeded in certain programs described in the application (Docket No. 72-00210-00-66700). See, for example, page 3 of our DWOP letter of July 27, 1972.

In the third submission (Docket No. 73-00258-00-66700), the applicant provided no new information relating to the issues raised in the second submission as listed above. Instead the applicant deleted all of the issues listed above and raised four new ones. In the DWOP of the third submission the applicant was asked for evidence that might explain why the four new issues were raised for the first time in the third submission. The applicant did not provide that evidence on resubmission. The substantive portion of the fourth submission (Docket No. 75-00392-00-66700) was essentially a duplication of the third submission. No new material was provided which could counterbalance contradictory material (pointed out to the applicant in the DWOP) contained in prior submissions. In reply to Question 8 of this (the fourth) submission the following features were listed as essential to the applicant's program:

1. Separate Milky Way Projection,
2. Star twinkling,
3. Fully variable star field,
4. Dual planet projectors.

All four of these features relate to purposes which appear for the first time in the third submission and are repeated in this submission. While some of these features may have been listed in the manufacturer's published specifications and discussed in material attached to prior applications, the applicant did not previously list any of them as characteristics essential to the achievement of intended purposes. Further, none of the features cited above (with the possible exception of

star dimming) was clearly an important consideration of the applicant, prior to the purchase of the foreign article, as evidence by the applicant's correspondence with the domestic manufacturer, the summary analysis provided to the planetarium committee, and inquiries on planetarium characteristics which were sent to planetarium directors by the applicant while seeking information helpful in the purchase of a planetarium. In connection with these four features, the following specifically is noted:

1. In two prior submissions (the first and second), separate Milky Way projectors was not listed in the comprehensive tables used by the applicant to compare the features of the foreign article with those of other planetarium projectors including the domestic Spitz A-4. Moreover, there is no evidence that Spitz was asked to provide a separately controlled Milky Way meeting the applicant's needs. However, prior to the date the foreign article was ordered, Spitz's Model Nova planetarium was equipped with a separately controlled Milky Way which could be easily transferred to the Model A-4. And, prior to the date of purchase, Spitz had produced separately controlled aperture as well as lens projectors which could be utilized to display a variety of images including the Milky Way. Thus, there is evidence that Spitz was capable of meeting the applicant's needs at the time of order.

2. Similarly, in the first and the second submission star twinkling was not listed in the comprehensive tables used by the applicant to compare the features of the foreign article with those of other planetariums including the A-4.

There is no evidence that the applicant initially required star twinkling or that Spitz was afforded an opportunity to offer star twinkling. It is within the realm of possibility that Spitz could have provided this feature if the firm had been asked to supply it, for example in a bona fide request for quote.

3. In the initial submission (Docket No. 71-00025-00-66700), the applicant made no claim, in reply to Question 8 (or in any other part of the application), that a fully variable star field was needed for achievement of intended purposes or even facilitated the performance of such purposes.

This omission is significant if we consider the fact that at least nine other characteristics of the article are alleged to be pertinent in reply to Question 8.

In the second submission (a comprehensive attempt to respond to the initial DWOP) the applicant alleged that the accomplishment of teaching purposes was "facilitated" by the capability of dimming the light source to simulate sunrise and sunset. In this con-

nection, we note that the applicant differentiated this feature from a number of other features alleged to be "essential" or "required" for achievement of purposes. It is clear that simulation of sunrise and sunset can be performed on the domestic instrument. In the DWOP of the second submission, the Department indicated that the domestically available planetarium provides an even closer approximation of nature than the foreign article with respect to simulation of sunrise and sunset as well as other features, e.g., circular shapes of stars vs. pinpoints. In the third submission (Docket No. 73-00258-00-66700) and this (the fourth) submission, in reply to Question 8.c.(3), the applicant related the foreign article's capability of full variation of the star field to four specific intended uses. These were described in the following manner:

(a) The Celestial Navigation course treats sextant sightings under a variety of conditions, including conditions of twilight when there is still a visible horizon. The necessity of accurate simulation here is a fully variable star field.

(b) The Principles of Stellar Photography course uses photography sessions under a wide range of sky conditions during dusk and dawn and those conditions during solar and lunar eclipses. A star field projector fully variable in intensity is necessary to accurately provide successful laboratory demonstration.

(c) Demonstrations in the 'General and Practical Astronomy' courses include sunrise and sunset sequences during which the stars need to be made to appear as they do in nature. For the series of events during lunar and solar eclipses, the Xenon arc light source on the domestic instrument is only partially variable in intensity, and hence renders accurate simulations difficult.

(d) The General and Practical Astronomy courses typically demonstrate variable sky conditions including the changing transparency of the earth's atmosphere. With the formation of haze and the coming of clouds there is gradual extinction of the starlight until this extinction becomes complete. This demonstration requires a fully variable star field projector. Use a., the lunar and solar eclipse aspect of b. and c., and use d., appear for the first time in the third submission (73-00258-00-66700); and the demonstration of sunrise and sunset in c. was found to be matched by the Spitz A-4 in our review of the second submission. Performing the lunar and solar eclipse demonstrations is stated by the applicant to be a matter of difficulty. The applicant did not state that the demonstrations could not be done on the domestic instrument. We,

therefore, find the ability to perform such demonstrations to be a matter of convenience (which is not pertinent within the meaning of § 301.2(n) of the regulations).

Further, in its recommendation relating to Docket No. 73-00258-00-66700 (the third submission) the National Air and Space Museum (NASM) advised that b., c., and d. were not pertinent and further described how use b. could be performed on the Spitz A-4. Moreover, all of use a. and b. are intended for programs designed to convey information on certain subjects to the general public. As such these programs are considered to be of cultural rather than formalized educational character. Within the context of the Florence Agreement Legislation (Pub. L. 89-651) and consistent with the Department's administration of this program since 1967, such cultural purposes cannot be used to establish the pertinency of any characteristic of the foreign article and to justify thereby duty-free entry under the law (a policy of which the applicant was advised in the DWOP of the initial submission).

Finally, it is noted that Spitz has had available a compact filamentary light source capable of 100 percent variability in intensity. This incandescent source could be exchanged with an arc source in a very short time by simply unhooking the Xenon source from the yoke and replacing it with the filamentary unit. Other alternatives such as use of a variable density filter over the light source are also possible.

In this connection, it is noted that the report of the equipment subcommittee dated February 5, 1970 includes a comparison of the A-4 with the foreign article showing that "Dawn/Twilight . . . Sunrise/Set" is built in on the article and is optional on the A-4. If "Dawn/Twilight . . . Sunrise/Set" refers to variability of the star field, Spitz is shown to have that feature.

4. In response to Question 8 of the applicant's initial submission the applicant stated that the dual optical projection of the foreign article's planet projectors assures that no occultations will occur as "sometimes" happens with the single planet projection method. No other information on this feature was provided.

In the second submission (Docket No. 72-00210-00-66700), which as already noted was comprehensive and definitive in nature the applicant elaborated on the issue of the dual planet projector. This was described as a feature which a planetarium "should have" for further effectiveness in teaching astronomy. There was no claim that this feature was essential for such purposes. This system was alleged to maintain reliability and prevent obscuration of image by support-

ing struts. Spitz commented on Docket No. 71-00293-00-61800 (an application for duty-free entry of an identical foreign article involving, for all intents and purposes, identical issues) and in connection with the dual projector feature alleged: That the number of projectors used is irrelevant; preservation of a comparable constant set of planet, sun and moon images is the relevant issue; that the Spitz A-4 planetary motion cage is designed without heavy struts, thereby minimizing (and in most cases eliminating) shadows as the result of occultation; and finally that, based on observation of a similar foreign article (wherein it was noted that "at least 3 of the planet images disappeared during annual motion because one of the two bulbs per planetary analog was evidently non-operative causing disappearance and unnatural change in brilliance") neither uniform brilliance nor preservation of planet images is in fact accomplished more dependably than with the A-4. After review of the second submission (Docket No. 72-00210-00-66700) our planetarium consultant advised in a memorandum dated June 8, 1972 that: "The Spitz A-4 is subject to occasional occultation of planets from structural members; however, the planet cage is designed with small members to minimize the occultation. The (article) uses a system of two projectors per planet such that if one is occulted the other usually has a free line of projection. The applicant states that better effectiveness in teaching astronomy is achieved with the dual system, but no indication of how the domestic system hampers the teaching of astronomy is forthcoming." The applicant, as noted above, did not treat this feature as essential to his purposes. Our consultants' advice was forwarded to the applicant as a part of the DWOP of the application.

In the third submission (73-00258-00-66700) and this fourth submission the material provided by the applicant relating to the issue of dual planet projectors is, for all intents and purposes, not significantly different (though a small amount of clarifying detail was provided in the latter submission). None of this material provides a basis for justification of duty-free entry.

First, the applicant alleges that the dual planet projectors of the article prevent the obscuration of planet images by structural members of the instrument and therefore, present to the student a more realistic and accurate demonstration of the planetary motions. In its recommendation relating to the third submission, NASM advised that with respect to obscuration of planetary images, the foreign article (i.e., the MS-10) provides a more realistic presentation of planetary motion than the A-4. However, NASM

emphasized that this finding was in no way intended to imply general superiority with regard to planetary or other simulations of any planetarium over another. NASM continued that in this case the relevant educational objective, "... introduction to the planets associated with the sun, their appearance in the night sky and where to locate them" (similar to the response to Question 7b(2), Grades 3 and 4) can be and has been achieved with the A-4. It is further noted the applicant is willing in certain instances to sacrifice realism (for example, as a trade off: circular dots to represent stars and the use of the relatively inexpensive "but perhaps less satisfactory" incandescent light as opposed to Xenon light; Docket No. 72-00210-00-66700, the second submission, see especially the letter to the Director of the Strasensburgh Planetarium dated December 16, 1969).

Next the applicant alleged that the dual projector was needed in the Principles of Stellar Photography course in which students conduct photographic exercises in which traces and positions of the planets created by the annual motion will be measured with respect to time. This use is part of the description of purposes attributed to the Jacksonville Children's Museum which are considered cultural rather than educational in character and, as such, cannot (as noted above) be used to establish pertinency.

Finally, the applicant alleged that occultation of one or more planets at a time when it is necessary to stop annual motion creates difficulty in their relocation and thereby hampers effective teaching of astronomy. This problem is first described in Docket No. 73-00258-00-66700 and again in this (the fourth) submission. Moreover, obscuration is described as "hampering", not preventing, effective instruction. Thus the dual projector, in this instance, is found to be a convenience which is not pertinent. Further, NASM in its recommendation related to Docket Number 73-00258-00-66700, the third submission, pointed out that the problem can be corrected easily by the operator of the A-4 (with its short, infrequent occulting characteristic) through manipulation of the annual and diurnal motions. NASM further pointed out that avoiding such manipulations with the foreign article, or explaining an occasional occultation, is considered a convenience.

In the initial submission (Docket No. 71-00025-00-66700), in response to Question 9.a. the applicant states, "Spitz Laboratories, Inc. did not have an instrument in the price wanted by Jacksonville Children's Museum, Inc. The Department notes that the technical comparability of the domestic instrument was not in question—the primary force influencing the final deci-

sion was purely cost. In accordance with subsection 301.2(n) of the regulations cost differences between the article and domestic instrument cannot be considered a pertinent specification upon which duty-free can be based.

Evaluation of the various submissions of this application was complicated by the continued introduction of new purposes which, under the Department's regulations, cannot be considered (§§ 301.5 and 301.6(a)(3)). In view of this restriction and the applicant's disregard thereof, the following statement included in reply to Question 7.b(3) in the second submission, 72-00210-00-66700 takes on significance: "A more specific description of potential uses of the instrument are set forth in the attached manual, entitled 'Astronomy Laboratory Manual' and marked 'Appendix II.'"

The four new-developed requirements listed in the third submission and in this submission, when taken together with this statement, do not provide a basis for justification of duty-free entry. Moreover, the National Bureau of Standards advised in its memorandum dated May 16, 1977, that it has taken into consideration the statements of the applicant and the attached documents for factual information therein and considers the applicant's arguments for duty-free entry of the foreign article to be exhausted and insubstantial.

Based on the foregoing consideration, NBS advice etc., our own review of the application as well as other factual information in our possession (specifications, text books, etc.) we find that the Spitz A-4 was of equivalent scientific value to the foreign article for the purposes for which this article is intended to be used at the time the foreign article was ordered.

SANDIA LABORATORIES

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public

review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 77-00295. Applicant: Sandia Laboratories, Kirtland AFB East Albuquerque, N. Mex. 87115. Article: TEA-100 CO₂ Lasers and Accessories. Manufacturer: Lumonics Roch Ltd., Canada. Intended use of article: The article is intended to be used to study chemical processes crucial to the development of an economical atomic iodine laser. The atomic iodine laser utilizes expensive starting chemicals which are destroyed during operation of the laser. Experiments will be conducted which are aimed at finding techniques for regenerating starting chemicals from iodine laser byproducts.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides at least 10 joules per pulse output. The National Bureau of Standards advises in its memorandum dated January 10, 1978, that: (1) The specification of the article described above is pertinent to the applicant's intended purposes, and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

ST. JUDE'S CHILDREN'S RESEARCH HOSPITAL

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public

review between 8:30 a.m. and 5 p.m. in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00036. Applicant: St. Jude's Children's Research Hospital, 332 North Lauderdale, Memphis, Tenn. 38101. Article: LKB 8800A Ultratome III Ultramicrotome complete. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological materials from humans, animals, fungi, bacteria, and viruses by investigators with widely divergent research interest from several different clinical and basic research laboratories in the hospital. Ultrastructural studies will be conducted in a wide variety of areas including:

Pathologic human tissues; normal and pathologic blood cells; normal and pathologic animal tissue; cyto- and histochemical location of enzymes and subcellular organelles localization in cells; subcellular changes in cells induced by changes in their biochemical environment; and membrane interaction with microfilaments, microtubules and virus particles.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has a cutting speed range of 0.1 to 50 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by the Department of Health, Education, and Welfare in its memorandum dated January 5, 1978, that (1) cutting speeds in the excess of 4 mm/sec. are pertinent to the applicant's research studies and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Consolidated Decision on Applications for Duty-Free Entry of Accessories for Foreign Instruments

The following is a consolidated decision on applications for duty-free entry of accessories for foreign instruments pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 77-00317. Applicant: University of California, Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, N. Mex., 87545. Article: (6) each; Kits, Preamplifier, CO₂ Laser, consisting of Main Discharge Electrodes and Accessories. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used to amplify the short-pulses produced in the oscillator-switch out section to an energy level capable of efficiently extracting the stored energy in the large power amplifier modules of the eight-beam system. This eight-beam system will play an important role in determining the feasibility of producing useful fusion energy from pulsed, high power CO₂ laser systems. Application received by Commissioner of Customs: July 26, 1977. Advice submitted by the National Bureau of Standards on: January 11, 1978.

Docket No. 78-00031. Applicant: Washington University School of Medicine, 660 South Euclid Avenue, St. Louis, Mo. 63110. Article: ultrahigh Resolution Scanning System, ASID-4 with accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is an accessory to an existing electron microscope that will be used for continuation of investigations of the mechanism of action of insulin in adipocytes from its initial binding to the hormone receptor on the plasma membrane through and including its alteration of lipolysis, protein synthesis, calcium binding and

distribution, plasma membrane ATPase activity and membrane phosphorylation. Application received by Commissioner of Customs: October 28, 1977. Advice submitted by the Department of Health, Education, and Welfare on: January 5, 1978.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, is being manufactured in the United States.

Reasons: The applications relate to compatible accessories for instruments that have been previously imported for the use of the applicant institutions. The articles are being manufactured by the manufacturers which produced the instruments with which they are intended to be used. We are advised by the National Bureau of Standards and the Department of Health, Education, and Welfare in the respectively cited memoranda that the accessories are pertinent to the applicant's intended uses and that it knows of no comparable domestic articles.

The Department of Commerce knows of no similar accessories manufactured in the United States which are interchangeable with or can be readily adapted to the instruments with which the foreign articles are intended to be used.

UNIVERSITY OF MINNESOTA, ET AL.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before March 6, 1978.

Regulations (16 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00107. Applicant: University of Minnesota, Department of Otolaryngology, 2630 University Avenue SE., Minneapolis, Minn. 55414. Article: Electron Microscope, Model JEM-100S and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the ultrastructural study of the mammalian cochlea. Experiments to be conducted will involve characterization of ultrastructural changes in the cochlea following intense sound and ototoxic drugs. In addition, the article will be used for resident training in ultrastructural technique. Application received by Commissioner of Customs: January 26, 1978.

Docket No. 78-00108. Applicant: LDS Hospital (Intermountain Health Care Inc.), 325 8th Ave., Salt Lake City, Utah 84143. Article: Electron Microscope, Model JEM-100S with sheet film camera and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to examine various types of biological specimens principally, pathological tissues obtained from patients from biopsy or autopsy. Experiments to be conducted will include the following:

(1) Establishment of diagnosis in human diseases where light microscopy is inadequate, such as poorly differentiated tumors and renal diseases.

(2) Focus on the ultrastructural alterations occurring in the lungs of experimental animals and man with acute respiratory distress syndrome.

(3) Studies of the alterations of macrophage cell surface occurring during macrophage activation and participation in tumor killing.

The article may also be used as an educational tool for pathology residents and research fellows. Application received by Commissioner of Customs: January 26, 1978.

Docket No. 78-00111. Applicant: University of California-Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, N. Mex. 87545. Article: Superconducting magnet, Polarized Target Cryostat and Accessories. Manufacturer: Cen Saclay, France. Intended use of article: The article will be used for a series of important and fundamental scattering experiments at the LAMPF medium-energy accelerator. In one experiment, a longitudinally polarized proton beam will be scattered from the longitudinally polarized protons from the target. In the second experiment, the polarization effect will be determined for the neutron-proton total sections at 25 MeV. Application

received by Commissioner of Customs: January 26, 1978.

Docket No. 78-00115. Applicant: Northeastern Ohio Universities College of Medicine, 4209 State Route 44, Rootstown, Ohio 44272. Article: NMR Spectrometer, Model WP-80 and Accessories. Manufacturer: Bruker, West Germany. Intended use of article: The article is intended to be used for studies of: (a) the molecular interactions between phospholipid bilayer membranes and proteins, (b) the effect of heat on phospholipid bilayer membranes, and (c) the interaction of bile acids, drugs, anesthetics, and carcinogens with phospholipid bilayer membranes. The interactions of model phospholipid membranes with added protein, drug, etc., will be determined by measuring the changes in molecular ordering of the fatty acid chains and the polar head groups, that occurs on incorporation of proteins into, or addition of drug, anesthetic, etc., to the membrane. The extent of molecular ordering of the fatty acid chains of polar head groups in an aqueous multibilayer dispersion of phospholipids is determined by measuring the C-H quadrupole splitting multibilayer dispersions prepared from selectively ²H-labelled phospholipids. The changes in the quadrupole splittings on interactions with proteins, drugs, carcinogens, etc., will be measured for a variety of positions in the phospholipid in order to give a complete description of the order profile for the molecule. Application received by Commissioner of Customs: January 27, 1978.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before March 6, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th Street and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00100. Applicant: University of Michigan, Room 3014, Administration Building, Ann Arbor, Mich. 48109. Article: Electron Microscope, Model EM-400 HMG and Accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used to study cells for research in modern cell biology, e.g., stages in the development of breast cancer, localization of hormone receptors in cells of the seminiferous tubules in the testis, localization of enzymes by cytochemistry at the electron microscope level in cells of the guinea pig corpus luteum, cytochemical localization of enzymes involved in ion transport in various transport epithelia, and fine structure of epidermal tissue cultures. In addition, the article will be used by graduate students as part of their training to become scientists. Application received by Commissioner of Customs: January 23, 1978.

Docket No. 78-00101. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., 2010 North Forbes Boulevard, Suite 100, Tucson, Ariz. 85705. Article: Repair of Klystron, Model VRB2113A30 and SN0139A7. Manufacturer: Varian Associates of Canada, Ltd., Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver. Application received by Commissioner of Customs: January 23, 1978.

Docket No. 78-00102. Applicant: University of Illinois at Chicago Circle, P.O. Box 4348, Chicago, Ill. 60607. Article: 80 MHz, Model WP-80 DS Spectrometer. Manufacturer: Bruker Scientific, West Germany. Intended use of article: The article is intended to be used for studies of nuclear magnetic phenomena in gases, liquids, solids, solutions, and biological systems. Variable temperature fourier-transform spectroscopy experiments will be conducted to: (a) probe intra- and intermolecular interactions, (b) determine the solution structure of the active site of an enzyme, (c) study the conformation of enzyme-inhibitor and enzyme-substrate complexes, (d) identify components of photolysis mixtures, and (e) determine the structure of newly synthesized organic compounds. The article will also be used by graduate students working under the direction of faculty using nmr

spectroscopy as a research tool. Application received by Commissioner of Customs: January 23, 1978.

Docket No. 78-00103. Applicant: University of Florida, Department of Chemistry, 109 Leigh Hall, Gainesville, Fla. 32611. Article: JNM/FX-100 High Resolution Fourier Transform Multi-Nuclear Magnetic Resonance System, with accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the following research involving standard photon and carbon spectra for structure determination:

(1) Investigation of whether certain carbonium ions are static bridged species or occur as an equilibrating mixture of two or more forms.

(2) Investigation of the kinetics of the isoidene photoisomerization and thermal reversion.

(3) Relaxation time measurements, particularly $T_{1\rho}$, to distinguish these mechanisms and to measure the mobility of the reporter molecules. $T_1/T_{1\rho}$ studies to investigate molecular motions over a longer time scale than those affecting T_1 . Similarly the binding of anthracycline antitumor drugs to DNA is under investigation; kinetic studies of drug/DNA complexing and dissociation will be facilitated by the auto-stacking capability of the article.

(4) Determination of the stereochemistry of polymer end groups and interconversion rates of carbanion rotamers will be investigated using the auto-stacking and $T_{1\rho}$ features.

(5) $T_{1\rho}$ measurements to determine the locations of the metal atom in the exchanging species and the effects of UV irradiation in situ on various metal complexes will be tested.

(6) The study of osmotic membranes using relaxation time measurements to follow the behavior of water molecules at the membrane.

(7) The study of the kinetics of the sulfite ion cleavage of thiamine in the presence of other nucleophiles using the auto-stacking feature and to search for a sulfite ion adduct by proton and carbon $T_{1\rho}$ measurements at the ring sites.

(8) Synthesis of polymers by use of novel organic reactions, a study of the mechanisms of the polymerization reactions, and determination of the fundamental physical properties of the polymers.

(9) Research devoted to the synthesis and synthetic use of novel heterocyclic systems.

(10) The study of reversible and irreversible rearrangement processes in organometallic π -complexes at low concentrations.

(11) Use of relaxation times of proton and carbon resonance as a probe of the transport of paramagnetic and quadrupolar ions.

(12) Relaxation time measurements on substances related to cell wall materials.

Application received by Commissioner of Customs: January 23, 1978.

Docket No. 78-00104. Applicant: Valley Medical Center of Fresno, 445 South Cedar Avenue, Fresno, Calif. 93702. Article: LKB 2128-010 Ultratome IV Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological materials, primar-

ily human tissues obtained at surgery or by autopsy. The tissues will be embedded in hardened epoxy resins for sections for ultrastructural examination correlated with histochemical and immunologic and regular light microscopic observations. The primary objective of the investigations will be the diagnosis and study of the pathogenesis of various disease processes. In addition, the article will be used in the training of physicians and histotechnologists in use and application of electron microscopy. Application received by Commissioner of Customs: January 23, 1978.

Docket No. 78-00105. Applicant: University of Miami, Rosenstiel School of Marine and Atm Science, 4600 Rickenbacker Cswy, Miami, Fla. 33149. Article: Flow Vibrating Densimeter, Model 01D. Manufacturer: Sodev, Inc., Canada. Intended use of article: The article will be used to measure the density of as little as 2 cm³ of a solution (relative to pure water or standard seawater) to a precision of ± 1 ppm and an accuracy of at least 10 ppm. Also, the article will be used to give densities on natural water that can be used to check the reliability of the equation ± 3 ppm and examine the excess densities in deep ocean water of ~ 20 ppm due to the increase of dissolved nutrients. In addition, the article will be used as a salinometer, which is a device that measures a physical property of seawater (or any electrolyte solution) that is directly related to concentration. Application received by Commissioner of Customs: January 24, 1978.

Docket No. 78-00106. Applicant: Frederick Cancer Research Center, P.O. Box B, Frederick, Md. 21701. Article: LKB 2127-001 Tachophor with power supply, and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the study of proteins, peptides and their associated precursors, and metabolites. These studies are to include the separation of: Synthetic peptide preparations, plasma proteins, urinary proteins, and products of in vitro synthesis. Application received by Commissioner of Customs: January 25, 1978.

Docket No. 78-00109. Applicant: University of California, 1156 High Street, Santa Cruz, Calif. 95064. Article: JNM/FX-100R Nuclear Magnetic Resonance Spectrometer and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for a large variety of research studies of molecular structure, molecular association, and molecular dynamics for biochemical, organic chemical, biological, and marine studies problems. These research applications will consist of the following:

1. The Structure and Dynamics of Lipids in Biological Membranes.

2. NMR Characterization of Enzyme-Substrate Intermediate Trapped at Subzero Temperatures.
3. Mechanisms of RNA Protein Interactions.
4. Natural Products Chemistry of Marine Organisms.
5. New Synthetic Methods and Their Use in Natural Product Total Synthesis.

The article will also be used for educational purposes in the following chemistry courses:

- Chemistry 135. Biophysical Chemistry.
Chemistry 140. Advanced Organic Laboratory.
Chemistry 164. Physical Chemistry Laboratory.
Chemistry 180A-B-C. Senior Research.
Chemistry 199. Tutorial.
Chemistry 243. Physical Properties and Molecular Structure.
Chemistry 299. Thesis research.

Application received by Commissioner of Customs: January 26, 1978.

Docket No. 78-00112. Applicant: U.S. Geological Survey Water Resources Division, National Center, Mail Stop 430, 12201 Sunrise Valley Drive, Reston, Va. 22092. Article: Water Level Gauge, Model 750 and Accessories. Manufacturer: Applied Microsystems, Canada. Intended use of article: The article is intended to be used to measure and record in situ, precisely timed long-term sequences of water-level elevations in the shallow waters of lakes, waterways, estuaries, and coastal embayments. The data are to be used, in connection with other data collected from surface vessels and from the ERTS satellites. These data will provide the input values used to initialize, calibrate, and otherwise verify large-scale, mathematical/numerical computer models. The field data together with the data produced by the computer simulation model are to be used to quantitatively and qualitatively assess the environment impact of existing features, as well as, alternative proposed changes to be introduced into the waterbody under study. Application received by Commissioner of Customs: January 26, 1978.

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:30 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No.: 77-00323. Applicant: University of Southern California, University Park, Los Angeles, Calif. 90007. Article: CO/CO₂ laser, type PL3 and components. Manufacturer: Edinburgh Instruments, United Kingdom. Intended use of article: The article is intended to be used for studies of vibrational circular dichroism in the infrared spectral region of chiral organic molecules with the aim of understanding of molecular structure.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides continuous wave operation in either carbon monoxide or carbon dioxide wave lengths. The National Bureau of Standards (NBS) advises in its memorandum dated January 10, 1978 that (1) the capability of the article described above is pertinent to the applicant's intended purposes and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or appa-

ratus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No.: 77-00195. Applicant: Yale University, Purchasing Dept., 20 Ashmun Street, New Haven, Conn. 06520. Article: Micro bomb combustion calorimeter and accessories. Manufacturer: Swedish Enthalpy, Sweden. Intended use of article: the article is intended to be used for combustion calorimetry studies to determine the thermal energy content.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides the capability of using very small samples (10 milligram (mg)) for high accuracy determinations (standard deviation on five 10 mg benzoic acid samples is less than 0.02 percent). The National Bureau of Standards advises in its memorandum dated January 19, 1978 that (1) the capability of the article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes

as this article is intended to be used, which is being manufactured in the United States.

PACIFIC FISHERY MANAGEMENT COUNCIL'S GROUNDFISH ADVISORY SUBPANEL

Public Meeting

Notice is hereby given of a meeting of the Pacific Fishery Management Council's Groundfish Advisory Subpanel, established under section 302(g) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The Groundfish Advisory Subpanel meeting will be Thursday and Friday, March 2-3, 1978, at the Oregon Department of Fish and Wildlife Headquarters office located at 6th and Mill Street, Portland, Ore. The meeting will convene at 1 p.m. and adjourn at about 5 p.m. on March 2, and will reconvene at 8 a.m. and adjourn about 5 p.m. on March 3.

Proposed Agenda. Discussion of Groundfish Management Plan.

The Groundfish Advisory Subpanel meeting will be open to the public. For more information contact: Mr. Lorry M. Nakatsu, Executive Director, Pacific Fishery Management Council, 526 Southwest Mill Street, Second Floor, Portland, Ore. 97201, telephone 503-221-6352.

Dated: February 6, 1978.

WINFRED H. MEIBOHM,
Associate Director, National
Marine Fisheries Service.

PRE-ACT ENDANGERED SPECIES PRODUCTS

Issuance of Certificate of Exemption

On December 12, 1977, notice was published in the FEDERAL REGISTER (42 FR 62416) that an application has been filed with the National Marine Fisheries Service by Kjeld N. Jensen of Mattapoisett, Mass., for a Certificate of Exemption to engage in certain commercial activities with respect to his declared inventory of pre-Act endangered species products. Notice is hereby given that on January 23, 1978, as authorized by the provisions of the Endangered Species Act of 1973, as amended (Pub. L. 94-359), and the reg-

ulations issued thereunder (50 CFR Part 222, Subpart B), the National Marine Fisheries Service issued a Certificate of Exemption to Kjeld N. Jensen, 23 Water Street, Mattapoisett, Mass. 02739.

The Certificate of Exemption is available for review during normal business hours in the office of the Enforcement Division, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20235.

Dated: February 4, 1978.

ROLAND FINCH,
Acting Assistant Director
for Fisheries Management.

PRE-ACT ENDANGERED SPECIES PRODUCTS

Issuance of Certificate of Exemption

On December 19, 1977, notice was published in the FEDERAL REGISTER (42 FR 63656) that an application has been filed with the National Marine Fisheries Service by Francis L. Vincent of Westwood, Mass., for a Certificate of Exemption to engage in certain commercial activities with respect to his declared inventory of pre-Act endangered species products. Notice is hereby given that on January 20, 1978, as authorized by the provisions of the Endangered Species Act of 1973, as amended (Pub. L. 94-359), and the regulations issued thereunder (50 CFR Part 222, Subpart B), the National Marine Fisheries Service issued a Certificate of Exemption to Francis L. Vincent d.b.a. Vincent Associates, P.O. Box 294, 727, High Street, Westwood, Mass. 02090.

The Certificate of Exemption is available for review during normal business hours in the office of the Enforcement Division, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

Dated: February 4, 1978.

ROLAND FINCH,
Acting Assistant Director
for Fisheries Management.

Office of the Secretary

[Dept. Organization Order 45-1; Amdt. 1]

ECONOMIC DEVELOPMENT ADMINISTRATION

Statement of Functions, Organization and Delegation of Authority

This order effective January 5, 1978 amends the material appearing at 43 FR 3604 of January 26, 1978.

Department Organization Order 45-1, dated October 1, 1977, is hereby amended as shown below. The purpose

of this amendment is to transfer the Executive Secretariat from the Office of Administration and Program Analysis to the Office of the Assistant Secretary for Economic Development (Sections 3. and 6.).

1. In Section 3.—"Office of the Assistant Secretary for Economic Development": a. A new paragraph .03 is added to read as follows:

.03 The Executive Secretariat reports to the Assistant Secretary and shall receive all correspondence addressed to the Office of the Assistant Secretary, and assign it to the appropriate office for action; record controlled and non-controlled correspondence, maintain prompt follow-up of replies to insure that deadlines are met, maintain correspondence and policy files; and provide a selective reference service to files as requested by EDA officials.

b. Renumber paragraphs .03, .04 and .05 as paragraphs .04, .05 and .06, respectively.

2. In Section 6—"Office of Administration and Program Analysis," in pen and ink, delete paragraph .07, "Executive Secretariat" from this section.

3. In pen and ink, delete "Executive Secretariat" from the organization chart (listed under the Office of Administration and Program Analysis).

GUY W. CHAMBERLIN, Jr.,
Acting Assistant Secretary
for Administration.

[3510-17]

[Dept. Organization Order 25-5A; Amdt. 1]

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Statement of Functions, Organization, and Delegation of Authority

This order effective January 1, 1978 amends the material appearing at 42 FR 35672 of July 11, 1977.

Department Organization Order 25-5A, dated June 3, 1977, is hereby amended as shown below. The purpose of this amendment is to bring the delegation of authority under the Fisheries Conservation and Management Act of 1976 into conformance with the new NOAA organization structure.

1. In Section 3—"Delegation of authority," subparagraph .01dd.3. is amended by changing the words "Associate Administrator" to "Assistant Administrator".

GUY W. CHAMBERLIN, Jr.,
Acting Assistant Secretary
for Administration.

[3510-17]

(Dept. Organization Order 25-5A; Amdt. 2)

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION**Statement of Functions, Organization and Delegation of Authority**

This order effective January 13, 1978 amends the material appearing at 42 FR 35672 of July 11, 1977.

Department Organization Order 25-5A of June 3, 1977, is hereby further amended as shown below. The purpose of this amendment is to: (1) delete the requirement for the Administrator, NOAA to advise the Secretary before any final action is taken on the issuance of preliminary fishery management plans (subparagraph 3.01dd.2.(f)), and the approval, disapproval, partial disapproval, or issuance of a fishery management plan or amendment thereto (subparagraph 3.01dd.2.(g)), (2) change the legal citation under which weather services are provided (subparagraph 3.01a.), and (3) add two new subparagraphs covering the performance of functions under the Central, Western, and Southern Pacific Development Act (3.01ff.) and the Whale Conservation and Protection Study Act (3.01gg.).

1. In Section 3. "delegation of authority": (a) In pen and ink delete subparagraphs 3.01dd.2.(f) and 3.01dd.2.(g) of this section, (b) subparagraph 3.01a. is revised to read as follows:

"a. The functions in Title 15, Chapter 9, and in Title 49, sections 1351 and 1463, of the U.S. Code, which relate to the provision of weather services."

(c) The following subparagraphs 3.01ff. and 3.01gg. are added to read as follows:

"ff. The functions prescribed by the Central, Western, and Southern Pacific Fisheries Development Act (16 U.S.C. 758e through 758e-5).

"gg. The functions prescribed by the Whale Conservation and Protection Study Act (16 U.S.C. 917 through 917d)."

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary
for Administration.

(FR Doc. 78-3909 Filed 2-10-78; 8:45 am)

[3510-17]

(Dept. Organization Order 25-5B)

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION**Statement of Functions, Organization and Delegation of Authority**

This order effective January 1, 1978, supersedes the material appearing at 41 FR 795 of January 5, 1976, 41 FR 36061 of August 26, 1976, 41 FR 43753 of October 4, 1976, 41 FR 50318 of November 15, 1976, 42 FR 11862 of

March 1, 1977, and 42 FR 40962 of August 12, 1977.

SECTION 1. *Purpose.* .01 This order prescribes the internal organization, management structure, and assignment of functions within the National Oceanic and Atmospheric Administration (NOAA). The scope of authority and functions of NOAA are set forth in Department Organization Order 25-5A.

.02 The purpose of this revision is to restructure the NOAA organization. Major changes include eliminating positions for the Associate Administrators for Marine Resources and for Environmental Monitoring and Prediction; establishing the position of Assistant Administrator for Policy and Planning; establishing the Office of Ocean Management; establishing positions for three new line managers—the Assistant Administrators for Fisheries, for Research and Development, and for Oceanic and Atmospheric Services; placing the programs of the National Marine Fisheries Service under the Assistant Administrator for Fisheries; consolidating the programs of the Environmental Research Laboratories, the Office of Sea Grant and the Office of Ocean Engineering under the Assistant Administrator for Research and Development; and consolidating the programs of the National Weather Service, the National Environmental Satellite Service, the National Ocean Survey and the Environmental Data Service under the Assistant Administrator for Oceanic and Atmospheric Services.

SEC. 2. *Organization structure.* The organization structure of NOAA shall be as depicted in the attached organization chart (Exhibit 1). A copy of the organization chart is on file with the original of this document on file with the Office of the Federal Register.

SEC. 3. *Office of the Administrator.* .01 The Administrator of NOAA formulates policies and programs for achieving the objectives of NOAA and directs the execution of these programs.

.02 The Deputy Administrator assists the Administrator in formulating policies and programs and in managing NOAA.

.03 The Associate Administrator assists the Administrator and the Deputy Administrator in formulating policies and programs and in managing NOAA.

SEC. 4. *Special Staff Offices.* .01 The Office of Congressional Liaison shall coordinate contacts with the Congress, except for contacts with the Congressional Appropriations Committees on matters relating to appropriation requests and related budget matters. The activities of this Office shall be carried out in coordination with and in recognition of the responsibilities of the Departmental Office of Congressional Affairs, and of the NOAA General Counsel with respect to legislation.

.02 The Office of Public Affairs shall recommend objectives and policies relating to public affairs; plan and conduct an information and education program to insure that the public, Congress, user groups, and employees are properly informed on NOAA's activities; and provide direction to all public affairs activities within NOAA. These activities shall be carried out in collaboration with the Departmental Office of Communication.

.03 The Office of Naval Deputy shall insure coordination and joint planning with the Navy on programs of mutual organizational interest.

.04 The Office of NOAA Corps shall develop plans for the efficient utilization of the NOAA commissioned officers corps; develop and implement policies and procedures for the recruitment, commissioning, training, and assignment of commissioned officers; and represent NOAA in interdepartmental activities having to do with the uniformed services.

SEC. 5. *Office of General Counsel.* The Office of General Counsel shall provide legal services for all components of NOAA and shall be responsible for the preparation or review of all legislative proposals emanating from any component of NOAA, for the expression of NOAA's views as to the merits of proposed or pending legislation, and for statements concerning pending legislation to be made before committees of Congress. These activities shall be carried out subject to the overall authority of the Department's General Counsel as provided in Department Organization Order 10-6. Legislative activities shall be carried out in cooperation with the NOAA Office of Congressional Liaison.

SEC. 6. *Office of Policy and Planning.* The Office of Policy and Planning, directed by the Assistant Administrator for Policy and Planning, shall provide staff advice on NOAA's objectives on program planning and on the development of policies of NOAA. The Office shall develop and recommend long-range policies and plans, including new program initiatives and modifications of policies and plans; conduct economic studies and operational analysis activities in support of the policy and planning functions; identify and make recommendations concerning major national and international issues and problems affecting NOAA's programs, and conduct or direct and coordinate studies and analyses to provide solutions thereto; and serve as the special problem solving and conceptual office on policy development matters of a direct concern to the Administrator. In addition, the Office shall develop policy and provide management and coordination for NOAA's marine min-

erals programs; and act as NOAA's focal point in developing and coordinating these programs in relation to programs and requirements of other agencies, industry and other elements of the private sector.

SEC. 7. *Office of Ocean Management.* The Office of Ocean Management shall evaluate the impact of alternative uses for intensely used ocean and adjacent areas, and develop and recommend overall proposals that will result in optimum benefit for society. The Office shall direct and coordinate the assessment of the potential impacts of proposed human activities such as deepwater ports, offshore oil and gas development, power generation, ocean dumping, and recreation; administer the marine sanctuaries program; and make use, on a selective basis in coordination with the responsible offices, of other available mechanisms for expressing NOAA's views on proposals for the use of ocean and adjacent areas.

SEC. 8. *Office of Program Evaluation and Budget.* The Office of Program Evaluation and Budget shall provide the Administrator with means of management control over program and budget operations and program evaluations, and shall coordinate Management by Objective activities. This Office shall be the focal point for contacts with the Department and the Office of Management and Budget in these areas. The Office shall specifically be responsible for the planning and management of the annual NOAA program review; the consolidation and integration of program guidance developed by the Office Directors; the coordination and development of issue studies, Zero Based Budget material, and other supporting documentation required in the program-budget cycle; the development of the NOAA budget; the allocation and budgetary control of funds; the review and monitoring of fiscal plan execution; the design and implementation of program impact and efficiency evaluations; and the coordination of Departmental and OMB requirements and reporting activities necessary to the operation of the Office. All contacts with the Congress on matters relating to appropriation requests and related budget matters shall be handled through the Departmental Office of Budget and Program Evaluation.

SEC. 9. *Office of Fisheries.* The Office of Fisheries, directed by the Assistant Administrator for Fisheries who shall serve as the Director of the National Marine Fisheries Service, shall conduct an integrated program of management, research, and services related to the protection and rational use of living marine resources for their aesthetic, economic, and recreational value by the American people. The Office shall administer programs to

determine the consequences of the naturally varying environment and human activities on living marine resources; to provide knowledge and services to foster their efficient and judicious use; and to achieve domestic and international management, use and protection of living marine resources. In the conduct of the above, the Office shall:

Establish national criteria and operational guidelines for fisheries management responsibilities, including those associated with the State-Federal Fisheries Management Program; subject to the limitations in DDO 25-5A, approve and issue fishery management plans and regulations; issue fishing permits to both foreign and domestic applicants; and provide interagency coordination of and manage NOAA's nationwide enforcement activities as related to fisheries regulations.

Administer the Marine Mammal and Endangered Species Programs; provide for the administration of the Pribilof Islands; assist the native inhabitants of those islands; and manage the fur seal herds of the North Pacific Ocean.

Administer programs to assist the fishing industry, improve the quality and safety of fish and seafoods, and enhance the production, marketing, and consumer awareness and acceptability of fishery products. These programs shall include: (1) financial assistance in the form of loans, loan guarantees, loan insurance, and a capital construction fund; (2) research on utilization technology as it affects the harvesting, processing, and marketing of fishery products and their use as human food; (3) consumer education and marketing to facilitate fishery development and stability in the marketing chain; (4) a national market news system and preparation of market research reports; (5) integrated regional fisheries development programs, including aquaculture, designed to increase the market share of domestically produced seafoods; (6) information on foreign trade and other matters which may affect the commercial fishing industry; and (7) a voluntary inspection and grading program for improving quality and safety of seafoods.

Identify the needs for oceanic research or services which should be undertaken by the Offices of Research and Development or Oceanic and Atmospheric Services to meet the special needs of the fisheries industry.

Administer multidisciplinary biological and socio-economic research programs necessary to provide fisheries management information options to the appropriate Regional Fisheries Management Councils, to support national and regional programs of the Fisheries, and to respond to the needs of various user groups.

Develop and implement NOAA policy with respect to international fisheries; acquire data and provide analysis regarding the status and impact of present and projected foreign fishing efforts and foreign industry activities, and government attitudes and policies regarding fishing; participate in negotiations within international forums, commissions, and agreements, as required; manage NOAA's international fisheries training program; and monitor and coordinate activities with regard to the U.S. Fisheries Attache Program.

Provide funding and such other administrative and technical support services as may be required to the Regional Fisheries Management Councils.

SEC. 10. *Office of Coastal Zone Management.* The Office of Coastal Zone Management, directed by the Associate Administrator for Coastal Zone Management, shall administer NOAA's Coastal Zone Management, Coastal Energy Impact, Estuarine Sanctuaries, Shorefront Access, and Coastal Zone Research and Technical Assistance Programs. For this purpose, the Office shall:

Develop policies and guidelines on a continuing basis to assist State and local governments in the effective management and, where possible, restoration and enhancement of the land and water resources of the coastal zone of the Nation.

Develop policies and guidelines on a continuing basis to assist State and local governments in planning for the consequences of and impacts on the Nation's coastal zones due to accelerated energy development activity.

Develop policies and guidelines and administer the Estuarine Sanctuaries and Shorefront Access programs.

Administer and monitor grants to states in support of the development and administration of coastal zone management programs.

Administer and monitor a energy impact financial assistance program consisting of loans, bond guarantees, planning grants, environmental grants and formula grants, each subject to specified conditions, for the purpose of meeting needs of States and local governments resulting from new or expanded energy activity in or affecting the coastal zone.

Develop NOAA policy, promulgate regulations, and implement procedures necessary for Federal review and approval of State coastal zone management programs and the execution of Federal consistency provisions which then come into force.

Serve as focal point for Federal interagency coordination and Federal-State consultation efforts on matters relating to coastal zone management programs under the Coastal Zone Management Act of 1972, as amended.

Serve as the Federal Government focal point regarding the consistency of Federal programs affecting the Nation's coastal zones with the policies contained in the Coastal Zone Management Act of 1972, as amended, and state programs approved thereunder.

SEC. 11. *Office of Administration.* The Office of Administration, directed by the Assistant Administrator for Administration, shall provide administrative management and support services for all components of NOAA except for elements of such services that appropriate components are directed to provide for themselves, exercise functional supervision over such decentralized services, and provide advice and guidance to the Administrator on the utilization of NOAA resources. To carry out these responsibilities, the Office shall:

Administer programs in procurement and grants management; property and supply management; paper work management; records and files management; space and facilities management; travel and traffic management; mail, messenger, and related office

services; graphic services; safety; security; and processing of claims.

Conduct studies and provide analytical assistance to develop or improve the organization and staffing structure and other management systems within NOAA; provide management staff services in the application of advanced management principles and techniques; carry out the NOAA committee, reports, and directives management functions; develop and maintain a central system for collecting, analyzing, presenting, and disseminating information on program status and performance; provide guidance and develop systems for measuring productivity and performance; exercise overall management, planning, and coordination of NOAA's automatic data processing and telecommunications needs and facilities including serving as the focal point within NOAA for intra- and inter-agency matters, and the review and evaluation of proposals for automatic data processing and telecommunications requirements and systems; coordinate the Federal planning program for environmental telecommunications systems; and engage in research into advanced system concepts and apply or provide guidance in the application of these concepts. The Office shall provide systems analysis and programming support to NOAA's executive and administrative management functions and to other NOAA functions as requested, and shall operate and provide automatic data processing facilities and systems and special software support for all NOAA components except where separate facilities are approved.

Administer a program of personnel management services including conducting recruitment, employment, classification and compensation, employee relations and assistance, labor relations, incentive awards, and career development activities for civilian personnel. This shall also include equal employment opportunity programs and affirmative action plans, upward mobility, and special programs for women, minorities, veterans, the handicapped, and cooperative students.

Provide centralized financial accounting and payroll for all components of NOAA, determine needs of managers for accounting data, and maintain a financial reporting system that will facilitate effective management of NOAA's financial resources.

As a Departmentwide responsibility, coordinate the requirements and the management and use of radio frequencies by all organizations of the Department of Commerce.

Provide administrative services responsive to the requirements of the National Marine Fisheries Service Northwest, Southwest, and Alaska Regions, the National Marine Fisheries Service Southwest Fisheries Center and Northwest and Alaska Fisheries Center, the National Ocean Survey Pacific Marine Center, and such other NOAA organizational units which can be accommodated. These services shall include personnel administration, finance, procurement and contracting, property management, motor vehicle pool operation, and office services.

Sec. 12. Office of Research and Development. The Office of Research and Development, directed by the Assistant Administrator for Research and Development, shall administer an integrated program of research, technology, and advanced engineering development, and transfer relating to

the oceans, the Great Lakes, the United States' coastal waters, the lower and upper atmosphere and the space environment so as to increase understanding of the environment and human impact thereon, and thus provide the scientific basis for improved services. The Assistant Administrator for Research and Development shall serve as the principal advisor to the Administrator on all research, technology, and engineering matters. To carry out these responsibilities, the Office shall:

Provide advice to the Administrator on NOAA's total research and technology development effort; and advise the Offices of Fisheries, Coastal Zone Management, and Ocean and Atmospheric Services on the research and technology development undertaken within their organizations to meet their special needs.

Serve as NOAA's focal point for coordination with the Office of Science and Technology Policy; the Federal Coordinating Council for Science, Engineering, and Technology; National Science Foundation; National Academy of Sciences; National Academy of Engineering; universities and other interagency groups; and international scientific bodies on matters affecting research and technology programs.

Discharge those coordinating and management functions for research and technology development which are assigned to NOAA for the Global Atmospheric Research program, and others as may be assigned by the Administrator.

Provide focal point for NOAA's research activities in support of international environmental programs such as the United Nations Environment Program (UNEP), United Nations Intergovernmental Oceanographic Commission, bilateral agreements with other nations, and such others as the Administrator may assign.

Serve as the focal point for the development and coordination of a coherent national climate program; manage those special purpose NOAA programs which are specifically designed to meet the needs of the national climate program; coordinate those multi-purpose programs within NOAA and other U.S. organizations which make significant contributions to national climate program goals; and serve as the focal point for U.S. participation in the International World Climate Program.

Conduct research to describe, understand, and improve the prediction of oceanic processes and phenomena, ocean-atmosphere interactions, and the environmental processes of coastal areas.

Conduct research on the physics and chemistry of the atmosphere.

Conduct research on the dynamics and physics of geophysical fluid systems to describe, understand, and improve predictions of the state of atmosphere and oceans, and their processes.

Develop techniques and maintain facilities to support the conduct of research and monitoring activities.

Measure and monitor the atmospheric composition for use in predicting and in validating trends in atmospheric conditions.

Conduct research to describe, understand, and improve prediction of environmental processes in the Great Lakes and their watershed.

Conduct research in the field of solar-terrestrial physics; provide monitoring and

forecasting of the space environment; and improve techniques for forecasting of solar disturbances and their effects on the earth's environment.

Plan, conduct, and coordinate comprehensive programs of basic and applied research directed toward the solution of resource-use problems which involve the functioning, health and restoration of selected near-coastal marine ecosystems; and plan and direct assessments of the primary environmental effects of energy development along broad areas of the Outer Continental Shelf of the United States.

Develop policy and plans for NOAA's ocean engineering and instrumentation program and promote the development of technology to meet future needs of the marine community; conduct an integrated program of research, technology development, and services related to ocean engineering, instrumentation and measurement standards, ocean buoy systems, and undersea operations; manage the NOAA diver program; and serve as a national focal point for transfer of knowledge related to civilian ocean engineering, a catalyst for industrial ocean engineering development, and a mechanism for technology transfer from military and space fields.

Develop policy and plans for NOAA's association with the academic community and administer a program of grants and contracts for research, education, and advisory services aimed at the development, utilization, and management of the seas and the Great Lakes of the United States, including their resources.

Promote the transfer of research information and new technology to other components of NOAA and to other scientific organizations outside of NOAA.

Sec. 13. Office of Oceanic and Atmospheric Services. The Office of Oceanic and Atmospheric Services, directed by the Assistant Administrator for Oceanic and Atmospheric Services, shall administer programs to provide a wide variety of meteorologic, hydrologic, climatologic, map and chart, geodetic, and oceanographic data and services to government, industry, the scientific and engineering communities, and the general public. To carry out these programs, the Office shall:

Observe and report the meteorological, hydrological, and ocean conditions of the United States, its possessions, and adjacent waters; issue forecasts and warnings of weather and climate, flood, and ocean conditions that affect the Nation's safety, welfare, and economy; develop the National Meteorological, Hydrologic and Oceanic Service Systems; promote the development of community preparedness programs; provide forecasts for domestic and international aviation and for shipping on the high seas; and operate the International Tsunami Warning Service.

With appropriate support of other offices, act as the NOAA focal point for participation in international meteorological, hydrologic, oceanic, and climatological activities, including the international exchange of data, service, products, and forecasts, of the World Meteorological Organization, the International Civil Aviation Organization, and other bodies as may be designated by the Administrator.

Operate the National Environmental Satellite System; develop new and improved

satellite techniques; increase the utilization of satellite data in environmental services; and manage and coordinate all operational satellite programs within NOAA and certain research-oriented satellite activities with the National Aeronautics and Space Administration and the Department of Defense.

Provide charts for the safety of marine and air navigation, a basic network of geodetic control, and basic geodetic, gravimetric, bathymetric, hydrographic, circulatory current and tidal data for engineering, scientific, commercial, industrial, and defense needs.

Acquire and disseminate global environmental data (marine, atmospheric, solid earth, and solar-terrestrial) and information tailored to meet the needs of users in commerce, industry, agriculture, the scientific and engineering community, the general public, and Federal, State, and local governments; provide experiment design, data management, and analysis support to national and international environmental programs; assess the impact of environmental fluctuations on food and energy, environmental quality, and telecommunications; manage and/or provide functional guidance for NOAA's scientific and technical publication and library activities; operate a network of specialized service centers, a field liaison service, and a comprehensive data and information referral service; and operate related World Data Center A facilities and participate in other international data and information exchange programs.

Be responsible for and administer programs for NOAA support in time of civil emergencies, the conduct of post-disaster surveys designed to evaluate the effectiveness of NOAA's warning services, and the cooperation between NOAA and the Department of Defense in time of a declared national emergency.

Discharge the Federal Coordinating functions assigned to NOAA for meteorology, marine prediction services, geodetic surveys, operational satellite systems, and others that may be assigned by the Administrator.

In consultation with the Offices of Fisheries, Coastal Zone Management, and Research and Development, design and execute service programs intended to meet the needs of these other elements of NOAA and their constituencies.

In consultation with the Office of Research and Development, design and execute research and technology development programs; conduct systems, equipment, and techniques development programs; and carry out related activities designed to improve the efficiency of service programs and the responsiveness of these programs to user needs.

Determine and validate requirements for oceanic and atmospheric services; evaluate the efficiency and economy with which the Service programs meet these needs; and take such steps as are feasible to improve services to meet new or changing needs.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary
for Administration.

[3510-17]

[Dept. Organization Order 30-7B]

NATIONAL TECHNICAL INFORMATION SERVICES

Statement of Functions, Organization and Delegation of Authority

This order effective January 11, 1978 further amends the material appearing at 42 FR 44831 of September 7, 1977 and 42 FR 60946 of November 30, 1977.

Department Organization Order 30-7B, dated August 1, 1977, is hereby further amended as shown below. This amendment adds units under the Office of the Controller (section 8.).

1. In Section 8. "Office of the Controller," section 8. is revised to read as follows:

"Sec. 8. Office of the Controller. The Office shall be headed by a Controller who shall be responsible for providing technical direction, coordination, evaluation, and execution of financial management policies; performing cost studies as a basis for product pricing; formulating and executing and integrated budget, which includes revenues forecasts, expense and production budgets, cost standards, and programs for capital investment and financing; measuring performance against approved operating plans and standards; planning, developing, and implementing accounting procedures and systems; and measuring and reporting on the validity of the objectives of NTIS and on the effectiveness of its policies, organization structure and procedures in attaining these objectives. The functions of the Office shall be carried out through its principal organizational elements as prescribed below:

".01 The Systems Analysis Staff develops systems and procedures to meet the needs of management as well as requirements for outside reporting; reviews and evaluates the effectiveness of financial and administrative systems and recommends improvements, as deemed necessary; researches, evaluates and makes recommendations for increased effectiveness of NTIS policies, organization structure and internal operating procedures for accomplishing program objectives; and conducts research, analysis and user studies on NTIS product lines.

".02 The Accounting Division ensures appropriate accountability in accordance with the Budget and Accounting Procedures Act of 1950, as amended, which requires, in part, each agency to conform to the principles, standards and related requirements prescribed by the Comptroller General of the United States and the Department of Commerce (see 31 U.S.C. 65 et seq.); provides effective control over and accountability for all funds; property, and other assets for which NTIS

is responsible; provides reliable accounting results to serve as a basis for preparing and supporting budget requests; and assists in the development of financial arrangements for NTIS' numerous interagency agreements.

".03 The Budget Formulation Division develops procedures and schedules for timely preparation and review of all NTIS budgets, which includes revenue forecasts, expense and production budgets, cost standards, and programs for capital investment and financing; provides appropriate assistance to line managers in preparing budget estimates including, where appropriate, cost benefit analyses, trend data, unit cost information, and other analytical tools to promote the development of meaningful budgets; reviews and consolidates budgets, ensuring the availability of funds to cover planned expenditures and preparing presentations for formal approval by the NTIS executive body; documents budget justification for presentation to the Department of Commerce budget staff; develops program presentations to the Office of Management and Budget (OMB) and the Appropriations Subcommittee; assists in the development of financial arrangements for NTIS' numerous interagency agreements; and maintains and monitors NTIS staffing to provide maximum utilization for the authorized personnel ceiling and to ensure the end-of-year ceiling is not exceeded.

".04 The Reporting Control and Analysis Division measures and reports performance against approved operating plans and standards, and reports and interprets the results of operations to all levels of management; performs studies of product costs, analyses of profitability by product line, studies of volume and price changes and the effects of reduction in costs, analyses of profitability by different product managers, objective analyses in support of forecasts to aid in management decision making, and develops alternative pricing mechanisms to aid management in realizing full cost recovery in the sale of products; controls the execution of the budget, and provides financial and quantitative data for internal management and control; and assists in the development of financial arrangements for NTIS' numerous interagency agreements."

2. The organization chart attached to this amendment supersedes the chart dated August 1, 1977. A copy of the organization chart is on file with the original of this document with the Office of the Federal Register.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary
for Administration.

[3510-17]

(Dept. Organization Order 20-5)

OFFICE OF THE CONTROLLER

Statement of Functions, and Organization

This order effective December 28, 1977 supersedes the material appearing at 41 FR 36058 of August 26, 1976.

SECTION 1. Purpose. This order establishes, and prescribes the functions and organization of the Office of the Controller in order to provide Departmental leadership and coordination for financial management policy and systems improvement. It also reflects the transfer of the functions previously assigned to the Office of Financial Management Services, the Office of the Secretary Budget Staff, and the Administrative Systems Division of the Office of Organization and Management Systems to the new Office of the Controller.

Sec. 2. Status and line of authority. The Office of the Controller, a Departmental office, shall be headed by a Controller, who shall report and be responsible to the Assistant Secretary for Administration.

Sec. 3. Functions. .01 The Controller shall be the adviser to, and representative of, the Assistant Secretary for Administration for financial management and control matters; shall provide leadership and coordination in setting Departmental financial and grants management policy and in the resolution of financial management issues and problems of a Departmental nature; and shall serve as adviser to other Department officials with respect to these matters.

.02 The Controller shall serve as Chairman of the Financial Operations and Practices Committee and shall serve as adviser to the Assistant Secretary for Administration as member of the Financial Management Committee.

.03 Pursuant to the authority vested in the Assistant Secretary for Administration by Department Organization Order 10-5, and subject to such policies and directives as the Assistant Secretary may prescribe, the office shall:

a. Perform, on a Departmentwide basis, financial management and financial systems management service functions, as specified in Section 4. of this order; provide accounting and related financial services to the Office of the Secretary, and, as may be designated by the Assistant Secretary for Administration, to particular operating units; and provide budgetary services for the Office of the Secretary and for assigned operating units.

b. Exercise such authorities of the Assistant Secretary for Administration as are implicit in and essential to carry out the functions assigned by this order.

Sec. 4. Organization. Under the direction and supervision of the Controller, the functions of the Office shall be organized and carried out as provided below.

.01 The *Operations Analysis Staff* shall conduct analyses of financial management policies, practices, and information support mechanisms and shall manage task forces and special financial management studies; shall develop processes for utilizing budgetary and accounting output data to increase financial management effectiveness; shall serve as principal liaison with outside organizations on matters pertaining to financial management practices and the Controller's initiatives; and shall coordinate machine systems planning with the Office of ADP Management.

.02 The *Finance Operations Division* shall implement financial and accounting policies designated by the Controller with the advice of the Chief Accountant; provide accounting, payroll, and related services for the Office of the Secretary, Regional Action Planning Commissions, and assigned operating units; be responsible for the consolidated billings of the Department, for preparation of consolidated accounting statements required of the Department, and for the Office's staff responsibility for Departmentwide policies and procedures on official travel; and provide accounting guidance and control for the Working Capital Fund of the Office of the Secretary, which responsibility shall consist of proposing accounting policies on operating the Fund, prescribing rules and procedures on use of the Fund, giving accounting management instructions to heads of Departmental offices responsible for services being financed through the Fund, and taking other actions as may be required to maintain liquidity of the Fund.

.03 The *Accounting Standards Division*, under the Chief Accountant, shall formulate standards applicable to accounting matters, the coordination and integration of all administrative systems of a financial nature, including those operating in an automated environment and the development of unit costs for planning and controlling operations. The Division is also responsible for reviewing accounting systems design and financial systems implementation for approval; assisting in the improvement of accounting systems; coordinating accounting practices; and providing liaison with central agencies on accounting matters and on administrative systems matters. The Division is also responsible for coordination with central agencies on grants management matters and for coordination of the administration of grants.

.04 The *Budget Operations Division* shall be responsible for budget

administration for the Office of the Secretary, including budget formulation and preparation and monitoring of operating budgets; shall administer the Office of the Secretary Working Capital Fund and Office of the Secretary trust funds (consisting of contributions from non-public sources and payments from private sources, and the special foreign currency and U.S. expositions programs); and shall develop, negotiate, and execute reimbursable agreements with the Executive Office of the President, other Departments and agencies, and the Departmental offices and operating units of Commerce with regard to services to be performed by or for the Office of the Secretary. The Division shall also advise the Controller on cash flow matters and conduct cash flow analysis and forecast as requested by the Financial Operations and Practices Committee.

Savings provision. The Assistant Secretary for Administration shall determine the schedule and quantity for the transfer of funds, positions, and employees, as required by this order.

GUY W. CHAMBERLIN, Jr.,
Acting Assistant Secretary,
for Administration.

[3510-17]

(Dept. Organization Order 20-7; Amdt. 2)

OFFICE OF ORGANIZATION AND
MANAGEMENT SERVICES

Statement of Functions and Organization

This order effective January 19, 1978 further amends the material appearing at 41 FR 50321 of November 15, 1976 and 42 FR 11863 of March 1, 1977.

Department Organization Order 20-7, dated November 1, 1976, is hereby further amended as shown below. The purpose of this amendment is to reflect the transfer of the functions and organization of the Administrative Systems Division to the newly established Office of the Controller.

1. In section 3—"Functions," in pen and ink, delete the words "financial systems management" from subparagraph .01a.

2. In section 4—"Organization," in pen and ink, delete paragraph .02 and renumber paragraph .03 as .02.

GUY W. CHAMBERLIN,
Acting Assistant Secretary
for Administration.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

CASES FILED WITH THE OFFICE OF
ADMINISTRATIVE REVIEW

Week of January 20 through January 27, 1978

Notice is hereby given that during the week of January 20 through January 27, 1978, the appeals and applications for exception or other relief listed in the Appendix to this Notice

were filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR. Part 205 any person who will be aggrieved by the DOE action sought in this case may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the

date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Administrative Review, Economic Regulatory Administration, Department of Energy, Washington, D.C. 20461.

MELVIN GOLDSTEIN,
Director, Office of
Administrative Review.

FEBRUARY 7, 1978.

APPENDIX List of cases received by the Office of Administrative Review, Week of Jan. 20, 1978 through Jan. 27, 1978

Date	Name and location of applicant	Case No.	Type of submission
Jan. 20, 1978	Commonwealth Oil Refining Co., Washington, D.C. If granted Commonwealth Oil Refining Co. Inc. would be permitted to import crude oil and resins into Puerto Rico as refinery and petrochemical feedstock on a license fee exempt basis.	DRX-0004	Exception from base fee requirements (sec. 213.35).
Jan. 23, 1978	Public Service Company of New Hampshire, Concord, N.H. If granted: The DOE's Jan. 9, 1978 information request denial would be rescinded and Public Service Co. of New Hampshire would receive access to additional DOE data deleted from the remedial order issued to C. H. Sprague & Son.	DFA-0120	Appeal of DOE's information request denial dated Jan. 9, 1978.
Do	TOSCO Corp., Washington, D.C. If granted TOSCO Corp. would receive an extension of the relief granted in the FEA's Apr. 28, 1977 decision and proposed to be extended in the DOE's Dec. 20, 1977 proposed decision and order which would relieve the firm of a portion of its entitlement purchase obligations.	DXE-0494	Extension of the relief granted in TOSCO Corp., 5 FEA par. 83,146 (Apr. 28, 1977).
Do	United Petroleum, Inc., Tampa, Fla. If granted: The Jan. 10, 1978 remedial order issued by DOE Region IV would be rescinded and United Petroleum, Inc. would not be required to refund overcharges made on its sales of motor gasoline and diesel fuel.	DRA-0116	Appeal of the Jan. 10, 1978 remedial order issued by DOE Region IV. Stay request.
Jan. 24, 1978	Staro Bottled Gas Co., Tampa, Fla. If granted: The Jan. 10, 1978 remedial order issued by DOE Region IV would be rescinded and Hillsboro Bottled Gas Co. would not be required to refund overcharges made on its sales of propane.	DRA-0119	Appeal of the Jan. 10, 1978 remedial order issued by DOE Region IV.
Do	Mobile, Ala. If granted: The Dec. 2, 1977 remedial order issued by DOE Region IV would be rescinded and Jedco, Inc. would not be required to refund overcharges made on its sales of motor gasoline from 34 retail outlets.	DRA-0117	Appeal of the Dec. 2, 1977 remedial order issued by DOE Region IV. Stay request.
Do	West Virginia Gas, Pittsburgh, Pa. If granted: The FEA's Oct. 7, 1975 decision and order would be rescinded and Kentucky West Virginia Gas would be permitted to establish its selling prices for the crude oil which it produces from nine leases located in Letcher, Perry, and Pike Counties, Ky. without regard to the current cumulative deficiency which has accrued at these properties during work stoppages.	DMR-0014	Modification/Rescission of Kentucky-West Virginia Gas, 2 FEA par. 80,698 (Oct. 7, 1975).
Do	Martin Oil Co., Wichita, Kans. If granted: The January 5, 1978 Remedial Order issued by DOE Region V would be rescinded and Martin Oil Co. would not be required to refund overcharges made on its sales of crude oil produced from the Speier and Montford leases.	DRA-118	Appeal of the Jan. 5, 1978 remedial Order issued by DOE Region V.
Do	Young Refining Corp., Douglasville, Ga. If granted: Young Refining Corp. would receive an extension of the stay granted in DOE's Jan. 13, 1978 decision and order pending a final determination on the firm's statement of objections to the proposed decision issued to the firm on Dec. 20, 1977.	DEX-0029	Supplemental Order in Young Refining Corp., 1 DOE — (Jan. 13, 1978).
Jan. 25, 1978	Maguire Oil Co., Dallas, Tex. If granted: The stay of the refund provisions of a June 30, 1977 remedial order granted in the FEA's July 18, 1977 decision and order would be rescinded.	DRX-0030	Supplemental order in Maguire Oil Co., 6 FEA par. 85,013 (July 18, 1977).
Do	Heinhard Distributing Co., Inc., Kent, Wash. If granted: Heinhard Distributing Co., Inc. would receive an exception from 10 CFR 212.93 which would permit the firm to calculate its weighted average inventory cost of motor gasoline on May 15, 1973 on the basis of the price set forth in its contract with Atlantic Refining Co.	DEE-0493	Price exception (sec. 212.93).

APPENDIX.—List of cases received by the Office of Administrative Review, Week of Jan. 20, 1978 through Jan. 27, 1978—Continued

Date	Name and location of applicant	Case No.	Type of submission
Jan. 25, 1978	Sabre Refining, Inc. Bakersfield, Calif. If granted: Sabre Refining, Inc. would receive a stay of the provisions of 10 CFR 211.87 with respect to its entitlement purchase obligations pending a final determination on its application for exception.	DES-0034	Stay of the entitlements program (sec. 211.87).
Do	Southwestern Refining Co., Inc., Washington, D.C. If granted: Southwestern Oil Co. would receive an exception from the entitlements program (10 CFR 211.67) which would relieve the firm of its entitlement purchase obligations.	DEE-0483	Exception from the entitlements program (sec. 211.67).
Jan. 26, 1978	Cleary, Gottlieb, Steen & Hamilton, Washington, D.C. If granted: The DOE's Dec. 7, 1977 information request denial would be rescinded and Cleary, Gottlieb, Steen & Hamilton would receive access to additional DOE data relating to correspondence by John M. Coffey.	DFA-0121	Appeal of the DOE's Dec. 7, 1977 information request denial.

NOTICES OF OBJECTION RECEIVED.—Week of Jan. 20, 1978 through Jan. 27, 1978

Date	Name and location of applicant	Case No.
Jan. 23, 1978	Arizona Fuels Corp., Salt Lake City, Utah	DXE-0224
Jan. 24, 1978	Coastal States Gas Corp., Houston, Tex.	DXE-0244
Jan. 25, 1978	Sabre Refining, Inc., Bakersfield, Calif.	DEE-0346
Jan. 26, 1978	Atlantic Richfield Co., Dallas, Tex.	FEE-4104
Jan. 28, 1978	International Retail Corp., Aberdeen, Md.	FEE-4838

VOLUNTARY AGREEMENT AND PLAN OF ACTION TO IMPLEMENT THE INTERNATIONAL ENERGY PROGRAM

Availability of Documents and Request for Comment on Proposed Approvals by the Secretary of Energy

AGENCY: Department of Energy.

ACTION: Notice of Availability of Documents and Request for Comment.

SUMMARY: A draft of a proposed clearance letter and recordkeeping guidelines with respect to U.S. oil company participation in the upcoming test of the International Energy Agency's international oil allocation system is being transmitted to the relevant government agencies for comment and is also being made available for public comment.

DATE: Written comments to be submitted by February 21, 1978.

ADDRESS: Comments should be submitted to Box RT, Room 2214, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (DOE, Freedom of Information, Reading Room), Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9161. Robert C. Goodwin, Jr., Office of General Counsel, Room 5116, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

SUPPLEMENTAL INFORMATION: Under section 252 of the Energy Policy and Conservation Act, the Administrator of the Federal Energy Administration (whose functions have now been transferred to the Secretary of Energy pursuant to the Department Energy Organization Act) monitors the carrying out of Voluntary Agreements by U.S. companies and issues certain approvals with respect thereto. In this connection, U.S. companies who are members of the Voluntary Agreement will be requested to assist the International Energy Agency in conducting a test of the emergency allocation system beginning March 30, 1978. The Department of Energy staff, in cooperation with the staffs of the Department of State, the Department of Justice, and the Federal Trade

Commission, has developed the various clearance documents which are being made available today.

The first document is a draft letter of approval for U.S. companies participating in the test. The second document is the Guidelines for Recordkeeping which will be required. These Guidelines will apply existing DOE regulations contained in Title 10, CFR, Part 209, to the test. Amendments to the part 209 regulations are also being proposed in a separate filing. The proposed clearance letter is substantially similar to the clearance letter which was provided for the 1976 systems test. See 41 FR 41459 (September 22, 1976). However, the categories of data which may be exchanged have been more precisely drawn. The recordkeeping guidelines are also similar in substance to those issued in 1976. They have been totally revised in terms of format. In addition, several changes have been made based on experience of the U.S. Government in monitoring the last test.

DOE has determined that it would be useful in this test to evaluate utilization of a verbatim transcript for portions of the test. Accordingly, it is contemplated that a transcript will be taken of many of the group sessions

during the second three-week cycle of the test. The record developed in this fashion will then be compared with the record developed through written notes and minutes maintained during the first cycle of the test in order to determine whether a transcript provides any additional helpful information for monitoring purposes.

DOE also considered instituting a system of recordkeeping for telephone calls which are made by U.S. ISAG members in connection with the test. This system would involve utilizing tape recordings of such phone conversations. However, because of the brief amount of time remaining between now and the beginning of the test, and because of the number of unresolved questions relating to the legal and other issues, it was decided not to institute such a system for this test. However, DOE is particularly interested in obtaining comments on such an approach for possibly utilization in future tests or in case of a real emergency.

COMMENT PROCEDURE: A file containing data on proposed clearance letter and recordkeeping guidelines is available for public inspection and copying at the DOE Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Written comments regarding the proposed clearance letter and recordkeeping guidelines will be accepted and considered if filed by 4:30 p.m., February 20, 1978. Any person submitting written comments with respect to the letter and guidelines should submit ten (10) copies to the Office of General Counsel, DOE, Room 5116, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, attention: Mr. Robert C. Goodwin, Jr. Comments should be identified on the outside of the envelope and on documents submitted with the designation "Proposed Clearance Letter and Recordkeeping Guidelines With Respect to AST-2."

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in one copy only, in accordance with procedures set forth in 10 CFR 205.9(f). Any material not accompanied by a statement of confidentiality will be considered to be non-confidential. The Department of Energy reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

Issued in Washington, D.C., February 7, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

[FR Doc. 78-3858 Filed 2-10-78; 8:45 am]

[3128-01]

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF ADMINISTRATIVE REVIEW

Week of December 5 through December 9, 1977

Notice is hereby given that during the week of December 5 through December 9, 1977, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Administrative Review and the basis for the dismissal.

APPEALS

Atlantic Richfield Co., Los Angeles, Calif., DFA-0030, Freedom of Information

The Atlantic Richfield Company (Arco) appealed from a partial denial by the FEA Information Access Officer of a Request for Information which the firm had submitted under the Freedom of Information Act (the Act). In its request, Arco sought the disclosure of documents relating to the FEA Transfer Pricing Program (10 CFR 212.84). In a partial response to the Arco request, the Information Access Officer released portions of a computer printout listing summaries of the price and volume of transactions in various crude oils which had been reported to the FEA. However, he deleted from this material the aggregate quantities and average prices for crude oils in months when three firms or less participated in transactions. The deletions were made on the grounds that the release of these figures would disclose confidential commercial information which was exempt from mandatory disclosure under Section 552(b)(4) of the Act. In considering Arco's Appeal, the DOE determined that the information withheld from Arco which is traceable to individual firms was properly found to be exempt from disclosure since that information is confidential commercial and financial information which, if released to the public, would cause substantial harm to the competitive positions of the firms which had submitted that data to the FEA. However, the DOE held that the Information Access Officer erred in deleting aggregate quantities and average prices for those months in which three firms had reported transactions involving a particular type of crude oil. The DOE determined that the Information Access Officer must provide Arco the aggregate volume and average price information when three firms had transactions in a particular month unless (i) one of the three firms is a governmental entity or utility; or (ii) fewer than three firms actually lifted that particular type of crude oil in that particular month. The Arco Appeal was therefore denied in part and granted in part.

Champlin Petroleum Co., Fort Worth Tex., FXA-1313, Crude Oil

Champlin Petroleum Company appealed from a Decision and Order denying the firm's request for exception relief from the provisions of 10 CFR, Part 212, Subpart D.

Champlin Petroleum Company, 5 FEA Par. 83,113 (March 31, 1977). Champlin had requested that it be permitted to sell at upper tier ceiling prices a portion of the crude oil produced and sold for the benefit of the working interest owners of Fault Block Units II, III and IV, located on the Wilmington Field, Long Beach, California. The relief was requested in order to permit the recoupment of the projected cost of an investment for a water pollution control facility which the firm must construct in order to comply with an Order issued by the California Regional Water Quality Control Board. In the March 31 Decision, the FEA found that Champlin had ample economic incentive to make the required investment in the absence of exception relief. In its Appeal, Champlin asserted that the FEA had failed to apply the methodology employed in previous cases in its analysis of the firm's future financial position. In considering the Appeal, the DOE determined that Champlin's contention was correct since the FEA, in projecting the revenues which the working interest owners will receive from the sale of crude oil in future years, had utilized ceiling prices which were substantially in excess of the current ceiling prices applicable to the sale of crude oil produced from Fault Block Units II, III and IV. The DOE found that in previous cases of a similar nature the FEA, in analyzing a firm's future financial position, had instead utilized the current applicable selling prices or the most recently published ceiling price which would be available to the producer. Accordingly, the DOE determined that a new analysis should be conducted of Champlin's request for exception.

On the basis of that new analysis, the DOE determined that under the current crude oil pricing regulations there is little economic incentive for Champlin to make the investment in the water treatment facility and it is likely that Champlin will abandon its operations at Fault Block Units II, III and IV in the absence of exception relief. The DOE also determined that the reservoirs underlying each Fault Block Unit contain substantial quantities of crude oil which would not be recovered if the firm's operations were abandoned. On the basis of the precedent established in *Standard Oil Company of California*, 4 FEA Par. 83,184 (November 5, 1976), and in view of the fact that the investment would further important national policy objectives, including the attainment of statutory water quality standards and the encouragement of domestic crude oil production, the DOE concluded that the application of the ceiling price rules to Champlin's operations resulted in a gross inequity which warranted exception relief. Accordingly, Champlin was permitted to sell at upper tier ceiling prices a sufficient quantity of crude oil produced for the benefit of the working interest owners to enable it to undertake the pollution control project while at the same time avoiding the possibility that windfall profits would be obtained.

Dasher-Harris Gas Co., Valdosta, Ga., FXA-1202, Propane

The Dasher-Harris Gas Company appealed from a Decision and Order which the FEA issued to it on January 3, 1977, denying a request for an extension of the exception relief which had been granted to the firm on June 29, 1976. *Dasher-Harris Gas Co.*, 5 FEA Par. 83,034 (January 3, 1977), 3 FEA Par. 83,253 (June 29, 1976). The June 29 De-

UMI

cision granted Dasher-Harris an exception from the provisions of 10 CFR 211.9 and directed that the firm be assigned a lower-priced supplier of propane to replace its base period supplier, Wanda Petroleum Company. The present Appeal, if granted, would have resulted in the reversal of the January 3 determination and the issuance of a further order assigning Dasher-Harris a lower-priced supplier of propane in place of its base period supplier.

In considering the Appeal, the DOE found that the FEA had performed an erroneous comparison of suppliers' prices in the marketing area in which Dasher-Harris operates and that if a proper comparison had been made, the FEA would have found that the price charged Dasher-Harris by Wanda was significantly higher than the average of the prices paid by Dasher-Harris' competitors. In addition, the DOE noted that Dasher-Harris had submitted new data which indicated that since the issuance of the January 3 Decision, Wanda had increased its prices for propane and that as a result, Dasher-Harris was incurring substantially higher costs for propane than its competitors. However, the DOE further noted that, in accordance with the principles established in several prior Decisions, Dasher-Harris would not be entitled to exception relief solely on the ground that a significant price disparity exists, but that the firm must also show that it is experiencing serious financial and operating difficulties which are attributable to this price disparity. The DOE determined that the manner in which the FEA conducted its analysis of the firm's financial data in the prior proceeding was erroneous to the extent that it excluded an allowance for depreciation which the firm had included in its financial statements. Accordingly, a new analysis was made of the financial data which Dasher-Harris submitted. Based on that analysis, the DOE concluded that Dasher-Harris had failed to substantiate its contention that its financial difficulties were attributable to the application of the propane allocation regulations to its activities. The DOE therefore determined that the Dasher-Harris Appeal should be denied.

Kingery Drilling Co., Inc., Ardmore, Okla., FRA-1392, Crude Oil

Kingery Drilling Company, Inc. filed an Appeal from a Remedial Order which was issued to the firm on June 27, 1977, by the Deputy Regional Administrator of FEA Region VI. The Remedial Order found that Kingery had sold crude oil at prices which were in excess of the ceiling prices specified in 6 CFR 150.353 and 10 CFR 212.73 and directed the firm to refund the amount of the overcharges, plus interest to the purchaser of the crude oil. In its Appeal, Kingery argued that the ceiling price for crude oil which it produced included a bonus of \$0.15 per barrel which the firm received under a contract with its purchaser on May 15, 1973. In considering the Appeal, the FEA found that Kingery had failed to provide evidence which demonstrated that the bonus which it received for crude oil from its purchaser on May 15, 1973, constituted a part of the "posted price" as that term is defined and interpreted in FEA Ruling 1977-1 (Federal Energy Guidelines (CCH) Par. 16.165). The firm's Appeal was therefore denied.

Maralo, Inc., Round Mountain, Tex., FXA-1353, Crude Oil

Maralo, Inc. filed an Appeal from a Decision and Order which was issued to the firm

on May 16, 1977. *Maralo, Inc.*, 5 FEA Par. 83.159 (May 16, 1977). In the May 16 Order, the FEA denied the firm's Application for Exception from the provisions of 10 CFR Part 212, Subpart D. The Appeal, if granted, would permit the firm to treat crude oil reservoirs underlying two leases in Chambers County and Gaines County, Texas as separate properties on a retroactive and prospective basis. In considering the firm's Appeal, the DOE determined that Maralo had not demonstrated that prior to the issuance of Ruling 1975-15 the regulations were so vague as to allow the firm to treat reservoirs as separate properties. Furthermore, the DOE held that the FEA correctly determined that Maralo had failed to demonstrate that the reservoirs retroactively qualified as separate properties under the criteria established in Ruling 1977-1. The DOE also affirmed the FEA's finding that Maralo was not justified in relying on oral advice which it allegedly received from FEA officials. Finally, the DOE determined that the issue of whether Maralo could treat the reservoirs as separate properties on a prospective basis under Ruling 1977-2 was a determination properly left to the DOE Regional Office. Based on these considerations, the DOE determined that Maralo had not demonstrated that the May 16, 1977 Order was erroneous in fact or law, or arbitrary or capricious and the Maralo Appeal was accordingly denied.

Natrogas, Inc., Minneapolis, Minn., FXA-1259, Propane

Natrogas, Inc. appealed from a Decision and Order denying a request for exception which it had filed from the provisions of 10 CFR 211.9 *Natrogas, Inc.*, 5 FEA Par. 83.095 (March 8, 1977). In its exception request, Natrogas sought to be assigned a new, lower-priced supplier to replace its four base period suppliers of propane. The firm contended that there was a significant disparity between its cost of propane and the comparable costs of its competitors, and that as a result it was experiencing a serious financial hardship. In rejecting these claims, the FEA found that the firm has been purchasing substantial quantities of propane on the surplus market, and that consequently its cost of propane was only 1.55 cents higher than the average cost of its competitors. The FEA also found that the evidence in the record did not support Natrogas' contention that it was experiencing a financial hardship as a result of FEA regulatory requirements. Natrogas contended on appeal that the FEA erred in calculating the difference between its cost of propane and the cost to its competitors by including prices offered by suppliers which do not supply its competitors. The DOE found that these prices were properly included in the comparison since those suppliers did in fact sell propane to competitors of Natrogas. Nevertheless, it also found that in determining the average cost of propane to Natrogas' competitors, the FEA improperly excluded the prices charged by several other suppliers. Accordingly, the DOE conducted a new survey of suppliers in Natrogas' market area, which indicated that the cost disadvantage currently being experienced by Natrogas was only 1.48 cents. Since this disparity was not substantial and, in any event, was less than that found to exist in the March 8 Decision and Order, Natrogas' Appeal was denied. However, it was also determined that new financial data submitted by Natrogas in connection with its present

submission warranted a reconsideration of the findings made in the March 8 Decision. That data indicated that Natrogas' markup had declined substantially in recent years, was insufficient to meet the firm's necessary operating costs, and that consequently the firm was currently operating at a loss. The DOE determined that the cost disadvantage which Natrogas was experiencing with respect to its purchases of propane was a primary cause of these financial difficulties, and therefore granted the firm exception relief, directing that it be assigned a lower-priced supplier of propane to replace three of its four base period suppliers.

Burl C. Smith, Portage, Ohio, FRA-1348, Refined Petroleum Products

Burl C. Smith (Smith) filed an Appeal from a Remedial Order which had been issued to him by the Regional Administrator of FEA Region V on February 25, 1977. In the Remedial Order, FEA Region V found that, during the period November 1, 1973 through June 30, 1975, Smith sold certain volumes of motor gasoline and middle distillates at prices which exceeded the maximum permissible price levels computed pursuant to 6 CFR 150.359 and 10 CFR 212.93. Since Smith had failed to maintain adequate records of his business transactions, the FEA could not make, on the basis of those records, a precise determination as to Smith's compliance with the applicable regulations and was accordingly compelled to calculate his selling prices and product costs on the basis of the available records and invoices. In considering the Appeal, the DOE determined that Smith did not present any material whatsoever which supported his broad allegation that certain calculations made by the FEA were incorrect. In addition, the DOE noted that although Smith had been given an opportunity during the appeal proceeding to show that he would experience a serious financial hardship as a result of the Remedial Order, he had failed to submit any financial material in support of this claim. The Smith Appeal was accordingly denied.

Texaco, Inc., White Plains, N.Y., DEA-0002, DEA-0003, DEA-0004, Aviation Jet Fuel

Texaco, Inc. filed Appeals from Assignment Orders which were issued to the firm on September 26, 1977 directing it to supply aviation jet fuel to Braniff Airways, Inc., Continental Airlines, Inc. and Southwest Airlines, Inc. In considering Texaco's Appeal, the DOE determined that the September 26 Orders were inconsistent with the standards and principles for adjusting an airline's base period volume of aviation jet fuel which the FEA had established in an earlier Decision and Order. See *Texaco, Inc.*, 6 FEA Par. 80.548 (September 9, 1977). Specifically, the Assignment Orders contained an erroneous finding that the approval of operating rights by the Civil Aeronautics Board or other appropriate authority is itself a "compelling situation" which justifies an adjustment under 10 CFR 211.145(b)(1). Furthermore, none of the Orders reflected any consideration of the airlines' attempts to reduce daily flights on routes with light passenger demand or to curtail service on routes which are duplicated by other airlines. Finally, the DOE held that consideration should also be given to the airlines' efforts to utilize alternative sources of fuel including imported aviation fuel. On the basis of these considerations, the September 26 Assignment Orders were

remanded for further findings of fact and law.

REQUESTS FOR EXCEPTION

Bailer & Deshaw, Kawakawin, Mich., FEE-4130, Crude Oil

Bailer & Deshaw (Bailer) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to sell at market prices the crude oil which it anticipates it will produce from two wells to be drilled on the Arbela Field located in Tuscola County, Michigan. In considering the Bailer application, the DOE found that a substantial investment is necessary to drill the two wells and purchase the equipment which is necessary to commence operations at the leases. The DOE further determined that the crude oil production estimates provided by the firm indicate that the investment would be uneconomic if the crude oil which will be produced from the wells prior to their qualification for stripper well status were to be sold at upper tier ceiling prices. Moreover, the DOE determined that over 30,000 barrels of crude oil could be recovered to meet the nation's energy requirements if the two wells are drilled. On the basis of these findings which are similar to those presented in a previous case, the DOE determined that exception relief should be granted to Bailer which would provide it with a sufficient economic return to undertake the capital investment project required to develop the two leases. See *Minard Run Oil Co.*, 5 FEA Par. 83.119 (March 31, 1977). Based on the financial and operating data that the firm submitted, the DOE determined that if Bailer were permitted to sell all the crude oil produced from the two wells for the benefit of the working interest owners during the first year of production at exempt price levels, it should have the necessary economic incentive to undertake the drilling project.

Texas Pacific Oil Co., Inc., Dallas, Tex., FEE-4405, Crude Oil

Texas Pacific Oil Co., Inc. filed an Application for Exception in which the firm requested that it be permitted to sell the crude oil produced from the Ackers-State (Caddo) Unit, located in Stephens County, Texas, at stripper well prices. In its Application, Texas Pacific stated that it unitized the 327.8 acres of the W.H. Ackers Lease and the 10.5 acres of the State of Texas

Lease into a single property on July 1, 1977. The firm also stated that the Ackers Lease property qualified as a stripper well property on the basis of 1975 production and that there had been no production of crude oil from the State Lease property since 1972. In considering the Texas Pacific exception request, the DOE noted that the State Lease property constituted only a very minor percentage of the entire unitized property and that Texas Pacific did not intend to drill any wells on the land previously included in the State Lease. The DOE therefore found that the only apparent effect of the unitization was to eliminate the incentive for current investment by precluding the property from qualifying as a stripper well property until at least July 1, 1978. In view of these factors, the DOE concluded that the application to the firm of the provisions of the DOE regulations concerning unitized properties resulted in a gross inequity which warranted exception relief. The firm was therefore permitted to sell the crude oil produced from the Unit without regard to those provisions of the regulations which relate to unitized properties.

REQUESTS FOR STAY

Mid-Michigan Truck Service, Inc., Kalamazoo, Mich., DES-0155, Motor Gasoline

Mid-Michigan Truck Service, Inc. filed an Application for Stay of the provisions of 10 CFR 211.25 (the supplier substitution rule). If the request were approved the Gulf Oil Corporation would be required to continue furnishing Mid-Michigan with its base period use of motor gasoline directly, rather than through the Bestrom Oil Company, Gulf's designated substitute supplier. In considering Mid-Michigan's request for stay, the DOE concluded that in view of the prior exception relief granted to Mid-Michigan, it is likely that the firm will prevail on the permits of its pending Application for Exception from Section 211.25. In addition, the DOE concluded that the financial burden to Mid-Michigan of returning to the situation which existed prior to the approval of the previous exception relief would be greater than any burden which Gulf would incur if the stay were granted in order to maintain the *status quo ante*. Accordingly, Mid-Michigan's request for stay was granted.

Union Oil Co. of California, Los Angeles, Calif., DES-0120, Motor Gasoline

The Union Oil Company of California

filed an Application for Stay of the provisions of 10 CFR 212.83 pending a determination on the merits of an Application for Exception which it had filed. If its request were approved, Union would be permitted to increase its maximum allowable selling price for motor gasoline in the County of Hawaii, State of Hawaii by two cents per gallon in order to reflect an increase in a County license tax on that product. Under the provisions of 10 CFR 212.83(c)(2)(iii)(E)(VII), Union is required to treat the County license tax increase as an increased nonproduct cost which it may recover only by applying that cost equally among all of its classes of customer throughout the United States on a firm-wide basis. In considering the Union Application, the DOE determined that Union had not yet clearly established the existence of a gross inequity by demonstrating that the effect of the regulation in question upon its customers differed in nature or degree from its effect on the customers of other refiners with respect to the County license tax increase or with respect to any other such local tax measure. Nor had Union demonstrated that the regulation interfered with the sovereign taxing authority of the State of Hawaii. The DOE therefore held that Union had failed to establish the existence of a substantial likelihood of success on the merits of its exception request. The DOE further held that Union's claim of irreparable injury, based on its present inability to recover some of its increased nonproduct costs due to market conditions, was speculative. The DOE also observed that if Union's request for a stay were granted and its exception request were denied, its customers in the County might be irreparably injured. The Union Application for Stay was therefore denied.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Administrative Review of the Department of Energy has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct cost increases:

Company	Case No.	Plant	Location	Amount of price increase (per gallon)
Atlantic Richfield Co.	FEE-4701	Camargo	Dewey County, Okla.	\$0.0060
	FEE-4702	Crittendon	Winkler County, Tex.	.0062
	FEE-4703	Grand Chenier	Cameron Parish, La.	.0066
	FEE-4704	Indian Basin	Eddy County, N. Mex.	.0091
	FEE-4705	Refugio	Refugio County, Tex.	.0297
Cities Service Co.	FEE-4754	Ambrose	Kay County, Okla.	.0160
	FEE-4755	Camrick	Beaver County, Okla.	.0094
	FEE-4756	Corpus Bay	San Patricio County, Tex.	(¹)
	FEE-4757	Diamond "M"	Scurry County, Tex.	(¹)
	FEE-4758	Elmwood	Beaver County, Okla.	.0168
	FEE-4759	Fairway	Henderson County, Tex.	(¹)
	FEE-4760	Indian Basin	Eddy County, N. Mex.	.0059
	FEE-4761	Murdock	Texas County, Okla.	.0063
	FEE-4762	Roberts Ranch	Midland County, Tex.	.0051
	FEE-4763	West Seminole	Gaines County, Tex.	.0174
	FEE-4764	Wilburton	Morton County, Okla.	(¹)
Doric Petroleum, Inc.	DXE-0047	Hennessey	Kingfisher County, Okla.	.0232
	DXE-0048	Newcastle	Grady County, Okla.	.0228
Gas Engine & Compressor Service, Inc.	DEE-0087	Freestone	Freestone County, Tex.	.11485

Company	Case No.	Plant	Location	Amount of price increase (per gallon)
Gulf Oil Corp.	FEE-4612	Delhi	Richland Parish, La.	.0109
	FEE-4613	Elmwood	Beaver County, Okla.	.0008
	FEE-4614	Enville	Love County, Okla.	.0062
	FEE-4615	Fashion	Atascosa County, Tex.	.0203
	FEE-4616	Johnsons Bayou	Cameron Parish, La.	.0024
	FEE-4617	Sea Robin	Vermilion Parish, La.	.0096
	FEE-4618	Venice	Plaquemines Parish, La.	.0012
	FEE-4619	Worsham	Ward County, Tex.	.0077

	FKE-4502	Worland	Washokle County, Wyo.	.0321

¹ Denied.

SUMMARY DECISIONS

The following firms filed Applications for Stay of Remedial Orders which has been issued to them by the DOE. In considering the stay requests, the DOE referred to a recent Decision in *Rickelson Oil and Gas Co.*, 6 FEA Par. 85,029 (August 24, 1977), in which it held that a Remedial Order will generally be stayed pending the determination of an Appeal unless it appeared that the public interest required immediate compliance with the Remedial Order. Since the record in these cases did not indicate that the public interest required immediate compliance with the Remedial Orders, the DOE granted the requests for stay pending consideration of the Appeals.

Charles W. Austin, Denver, Colo., DRS-0062
Eastern Oil Co., Tampa, Fla., DRS-0063
Franconia Propane Gas Co., Inc., Harleysville, Pa., DRS-0066
Pioneer Operations Co., Inc., Seminole, Okla., DRS-0039

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Lincoln Rock Corp., Ardmore, Okla., DEE-0234
Suburban Propane, Morristown, N.J., DEE-0236

The following submission was dismissed on the grounds that the request is now moot:

Petrochemical Energy Group, Washington, D.C., FMR-0102

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Administrative Review, Room B-120, 2000 M Street NW, Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays. They

are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

Dated: February 2, 1978.

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF ADMINISTRATIVE REVIEW

January 23 Through January 27, 1978

Notice is hereby given that during the period January 23 through January 27, 1978, the Proposed Decisions

and Orders which are summarized below were issued by the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of a Proposed Decision and Order in final form may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice of issuance of a Proposed Decision and Order shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the

Office of Administrative Review, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m. e.s.t., except federal holidays.

Dated February 3, 1978.

MELVIN GOLDSTEIN,
Director, Office of
Administrative Review.

PROPOSED DECISIONS AND ORDERS

Gas Engine & Compressor Service, Inc., Longview, Tex., FEE-4046, natural gas liquids

Gas Engine & Compressor Service, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart K. The exception request, if granted, would permit the firm, during the period September 1973 to the present, to charge prices for the natural gas liquids produced at its Freestone plant in excess of the levels permitted under Subpart K. On January 27, 1978, the DOE issued a Proposed Decision and Order that determined that Gas Engine's request for retroactive exception relief be denied.

Gulf Oil Corp., Tulsa, Okla., DXE-0251, crude oil

Gulf Oil Corp. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of the exception relief which the FEA granted to Gulf in a previous Decision and would permit Gulf to sell a portion of the crude oil which it produces from the Northwest Graylin "D" Sand Unit at upper tier ceiling prices. On January 23, 1978, the DOE issued a Proposed Decision and Order granting Gulf exception relief which would permit the firm to sell at upper tier ceiling prices 67.66 percent of the crude oil which it produces from the Graylin Unit for the benefit of the working interest.

O'Meara Bros., Lake Charles and New Orleans, La., FEE-4732, FEE-4750, crude oil

O'Meara Bros. filed two Applications for Exception from the provisions of 10 CFR,

Part 212, Subpart D. The exception requests, if granted, would permit O'Meara to sell at upper tier ceiling price levels a portion of the crude oil which it produced from the Vinton Lease and Louisiana State Lease 2192 T 165, R 17E. On January 24, 1978, the DOE issued a Proposed Decision and Order which determined that the exception requests be granted.

Phillips Petroleum Co., Bartlesville, Okla., DEE-0386, crude oil

Phillips Petroleum Co. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Phillips to sell at upper tier ceiling prices the crude oil which it produces from the Bridger Lake Unit located in Summit County, Utah. On January 27, 1978, the DOE issued a Proposed Decision and Order which permits the firm to sell at upper tier ceiling prices 6.85 percent of the crude oil produced from the Unit for the benefit of the working interest.

Texas Pacific Oil Co., Inc., Dallas, Tex., DXE-0235, crude oil

Texas Pacific Oil Co., Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would increase the amount of exception relief granted to Texas Pacific on April 29, 1977 by permitting the firm to sell at upper tier ceiling prices additional quantities of the crude oil produced from the Lagrange 4300' reservoir of the O. L. Wilson Lease, located in Adams County, Miss. On January 25, 1978, the DOE issued a Proposed Decision and Order which determined that the Texas Pacific exception request be granted.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Administrative Review of the Department of Energy has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct cost increases:

Company	Case No.	Plant	Location	Amount of price increase (per gallon)
General Crude	FEE-0050	Dayton	Liberty County, Tex.	\$0.0139
	DEE-0051	Grand Chenier	Cameron Parish, La.	.0307
	DEE-0052	Hamlin	Fisher County, Tex.	.0119
	DEE-0053	Salt Creek	Kent County, Tex.	.0778
	DEE-0387	Silsbee	Hardin County, Tex.	.1346
Ginther Gas Processing	FEE-4371	Springer	Campbell County, Wyo.	.02156
Matrix Land	DEE-0034	Piceance Creek	Rio Blanco County, Colo.	(¹)
	DEE-0035	Mobeetle	Wheeler County, Tex.	.0415
	DEE-0036	Box-Elmdale/Tuscola	Taylor and Callahan Counties, Tex.	.1755

Economic Regulatory Administration
**EMERGENCY ELECTRIC ENERGY AND FUEL
 ALLOCATION AUTHORITIES**
 Notice of Delegation

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Announcement of Delegations of Authority.

SUMMARY: The Administrator of the Economic Regulatory Administration (ERA) hereby gives notice of delegations of authority in regard to his emergency authorities under § 202(c) of the Federal Power Act (16 U.S.C. § 824a(c)) to order the "temporary connection of facilities and transfer of electricity," and under § 2(d) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA) (15 U.S.C. § 792 et seq.), by rule or by order to "allocate coal to any person to the extent necessary to carry out the purposes of this Act."

This notice advises the public that these delegations have been made, describes the pertinent scope of authorities associated with each of these delegations and identifies relevant offices in the ERA for submission of filings.

SUPPLEMENTARY INFORMATION:
 I. Background.
 II. Electrical Interconnections.
 III. Coal Allocation.

I. BACKGROUND

The authorities contained in § 202(c) of the Federal Power Act and in § 2(d) of ESECA were delegated by the Secretary of Energy to the Administrator of the Economic Regulatory Administration. This delegation of authorities was previously published in the FEDERAL REGISTER on November 29, 1977 (42 FR 60725-27). The Administrator of the Economic Regulatory Administration has further delegated his authorities under section 202(c) of the Federal Power Act to the Assistant Administrator for Utility Systems and under Section 2 of the Energy Supply and Environmental Coordination Act of 1974 (Pub. L. 93-319), as amended, to the Assistant Administrator for Fuels Regulation.

II. ELECTRICAL INTERCONNECTIONS

As a result of the above referenced delegation, the Assistant Administrator for Utility Systems, ERA, administers the following pertinent statutory authorities among others in regard to emergency electrical interconnections under the Federal Power Act:

**TEMPORARY CONNECTION AND EXCHANGE
 OF FACILITIES DURING EMERGENCY**

... whenever [DOE] determines that an emergency exists by reason of ... a short-

age of electric energy or of facilities for the generation or transmission of electric energy, or of fuel or water for generating facilities, or other causes, [DOE] shall have authority either upon its own motion or upon complaint, with or without notice, hearing, or report, to require by order such temporary connections of facilities and such generation, delivery, interchange, or transmission of electric energy as in its judgment will best meet the emergency and serve the public interest. Section 202(c) Federal Power Act, (16 U.S.C. § 824(c)).

The authorities contained in § 202(c) of the Federal Power Act are implemented under the provisions of regulations previously promulgated by the Federal Power Commission and which currently remain in effect pursuant to the transfer provisions of § 705 of the Department of Energy Organization Act (Pub. L. 95-91). These regulatory provisions are contained in 18 CFR §§ 32.60-32.62.

Application for a temporary connection order or an order for generation, delivery, interchange, or transmission of electric energy pursuant to Section 202(c) of the Federal Power Act should be filed attention:

Dr. Douglas C. Bauer, Assistant Administrator for Utility Systems, Economic Regulatory Administration, Department of Energy, 2000 M Street NW., Room 6011, Washington, D.C. 20461.

between the hours of 8 a.m. and 4:30 p.m. e.s.t. Telephone inquiries shall be directed to:

Mr. Jerry Pfeffer, Deputy Assistant Administrator for Utility Systems, Economic Regulatory Administration, Department of Energy, 202-254-9655.

III. COAL ALLOCATION

As a result of the above referenced delegation, the Assistant Administrator for Fuels Regulation, ERA, administers the following pertinent statutory authorities in regard to the emergency allocation of coal under the ESECA statute:

(1) "The [DOE] may, by ... order, allocate coal ... to any ... person to the extent necessary to carry out the purposes of this act." (15 U.S.C. 792(d));

(2) "The purposes of this Act are (1) to provide for a means to assist in meeting the essential needs of the United States for fuels, ... " (15 U.S.C. 791)

The pertinent coal allocation regulations for the implementation of these authorities are contained in 10 CFR §§ 309.1-309.5 and 10 CFR §§ 303.50-303.61.

Application for an order to allocate coal pursuant to Section 2(d) of the Energy Supply and Environmental Coordination Act of 1974 should be filed attention:

Mr. Barton R. House, Assistant Administrator for Fuels Regulation, Economic Regulatory Administration, Department of Energy, 2000 M Street NW., Room 6128L, Washington, D.C. 20461.

between the hours of 8 a.m. and 4:30 p.m. e.s.t. Telephone inquiries should be directed to:

Barton House, Assistant Administrator for Fuels Regulations, Economic Regulatory Administration, Department of Energy 202-254-3905.

Issued in Washington, D.C. February 10, 1978.

DAVID J. BARDIN,
 Administrator, Economic Regulatory Administration, Department of Energy.

**ENVIRONMENTAL PROTECTION
 AGENCY**

[FRL 854.2]

**ENVIRONMENTAL IMPACT STATEMENTS AND
 OTHER ACTIONS IMPACTING THE ENVIRONMENT**

Agency Comments

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of October 1, 1977 and October 31, 1977.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the

number and title of the statement, and the source of the EPA review as set forth in Appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the source for copies of the comments as set forth in Appendix VI.

Appendix VI contains a listing of names and addresses of the sources of

EPA reviews and comments listed in Appendices I, III, IV, and V.

Copies of the EPA Manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW., Washington, D.C. 20460, telephone 202-755-2808. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

Dated: 30, January 1978.

PETER L. COOK,
 Acting Director,
 Federal Activities.

APPENDIX II

DEFINITIONS OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

Environmental Impact of the Action

LO—Lack of Objection

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservations

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU—Environmentally Unsatisfactory

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

Adequacy of the Impact Statement

Category 1—Adequate

The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient Information

EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate

EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

FEDERAL COMMUNICATIONS
COMMISSION

[CC Docket No. 78-36; FCC 78-67]

IMPLICATIONS OF THE TELEPHONE
INDUSTRY'S PRIMARY INSTRUMENT CONCEPT

Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of inquiry.

SUMMARY: The Commission is exploring the telephone industry's primary instrument proposal that all subscribers to single line telephone service be required to obtain one telephone set from the serving company. Comments are requested on a large number of legal, procedural, economic, technical, and other issues specified by the agency.

DATES: Comments must be received on or before March 28, 1978, and Reply Comments must be received on or before May 9, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Ruth Reel, Policy and Rules Division, Common Carrier Bureau, Fed-

eral Communications Commission, Washington, D.C. 20554, 202-632-6363.

ADOPTED: February 1, 1978.

RELEASED: February 6, 1978.

In the matter of implications of the Telephone Industry's Primary Instrument Concept, CC Docket No. 78-36.

1. On October 3, 1977, Congressman Lionel Van Deerlin and Louis Frey, respectively the Chairman and ranking minority member of the House Subcommittee on Communications, forwarded for our attention the "Primary Instrument Concept" recently advanced by the telephone industry as a proposed modification of our terminal equipment registration program, and requested that we give this proposal "expeditious consideration." On October 13, 1977, we responded affirmatively to this request. The proposal of the telephone industry is appended hereto (Appendix A). There is also attached (Appendix B) a copy of the industry's response, dated October 31, 1977, to questions of the Subcommittee staff pertaining to the primary instrument concept. We identify below the various legal, procedural, policy, economic, technical, and other issues which we believe to be germane to this proceeding, and solicit comments on these as well as any other issues the parties may wish to address.

2. We have already received some correspondence on this matter, primarily seeking further clarification of the proposal or challenging its validity. All such correspondence will be incorporated in the public file, and will be considered at the appropriate stage of the proceeding. We will treat herein two pleadings which request immediate relief. One is the October 28, 1977, "Comments of the Computer and Business Equipment Manufacturers Association (CBEMA)," requesting that we either dismiss the primary instrument proposal as an unjustified departure from the "Carterfone" and equipment registration policies,¹ or require the telephone industry to submit a more precise and documented statement of their proposal prior to comments. The other is a joint letter (November 1, 1977) from the major telephone companies and associations, enclosing a proposed amendment to Part 68 of the Commission's Rules to effect the primary instrument concept. The letter also urged that we stay, on our own motion, those provisions of the registration program that "permit" the connection of customer-provided main station telephones to single-line telephone services pending prompt action on the proposed Rule amendments. We acted upon the request for stay relief on November 22, 1977, and will treat herein the industry request for rulemaking.

¹ *Carterfone*, 13FCC 2d 420, on reconsideration 14 FCC 2d 571 (1968); *Hush-a-Phone v. United States*, 238 F. 2d 266 (D.C. Cir. 1956).

3. At this time, and in view of the various correspondence received, we believe it may be useful for all concerned parties to set forth more fully the background of this proceeding, some of the legal and procedural issues it raises, and the procedures we intend to follow in seeking a rapid resolution of these issues.

I. BACKGROUND

4. On June 27, 1968, the Commission issued its *Carterfone* decision holding that, consistent with the earlier *Hush-a-Phone* decision² of the U.S. Court of Appeals for the District of Columbia Circuit, subscribers to telephone services have a right to use that service in any manner privately beneficial if not publicly detrimental, and that telephone companies subject to our jurisdiction must allow subscribers to connect privately owned equipment to the telephone network unless it were demonstrated that such connection would be publicly detrimental. As we further explained in *Mebane*, this broad principle applies to customer terminal equipment used as a replacement for telephone system equipment.³ Pursuant to the *Carterfone* decision and telephone industry tariffs and practices adopted in implementing that decision, telephone service subscribers have indeed enjoyed the right of providing their own terminal equipment, including main station telephones, since January 1, 1969. However, connection of such equipment to the network was initially permitted only through telephone company-provided "connecting arrangements", allegedly required to protect the network from technical harm.⁴

5. On November 5, 1975, following lengthy rulemaking proceedings conducted with the assistance of a Federal-State Joint Board, the Commission concluded that adequate network protection could be provided by means other than the required use of carrier-provided connecting arrangements, and adopted rules establishing standards for protective circuitry for all terminal equipment and an FCC registration program to ensure compliance with such standards.⁵ Initially, this program was limited to data and ancillary devices, thus continuing the requirement that customer-provided main station telephones, PBXs, and

² *Hush-a-Phone Corp. v. U.S.*, 238 F. 2d 266 (D.C. Cir. 1956).

³ *Mebane Home Telephone Co.*, 53 FCC 2d 473 (1975) aff'd *Mebane Home Telephone Co. v. FCC*, 535 F. 2d 1324 (D.C. Cir. 1976).

⁴ See, *AT&T Foreign Attachment Tariff Revisions*, 15 FCC 2d 605 (1968), on reconsideration, 18 FCC 2d 871 (1969).

⁵ First Report and Order in Docket No. 19528, 56 FCC 2d 593 (1975), on reconsideration 57 FCC 2d 1216 (1976), 58 FCC 2d 716 (1976) and 59 FCC 2d 83 (1976).

key telephone systems could only be connected to the network via company-provided connection arrangements. On March 18, 1976, after further proceedings, the Commission expanded the scope of its registration program to include these equipment items as well, thus eliminating entirely the telephone company-imposed requirement that customer-provided equipment could only be connected via company-provided connecting arrangements.² Neither of these latter decisions, of course, dealt with the inherent right of the subscriber to provide and connect his own terminal equipment, including main station telephones, since that issue was decided affirmatively in the *Carterfone* line of cases consistent with the court's ruling in *Hush-a-Phone*.

6. The Commission's decisions allowing alternatives to the requirement for carrier-provided connecting arrangements and establishing the FCC registration program as a substitute therefor were appealed to the U.S. Court of Appeals for the Fourth Circuit. Appellants included the North Carolina Utilities Commission, AT&T, U.S. Independent Telephone Association, United Telephone System & Continental Telephone Corp. Pending action on this appeal, the Court stayed the program except for customer-provided data and ancillary devices. On March 22, 1977, the Court of Appeals affirmed the Commission's actions in all respects. However, pending petitions for certiorari the Court continued its stay order. On October 3, 1977, the Supreme Court denied certiorari, thereby terminating the stay order. On October 17, 1977, upon issuance of the Court's formal mandate, the FCC registration program became effective by operation of law. Accordingly, telephone subscribers who have the right under *Carterfone* to provide and interconnect their own terminal equipment may now do so without the necessity of using carrier-supplied connecting arrangements, provided such equipment is registered pursuant to, or "grandfathered" by, the Commission's rules and the telephone company has been properly notified.

7. Viewed against this background, the "Primary Instrument Concept" appears to raise a variety of legal, procedural, and substantive issues. The November 1, 1977, letter from the telephone industry and its associations styles the concept as a proposed amendment to the Commission's rules, specifically Part 68, to modify the FCC Registration Program. However,

²Second Report and Order in Docket No. 19528, 58 FCC 2d 736 (1976), on reconsideration 61 FCC 2d 396 (1976) and 64 FCC 2d 1058 (1977), *aff'd sub nom North Carolina Utilities Commission v. FCC*, 552 F. 2d 1036 (C.A. 4, 1977), cert. den. — U.S. — (October 3, 1977), 46 U.S.L.W. 3190.

since it is apparently proposed not merely to return to the situation in which customer-provided main stations may be connected only through carrier-supplied connecting arrangements, but rather to a situation in which single-line customers may not provide their own primary instrument, under any circumstances, the primary instrument proposal appears to contemplate a fundamental modification of the basic principles enunciated in *Hush-a-Phone* and *Carterfone*. Such prior decisions of the Commission and the courts are not, of course, immune to subsequent modification. However, the proponents of change clearly bear the burden of justifying such change, and the appropriate process through which such proposed modifications may properly be considered, as well as the substantive issues which must be addressed therein, require careful examination.

II. INDUSTRY PROPOSAL

8. It is our tentative understanding, based on appendices A and B and subject to the questions indicated below, that the telephone industry is proposing that subscribers to "single-line" telephone services—but not including "multi-line" and "data services" subscribers—would be required to lease, as part of basic telephone service, one piece of consumer-premises equipment from the serving telephone company.³ This requirement would not apply to single-line data services provided via standard data jacks or to multi-line service, but would apply to data services provided via standard voice jacks to single line voice-grade service (Appendix B). The charges for a standard telephone (500 type set) and its maintenance would be included in the rate for basic telephone service. For an additional charge the telephone company would substitute an optional instrument with equivalent minimum capabilities, but the subscriber would still have to pay for the standard telephone portion. Optional instruments provided by the telephone company may provide additional service features so long as capabilities equivalent to the basic set are present. The customer may disconnect the carrier instrument and substitute his own equipment; however, the carrier instrument must be connected during telephone company testing (Appendix B). All other consumer-premises equipment used as an adjunct to basic telephone service may be obtained from any source, provided that the equipment complies with the Commission's

³The industry states that the primary instrument concept would apply only to the public switched telephone network (local exchange and intercity); it would not apply to private line services (Appendix B).

registration program and the subscriber pays the carrier a monthly charge to cover the costs of inside wiring and "other requirements." The primary instrument concept is characterized as being "transitional", in the sense that it would be subject to review by the FCC or the Congress in 7-10 years.

9. The objectives of the telephone industry in proposing the primary instrument concept are stated to be:

(a) To make one serving entity responsible and accountable for providing complete basic telephone service for single line voice subscribers;

(b) To assure continuity of such telephone service;

(c) To facilitate testing, both static and functional;

(d) To serve as a reference set to allow the customer to independently diagnose trouble responsibility;

(e) To permit and encourage customers to effect prompt repair of malfunctioning equipment without interruption of basic telephone service; and

(f) To permit orderly introduction of technological innovations in the network.

III. ISSUES CONCERNING PRIMARY INSTRUMENT CONCEPT

10. In order to determine whether or not the public interest would be served by implementation of the primary instrument concept as a matter of Federal policy, it is of course necessary first to determine whether the public interest requires that the stated objectives be achieved, and if so whether the primary instrument concept is both a necessary and sufficient means of achieving those objectives as compared with alternative means. Moreover, it must be determined whether there are other public interest objectives that would be adversely affected by implementation of this concept, and if so whether there are alternative concepts or means which would better satisfy the overall public interest. Finally, it is necessary to determine whether the primary instrument concept is consistent with established legal principles, statutes, and judicial rulings. In the following sections we have identified a number of specific issues raised by this proposal upon which the views of interested parties are solicited. While we find it necessary to ask these questions in order to evaluate the primary instrument proposal, we stress that we have not prejudged any of the issues set forth below.

A. SOCIAL AND CONSUMER RIGHTS QUESTIONS

A1. *Carterfone*. The Primary Instrument Concept has been presented as a proposed modification of the Commission's registration program embodied in Part 68 of the Rules. However, as

noted, the apparent effect of this proposal, if adopted, would be to prohibit subscribers to single-line telephone service from providing their own primary instruments⁴ under any circumstances and regardless of the absence of harm to the telephone network. Therefore, it appears to constitute a modification of the underlying principle in the *Carterfone* line of cases,⁵ which establishes the consumer's basic right to connect any and all types of terminal equipment, including primary instruments, to the telephone network unless there is a sufficient showing of public detriment. This gives rise to several legal and procedural issues:

A1.1 Would the Commission have legal authority to modify the *Carterfone* principle in view of our holdings that the subscriber has a statutory right under the Communications Act not to be subjected to tariff or other restrictions which indiscriminately bar connection of customer-provided equipment without regard to harm?

A1.2 If so, what type of showing of new or changed facts or circumstances is required to effect such a change in view of our holdings that the subscriber has a statutory right under Section 201(b) of the Communications Act not to be subjected to restrictions which indiscriminately bar interconnection of customer-provided equipment without regard to harm, and that blanket tariff restrictions of this nature are unlawful under Sections 201(b) and 202(a) of the Act?

A1.3 Assuming that such action would not exceed the Commission's authority, what type of procedures should the Commission adopt if modification of *Carterfone* is in fact required?

A1.4 To what extent, if any, can the record developed in Docket No. 19528 be used as a basis for such a proceeding, considering that Docket No. 19528 was conducted on the basis that customers' rights established in *Carterfone* were not under review therein?

A2. *Anti-trust*. The primary instrument concept appears to give rise to questions of consistency with the policies underlying the anti-trust laws:

A2.1 Is the primary instrument proposal consistent with the anti-trust policy against unreasonable tie-ins insofar as it would require:

(a) A single-line subscriber, as a condition of obtaining telephone service from the carrier, to pay also for a carrier-owned terminal device?

⁴We use the term "primary instrument" as defined in the industry proposal.

⁵*Hush-a-Phone*, *Carterfone*, *Mebane*, *supra*. AT&T Foreign Attachment Tariff Revisions, *supra*. We note that the suggested rule changes of the telephone industry provide that customer-owned equipment may not be used as the primary instrument. Compare the industry response to the Subcommittee staff questions.

(b) A subscriber who elects to take an optional instrument from the carrier to pay also for a standard instrument that the subscriber may not receive, as a condition to obtaining the carrier's telephone service?

(c) A subscriber who chooses to use only customer-provided terminal equipment at all times except during telephone company testing, to obtain and pay for a carrier's primary instrument as a condition to receiving the carrier's telephone service?

A2.2 Would adoption of a primary instrument requirement by the Commission immunize the telephone companies from anti-trust suits involving tie-in questions?

A2.3 Would the lack of a credit allowance for nonprovision of the standard instrument encourage subscribers selecting optional equipment to take the standard instrument as well, and thereby have an anti-competitive effect on the independent suppliers of extension sets?

A2.4 Would the primary instrument proposal have the effect of allowing the telephone companies to retain or enhance a market share in the provision of main station telephone sets or to dominate the market for all telephone sets?

A2.5 What evidence is there that the telephone set market has the economic characteristics of a natural monopoly?

(a) What evidence is there to indicate that the main station market has the economic characteristics of a natural monopoly?

(b) Is there any technical or economic basis for distinguishing between main stations and extension sets?

A2.6 What percentage of the total telephone set market does the main station market now constitute?

A2.7 What percentage of main station sets is currently provided by the telephone carriers?

A2.8 In the absence of the primary instrument concept, what is the forecast for the total main station market for each of the next seven years, and what would be the independent supplier share of that market in terms of numbers of telephone sets? (*Please set forth the forecasting method, including assumptions and calculations).

A2.9 In the absence of the primary instrument concept, what is the forecast for the total extension market for each of the next seven years, and what would be the independent supplier share of that market in terms of numbers of telephone sets? (*See above).

A2.10 Assuming adoption of the primary instrument concept, what would be the market forecasts for main stations and extensions, delineated as in A2.8 and A2.9 above?

A2.11 Would the primary instrument concept have the effect of allocating the terminal equipment market so

that telephone companies would become monopoly suppliers of primary instruments to single-line subscribers, and independent suppliers and telephone carriers would compete in the provision of any additional terminal equipment to single-line subscribers as well as in the provision of all terminal equipment to multi-line, data and private line subscribers?

(a) If so, would such a market allocation be in the public interest?

A2.12 Would adoption of a primary instrument requirement by the Commission affect any pending anti-trust suits against the telephone companies? If so please list.

A3. *Effect on state actions*. It is our understanding that the New York Public Service Commission has recently decided that customer ownership of main stations is feasible and proper (see Appendix C hereto), and presently has pending a proceeding on customer-provision of inside wiring.

A3.1 In light of the *Telent Leasing* and *Comtronics* cases,⁶ what effect would the primary instrument concept, if adopted by the Commission, have on state actions or proceedings in the area of main stations and/or inside wiring?

B. CONSUMER RIGHTS

As noted, under present regulatory policies and industry practices, all telephone service subscribers have the option of obtaining end-to-end service, including the provision and maintenance of consumer-premises equipment, from the serving telephone company; or of seeking alternative sources of supply and maintenance for their own consumer-premises equipment. The primary instrument concept would delete the latter option for residential and business subscribers to single-line telephone services, and mandate instead that all such subscribers must take, as part of the basic service offering, a carrier-provided and maintained "primary" instrument. This change in policy appears to be predicated, at least in part, on the view that such subscribers are less sophisticated than the typical multi-line service subscriber, and less likely to assure that their equipment is in proper working order. To determine the validity of these claims, the following information is requested:

⁶The consumer's right, under the Communications Act and the Commission's implementing policies, to connect his own equipment to the telephone network in the absence of public detriment, cannot be abridged through inconsistent actions by state regulatory agencies or legislatures. *Telent Leasing Corp.*, 45 FCC 2d 204 (1974), *aff'd sub nom North Carolina Utilities Commission v. FCC*, 537 F. 2d 787 (4th Cir., 1976), cert. den. 429 U.S. 1027 (1976); *Comtronics, Inc.*, 57 FCC 2d 1202 (1976), *aff'd sub nom Puerto Rico Telephone Company v. FCC*, 553 F. 2d 694 (1st Cir., 1977).

B1. What demographic or other evidence would support the proposition that residential and business subscribers to single-line telephone services are either typically or in selected cases (a) less sophisticated than multi-line subscribers and (b) less likely to ensure that their equipment is in proper working order?

B2. What is a reasonable estimate of the number and class of subscribers who are believed to be either unwilling or unable to assure that their equipment is and remains in proper working order and how is that estimate derived?

B3. What is the number of such subscribers who would not be expected to elect to take end-to-end service and maintenance from the serving telephone company, absent any mandatory requirement of such action?

B4. What is the public interest justification for the primary instrument proposal?

B5. Would the proposed requirement that single-line residential and business subscribers obtain the primary instrument from the carrier, while multi-line and data subscribers need not, constitute an unjust or unreasonable discrimination in violation of Section 202(a) of the Act?

B6. Would it be unjust or unreasonable to require a single-line subscriber, who elects to take an optional instrument from the carrier in lieu of a standard instrument, to pay also for a standard instrument that he does not receive or require?

What is the current practice under applicable tariffs with respect to credit allowances where a single-line subscriber provides:

- (a) His own main station?
- (b) His own extension station?

B7. Would it be unjust or unreasonable to require a single-line subscriber, who chooses to use all customer-provided terminal equipment, to pay the full charge for a carrier-supplied primary instrument that he is required to use only during telephone company testing?

B7.1 How often does telephone company testing occur for the average single-line?

B7.2 Could such telephone company testing be accomplished by means less costly to the single-line subscriber than the full charge for a carrier-supplied primary instrument? (See also Question D2 below.)

B8. Would it be unjust or unreasonable under the primary instrument concept to combine the charges for service, a standard instrument, and maintenance in the basic service rate?

B8.1 Would unbundling of the charges for service, standard instruments and maintenance be necessary or appropriate to ensure that subscribers are not required to pay for terminal equipment or maintenance which they do not receive?

B8.2 Would unbundling be necessary or appropriate to permit the proper ascertainment of costs in determining the justness and reasonableness of rates?

B8.3 Should single-line subscribers have the option of purchasing primary instruments from the carrier, and paying for carrier maintenance if desired?

B9. The illustrative tariff in the primary instrument proposal would require all inside wiring to be done by the carrier. However, the proposal contemplates that in the event of customer wiring the carrier could "provide inside wiring to a designated, primary jack into which the customer could plug any one of the telephones on his premises."

B9.1 Would it be unjust or unreasonable to require carrier inside wiring for customer-provided extensions, and the payment of a monthly charge therefor, if the customer desires only a primary jack?

C. ECONOMIC

Proponents of the primary instrument concept claim that it will produce a number of economic benefits for both consumers and the telephone industry. Special emphasis has been placed on the potential role of this concept as a "transitional" arrangement which would permit telephone companies to adjust their inventories, accounting systems, pricing practices, etc. so as to minimize adverse economic consequences which allegedly will result if consumers substitute their own primary station equipment for that presently supplied by the serving telephone company. Preliminary comments seem to indicate that other parties may disagree with this assessment. We shall expect parties responding to this inquiry to demonstrate with much greater specificity and documentation their views regarding both the benefits and costs of this concept for consumers, telephone companies, and independent equipment suppliers. Moreover, we note that under current accounting rules and practices, telephone instruments removed from service may be retained in the Station Apparatus Account (Account 231), until such time as the equipment is fully depreciated. That portion of Account 231 attributable to interstate services through current separations procedures is allowed in the carrier's rate base for the purposes of interstate rate-making and division of revenues. Given these circumstances, please respond to the following:

C1. What are the projected economic effects upon the telephone company¹⁰ for the calendar year 1978 under the following scenarios for the substitution of customer-owned instruments for carrier-supplied main stations by single-line residential subscribers (assume entire loss incurred at the beginning of 1978):

- C1.1 5-10% of the carrier-owned stations.
- C1.2 25% of the carrier-owned stations.
- C1.3 50% of carrier-owned stations.
- C1.4 100% of carrier-owned stations.
- C1.5 The most likely loss anticipated by the company on the basis of market studies.

The economic effects to be calculated must include at least the following:

- (a) Change in local and toll service revenues and revenue requirements.
- (b) Change in rate of return on combined operations (state and interstate).
- (c) Monthly upward rate pressure per subscriber (magnitude and percentage).

Document the methodology of all computations as well as the specific nature of any underlying assumptions. In particular the following should be thoroughly documented:

- (a) The accounting treatment of the replaced instrument—whether it will be retired or remain in Account 231.
- (b) The imputed un-bundled revenue requirement of the replaced instrument.
- (c) The computation of any toll service revenue changes and (for those companies which settle upon the basis of cost separations studies) the changes in the state and interstate amounts of affected plant and expense accounts.
- (d) For instruments not retired: The length of time they will be allowed to remain in rate base Account 100.1.

The treatment of depreciation maintenance, and tax expense, and the subsequent impact upon total expenses.

The impact upon common expenses.

(e) For instruments which are retired: The specific retirement policy including salvage.

The impact upon depreciation, maintenance, and tax expenses.

The impact upon common expenses.

C2. What are the projected economic effects upon the telephone company where the equipment substitution is by single-line business subscribers under the scenarios set forth in Question C1 above?

C3. What accounting procedures or other safeguards would be necessary to ensure that all proper costs of optional carrier-supplied equipment are fully reflected in the rate charged?

C4. Should standard instruments, which are paid for but not received by subscribers choosing optional carrier equipment, be treated as property in use or not in use for accounting purposes?

¹⁰Holding companies should calculate these effects on an individual company and total corporate basis.

the following scenarios for the substitution of customer-owned instruments for carrier-supplied main stations by single-line residential subscribers (assume entire loss incurred at the beginning of 1978):

C1.1 5-10% of the carrier-owned stations.

C1.2 25% of the carrier-owned stations.

C1.3 50% of carrier-owned stations.

C1.4 100% of carrier-owned stations.

C1.5 The most likely loss anticipated by the company on the basis of market studies.

The economic effects to be calculated must include at least the following:

(a) Change in local and toll service revenues and revenue requirements.

(b) Change in rate of return on combined operations (state and interstate).

(c) Monthly upward rate pressure per subscriber (magnitude and percentage).

Document the methodology of all computations as well as the specific nature of any underlying assumptions. In particular the following should be thoroughly documented:

(a) The accounting treatment of the replaced instrument—whether it will be retired or remain in Account 231.

(b) The imputed un-bundled revenue requirement of the replaced instrument.

(c) The computation of any toll service revenue changes and (for those companies which settle upon the basis of cost separations studies) the changes in the state and interstate amounts of affected plant and expense accounts.

(d) For instruments not retired: The length of time they will be allowed to remain in rate base Account 100.1.

The treatment of depreciation maintenance, and tax expense, and the subsequent impact upon total expenses.

The impact upon common expenses.

(e) For instruments which are retired: The specific retirement policy including salvage.

The impact upon depreciation, maintenance, and tax expenses.

The impact upon common expenses.

C2. What are the projected economic effects upon the telephone company where the equipment substitution is by single-line business subscribers under the scenarios set forth in Question C1 above?

C3. What accounting procedures or other safeguards would be necessary to ensure that all proper costs of optional carrier-supplied equipment are fully reflected in the rate charged?

C4. Should standard instruments, which are paid for but not received by subscribers choosing optional carrier equipment, be treated as property in use or not in use for accounting purposes?

D. TECHNICAL/OPERATIONAL ISSUES

D1. *End-to-End Service.* It has been suggested that one basis for adopting the Primary Instrument Concept is that this would permit the serving telephone companies to have end-to-end responsibility for continuity of basic telephone service for single-line voice subscribers, presumably for both calling and called parties. In order to evaluate this claim, it is first necessary to determine the extent to which such end-to-end service continuity is presently assured, and the manner and extent to which this would be modified under the Primary Instrument Concept.

D1.1 It is our understanding that substantial numbers of single-line telephone subscribers are presently served by all plug-and-jack installations which permit the subscriber to disconnect all items of terminal equipment, including main or primary stations, when he does not desire to place or receive calls.

(a) How many single-line subscribers presently have plug and jack installations?

(b) What is a reasonable estimate as to how many single-line subscribers would have plug and jack installations within the next seven years?

(c) To what extent is end-to-end responsibility for continuity of service presently assured under this practice?

(d) Would the subscriber's right of disconnection be continued under the primary instrument concept?

(e) How would the primary instrument concept modify the extent to which end-to-end responsibility for continuity of service is presently assured under plug-and-jack installations?

D1.2 Customer-provided terminal equipment, including main stations, has been permitted since the post-Carterfone tariffs filed in 1969, and the connecting arrangement required during most of this period were designed only to protect the telephone network from technical harm and not to assure the functioning of the terminal device.

(a) To what extent was end-to-end responsibility for service continuity assured in the case of customer-provided main stations, calling and/or called, connected via connecting arrangements?

(b) What problems arose during this period regarding end-to-end responsibility for continuity of service where customer-provided instruments were involved?

(c) How would the primary instrument concept modify the extent to which end-to-end responsibility for continuity of service was assured under the connecting arrangements requirement?

(d) Would single-line subscribers, calling and/or called, be permitted to

use their own registered terminal equipment in lieu of carrier supplied primary instruments at all times except during telephone company testing?

(e) Could single-line subscribers make or receive calls involving terminal equipment at the other end which is exempt from the carrier-supplied requirement, such as extension telephones and multi-line equipment?

(f) Would a malfunctioning extension telephone interfere with end-to-end continuity of service in any failure modes and, if so, which ones?

D1.3 It is our understanding that a percentage of the calls originating or terminating on the facilities of private or specialized carrier systems or on the private line facilities of telephone carriers go "off-network" via the switched public telephone network. The primary instrument proposal does not purport to apply to private line services of the telephone carriers and would, of course, be inapplicable to terminal equipment used with private or specialized carrier systems.

(a) To what extent is end-to-end responsibility for continuity of service presently assured where the single-line subscriber makes/receives a call and the other party is using independently supplied terminal equipment in conjunction with private line facilities?

(b) How would the primary instrument concept modify the extent to which end-to-end responsibility for continuity of service is presently assured in the above instances?

D2. *Testing.* It has been suggested that another basis for adopting the Primary Instrument Concept would be to facilitate telephone company testing, both static and functional, of subscriber loop service. In order to determine whether a carrier-supplied terminal device is both a necessary and sufficient means for testing the continuity of subscriber loop service, we must first ascertain how telephone company testing is now performed and what alternative devices and/or test procedures are available.

D2.1 What are each of the specific static and dynamic tests that are now performed when a customer reports malfunctioning telephone service to the carrier? For each such test, please indicate the following:

(a) What action is performed by the carrier and what action is performed by the customer?

(b) What parameters or functions are evaluated quantitatively and what parameters or functions are evaluated qualitatively or in terms of perceived functions (e.g., customer lifts handset and does not receive dial tone, a qualitative test of off-hook impedance/resistance)?

(c) What parameters or functions are evaluated using central office testing equipment and what parameters or

functions are evaluated in conjunction with the terminal equipment at the customer's premises?

(d) Which of these parameters or functions could not be evaluated if the customer were instructed to unplug all terminal equipment at the premises?

(e) Which of these parameters or functions could not be evaluated if the customer were instructed to unplug all terminal equipment at the premises, and then plug in a known termination impedance or resistance (e.g., a 400 ohm resistor)?

(f) Would the answers to the above questions be any different if the customer currently has a carrier-supplied voice "connecting arrangement" and no other carrier-supplied equipment connected to the line or loop on which trouble is reported?

D2.2 What "testing device" does the primary instrument proposal contemplate in giving examples of tests which could not be performed by a testing device in lieu of a primary instrument?

D2.3 Could noise on the line, cross talk and transmission quality be measured or evaluated at the central office regardless of the supplier of the main stations?

D2.4 To what extent could the subscriber perform the same testing functions with a customer-provided instrument in conjunction with central office testing that could be performed with a carrier supplied instrument?

(a) Is there any technical distinction between a main station and an extension telephone?

(b) To what extent would primary and extension instruments be identical regardless of the supplier?

D2.5 If the primary instrument requirement is construed to apply to multiple single lines entering a single premise, would one carrier-supplied terminal device be sufficient for testing purposes?

D2.6 To what extent would the following alternatives to a carrier-supplied primary instrument satisfy one or more concerns expressed in the testing rationale for the primary instrument?

(a) An electrical network permanently connected in parallel with each telephone line to provide a known termination impedance when all equipment is unplugged (e.g., a simple resistor, a resistor in series with a capacitor).

(b) A test network connected in parallel with each telephone line during testing to provide a known termination impedance. (This network could be implemented on a testing plug which the customer can be instructed to plug in during testing, or could be automatically connected through a central-office originated test signal.)

(c) A carrier-provided ringer or bell required to be permanently connected to each telephone line, both to provide

a known termination impedance and to provide a known annunciator indication of an incoming call. (Please explain why this approach has been abandoned in the past.)

(d) Automatic testing apparatus at the central office which routinely, or at customer request, verifies proper electrical conditions on the telephone line. (Examples of such equipment which presently are in use include equipment which detects unauthorized equipment, and signal power monitoring equipment associated with central offices and with multiplex systems.)

(e) Fault isolation equipment built into the central office or accessible at a dialable telephone number to alleviate testing problems. (Such equipment is currently used by telephone company personnel to evaluate dial and ringer functions of carrier-provided instruments; presumably this could be made available to customers, on a compensatory basis, to allow for functional testing by the customer.)

D3. *Customer Diagnosis of Trouble.* A related basis for the proposed primary instrument requirement is that it would serve as a reference set to allow the customer to independently diagnose trouble responsibility.

D3.1 Does this rationale have any applicability to single-line subscriber with only one telephone set?

D3.2 To what extent would the single-line subscriber who owned more than one telephone set have a similar reference set capability?

D3.3 One of the reasons given in the industry proposal for not applying the primary instrument concept to multi-line subscriber is "because he can interchange terminal equipment between telephone lines and isolate problems to the line or the equipment." Could a single-line subscriber who owns more than one telephone set ascertain, either by himself or in conjunction with central office testing, whether one of his sets or the line was malfunctioning?

D3.4 What is the likelihood that a single-line subscriber with more than one customer-provided telephone set would experience malfunctioning in all his telephone sets at the same time?

D3.5 Is there any basis, technical or from experience, for assuming that a carrier-supplied telephone set would malfunction less often than a set obtained by the customer from an independent equipment supplier?

D3.6 The industry proposal suggests that it is not necessary to apply the primary instrument requirement to data service users because customer-provided data systems are equipped with "elaborate diagnostic capabilities."

(a) Would all terminal devices capable of use with a data jack have such capabilities (for example, terminal devices used for low speed data)?

(b) Would all terminal devices capable of use with a data jack have both the static and dynamic functional test capabilities of a primary instrument?

D4. *Repair of Malfunctioning Equipment.* The industry proposal further indicates that one of the purposes of the proposed primary instrument requirement is to permit and encourage customers to effect prompt repair of malfunctioning equipment without interruption of basic telephone service.

D4.1 What is the average interval between repair calls for carrier-supplied main stations and extension sets?

(a) for business subscribers?

(b) for residential subscribers?

D4.2 How could an interruption of basic telephone service be avoided where a single-line subscriber has only one telephone set, carrier supplied, and that set malfunctions?

D4.3 Could a single-line subscriber who owns multiple telephone sets repair one malfunctioning set without interruption of his basic telephone service?

D4.4 What additional incentives, beyond what is presently the case, would the primary instrument provide to encourage customers to have malfunctioning equipment repaired?

D4.5 The Commission recognized in Docket No. 19528 that business subscribers have a strong incentive to avoid interruption in telephone service. What is the basis for the assumption in the industry proposal that multi-line and data service subscribers are more likely than single-line business subscribers to promptly repair malfunctioning terminal equipment?

D5. *Technological Innovation.* One of the stated bases for the primary instrument proposal is to permit the orderly introduction of technological innovations in the network.

D5.1 To what extent do the carriers presently control technological innovation in terminal devices?

D5.2 Under the primary instrument concept to what extent would the carriers control technological innovation in terminal devices?

D5.3 To what extent must technological innovation in the network be compatible with the continued use of existing terminal equipment?

D5.4 Is it reasonable to anticipate that there is likely to be any substantial technological innovation in the network which would be compatible with the continued use of existing carrier-supplied terminal devices but not with the continued use of existing independently supplied terminal devices?

D5.5 Could the orderly introduction of technological innovations in the

"Second Report and Order in Docket No. 19528, 58 FCC 2d 736, at 743 (1976).

network be achieved by putting independent terminal suppliers on early notice of pending innovations, such as at the same time that suppliers to the carriers are notified of planned innovations in the network? Would the notice requirements of § 68.106 of the rules be sufficient for this purpose?

D6. *Restoration of Service in Emergencies.* The industry proposal indicates that the primary instrument concept would assure prompt restoration of basic service in emergency situations.

D6.1 How would the primary instrument proposal afford any greater assurance of basic service in emergency situations than is presently the case?

D7. *Operational.* D7.1 In the industry response to the Subcommittee staff questions it is stated that optional instruments may provide service features in addition to the equivalent minimum capabilities of standard instruments.

(a) What are the current minimum capabilities of a standard instrument?

(b) Are the present capabilities of a standard instrument subject to change or augmentation by additional service features?

(c) If so, what changes in the capabilities of standard instruments or additional service features are anticipated within the near future?

(d) What additional service features are presently available in optional instruments?

(e) What new service features are anticipated for optional instruments in the near future?

(f) Whether or not the primary instrument concept is adopted, carrier-supplied primary instruments would be subject to the outcome of Docket No. 20828 (the "Computer Inquiry"). If the primary instrument concept were adopted, should the capabilities of carrier-supplied primary instruments be further regulated by the Commission?

(g) If so, what should be the nature of such regulation?

(h) Should the Commission prescribe standards for carrier-supplied primary instruments? For example, it is our understanding that not all main stations supplied by telephone carriers are compatible with equipment used by a substantial number of those subscribers who have impaired hearing. If the primary instrument concept were to be approved, should the Commission prescribe uniform standards in this area?

D7.2 In the industry response to the Subcommittee staff questions it is stated that the distinction between basic telephone service and data ser-

"Notice of Inquiry and Proposed Rule-making in the "Computer" Inquiry, Docket No. 20828, 61 FCC 2d 103 (1976), Supplemental Notice, 64 FCC 2d 771 (1977).

vice depends on the kind of jack used. Thus, data equipment connected via standard data jacks would not be included in the primary instrument concept, whereas data equipment connected via standard voice jacks would be included.

(a) Should any distinction between basic telephone service and terminal devices, on the one hand, and data services and terminal devices, on the other, depend upon and be consistent with the outcome of the proceedings in Docket No. 20828 (the "Computer Inquiry")?

(b) Would the primary instrument concept prejudice the Commission's consideration in Docket No. 20828 of issues and proposals by parties relating to carrier-supplied terminal equipment?

E. DURATION OF THE PROPOSED REQUIREMENT

The primary instrument proposal is advanced as a transitional measure, to be re-evaluated in 7-10 years.

E1. It has been suggested that the primary instrument concept would afford an economic transition in light of the registration program. In light of the answers to questions C1 and C2 above, what would be the economic difference to the telephone companies between no primary instrument requirement and a primary instrument requirement of seven years duration?

E2. It has been further suggested that the primary instrument concept would permit the telephone companies to adjust their operation to minimize the operational impact on subscribers.

E2.1 Have there been any complaints on customer provided main stations in the last seven years?

E2.2 If so, how many and of what nature?

E3. It has been suggested that the primary instrument concept would permit the telephone companies to evaluate new technology in the provision of basic telephone service. What new technology within the next 7-10 years is anticipated that might affect the primary instrument concept?

E4. How would the concerns underlying the primary instrument proposal be met at the end of any transition period?

E5. If the primary instrument concept were adopted, should there be a "sunset" provision that the requirement would automatically expire after a certain time period?

E6. How would the primary instrument concept affect single-line subscribers who have purchased telephone sets from telephone companies?

E7. Should there be a "grandfather" provision for such telephone sets?

F. CLARIFICATION

Some aspects of the primary instrument proposal need clarification to

enable responsive public comment and full consideration of the proposal. While the telephone industry response to the Subcommittee staff questions has been helpful in clarifying some areas, several ambiguities remain.

F1.1 How should the term "multi-line service" be defined? Is the primary instrument proposal intended to apply to multiple single lines entering a single premise, not terminated in a key telephone or PBX system? For example:

(a) Would the proposal include multiple line terminated on multiple single line telephone?

(b) Would two lines terminated on a single telephone with a turn button (e.g., a 510 set) be included in the proposed requirement?

(c) Would the proposed requirement apply to multiple lines terminated on a so-called "convenience key telephone" with no common equipment?

(d) How would the proposal treat a subscriber who has another line to a secretarial service on the premises?

(e) Would the proposed requirement apply to multiple lines entering a single premise, some terminated on a key or PBX system and some terminated otherwise (e.g., on single line instruments or instruments used solely for data or for voice and data)?

(f) Would the proposed requirement apply to specialized network services which do not offer both origination or reception of telephone calls, for example:

WATS services?
One-way trunks and loops?
Extended area outgoing-only lines?
FX and one-way CCSA services?

F1.2 How should the term "data service" be defined?

The industry response to the Subcommittee staff questions indicates that the distinction between basic telephone service included in the proposed requirement and excluded data service turns on whether data equipment is connected via a standard voice jack or a standard data jack.

(a) Can a standard telephone set be connected via a standard data jack?

(b) Can a carrier optional instrument with minimum capabilities equivalent to a standard instrument be connected via a standard data jack?

(c) Would a single-line subscriber to basic telephone service be excluded from the proposed primary instrument requirement if he plugged his telephone instrument into a standard data jack?

F2. The industry proposal states that the primary instrument concept would require "the telephone company to provide, as part of single line basic telephone service, one telephone company owned and maintained instrument associated with the central office and loop plant serving the subscriber."

F2.1 What is meant by an instrument "associated with the central office and loop plant?"

F3. The illustrative tariff states (Attachment C, p. 1 of 2) that: "Extension telephones, whether provided by the telephone or the customer, may be subject to an extension service charge to cover the costs of inside wiring and other requirements in addition to the monthly telephone instrument rate."

F3.1 What "other requirements" would be covered by this charge?

IV. PLEADINGS

11. Turning now to the relief requested by CBEMA, we decline to adopt the suggestion that the primary instrument proposal be summarily rejected. Our action of November 22, 1977, declining to stay the inclusion of main stations in the registration program, will preserve to the public the benefits of the registration program while this inquiry is proceeding. In the circumstances, we believe it appropriate to follow procedures which will afford all interested persons an opportunity to express their views on the primary instrument proposal.

12. CBEMA further asserts that the proponents of the primary instrument concept should be required to clarify and document their proposal prior to any proceeding in order to permit meaningful comments by interested persons. While the questions set forth above are to some extent indicative of ambiguities in the telephone industry's proposal, we believe that the comment and reply procedures specified in paragraph 16 below will afford an adequate and orderly means of achieving clarification and informed public participation. The telephone industry is in a position to address these questions in their comments, and other interested persons will have an opportunity to raise any additional questions. The industry responses and additional questions contained in the comments can be fully treated in reply comments. In the event of important new matter in the reply comments, we can order another round of comments either at the request of any party or on our own motion. We see no substantial prejudice to interested persons in this procedure, and will accordingly deny CBEMA's request.

13. With respect to the request by the telephone industry that we proceed immediately with proposed rule making looking toward adoption of the suggested rule amendments attached to its letter of November 1, 1977, we believe that such action would be premature. The precise nature and full implications of the primary instrument concept are presently unknown and require clarification before we would be in a position to make any preliminary determination as to whether the industry proposal,

or some variation thereof, offers sufficient promise of public benefit to warrant proposed rule making. The primary instrument proposal potentially would have widespread and important ramifications for the public, and these may vary according to the exact nature of the proposal and the manner in which it might be implemented. Moreover, some aspects of the industry proposal appear to raise questions of lawfulness which should be examined before any policy determination, even of a preliminary nature, could appropriately be made. We will pursue this matter expeditiously to the extent consonant with the thorough exploration that is essential to a sound public interest decision. If rule making is found warranted at the conclusion of this inquiry, the groundwork laid in this proceeding should serve to shorten the rule making procedure.

14. Finally, we note that the primary instrument concept has been recently addressed by the New York Public Service Commission (NYPSC) in its Opinion No. 77-17 issued on October 25, 1977. The portion of the NYPSC Opinion dealing with the primary instrument concept is appended hereto (Appendix C¹³) for the convenience of those commenting.

V. INQUIRY PROCEDURES

15. This inquiry is instituted pursuant to the authority contained in sections 2(a), 3 (a) and (b), 4 (i) and (j), 201(b), 202(a), 218, 219(a), 403, 409(e), 412, and 602 of the Communications Act.

16. Interested persons may file comments on or before March 28, 1978 and reply comments on or before May 9, 1978. Interested persons who feel unable to make meaningful comments pending further clarification by the telephone industry may defer their participation until the reply comment stage. Upon consideration of the reply comments the Commission may, by further order, provide an opportunity for additional comments if we conclude that further procedures are necessary to or would assist our determinations.

17. Pursuant to the applicable procedures set forth in Section 1.51 of the Commission's rules, an original and 9 copies of all statements, briefs or comments shall be furnished the Commission. All comments received in response to this Notice will be available for public inspection in the Docket Reference Room in the Commission's Offices in Washington, D.C. In reaching its determinations in this proceeding, the Commission may also take into account other relevant material

¹³ Appendix C filed as a part of the original document.

before it, in addition to the specific comments invited by this Notice.

FEDERAL COMMUNICATIONS
COMMISSION,¹³
WILLIAM J. TRICARICO,
Secretary.

APPENDIX A
HOUSE OF REPRESENTATIVES, SUBCOM-
MITTEE ON COMMUNICATIONS OF THE
COMMITTEE ON INTERSTATE AND FOR-
EIGN COMMERCE,
Washington, D.C., October 3, 1977.

Hon. RICHARD E. WILEY,
Chairman,
Federal Communications Commission,
Washington, D.C.

DEAR CHAIRMAN WILEY: As you know, the Subcommittee on Communications is now completing hearings on national telecommunications policy. We are taking this opportunity to comment on one subject that was discussed at the recent hearings on domestic common carrier policy.

We are aware of the major opportunities for innovation which the Commission's terminal equipment policies have brought about. We believe that many parties now recognize the desirability of a competitive terminal equipment marketplace. We believe the advantages to the consumers of this nation are extensive.

As is the case with any policy change of this magnitude, however, the transition will inevitably involve difficult situations for some telephone companies and subscribers. It is a recognition of this aspect of the transition that leads us to ask that the Commission give expeditious consideration to a proposal advanced by the telephone industry known as the "Primary Instrument Concept." A copy of the proposal is attached for your consideration.

We have not reviewed every detail of the industry's proposal. However, it would appear to have a number of transitional advantages. Primarily, these involve allowing time for companion regulatory adjustments to be made before the Commission's policy in Docket 19528 goes fully into effect.

We are aware of the decision by the Supreme Court which allows for full implementation of the decision in Docket 19528 at an early date. Therefore, we believe it is appropriate to ask that you begin expeditious consideration of this proposal.

Thank you for your cooperation.

Sincerely,

LOUIS FREY, Jr.,
Ranking Minority Member.
LIONEL VAN DEERLIN,
Chairman.

PRIMARY INSTRUMENT CONCEPT

1.0 The Primary Instrument Concept requires the telephone company to provide, as a part of single line basic telephone service, one telephone company owned and maintained instrument associated with the central office and loop plant serving the subscriber. This concept is predicated on the belief that it is in the public interest for one serving entity to be responsible and accountable for complete basic telephone service in those situations where consumers enjoy only single line communications service.

1.1 The Primary Instrument Concept is premised on the fact that telephone service is a service which allows the user to communicate with any other user. Telephone service is not any one device or item of equip-

¹³ Commissioner Lee absent.

ment or even an integration of different facilities, but a complete operating telecommunications system. Without maintaining this relationship of all the piece parts, the traditional concept of end to end service ceases to exist. Furthermore, without providing basic telephone service, the telephone companies can no longer provide a complete quality service. Service standards which heretofore have been used by consumers to measure the quality of telephone service will be meaningless since accountability is fragmented.

1.2 The Primary Instrument Concept eliminates some of the fundamental problems inherent in the FCC Registration Program by requiring that a telephone company primary instrument be included with basic telephone service (see definition Paragraph 3.0). All other terminal equipment used as an adjunct to basic telephone service can be obtained from any source at the discretion of the customer so long as such equipment complies with applicable FCC Rules and Regulations covering terminal equipment. Thereby, customer choice can be promoted in the single line market without releasing the telephone companies from the responsibilities and accountability for basic telephone service.

1.3 The objectives of the Primary Instrument Concept are:

To make one serving entity responsible and accountable for providing complete basic telephone service for single line voice subscribers.

To assure continuity of such telephone service.

To facilitate testing, both static and functional.

To serve as a reference set to allow the customer to independently diagnose trouble responsibility.

To permit and encourage customers to effect prompt repair of malfunctioning equipment without interruption of basic telephone service.

To permit orderly introduction of technological innovations in the network.

1.4 Review of the Primary Instrument Concept.

Based on today's technology, the Primary Instrument Concept is the only viable approach to achieve the objectives and benefits discussed herein. However, future technological developments may produce other alternatives that should be carefully weighed against these objectives.

Therefore, in seven to ten years, it may be appropriate for Congress to direct a review of the objectives identified in Paragraph 1.3, and whether the Primary Instrument Concept is still the best method for achieving the public interest objectives.

2.0 Primary Instrument Concept Defined.

The Primary Instrument Concept as stated in Paragraph 1.0 requires the telephone company to provide, as a part of a single line basic telephone service, one telephone company owned and maintained instrument associated with the central office and loop plant serving the subscriber. The telephone company will make available to the customer a standard or other instrument in connection with basic telephone service. (See Attachment A for discussion of why the Primary Instrument Concept does not apply to multi-line and data service.)

3.0 Basic Telephone Service Defined.

Basic telephone service is telephone service for single line business and residence customers which provides the capability for

originating calls to a defined local calling area, for receiving incoming calls, and for access to and from the toll network. Such service includes central office switching and the access line from the telephone company central office up to and including the primary instrument on the customer's premises.

4.0 Rate and Tariff Considerations.

4.1 Basic Telephone Service.

Under the Primary Instrument Concept the basic service rate includes a standard instrument.

4.2 Optional Instruments.

The customer has the option of substituting for the standard instrument another item of telephone company provided terminal equipment, provided said substitute has, at a minimum, capabilities equivalent to the primary instrument. All optional instruments, i.e., other than the standard instrument, will be provided at rates recognizing their relevant costs.

4.3 In situations where the customer elects to use an optional instrument as the primary instrument:

4.3.1 The rate for basic telephone service will continue to apply. In addition to the rate for basic service, the customer will pay the same rate for the optional instrument used as the primary instrument as he would pay if the optional instrument were used as an extension or discretionary instrument.

4.3.2 Where a customer chooses the optional instrument, no credit allowance will apply for the non-provision of the standard instrument.

4.3.3 Customers utilizing an optional instrument as a primary instrument may elect to have the telephone company provide them the standard instrument.

These pricing concepts are illustrated further in a hypothetical tariff, Attachment B, and through illustrative examples of tariff applications, Attachment C.

5.0 The FCC Registration Program Divides Service Responsibility.

The FCC Registration Program fragments the responsibility for basic telephone service. Under Part 68 of the Rules, basic telephone service consists of two parts: (1) The network, which is made up of switching and transmission facilities and an access line from these facilities to the telephone or other terminal equipment on the customer's premises, and (2) the terminal equipment or the telephone itself. If any of these parts malfunction, service to one or more subscribers may be affected and therefore must be corrected by the responsible party.

6.0 Operational Benefits of the Primary Instrument Concept to the User.

Significant benefits of the Primary Instrument Concept to the user include:

1. The maintaining of complete basic telephone service.

2. Provision of a means for the customer to diagnose certain kinds of trouble without requiring telephone company or other outside testing assistance. It affords the customer the opportunity to test his own instruments by unplugging and interchanging them with the telephone company primary instrument. By having the primary instrument as a "reference set," the customer can often determine the origin of certain kinds of trouble and identify repair responsibility, thereby avoiding a charge for an unnecessary service visit.

3. Encouraging customers providing their own instruments to disconnect malfunctioning sets and have them repaired, since the customer can depend on having a continuing basic service provided by the telephone company. By having the basic telephone service, there is an incentive to the customer to report trouble with his basic service promptly.

4. Assurance of a basic service compatible with network facilities even during periods of changes or innovations in the operating environment. Customers will be able to obtain the benefits of innovations in network services without undue delay since a telephone company primary instrument compatible with the network would always be provided.

5. Assurance that at least one ringer on the customer's premises is identified with the type and frequency of the ringing signal generated by the local telephone company's central office equipment. Part 68 of the rules does not provide adequate assurances. For example, in one independent company alone, there are four basic types of ringing technology used. Each type may be manufactured tuned to any one of a number of frequencies (similar to a CB radio with a single channel), but once tuned it will respond only to the appropriate signal. Table 1 of §68.312(b) of the Registration Rules lists a total of 13 different types of ringers, not all of which may ring in all telephone company areas. Thus, the customer has no assurance that his telephone set will be compatible (i.e., will ring) when he moves from one exchange to another.

6. Assurance of prompt restoration of basic service in emergency situations, such as floods or other natural disasters, since the telephone company would have responsibility for restoration of all the components of basic service.

7.0 Primary Instrument Facilitates Testing.

The Primary Instrument makes it possible to perform tests that facilitate timely repair service at the lowest cost. The testing of telephone service today is a two-step process:

(1) Static electrical tests of the pair of wires (access line) to the subscriber's premises, and (2) dynamic functional tests of the operation of the telephone and its interaction with the network (e.g., dialing, ringing, voice transmission). Both static and dynamic tests incorporate the use of a telephone instrument.

7.1 Static electrical tests are done remotely by the telephone company for the purpose of testing electrical integrity of the pair of wires from the central office to the ringer in the telephone. Static tests are not tests of the actual ability of the telephone to interact with the telephone network. Only dynamic tests, which require the presence of a reference set, can determine if the total service is functioning properly. Attachment D contains additional details on typical telephone service repair and testing procedures.

7.2 The primary telephone instrument not only provides for recognizable terminations but also for functional tests, the result of which eliminates the potential for countless unnecessary repair visits annually. For example, an unrecognizable termination in connection with a trouble report test on a good access line would appear from the test results as "open line" rather than "Test OK," and an unnecessary dispatch would be

made. Each year approximately 15 to 20 percent of over 60 million Customer Trouble Reports are closed out as Test OK.

7.3 There have been several proposals that a test device would eliminate this need for a primary instrument. Tests that are performed using a testing device are static tests and can only identify electrical faults on a pair of wires (grounds, open lines, moisture problems, etc.). A test device does not allow for functional type tests for noise on the line, cross talk, proper signaling, transmission quality, etc., which are necessary to determine if a customer has working telephone service.

7.4 Thus, a Telephone Company provided primary instrument at the customer's premises not only minimizes ambiguities in the results of remote static tests of the access line, it also (a) allows remote functional tests of signaling, transmission, etc., (b) avoids false dispatches, (c) provides a means for customers to diagnose certain kinds of repair responsibility without outside assistance, and (d) maintains the Telephone Company accountability for basic telephone service, not just the access line.

8.0 Inside Wire Under the Primary Instrument Concept.

The Telephone Industry is of the view that the telephone companies should provide all inside wiring.

8.1 The basic reason for the Industry's position on this issue can perhaps best be expressed by a direct quote from the FCC's Second Report and Order released March 18, 1976, in Docket 19528, which states:

"Wiring is passive. It cannot, of itself, generate any signals. It can, however, become connected with earth ground or power lines through inadequate insulation, or marginally adequate insulation and improper installation. . . . Even if we were to make the leakage current requirements applicable to intra-system wiring (which would assure adequate insulation), there still would be no assurance of adequate separation from power lines at the time of installation of such adequately-insulated wiring. Thus, we are faced with a quandary: the common equipment may be perfectly acceptable without protective circuitry, and yet leave the telephone network vulnerable to the vagaries of installation of wiring. . . ." (Emphasis added.) 58 FCC 2d 736 at 745 (1976).

8.2 Even though it is not recommended by the telephone industry or allowed under the FCC Registration Program, if customers were eventually allowed to provide their own inside wire beyond the primary instrument outlet, the Primary Instrument Concept would continue to be a viable concept. In such cases the telephone company would provide the inside wiring to a designated, primary jack into which the customer could plug any one of the telephones on his premises. If a trouble was experienced with the service, the customer could diagnose the problem by disconnecting all his own equipment and connecting the telephone company primary instrument to the primary jack. If the telephone company instrument works, the trouble would be in the customer provided equipment.

The only known exception is the Rochester Telephone Co. which operates entirely in the state of New York. Rochester operates less than one-half of one percent of the telephones in the United States.

THE PRIMARY INSTRUMENT CONCEPT WILL NOT APPLY TO MULTI-LINE VOICE AND DATA SERVICE

The assurance of a viable end-to-end service with the ability to transmit and receive information, rather than limiting such assurance solely to the integrity of the line facility, is as important to the multi-line customer as it is to the single-line customer. But, by the very nature of the business environment and the fact that the customer has multiple lines, the customer inherently has the capability to use another line if one line should fail. Also, the business communications environment has historically recognized the need for back-up in case of total system failures. Currently, PBXs are equipped to provide, at the customer's option, a transfer arrangement, on which one or more of the telephones can be connected to a separate line. This allows the making or receiving of telephone calls to the independent of the function of the PBX in case of PBX failure.

Although the Primary Instrument Concept is beneficial for isolating troubles for single-line service, it is not necessary for multi-line service. The multi-line customer or his repair agent inherently has this diagnostic ability without the need for a telephone company primary instrument because he can interchange terminal equipment between telephone lines and isolate problems to the line or the equipment. In addition, business customers with multi-line service rely heavily on their telephones for business purposes, are more sophisticated, and generally assure that their equipment is in proper working order. Because of this, there is less necessity to stimulate the business customer to properly maintain or repair malfunctioning telephones. Also, business equipment vendors have an incentive to assure basic compatibility with the telephone company facilities, proper installation of complex communication equipment, and provide standard terminations recognizable to the telephone company because they generally are responsible for the maintenance of the equipment they install.

The Primary Instrument Concept does not apply to data services for many of the same reasons indicated above for multi-line service. In addition, many customer-provided data systems are equipped with elaborate diagnostic capabilities.

ATTACHMENT B
THE TELEPHONE CO."ILLUSTRATIVE" GENERAL EXCHANGE TARIFF
SECTION —

3. BASIC TELEPHONE SERVICE

3.1 General.

(1) Basic telephone service is telephone service for single line business and residence customers which provides its users with the capability for originating calls to a defined local calling area, for receiving incoming calls, for access to and from the toll network and includes appropriate maintenance.

(2) Basic telephone service includes central office switching and access line facilities from the telephone company central office up to and including the primary instrument (currently a 500 Type instrument) on the customer's premises.

(3) Customers may elect to substitute an optional instrument for the standard instrument with basic service as long as the substitute has, at the minimum, capabilities equivalent to the primary instrument. Charges as they appear in Section 3.4 of this Tariff will apply for these optional instruments. There will be no credit allowance for non-provision of the standard instrument.

(4) Where the customer elects to have the telephone company provide an instrument other than the standard instrument as the primary instrument, the customer can elect to take the standard instrument subject to applicable service connection charges.

(5) There is no monthly charge for the standard instrument as it is included in the rate for basic telephone service.

3.2 Wiring and jacks.

The telephone company shall provide the necessary wiring and jack outlets on the customer's premises for connection of the telephone instrument to be used with Basic Exchange Telephone Service. The telephone company shall also provide additional wiring and jack outlets ordered by the subscriber for use in connecting additional telephone company provided terminal equipment or subscriber provided terminal equipment that may be connected under Part 68 of the FCC Rules and Regulations. Charges for wiring and jack outlets are set forth in Section — of the tariff.

3.3 Statewide rate schedules.

The following statewide schedule of rates is applicable to Basic Telephone Service:

3.4.2 OTHER TELEPHONE INSTRUMENTS (NO NONRECURRING CHARGES)

Dial pulse signaling	
Standard set.....	\$.70
Trimline.....	1.85
Princess.....	1.70
Outdoor set.....	3.50
Candlestick.....	2.50
Chestphone.....	2.85

EXAMPLES OF THE PROCESS OF DIAGNOSING
TROUBLE RESPONSIBILITIES

Customer testing

Telephone company provides all wiring

If a customer has both telephone company and customer-owned instruments and experiences difficulty receiving dial tone when he lifts the telephone handset of the customer-owned equipment, the problem could be caused by either a malfunction in his owned equipment or the telephone company facilities. Each owned set is connected to the primary jack until it is verified whether or not the owned sets are functioning properly. With the primary instrument the customer can identify whose equipment is at fault. The step-by-step process would proceed as follows:

Leaving the primary instrument connected, he would disconnect the instruments he owns and attempt to make a call with the primary instrument. If he can successfully complete the call, he can assume that the basic service is properly functioning and that the trouble is in his equipment. If he cannot make a successful call with the primary instrument, he would report the problem to the telephone company for repair.

Wiring provided by telephone company and customer

If the customer is allowed to provide his own inside wiring, the Primary Instrument Concept is still necessary for trouble diagnosis. This is illustrated in the following hypothetical example:

Trouble on a service with customer provided inside wiring could be caused by the telephones, a fault in the inside wire, or the telephone network. To determine if it is the telephone company's responsibility, the customer would disconnect all of his owned telephones and inside wire, leaving the primary instrument connected to the primary jack. If the primary instrument worked without any of the customer provided equipment connected, the problem is somewhere in the customer's equipment. To determine where, the customer could follow this step-by-step approach:

First, disconnect the primary instrument and, one at a time, connect each of his telephones into the primary jack and make a functional test. By reconnecting, in turn, each customer-provided inside wire and associated jack and making a functional test with the primary instrument, the particular portion of the inside wire with the trouble condition could be determined. If any one of them does not work with the primary jack, then it can be assumed to be defective and should be repaired. If all of the telephones worked, the problem is someplace in the customer-provided inside wiring and not in the telephones. An appropriate repairperson could then be summoned. While the defective wire was being repaired, service would continue through the primary jack and telephone company wiring.

Telephone company testing

In today's repair service bureau operation, after the customer contacts a service attendant and reports the type of trouble being experienced (e.g., can't call out, my bell doesn't ring, the phone is dead, etc.), initially static tests are made on the access line to the customer's premises, and on a portion of the central office equipment associated with

NOTICES

the customer's line. In order to perform static tests, the access line must have a termination that is electrically recognizable at the test center, i.e., will cause a meter to react in a prescribed manner. This reaction on the test meter enables the testperson to determine if both wires are continuous up to the customer's telephone instrument. This is possible because the test meter readings from measurements of an access line with an instrument connected to it are different from measurements on an unterminated line. Telephone company supplied instruments all have a termination with characteristics which permit this difference to be easily identified by the tester. Therefore, the presence of the primary instrument provides the proper recognizable termination to enable static tests of the access line. Results of the access line test allow the telephone company to determine if there is electrical continuity to the customer's premises. If the access line test indication shows a fault and the customer has some of his own equipment in service, the customer would be contacted and requested to disconnect his equipment from the line. (The customer normally leaves a contact number if he reports the trouble from a location other than his home.) Then a second test of the line is made with the customer's equipment disconnected. A comparison of these static tests with and without the customer's equipment connected to the line will determine if the fault is in the portion of the service supplied by the telephone company or the customer.

If there is continuity to the customer's premises, the tester will call the customer and interactively perform further diagnosis involving functional tests using the telephone instrument. Comparison of the functional tests results with only the customer's telephone connected and with only the primary instrument connected will determine which equipment is in trouble. If the trouble is in the telephone company equipment, the case is not closed until the customer is called back to confirm that the service is now functioning properly (e.g., the phone rings properly, hearing and transmission are satisfactory and that the line (service) is free of any noise).

To determine causes of troubles that are identified as being somewhere between the customer's premises and the central office, just as a telephone instrument is necessary to make a functional test from the customer's premises, the repairman uses a portable telephone instrument to make functional tests at various points, e.g., at the point where the customer's line connects to the pole, at various locations on the outside plant cable, etc. When the trouble reappeared, he would then know the trouble existed in the portion of the service between the previous test point and the current test point, and he would proceed to fix the problem now that it was isolated.

APPENDIX B

UNITED TELECOMMUNICATIONS, INC.,
Washington, D.C. October 31, 1977.

HON. LIONEL VAN DEERLIN,
Chairman,
Subcommittee on Communications,
Washington, D.C.

DEAR CHAIRMAN VAN DEERLIN: Following the House Subcommittee's hearings on Domestic Common Carrier Policies on September 28, D. Wayne Peterson, an industry spokesman on the terminal equipment panel, was requested by the Subcommittee

staff to answer twenty-one questions pertaining to the primary instrument concept. Accordingly, I am enclosing the telephone industry's answers to those questions.

The telephone industry will be happy to provide you with any additional information or clarification.

Sincerely,

JOHN M. LOTHSCHEUTZ.

INDUSTRY RESPONSE TO SUBCOMMITTEE
QUESTIONS ON THE PIC

1. We understand that the PIC is a transitional and temporary approach to the regulation of the interconnection of customer-provided equipment to the facilities of telephone common carriers. Is that correct?

The Primary Instrument Concept (PIC) is transitional. It is transitional in the sense that it may be appropriate for Congress or the FCC to review the concept in 7-10 years to determine whether the Primary Instrument Concept is still the best method for achieving the public interest objectives listed in par. 1.3., page 2 of the industry paper statement.

1. (ii) Why was this period chosen?

The 7-10 year period was selected as a reasonable period of time to evaluate the concept, to permit a review of the role of telephone common carriers in the provision of basic telephone service, to permit telephone companies to adjust their operations in such a manner so as to minimize the operational and economical impact upon subscribers, and to permit the evaluation of new technology and the relationship of that technology in the provision of basic telephone service.

2. Is it correct that the PIC:

(a) Applies only to connections to the public switched telephone network (DDD). Yes, including the local exchange network as well as the intercity DDD network.

(b) Does not apply to private line services. It does not apply to private line services.

(c) Does not apply to switched data services, e.g., Switched Dataphone Digital Service, Transaction Network Service, Bell Data Network?

See answer to question 9. (b).

3. Is it correct that the P.I. is always a telephone (voice) instrument?

The Primary Instrument Concept entitles a subscriber to one basic voice grade telephone instrument as part of basic telephone service. Anything other than a basic 500 type rotary dial or touchtone instrument used by a subscriber as a primary instrument would be charged for as any other optional terminal device.

If technical developments require a change at a further date, the telephone industry will notify the FCC of its intent to change the basic set.

4. (a) Will the P.I. be required to be actually connected (plugged-in) all the time?

The primary instrument will be required to be connected during periods of testing conducted by the telephone company. At other times the primary instrument may be connected or disconnected at the customer's discretion. Subscribers will be encouraged to leave the instrument connected.

(b) Some of the time?

See answer to question 4. (a).

(c) None of the time?

See answer to question 4. (a).

5. Can the subscriber disconnect the P.I. and use his own instrument or equipment instead of the P.I.?

Yes, if the customer desires to do so. However, the primary instrument must be connected during telephone company testing.

6. Will the P.I. always be plug equipped/jack connected per Part 68 of the FCC Rules?

Yes, except for those covered under the grandfather provision of Part 68 of the FCC's Rules.

7. If the telephone company customer premises equipment becomes subject to Part 68 of the FCC Rules:

(a) Will the P.I. be registered?

Yes, except those covered under the grandfather provision of Part 68 of the FCC's Rules.

(b) Will the "optional" instruments be registered?

See answer to question 7. (a).

(c) Will other terminal equipment be registered?

All equipment will be registered per Part 68 of the FCC's rules.

8. The reference in Paragraph 2 to a "Standard" instrument is understood to mean a P.I. which per the illustrative tariff is a 500 type telephone instrument. Is this correct?

Yes, the basic set offered by the telephone company tariff is the 500 type set (rotary or touchtone dial). See also, answer to question 3.

9. (a) Is it correct that "optional instruments" which can be substituted for the P.I. are only telephone (voice) instruments, as called out in Paragraph 3.4.2 of the Illustrative Tariff?

No. Optional instruments may provide service features in addition to those provided by a P.I. See also, answer to question 4. (a).

(b) For instance, a data device, even if it has capabilities equivalent to a P.I. could not be substituted for a P.I.?

Data equipment connected via the standard data jacks specified in Part 68 of the FCC's Rules or connected to multi-line service, is not included in PIC.

However, data equipment connected via the standard voice jacks specified in Part 68 of the FCC's Rules and connected to single line service, is included in PIC. Such equipment could qualify as an optional instrument under PIC if it provides capabilities equivalent to the basic set. See also, answer to question 4. (a).

10. Would not, or could not, the same operational benefits and testing capabilities of Paragraph 6.0 and 7.0 be realizable if the P.I. was at the customers option, either telephone company provided as described or a customer provided instrument meeting the registration requirements of Part 68 and containing the minimum capabilities as specified by the telephone company for a P.I.?

No, Part 68 does not require telephone instruments to operate functionally in the manner necessary to meet quality service standards on an ongoing basis. As to testing, a static test could be performed if Part 68 required that an identifiable termination be made part of the telephone instrument. However, this would not permit the functional tests that are necessary to assure working telephone service.

11. Paragraph 4.2 states optional instruments (telephones) other than the standard P.I. will be provided at rates recognizing their relevant costs:

(a) Define relevant costs.

The relevant costs are the full direct costs plus a contribution.

(b) Is this full cost recovery?

Yes, for the optional instrument.

(c) Will any reduction in cost occur by virtue of a "credit" for the cost of the P.I. not provided?

NOTICES

We do not plan to give a credit for a basic set not provided. To do so would raise the question of competitive advantage in pricing optional instruments.

12. The FCC Rules at Section 68.106, Notification to Telephone Company, require that the customer give prior notice to the telephone company of the FCC Registration and Ringer Equivalence. If the subscriber provided the PI, which was registered, in conformance with the notification requirements of the FCC's Part 68 Rules, would not this provide a "recognizable termination?"

See answer to question 10.

13. What is the definition of "single-line" service; and what are examples?

The term "single line" as used in the PIC paper is defined as that class of exchange service offered to residence and business customers in which one central office voice-grade access line and at least one non-key telephone instrument is provided by the telephone company at the customer's premises.

Examples. Basic telephone service to residences (non-party line). Basic telephone service to business premises (non-party line), such as bakeries, barber shops, etc., where one access line and at least one telephone set is provided.

14. What is the definition of "multi-line" service; and what are examples?

The term "multi-line" as used in the PIC paper is defined as that class of exchange service offered to residence and business customers in which central office access lines are provided to the customer's premises to connect PBX systems, key systems, ACD systems, etc.

Examples. C.O. lines terminating in key systems, PBX trunks.

15. For the purposes of the PIC, what is the classification of:

(a) Two telephone lines on the same premises, but not connected for access by a single instrument?

Two single line services requiring two primary instruments.

(b) A single telephone line that has only equipment used for data transmission?

See answer to question 9. (b).

(c) A single telephone line that with a terminal or terminals usable for data transmission and voice transmission but it is clear that the data use predominates, for example, where the handset is integrated into, a W.E. model 103 dataset?

See answer to question 9. (b).

(d) A single telephone line that has terminal equipment usable for data or voice transmission, but it is not clear that the data use predominates?

See answer to question 9. (b).

(e) A single telephone line that has terminal equipment usable for data or voice transmission, but it is clear that that data use is only occasional?

See answer to question 9. (b).

16. If such alternate data-voice applications or occasional use data applications would come under the PIC:

(a) What provision would be made to provide an FCC standard data interface (transparent) for connection of either customer or carrier provided data equipment behind the P.I.?

See answer to question 9. (b).

(b) What provisions would be made for coordinated control e.g., exclusion key) between the primary instrument and the data equipment?

All the wiring configurations specified in the FCC's Rules Part 68, Subpart F will be provided.

(c) Would additional charges (such as an optional instrument without credit for the standard instrument) be required to obtain this control feature discussed in subparagraph (b)?

The tariff rate, according to local tariff, will apply for additional features, e.g., an exclusion key between the primary instrument and the data equipment.

17. In many data applications a data auxiliary set is used in conjunction with the data set (modem) to provide voice coordination, testing, etc., features. Is it correct to assume that the DAS instrument when provided as part of a data application is likewise exempted from the PIC?

It is difficult to answer this question precisely because of the several possible wiring configurations of combinations of data modems and auxiliary sets, etc. The connection is exempt from PIC if connected through data jacks specified in Part 68 of the FCC's Rules or if a multi-line service. See also answer to question 9. (b).

18. A voice capability and a data capability are sometimes combined into a single terminal instrument:

(a) Is this permissible under the PIC?

See answer to question 9. (b).

(b) If it is possible:

(i) How does such an instrument connect to the transmission services?

See answer to question 9. (b).

(ii) Can the customer provide such an instrument?

See answer to question 9. (b).

(iii) Would the customer-provided and carrier-provided instrument connect to the transmission service in the same manner?

See answer to question 9. (b).

(iv) Would the rate for the carrier device be based on all costs, without a credit for the cost of the PI not provided?

Yes, if the primary instrument applies. See also answer to question 11. (c).

19. How would charges be based (computed) for services which are excluded from the PIC concept (i.e., multi-line voice and single and multi-line data)? Provide sample tariff for such services.

This question is not relevant to the PIC and therefore is not applicable.

20. Would standard data jacks, as specified under Subpart F or Part 68 of the FCC Rules governing the Equipment Registration Program, be provided for single and multi-line services for connection of data equipment provided by customer or carriers?

Yes, to the extent provided in the Rules. 21. It is generally recognized that the telephone industry introduces changes in the network on a carefully planned basis. Consideration is given the interworkings of the independent telephone companies and avoiding premature obsolescence of existing plant investment. Provisions are made to permit old and new technologies to co-exist for protracted periods. In the last sentence of Paragraph 1.3 and Section 6.0, Paragraph 4 addresses the introduction of new technology in the network being facilitated by a telephone company provided instrument:

(a) Does this reflect any changes in philosophy regarding the introduction of new technology as it might affect basic telephone service?

The introduction of the PIC does not reflect any changes in the philosophy of introducing new technology.

(b) Are there any changes presently under consideration which would affect the basic telephone instrument?

We are not aware of any changes presently being considered that would affect the basic telephone instrument's ability to be used as a primary instrument. This does not mean, however, that technology will not result in a redesign or modification of the basic instrument.

(c) Assuming a change was planned which would require changes or modification to the primary instrument or customer-provided equipment, what steps would be taken to insure timely dissemination of information to basic telephone service subscribers and manufacturers of customer-provided equipment?

If technology should require modification to the primary instrument or to customer-provided equipment, notification to customers would be made as required in Part 68, Subpart B, § 68.110 of the FCC's Rules and manufacturers and the FCC will be provided similar information.

[FR Doc. 78-3698 Filed 2-10-78; 8:45 am]

[6210-01]

FEDERAL RESERVE SYSTEM

BANCORP CORP.

Proposed Acquisition of Franklinton Assurance Co.

Bancor Corp., Columbus, Ohio, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Franklinton Assurance Co., Phoenix, Ariz. Notice of the application was published on November 18, 1977, in the Columbus Dispatch, a newspaper circulated in Columbus, Ohio, and on November 29, 1977, in the Record Reporter, a newspaper circulated in Phoenix, Ariz.

Applicant states that the proposed subsidiary would engage in the activity of acting as underwriter of credit life and credit accident and health insurance directly related to extensions of credit by Bancor Corp. and its subsidiaries. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a

statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Cleveland.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than February 21, 1978.

Board of Governors of the Federal Reserve System, February 6, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

FIRST INTERNATIONAL BANCSHARES, INC.

Acquisition of Bank

First International Bancshares, Inc., Dallas, Tex., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of the successor by merger to First State Bank & Trust Co. of Houston, Houston, Tex. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than March 5, 1978.

Board of Governors of the Federal Reserve System, February 6, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

NATIONAL BANCSHARES CORP. OF TEXAS

Acquisition of Bank

National Bancshares Corp. of Texas, San Antonio, Tex., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of Northwest Bank of Commerce National Association, San Antonio, Tex. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than March 5, 1978.

Board of Governors of the Federal Reserve System, February 6, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on February 7, 1978. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before March 3, 1978, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, U.S. General Accounting Office, Room 5106, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

INTERSTATE COMMERCE COMMISSION

The Interstate Commerce Commission (ICC) requests clearance of revisions to Form OP-OR-9, Application for Motor Carrier Certificate or Permit; Form OP-OR-11, Application for Brokerage License; Form OP-FF-10, Application for Freight Forwarder Permit; and Form OP-WC-20, Application for Water Carrier Certificate or Permit. Changes to the application forms are made necessary by recent procedural revisions adopted formally by the Commission.

In Ex Parte No. 55 (Sub. No. 25), decided December 1, 1977, the ICC

adopted final rules which require each applicant to submit, in addition to that information previously called for, (1) a current balance sheet and income statement, (2) a list delineating equipment and pertinent terminal locations, (3) a brief statement concerning the feasibility of the proposed operation, and (4) a certification of familiarity with applicable safety regulations. Additionally, each applicant for motor contract carrier authority (Form OP-OR-9) must describe how its proposed service qualifies as contract carriage under section 203(a)(15) of the Interstate Commerce Act. Each supporting witness must include in its certification of support (1) a brief description of the transportation services currently employed and (2) the extent to which the proposed service, if authorized, would be used. These rules are intended to eliminate, in unopposed proceedings, the necessity for further evidentiary submissions and to expedite issuance of operating authorities.

In Ex Parte No. MC-100 (Sub. No. 2), decided January 9, 1978, the Commission adopted final rules eliminating the requirement that each applicant (for Motor Carrier Certificate or Permit, Form OP-OR-9) serve upon the designated official of a State in or through which a proposed operation is to be performed, a copy of its application form. Applicant will be required to serve upon the designated official of its domicile State a copy of the caption form which it currently is required to prepare. The purpose of this rule is to save applicants the time and expense associated with copying and mailing little used information.

In an order entitled "Notice Regarding Style Changes for Caption Summaries Prepared by Parties for Publication in the FEDERAL REGISTER," decided January 9, 1978, the Commission adopted mandatory style changes. The principal change effected by this order is the use of two-letter State abbreviations similar to those currently employed by the Postal Service. The purpose of this change and other major changes (abbreviations) required by the order was to economize on the length of caption summaries thereby saving applicants additional time and expense.

The ICC estimates that Form OP-OR-9 will be filed by approximately 16,000-18,000 applicants annually and preparation time for the form will average 10 hours; Form OP-OR-11 will be filed by approximately 750-1,500 applicants annually and preparation time will average 10 hours; Form OP-FF-10 will be filed by approximately 750-1,500 applicants annually and preparation time will average 10 hours; and Form OP-WC-20 will be filed by approximately 750-1,500 applicants and preparation time will average 10 hours. The Commission states

that each application may lead to a formal proceeding before the Commission.

NORMAN F. HEYL,
Regulatory Reports
Review Officer.

[4110-35]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

MEDICAL ASSISTANCE PROGRAMS

Revocation of Supplement D of Handbook of Public Assistance Administration

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Final notice.

SUMMARY: This final notice revokes Handbook of Public Assistance Administration Supplement D, applicable to the medical assistance program under Title XIX of the Social Security Act. Material in Supplement D has been superseded or has become outdated; consequently, it no longer represents official HEW policy.

EFFECTIVE DATE: February 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Margaret O. Schnoor, 202-245-1960.

SUPPLEMENTARY INFORMATION: Notice of proposed revocation of Handbook of Public Assistance Administration Supplement D, was published on July 25, 1977, in the FEDERAL REGISTER (42 FR 37849). Supplement D contains certain requirements, interpretations, informational materials, and instructions for the administration of the medical assistance program under Title XIX of the Social Security Act (Medicaid).

On August 11, 1975 (40 FR 33697), Parts I, II, and III, and Supplements A, B, and C of the Handbook were revoked. All material in those parts and supplements had been either superseded by regulations published in 45 CFR Chapter II, reissued as instructions or interpretations, or outdated by statutory revisions.

Supplement D was not revoked at that time because of one provision which was still in effect and had not been superseded or reissued. Section D-5840, Pooled Funds, of Part D-5800, Federal Financial Participation in Medical Assistance Programs, allowed a public assistance agency to establish, maintain, and operate a pooled fund for medical care. The States that used a pooled fund have since closed them; the last as of September 30, 1976.

DISCUSSION OF COMMENTS

Comments on the notice were received from one legal services corpora-

tion which opposed the revocation, and one State agency which supported it.

The legal services office pointed out that there may be provisions in Supplement D that have not been fully superseded or reissued in regulations or instructions and that are still relied on to protect the interests of recipients. For example, Supplement D required the State to insure that all recipients in a locality had access to services generally available in the geographic area; one measure of availability was that participation of each provider group in the Medicaid program should be about two-thirds of the total number in that profession in the State. The commenter believes that the regulation on this subject (42 CFR 450.30(a)(7), previously 45 CFR 250.30(a)(7)) is too vague to be useful and must be supported by issuance of numerical or percentage requirements.

Supplement D did contain, in addition to basic requirements, explanations of the intent of the requirements and suggested methods for carrying them out. In considering material for transfer to regulations, the Department recognized that much of the Supplement was interpretative and guideline in nature. Consequently the general rule followed was that only the requirements themselves were to be reissued as regulations; the remaining material was to serve as explanatory, guide and historical information.

Therefore, in order to clarify this situation, the Department believes it necessary to and hereby does revoke Supplement D, Handbook of Public Assistance Administration.

(Section 1102, 49 Stat. 647 (42 U.S.C. 1302).)
(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program.)

NOTE.—The Health Care Financing Administration has determined that this document does not require preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Dated: November 22, 1977.

WILLIAM D. FULLERTON,
Acting Administrator, Health
Care Financing Administration.

Approved: February 7, 1978.

JOSEPH A. CALIFANO, JR.,
Secretary.

Office of Education

ADVISORY COUNCIL ON DEVELOPING INSTITUTIONS

Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Adviso-

NOTICES

SEATTLE, WASH.

ry Committee Act (Pub. L. 92-463), that the next meeting of the Advisory Council on Developing Institutions will be held March 10, 1978, from 9 a.m. to 4 p.m. in Room 3000, Federal Office Building 6, 400 Maryland Avenue SW., Washington, D.C.

The Advisory Council on Developing Institutions was established by Title III of the Higher Education Act of 1965, as amended. The Council is governed by the provisions of Part D of The General Education Provisions Act and of the Federal Advisory Committee Act (Pub. L. 92-463). The Council shall assist the Commissioner in identifying the characteristics of developing institutions through which the purpose of Title III may be achieved, and in establishing the priorities and criteria to be used in making grants under section 304(a) of that Title.

The meeting of the Council shall be open to the public.

The Proposed agenda includes:

- (1) The final preparation of the Annual Report for 1978.
- (2) Other administrative matters and related business.

Records shall be kept in the form of the Council's Annual Report. Copies of the Annual Report will be available at a later date to the public at the office of the Director of the College and University Unit, BHCE, located in Room 3036, ROB-3, 7th and D Streets SW.

Signed at Washington, D.C., on February 8, 1978.

PRESTON VALIEN,
Office of Education
Delegate to the Council

[4110-12]

Office of the Secretary

Evaluation of the Appropriateness of the Federal Interagency Day Care Requirements (FIDCR)

Public Meetings

FEBRUARY 7, 1978.

The Department of Health, Education, and Welfare will hold three public meetings to ensure broad participation in the discussion of issues to be contained in the FIDCR Appropriateness Report which is required to be sent to Congress on April 1.

Three full day meetings are scheduled for:

WASHINGTON, D.C.

Monday, February 27, 9:30 a.m. to 5:30 p.m., Room 425-A, Hubert H. Humphrey Building, 200 Independence Avenue S.W.

DALLAS, TEX.

Wednesday, March 8, 9:30 a.m. to 5:30 p.m., 1100 Commerce Street, Room 7823.

Tuesday, March 14, 9:30 a.m. to 5:30 p.m., Room 380, Federal Building, 915 Second Avenue.

The format for each of the three meetings will be the same: HEW will present the key issues covered in the draft of the Report, e.g., the characteristics of the day care market; the characteristics of existing Federal, State, and local regulations of the day care market; the effects of the FIDCR on cost, the child, and the family; and the alternative Federal roles in the regulation of day care which may be deemed appropriate. The presentation will be followed by a discussion by the panelists representing persons and organizations interested in day care. Time will be allowed in the afternoon session for questions and comments from the general public.

THE APPROPRIATENESS REPORT

Section 2002(a)(9) of Title XX of the Social Security Act directed the Secretary of Health, Education, and Welfare to submit to Congress "an evaluation of the appropriateness of the requirements imposed by (FIDCR), together with any recommendations he may have for modification of these requirements." Submission of this report must precede any new modification of the FIDCR by HEW.

Following its submission to Congress, copies of the Report will be available on request from the Office of Planning and Evaluation, Room 416-E, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201.

For further information on the meetings contact Mr. William Prosser, Room 416-E, or Dorothy Sortor Stimpson, Room 415-F, Office of Planning and Evaluation, Hubert Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201.

Dated: February 7, 1978.

HENRY AARON,
Assistant Secretary for Planning
and Evaluation, Department
of Health, Education, and Welfare.

[4210-01]

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D-78-498]

ASSISTANT SECRETARY FOR COMMUNITY PLANNING AND DEVELOPMENT ASSISTANT SECRETARY FOR HOUSING

Delegation of Authority

AGENCY: Department of Housing and Urban Development.

ACTION: Delegation of authority.

SUMMARY: The Secretary is delegating to the appropriate Assistant Secretaries of the Department of Housing and Urban Development the responsibility and authority with respect to the urban homesteading program pursuant to provisions of the Housing and Community Development Act of 1974.

EFFECTIVE DATE: September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Betsy B. Tibbs or William Tatum, Deputy Director, Administrative Support Division, U.S. Department of Housing and Urban Development, Room 7238, Washington, D.C. 20410, area code 202-755-6186.

SUPPLEMENTARY INFORMATION: Pursuant to Title VIII, section 810 of the Housing and Community Development Act of 1974, the Department of Housing and Urban Development has administered an "Urban Homesteading Demonstration Program" on a demonstration basis. The experience and accomplishments attained by the Department in the demonstration program have led the Secretary to change urban homesteading activities from a demonstration to a nationwide, operating program to be made available to all qualifying localities.

To effect this change, this delegation of authority confers upon the appropriate Assistant Secretaries of the Department of Housing and Urban Development the power and authority of the Secretary with respect to the urban homesteading program, pursuant to Title VIII, section 810 of the Housing and Community Development Act of 1974 (42 U.S.C. 5301). Accordingly, the Secretary delegates authority as follows:

SECTION A. *Authority delegated.* The Assistant Secretary for Community Planning and Development shall exercise the power and authority of the Secretary with respect to the urban homesteading program, pursuant to section 810 (b), (c), (d), and (e) of the Housing and Community Development Act of 1974. The Assistant Secretary for Housing shall exercise the power and authority of the Secretary with respect to the urban homesteading program pursuant to section 810 (a), (f), and (g) of the Housing and Community Development Act of 1974.

SEC. B. *Authority excepted.* There is excepted from the authority delegated under section A the power to sue and be sued.

SEC. C. *Authority to redelegate.* The Assistant Secretary for Community Planning and Development is authorized to redelegate to employees of the Department any of the authority delegated to him under section A, except rules and regulations and not excepted under section B. The Assistant Secretary for Housing is authorized to rede-

legate to employees of the Department any of the authority delegated to him under section A and not excepted under section B of this delegation.

(Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).)

Issued at Washington, D.C., February 3, 1978.

PATRICIA ROBERTS HARRIS,
Secretary, Department of
Housing and Urban Development.

[4310-02]

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

CONFEDERATED TRIBES OF THE SILETZ RESERVATION

Election of Interim Council

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 230 DM 2.

Pursuant to Pub. L. 95-195, notice is hereby given that on Saturday, February 18, 1978, qualified Siletz tribal voters will elect a nine-member Siletz Interim Council.

Voting will take place between the hours of 10 a.m. and 7 p.m. The polling place will be located at the Siletz Grange Hall, Siletz, Ore.

Qualified voters unable to vote in person may vote by absentee ballot. Written requests for absentee ballots must be received no later than 4:30 p.m., February 8, 1978, by the Area Director, Vincent Little, Portland Area Office, Bureau of Indian Affairs, P.O. Box 3785, 1425, Northeast Irving, Portland, Ore. 97208, Attention: Tribal Operations. Qualified voters may also obtain absentee ballots by presenting themselves in the Office of the Area Director no later than 4:30 p.m., February 8, 1978.

In order to be counted, all absentee ballots must be received in the Office of the Area Director, Portland Area Office, no later than 4:30 p.m. on February 17, 1978.

FORREST J. GERARD,
Assistant Secretary,
Indian Affairs.

NEW ORLEANS: OUTER CONTINENTAL SHELF OFFICE

Availability of Outer Continental Shelf Official Protraction Diagrams

1. Notice is hereby given that, effective with this publication, the following OCS official protraction diagrams, last approved or revised on the dates

indicated, are on file and available, for information only, in the New Orleans Outer Continental Shelf Office, Bureau of Land Management, New Orleans, La. In accordance with Title 43, Code of Federal Regulations, these protraction diagrams are the basic record for the description of mineral and oil and gas lease offers in the geographic areas they represent.

OUTER CONTINENTAL SHELF OFFICIAL PROTRACTION DIAGRAMS

Description	Latest approval or revision date ¹
Tex. Map No. 8	
La. Map No. 12 (composite)—Sabine Pass area	Mar. 7, 1977.
NH 18-4—Mobile	Dec. 21, 1977.
NI 18-10	July 5, 1977.
NJ 18-11—Virginia Beach	June 22, 1977.

¹Changes in CFR notations are not considered as revisions.

2. Copies of these protraction diagrams may be purchased for \$2 each from the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, Suite 841, Hale Boggs Federal Building, 500 Camp Street, New Orleans, La. 70130. Checks or money orders should be made payable to the Bureau of Land Management.

3. In 42 FR 4906, dated January 26, 1977, as corrected in 42 FR 6646, dated February 3, 1977, there was published a composite list of all official protraction diagrams then covering the Gulf of Mexico OCS. In 42 FR 14184, dated March 15, 1977, there was published a composite list of all official protraction diagrams then covering the Atlantic OCS off the coasts of North Carolina, South Carolina, Georgia, and Florida. These two lists, when taken in connection with the list set out above, constitute a complete list of all official protraction diagrams now covering said areas.

JOHN L. RANKIN,
Manager, New Orleans Outer
Continental Shelf Office.

[Wyoming 62565]

WYOMING

Order Providing for Opening of Public Lands

FEBRUARY 2, 1978.

1. In exchanges of lands made under the provisions of section 8 of the Act of June 28, 1934, as amended; 43 U.S.C. 315g (1970), the following described lands have been reconveyed to the United States:

SIXTH PRINCIPAL MERIDIAN, WYOMING
T. 24 N., R. 78 W.,

Sec. 8, all;
T. 21 N., R. 91 W.,
Sec. 5, lots 1, 2, 3, 4, S $\frac{1}{2}$ N $\frac{1}{2}$ and S $\frac{1}{2}$;
Sec. 7, lots 1, 2, 3, 4, E $\frac{1}{2}$ W $\frac{1}{2}$ and E $\frac{1}{2}$;
Sec. 9, W $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$,
S $\frac{1}{2}$ NE $\frac{1}{4}$ SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ and
S $\frac{1}{2}$ SE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 17, all;
Sec. 19, lots 1, 2, 3, 4, E $\frac{1}{2}$ W $\frac{1}{2}$ and E $\frac{1}{2}$;
Sec. 21, W $\frac{1}{2}$ and W $\frac{1}{2}$ E $\frac{1}{2}$;
Sec. 29, all;
Sec. 31, lots 1, 2, 3, 4, E $\frac{1}{2}$ W $\frac{1}{2}$ and E $\frac{1}{2}$;
Sec. 33, all;
T. 21 N., R. 92 W.,
Sec. 5, lots 1, 2, 3, 4, S $\frac{1}{2}$ N $\frac{1}{2}$ and S $\frac{1}{2}$;
Sec. 7, lots 1, 2, 3, 4, E $\frac{1}{2}$ W $\frac{1}{2}$ and E $\frac{1}{2}$;
Sec. 9, all;
Sec. 17, all;
Sec. 19, lots 1, 2, 3, 4, E $\frac{1}{2}$ W $\frac{1}{2}$ and E $\frac{1}{2}$;
Sec. 21, all;
Sec. 29, all;
Sec. 31, lots 1, 2, 3, 4, E $\frac{1}{2}$ W $\frac{1}{2}$ and E $\frac{1}{2}$;
Sec. 33, all;
T. 21 N., R. 93 W.,
Sec. 1, lots 1, 2, 3, 4, S $\frac{1}{2}$ N $\frac{1}{2}$ and S $\frac{1}{2}$;
Sec. 13, all;
Sec. 25, all;
T. 42 N., R. 107 W.,
Sec. 13, N $\frac{1}{2}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$.

The areas described aggregate 13,520.85 acres.

2. The lands are located in Carbon, Sweetwater, and Fremont Counties. They have values for watershed, grazing, wildlife, and recreation.

3. The mineral rights in the lands were not exchanged. Therefore, the mineral status of the lands is not affected by this order.

4. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the above described lands will at 10 a.m. on March 10, 1978, be open to application, petition, and selection under the public land laws. All valid applications received at or prior to 10 a.m. on March 10, 1978 shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

5. Inquiries concerning the lands should be addressed to the Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyo. 82001.

DANIEL P. BAKER,
State Director.

National Park Service

GOLDEN GATE NATIONAL RECREATION AREA
ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of Golden Gate National Recreation Area Advisory Commission will be held at 9:30 a.m. (PDT) on Saturday, March 4, 1978, at Tamalpais High School Student Center, Mill Valley, Calif.

The Advisory Commission was established by Pub. L. 92-589 to provide for

the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service system in Marin and San Francisco counties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Secretary
Mr. Ernest Ayala
Mr. Richard Bartke
Mr. Fred Blumberg
Ms. Daphne Greene
Mr. Peter Haas, Sr.
Mr. John Jacobs
Ms. Gimmy Park Li
Mr. Joseph Mendoza
Mr. John Mitchell
Mr. Merritt Robinson
Mr. Jack Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The major agenda item will be a National Park Service planning staff presentation of proposed recommendations for Marin County portions of Golden Gate National Recreation Area, Point Reyes National Seashore, and Transportation within 100,000 acres of National Park Service land.

This meeting is open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact Jerry L. Schober, Acting General Manager, Bay Area National Parks, Fort Mason, San Francisco, Calif. 94123, telephone 415-556-2920.

Minutes of the meeting will be available for public inspection by April 5, 1978, in the Office of the General Manager, Bay Area National Parks, Fort Mason, San Francisco, Calif.

Dated: February 1, 1978.

JOHN H. DAVIS,
Acting Regional Director,
Western Region.

[4310-70]

HISTORY AREAS COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the History Areas Committee of the National Park System Advisory Board will be held on Friday, March 10, 1978, commencing at 9 a.m. in Room 8068, at the Department of the Interior, 18th and C Streets NW., Washington, D.C.

The purpose of the Advisory Board is to advise the Secretary of the Interior on matters relating to the National

Park System and the administration of the Historic Sites Act of 1935. The History Areas Committee considers, and advises on, matters relating to the eligibility of sites being proposed for designation as national historic landmarks, and on proposals for the establishment of historic units of the National Park System.

The purpose of this meeting is to consider potential national historic landmarks studied under the National Survey of Historic Sites and Buildings as follows:

1. A partial revision of two subthemes on Alaska, "Alaska Aboriginal Culture," and "Alaska History."
2. A segment of the subtheme "Architecture."
3. Special studies of the following properties:

- (a) Kent State, May 4, 1970, site, Kent, Ohio.
- (b) Central of Georgia Railroad Shops, Savannah, Ga.
- (c) Falls of the Chattahoochee Hydroelectric Development, Columbus, Ga.
- (d) Jackson Ward Historic District, Richmond, Va.
- (e) Toltec Mounds Site, vicinity of Scott, Ark.
- (f) Soapstone Ridge, vicinity of Atlanta, Ga.
- (g) Indian Knoll, vicinity of Paradise, Ky.

The formal recommendations of the Committee will be made to the National Park System Advisory Board at its meeting on April 17-19 in Washington, D.C. No formal action of the Secretary of the Interior will be sought until after the Advisory Board has considered the recommendations of its History Areas Committee and acted thereon.

The meeting will be open to the public. However, facilities and space to accommodate members of the public are limited and persons will be accommodated on a first-come, first-served basis. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting, or who wish to submit written statements, may contact Robert M. Landau, Assistant for Advisory Boards and Commissions, National Park Service, Washington, D.C. at 202-343-8953.

Minutes of the meeting will be available for public inspection 8 to 10 weeks after the meeting in Room 3013, Interior Building, Washington, D.C.

Dated: February 7, 1978.

ROBERT M. LANDAU,
Assistant for Advisory Boards
and Commissions, National
Park Service.

FEBRUARY 7, 1978.

[FR Doc. 78-3872 Filed 2-10-78; 8:45 am]

[4310-70]

OVERSIGHT COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Oversight Committee of the National Park System Advisory Board will be held on Thursday, March 9, 1978, commencing at 10:30 a.m. in Room 3119 at the Department of the Interior, 18th and C Streets NW., Washington, D.C.

The purpose of the Advisory Board is to advise the Secretary of the Interior on matters relating to the National Park System and the administration of the Historic Sites Act of 1935.

The purpose of the meeting of the Oversight Committee is to consider items to be recommended to the Director of the National Park Service for inclusion on the agenda of the regular business meeting of the Advisory Board to be held on April 17-19 in Washington, D.C.

The meeting will be open to the public. However, facilities and space to accommodate members of the public are limited and persons will be accommodated on a first-come, first-served basis. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting may contact Robert M. Landau, Assistant for Advisory Boards and Commissions, National Park Service, Washington, D.C., at 202-343-8953.

Minutes of the meeting will be available for public inspection 8 to 10 weeks after the meeting in Room 3013, Interior Building, Washington, D.C.

Dated: February 7, 1978.

ROBERT M. LANDAU,
Assistant for Advisory Boards
and Commissions, National
Park Service.

FEBRUARY 7, 1978.

INTERNATIONAL TRADE
COMMISSION

CERTAIN SOFT-SIDED LUGGAGE

Order Deferring Consideration of Complaint

A complaint was filed with the U.S. International Trade Commission on December 27, 1977, and amendments were filed on January 13, 1978, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of American Luggage Works, Inc., 91 Main Street, Warren, R.I. 02885. The complaint, as amended, alleges that unfair methods of competition and unfair acts exist in the importation of

certain soft-sided luggage into the United States or in their sale by reason of the alleged coverage of such articles by U.S. Trademark Reg. No. 1,039,677 and the passing off of such luggage as luggage of American Luggage Works, Inc. The complaint, as amended, alleges that such unfair methods of competition and unfair acts have the effect or tendency to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

Complainant filed a petition on December 12, 1977, with the Commissioner of Customs under section 526 of the Tariff Act of 1930 (19 U.S.C. 1526) based upon its U.S. Trademark Reg. No. 1,039,677, which is also the subject of the complaint filed with the Commission. Section 526 makes it unlawful to import into the United States merchandise of foreign manufacture if it bears a trademark owned by a U.S. citizen or corporation without written consent of the owner of the trademark.

Having considered the complaint, as amended, the U.S. International Trade Commission on February 7, 1978, ordered,

That the parallel proceedings pending before the Commissioner of Customs constitute exceptional circumstances within the meaning of section 210.12 of the Commission's Rules of Practice and Procedure, as amended (41 FR 17710, April 27, 1976), warranting deferral of consideration of whether to institute an investigation pursuant to section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337). Consideration therefore is deferred for two months from the date of this order.

By order of the Commission.

Issued: February 8, 1978.

KENNETH MASON,
Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 77-32]

FREDERICK M. BLANTON, M.D., FORT
LAUDERDALE, FLA.

Hearing

Notice is hereby given that on September 29, 1977, the Drug Enforcement Administration, Department of Justice, issued to Frederick Marsh Blanton, M.D., Fort Lauderdale, Fla., an Order to Show Cause as to why the Drug Enforcement Administration should not deny his application dated April 6, 1977, for registration as a Researcher in Schedule I, drug code 7370.

Notice is also hereby given that on September 29, 1977, the Drug Enforcement Administration, Department of Justice, issued to Frederick Marsh Blanton, M.D., Fort Lauderdale, Fla., an Order to Show Cause as to why the Drug Enforcement Administration should not revoke his Certificate of Registration, DEA Number AB 4875881.

Thirty days having elapsed since the said Orders to Show Cause were received by the Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held commencing at 9:30 a.m. on Friday, February 17, 1978, in the Hearing Room 1210, Drug Enforcement Administration, 1405 I Street, NW., Washington, D.C. At the close of that day's session, the hearing will be recessed until Wednesday, February 22, 1978, and will re-convene on that day at 10 a.m. in the U.S. Tax Court Courtroom, Room 1524, Federal Building, 51 Southwest First Avenue, Miami, Fla.

Dated: February 6, 1978.

PETER B. BENSINGER,
Administrator,
Drug Enforcement Administration.

[Docket No. 77-19]

PHENMETRAZINE QUOTAS—1977

Western Fher Laboratories, a division of Fher Corp., Ltd. ("Western Fher") has been the only holder of an individual manufacturing quota for phenmetrazine and its salts since phenmetrazine was placed on Schedule II under the controlled Substances Act, 21 U.S.C. 801, et seq. (the "Act"), in October 1971, and was the sole applicant for a 1977 manufacturing quota.

Ciba-Geigy Corp. ("Ciba-Geigy") is the exclusive manufacturer of bulk phenmetrazine hydrochloride into finished dosage form. Ciba-Geigy has been the only holder of a procurement quota for phenmetrazine since the drug was placed on Schedule II under the Act and was the sole applicant for a 1977 phenmetrazine procurement quota.

Boehringer Ingelheim, Ltd. ("Boehringer"), either directly or through its agent, Obergfel Brothers, Vernon, Calif., is the sole primary distributor of phenmetrazine hydrochloride in finished dosage form, which dosage forms are sold under the trade name "Preludin."

Western Fher distributes phenmetrazine only to Ciba-Geigy, which

holds an effective certificate of registration issued by the Drug Enforcement Administration ("DEA"), authorizing the company to handle Schedule II controlled substances. Western Fher makes no sales of phenmetrazine to retail pharmacies or similar retail outlets.

Ciba-Geigy distributes phenmetrazine only to Boehringer and makes no sales of phenmetrazine to retail pharmacies or similar retail outlets.

Boehringer distributes phenmetrazine to retail pharmacies only through wholesale drug outlets. Some direct sales are made by Boehringer to private and nonprofit hospitals and clinics; city, county, and state hospitals and clinics; and federal government facilities. Some phenmetrazine is also distributed as samples to requesting physicians.

On September 23, 1976, the Administrator of DEA proposed an initial 1977 aggregate production quota for the basic class phenmetrazine in the amount of 2,126,000 g. (2,126 kg.) expressed in terms of anhydrous base.¹ This proposal was published in the FEDERAL REGISTER in accordance with the applicable regulations (41 FR 42965 (September 29, 1976)).

On October 29, 1976, pursuant to the applicable provisions of the Act and its implementing administrative regulations, as well as in accordance with the Administrative Procedure Act, Western Fher and Boehringer, jointly and through their counsel, Arnold & Porter, submitted objections, a request for an explanation and a request for hearing in response to the initial proposed 1977 aggregate production quota for the basic class phenmetrazine.

On November 4, 1976, the then Acting Administrator of DEA established an interim 1977 aggregate production quota for phenmetrazine in the amount of 2,126,000 g. (2,126 kg.). This proposal was published in the FEDERAL REGISTER (41 FR 49873 (November 11, 1976)).

On November 5, 1976, DEA informed Western Fher of its 1977 interim manufacturing quota for phenmetrazine, 2,126 kg., and informed Ciba-Geigy of its 1977 procurement quota for phenmetrazine, 2,952 kg. Both companies were advised that these quotas were subject to adjustment.

Between November 11, 1976, and April 25, 1977, a number of meetings and discussions took place during which representatives of DEA and counsel from Arnold & Porter, by then also representing Ciba-Geigy, exchanged views and information con-

cerning the interim 1977 quotas for phenmetrazine. During this process, Arnold & Porter (respondents' counsel) submitted additional written comments and documentary materials in support of the arguments of Western Fher, Boehringer and Ciba-Geigy (respondents).

On April 25, 1977, the Administrator of DEA proposed that the 1977 aggregate production quota for phenmetrazine be established at 2,900,000 g. (2,900 kg.). This proposal was published in the FEDERAL REGISTER (42 FR 21860 (April 29, 1977)).

On May 31, 1977, respondents, through their counsel, submitted objections and a request for hearing with respect to: "the proposed final 1977 aggregate phenmetrazine production quota"; "the proposed final 1977 individual phenmetrazine manufacturing quota for Western Fher"; and "the proposed final 1977 phenmetrazine procurement quota for Ciba-Geigy."

On June 15, 1977, the Administrative Law Judge issued an order for prehearing statements, established the caption of this proceeding, and assigned to it Docket No. 77-19.

On July 11, 1977, the Administrator of DEA established the final 1977 aggregate production quota for phenmetrazine in the amount of 2,900,000 g. (2,900 kg.). That final order was published in the FEDERAL REGISTER (42 FR 36570 (July 15, 1977)).

On September 23, 1977, the Administrator of DEA published in the FEDERAL REGISTER a notice that the hearing in this matter would be held at 9:30 a.m. on October 3, 1977, in the hearing Room, Room No. 1210, Drug Enforcement Administration, 1405 I Street NW., Washington, D.C. The Administrative Law Judge heard testimony and received documentary evidence in this matter on October 3, 4, 5, 6, 7, 25, 26, and 27, 1977.

On September 20, 1977, the Administrative Law Judge issued a prehearing ruling in this matter, pursuant to 21 CFR 1316.55, in which he set forth the issues as follows:

A. Whether the 1977 aggregate production quota for the basic class phenmetrazine, presently established at 2,900,000 grams, in terms of anhydrous base (42 FR 36570 (July 15, 1977); 42 FR 21860 (April 29, 1977)), reasonably satisfies the requirements of 21 U.S.C. 826: in light of an alleged situation of continued, chronic and widespread diversion of this substance into illicit channels; in view of the legislative history of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.); and upon consideration of the Congressional findings and declarations made therein (21 U.S.C. 801);

B. Whether the 1977 individual manufacturing quota issued to Western Fher Laboratories, a division of Fher Corporation, Ltd., for the basic class phenmetrazine, presently established at 2,900,000 grams, in terms of anhydrous base, reasonably satisfies the requirements of 21 U.S.C. 826: in

light of an alleged situation of continued, chronic and widespread diversion of this substance into illicit channels; in view of the legislative history of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.); and upon consideration of the Congressional findings and declarations made therein (21 U.S.C. 801);

C. Whether the 1977 procurement quota issued to Ciba-Geigy Corp. for the basic class phenmetrazine, presently established at 2,952,000 grams, in terms of anhydrous base, reasonably satisfies the requirements of 21 U.S.C. 826: in light of an alleged situation of continued, chronic and widespread diversion of this substance into illicit channels; in view of the legislative history of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.); and upon consideration of the Congressional findings and declarations made therein (21 U.S.C. 801);

D. Can the DEA demonstrate that the proposed 1977 quotas for phenmetrazine provide for 'the estimated medical . . . needs of the United States and for the establishment and maintenance of reserve stocks' as required by law?

1. Will the total amount of phenmetrazine available for sale by Boehringer be sufficient to meet legitimate demand for the product?

2. Does the estimate of demand provided by the national Prescription Audit ('NPA') accurately reflect all legitimate usage of phenmetrazine?

3. Will the proposed quotas provide for adequate reserve stocks as required by law?

4. Will the proposed quotas provide for 'an adequate and uninterrupted supply' of phenmetrazine to meet legitimate demand, as required by DEA regulations?

E. Are reduced 1977 quotas warranted to prevent diversion of phenmetrazine from legitimate channels?

1. Has DEA accurately represented the degree of alleged phenmetrazine abuse and diversion?

2. Can the alleged abuse and diversion of phenmetrazine be appreciably reduced by drastic supply reduction?

3. Is supply reduction more effective in combating abuse and diversion than alternative methods of control?

F. By what method did DEA compute its proposed 1977 quotas for phenmetrazine and does this method rationally fulfill the statutory requirements? (ALJ-8, pp. 1-3.)²

DEA and the Respondents, through agreement of counsel, submitted to the Administrative Law Judge prior to the hearing a document entitled Joint Stipulations of Fact consisting of fifty-eight numbered paragraphs which address subject matter relevant to this record. The Administrative Law Judge designated this document as ALJ-10.

Proposed Findings of Fact and Conclusions of Law were filed with the Administrative Law Judge by the parties

²For the purpose of designating specific references to the record, the following abbreviations are employed: "ALJ-1" identifies documents incorporated into the record by the Administrative Law Judge; "G-1" identifies exhibits admitted at the request of the Government; and "R-1" identifies exhibits admitted at the request of the Respondents.

on November 18, 1977. The Administrative Law Judge submitted his Opinion and Recommended Ruling, Findings of Fact, Conclusions of Law and Decision to the Administrator on December 9, 1977.

The Administrator adopts the Administrative Law Judge's Findings of Fact, with editorial modifications, as set forth hereafter.

FINDINGS OF FACT

PHENMETRAZINE HYDROCHLORIDE

1. Phenmetrazine is classified by the DEA as a Schedule II controlled substance.

2. Phenmetrazine was originally classified under the Act as a Schedule III controlled substance.

3. On April 20, 1971, the Bureau of Narcotics and Dangerous Drugs recommended that phenmetrazine be moved from Schedule III to Schedule II and that change was accomplished by FEDERAL REGISTER notice dated October 18, 1971, and published on October 28, 1971.

4. Under the applicable statutory provisions, a Schedule II controlled substance is one which has a currently accepted medical use in treatment in the United States or a currently accepted medical use with severe restrictions but has a high potential for abuse which could lead to severe psychological or physical dependence.

5. Phenmetrazine, as Preludin, is approved by the Food and Drug Administration (FDA) for use in treatment of simple exogenous obesity in conjunction with dietary management.

6. Preludin is not indicated for use in treatment for any other condition.

7. Exogenous obesity in a given individual is the result of excessive caloric intake by that individual. It is not the result of conditions such as hormonal disorders.

8. Preludin produces a tolerance in individuals to whom it is administered. If tolerance occurs, administration of Preludin should be discontinued.

9. It is generally accepted that Preludin is useful only as a short-term adjunct to a regimen of diet control. By "short term" is usually meant a period of about eight to twelve weeks. This period should be used to inculcate principles of good dietary control. At the end of this period, the physician should generally discontinue the Preludin.

QUOTAS

10. Pursuant to the Act and authority delegated by the Attorney General of the United States, DEA establishes individual procurement, individual manufacturing, and aggregate production quotas for Schedule I and Schedule II controlled substances.

11. The aggregate production quota establishes the maximum net amount

of the basic generic class of a controlled substance which legally may be manufactured by all bulk manufacturers of the drug in the United States.

12. An individual manufacturing quota establishes the maximum amount of the basic generic class which may be produced by each firm that synthesizes or manufactures bulk quantities of the basic substance from raw material.

13. A procurement quota establishes the maximum amount of the basic generic class which may be procured by each finished dosage form manufacturer from bulk manufacturers or through lawful importation.

14. Since Western Fher is the sole manufacturer of phenmetrazine in bulk form, the aggregate production quota for this drug has been equal to the individual production quota assigned to Western Fher in 1975, 1976, and 1977.

15. It is the general policy of DEA to set initial manufacturing and procurement quotas during the year prior to the year for which the quotas are set, and then to adjust these quotas during the quota year on the bases of (1) medical and scientific needs for the year in question, as estimated by FDA, (2) the final sales of the distributor for the year prior to the quota year, and (3) the inventory of the quota applicant at the beginning of the quota year, including the inventory of a primary distributor if one exists.

16. The purpose of quotas under the Act is to limit the production and distribution of those controlled substances with the highest degree of abuse potential, those in Schedules I and II, to that quantity of each of such substances which is needed for legitimate medical and scientific purposes.

17. DEA considers the quota setting mechanism to be an integral part of its closed distribution system.

18. The actual calculations which form the basis of all quotas established by DEA are made by members of the staff of DEA's Office of Compliance and Regulatory Affairs.

DEA'S REGULATORY SYSTEM

19. The Office of Compliance and Regulatory Affairs performs a variety of functions under the Act's regulatory provisions: (a) The setting of quotas; (b) the coordination of administrative activities relative to the scheduling of substances; (c) the maintenance of DEA's system of annual registration of all manufacturers, distributors, and dispensers of controlled substances; (d) the coordination of DEA's system of field investigations, conducted on a cyclical basis at the manufacturer-distributor level, and on a complaint basis at the retail level, of legitimate handlers of controlled substances; and (e) the monitoring, by

computer, of the production and distribution of Schedule I and II controlled substances and Schedule III narcotics from their manufacture to their distribution to the retail level.

20. The mission of the Office of Compliance and Regulatory Affairs is to maintain a closed distribution system to prevent the diversion of lawfully manufactured or imported controlled substances from legitimate commerce into illicit channels.

21. DEA's Office of Enforcement cooperates with the Office of Compliance and Regulatory Affairs in criminal investigations of DEA registrants, but this activity is limited because DEA devotes only about two percent of its agent work force of 2,000 agents, plus an additional thirteen agents assigned to diversion investigative units in twelve states, to so-called "criminal compliance" cases.

22. DEA applies this relatively small amount of its resources to criminal compliance activities because, among other things, the locus of most of the diversion of controlled substances from licit to illicit channels is at the retail level (pharmacies, physicians, etc.) of the distribution system.

23. State and local law enforcement agencies are better suited to conduct criminal investigations into instances of diversion (through forged prescriptions and/or prescriptions issued promiscuously or for a nonmedical purpose) of controlled substances at the retail level than is DEA, due in part to the fact that there are over 500,000 DEA registrants at the retail level.

24. DEA has executed memoranda of understanding with forty-five states and the District of Columbia in which DEA has agreed to assume primary responsibility for policing manufacturers and distributors and the individual state agencies have agreed to assume primary responsibility for policing the retail level.

DIVERSION AND ABUSE OF PHENMETRAZINE

25. In November 1976, Senator Gaylord Nelson of Wisconsin, Chairman of the Subcommittee on Monopoly of the Select Committee on Small Business, United States Senate, presided over five days of hearings on the safety and efficacy of anti-obesity drugs such as phenmetrazine.

26. During the five days of hearings before Senator Nelson's subcommittee, recognized authorities in the fields of drug abuse research and drug law enforcement gave testimony concerning the serious nature and the wide extent of abuse and diversion of antiobesity drugs, such as phenmetrazine, within the United States. Witnesses noted a limited usefulness of these drugs in treatment (indicated for short-term use in the treatment of obesity, in conjunction with dietary restrictions of caloric intake) in comparison with the

¹Figures relating to specific amounts of phenmetrazine, as used throughout the text of this Final Order, are expressed in terms of grams or kilograms of anhydrous base (unless expressly indicated otherwise) rather than in terms of quantities of the salt.

demonstrated abuse associated with them.

27. In October, 1976, Mr. Kenneth A. Durrin, Acting Director of DEA's Office of Compliance and Regulatory Affairs, directed DEA field offices to conduct a survey with reference to the nature and extent of abuse and diversion in the United States associated with phenmetrazine.

28. The primary purpose of the DEA field survey relative to the subject of phenmetrazine abuse and diversion was to develop up-to-date data for the hearings before Senator Nelson's subcommittee.

29. On October 29, 1976, Mr. Durrin transmitted a memorandum to the Administrator of DEA, entitled "Limited Preludin Survey," which indicated that Preludin was a popular "street drug" in five of DEA's twelve domestic regions.

30. In January 1977, Mr. Durrin requested that DEA field units provide to the Office of Compliance and Regulatory Affairs additional information with reference to the abuse and diversion of phenmetrazine.

31. As of late April 1977, Mr. Durrin had received virtually all of the data requested from DEA's field offices with reference to the abuse and diversion of phenmetrazine; this data was later collated by DEA headquarters' personnel and put into a volume entitled "National Phenmetrazine Survey."

32. Based upon the limited survey on phenmetrazine abuse and diversion which had been performed in the autumn of 1976, as well as upon the field reports with reference to this subject which were later collated into the document entitled "National Phenmetrazine Survey," Mr. Durrin concluded in late April, 1977 that there was "widespread abuse and diversion of phenmetrazine in several parts of the United States."

33. The "National Phenmetrazine Survey" contains information indicating that the diversion of phenmetrazine from the legitimate distribution system into illicit channels has become a significant problem in the following DEA domestic regions: III, IV, VI, VII, VIII, X, and XI.

34. Mr. Durrin testified that, in assessing the abuse of phenmetrazine in connection with establishing the phenmetrazine quotas for 1977, members of his staff took into consideration information on phenmetrazine which was contained in the volume entitled "Pilot Test of an Epidemiological Technique for Detecting Abused Substances in Drug Using Populations: Final Report."

35. Dr. Carl Chambers, co-author of the volume entitled "Pilot Test of an Epidemiological Technique for Detecting Abused Substances in Drug Using Populations: Final Report," testified

that approximately fifteen percent of the drug abusers interviewed during the research underlying his study of drug abuse epidemiology had engaged in the non-medical use of phenmetrazine.

36. This study indicated that the manner in which these drug abusers had first come into contact with phenmetrazine varied: peers providing it to them; pharmacists providing it to them via prescription; members of their family providing it to them; or street drug dealers providing it to them.

37. The results of this study indicated that phenmetrazine abuse had the characteristics of an epidemic ("contagious transmission" of the nonmedical use of the drug from one abuser to another) in three of the nine cities studied: Des Moines, Iowa; Kansas City, Kans.; and Washington, D.C.

38. This study also indicated that phenmetrazine abuse had become endemic, i.e., stable, in its characteristics in four of the cities studied: Atlantic City, N.J.; Greensboro, N.C.; Phoenix, Ariz.; and San Francisco, Calif.

39. Dr. Chambers had encountered individuals using Preludin in combination with, or concurrently with, heroin in Des Moines, Iowa, Kansas City, Kans. and Miami, Fla.

40. Mr. Durrin testified that, in assessing the degree of diversion of phenmetrazine in connection with establishing the phenmetrazine quotas for 1977, members of his staff took into consideration information which indicated that wide-ranging, sophisticated criminal enterprises were involved in the diversion of phenmetrazine.

41. Det. William E. Larman, Narcotics Branch, Morals Division of the District of Columbia Metropolitan Police Department described the characteristics of several elaborate criminal enterprises, engaged in by violators based in the District of Columbia, which were designed to divert large quantities of phenmetrazine, as Preludin, from the licit distribution system into the illicit traffic in the District of Columbia.

42. Groups of individuals will travel from Washington, D.C. to another metropolitan area to obtain Preludin; these groups, each financed by a single organizer and usually including in their number at least six overweight females, have ranged from New York, New York to Miami, Florida, and as far west as Alabama.

43. These groups of overweight females systematically seek out corruptible physicians who will provide them at one time with a large number of prescriptions, all undated, for Preludin.

44. These individuals then attempt to locate pharmacies which will fill more than one Preludin prescription

at a time for a given individual, and when successful, they use these pharmacies as sources to obtain the Preludin for transport back to the District of Columbia.

45. The average duration of this kind of criminal expedition to any one metropolitan area is three or four days.

46. The profits flowing to the organizer from this criminal enterprise have been very handsome.

47. There are at least five major violators located in Washington, D.C., who are managing criminal enterprises such as the one described in the foregoing paragraphs.

48. The "street price" for one Preludin 75 mg. Enduret in Washington, D.C., fluctuates between \$8 and \$12, if one were to buy it from a pusher.

49. The price paid by pushers to their sources for bulk quantities of Preludin 75 mg. Endurets is \$5 per dosage unit.

50. Preludin is second only to heroin as a drug of abuse in the District of Columbia.

51. The most popular manner in which drug abusers in Washington, D.C., use Preludin is to crush the dosage form, mix it in water along with a quantity of heroin, and then to inject the liquid intravenously through a syringe.

52. Over the last three years, the trend of phenmetrazine abuse among arrestees at the Washington, D.C., Superior Court Lock-Up has been similar to the trend of heroin abuse within that same population.

53. Data from the results of the urinalysis of individuals admitted to the Washington, D.C., Superior Court Lock-Up from 1972 through June 1977 indicate that the abuse of phenmetrazine, as measured by positive urinalysis, increased sharply in 1973, declined slightly thereafter, then leveled off to a rate of between six to nine percent positive urinalysis.

54. Phenmetrazine diversion and abuse is not a localized phenomenon.

55. An admitted abuser and illegal distributor of phenmetrazine, Witness Number Ten, appeared anonymously and testified that phenmetrazine, as Preludin, is widely available in his home city of Houston, Texas.

56. Witness Number Ten indicated that the "street price" for one Preludin 75 mg. Enduret in Houston, Texas ranges anywhere from \$5 to \$10, if one were to buy it from a pusher.

57. Witness Number Ten, during the height of his abuse of Preludin, administered Preludin to himself intravenously, at the rate of ten 75 mg. Endurets on each occasion, eight to twelve occasions a day.

58. Witness Number Ten indicated that he currently obtains Preludin either from a pharmacist pursuant to a prescription or from a "street" source.

59. The price Witness Number Ten pays to a physician in exchange for an illicit prescription for one hundred 75 mg. Preludin Endurets has ranged from \$50 to \$100.

60. Witness Number Ten pays \$75 to his supplying pharmacist in exchange for one hundred 75 mg. Preludin Endurets.

61. During the period that Witness Number Ten was using approximately one hundred 75 mg. Preludin Endurets a day for his own use, he supported the cost of his abuse by selling large quantities of Preludin to others.

62. Witness Number Ten, over the last four or five years, has obtained prescriptions for Preludin for non-medical purposes from between fifty and sixty physicians.

63. Witness Number Ten has obtained Preludin in Austin, Dallas, Houston, and San Antonio, Texas; Las Vegas, Nevada; Homer and New Orleans, Louisiana; New York, New York; Los Angeles, California and from Mexico.

64. Witness Number Ten is acquainted with at least one hundred other individuals who abuse Preludin, usually by administering it intravenously.

PHENMETRAZINE INVENTORIES AT THE WHOLESALE-RETAIL LEVEL

65. In connection with the establishment of the 1977 quotas for phenmetrazine, the Office of Compliance and Regulatory Affairs sought to obtain, and did receive, current information with reference to the distribution and dispensing of phenmetrazine.

66. This Office concluded that inventories at the wholesaler-retailer level of the distribution system in 1976 were not excessive.

67. While wholesalers experienced intermittent periods of unavailability of Preludin from Boehringer in 1976, ninety-six percent of those drug stores normally stocking Preludin had current inventories of the product when queried in a survey performed in the last ten days of November, 1976.

68. There have been occasions in the recent past, when, for one reason or another, a number of Schedule II substances have become unavailable at the retail level, resulting in situations wherein a patient has been unable to obtain such Schedule II substance pursuant to a valid prescription or a physician has been unable to dispense that substance to his patients in the course of bona fide medical practice.

69. DEA has not received a single complaint from a physician or a patient with reference to any instance of unavailability of Preludin at the retail level. Boehringer has received one such complaint, from a patient.

70. DEA has received one complaint from a pharmacist indicating his inability to fill prescriptions for Preludin due to unavailability of the product.

71. In connection with the process of determining the 1977 quotas for phenmetrazine DEA compared Boehringer's reported sales of phenmetrazine in 1976 and IMS-America's National Prescription Audit ("NPA") statistical estimate of the quantity of phenmetrazine dispensed in 1976 pursuant to supposedly valid prescriptions at retail pharmacies in the United States.

72. The NPA is an audit designed to measure the volume in activity found in retail pharmacies in the United States. A panel of 800 pharmacies is sampled out of the total universe of between 49,000 and 50,000 pharmacies, and data regarding prescriptions is collected from the panel and analyzed by IMS-America. The results of that analysis are included in reports describing size, trends and volume within a given market.

73. The NPA does not include the following in its data base: pharmacies located in Alaska, Hawaii or Puerto Rico; hospital pharmacies; discount houses with pharmacies; food store pharmacies; health maintenance organization pharmacies; clinic pharmacies; mail order pharmacies; nursing home pharmacies; and pharmacies located in Federal or state government installations.

74. For 1976, the statistical reliability factor at the ninety-five percent confidence level applicable to the NPA's total kilogram estimate for all dosage units of phenmetrazine dispensed at the retail pharmacy level is ± 7.6 percent.

75. In determining Ciba-Geigy's phenmetrazine procurement quota for 1975 and 1976, DEA had also compared Boehringer's reported sales of phenmetrazine during each of the preceding years (1974 and 1975) and the NPA estimates of the quantity of phenmetrazine dispensed in each of those years by prescription at retail pharmacies in the United States.

76. Because of the nature of the diversion of Preludin, largely through forged prescriptions or prescriptions promiscuously issued by doctors, NPA estimates of actual dispensing by prescription at retail pharmacies in the United States undoubtedly include large quantities of Preludin which are being diverted. That is to say, all of the Preludin being dispensed by retail pharmacies according to NPA estimates is not being dispensed lawfully, i.e., for bona fide medical purposes.

77. The following chart shows the comparison between Boehringer's sales of phenmetrazine and the original NPA estimates of phenmetrazine dispensed at retail pharmacies for the years indicated, with all figures expressed in kilograms of anhydrous base:

*The numbers in the column labeled "NPA" for the years 1974, 1975, and 1976, as

78. Upon making this comparison of Boehringer's sales and NPA estimates, Mr. Durrin concluded that the difference (representing the amount by which Boehringer's sales were in excess of NPA estimates) could only have gone into an inordinate inventory build-up within the wholesaler-retailer portion of the distribution system or into the illicit market for phenmetrazine.

79. Given the information contained in R-21, R-23 and R-24, indicating periodic shortages at the distributor level, it seems unlikely that there has been inordinate inventory build-up.

80. There is very little legitimate distribution or dispensing of Preludin at the retail or consumer level other than through retail pharmacies of the type included in the NPA estimates.

DETERMINATION OF THE 1977 PHENMETRAZINE QUOTAS

81. For the quota years 1975, 1976, and 1977, DEA used a standard formula, without variations or adjustments, for determining most Schedule II procurement quotas.

82. The first step in the standard procurement quota formula is to estimate the quota applicant's sales for the quota year on the basis of the

supplied to DEA from IMS-America on February 7, 1977 (G-18), were assumed to be correct when Mr. Durrin and his staff made the comparison between Boehringer's sales and NPA data for those years.

At the hearing of this matter, it became apparent through the testimony of two witnesses that IMS-America had not supplied to DEA the correct numbers for those years. Mr. Chappell of IMS-America testified that, through a clerical error, an incorrect statistical multiplier had been used to project totals from the raw data for those years. Mr. Chappell provided the corrected totals for those years to DEA by letter dated October 20, 1977, and this information was entered into the record. (G-38)

Using the data contained in G-38, the following chart (G-39) shows the comparison between Boehringer's sales of phenmetrazine and the correct NPA estimates of phenmetrazine dispensed at retail pharmacies for the years indicated:

	Boehringer sales	NPA	Difference	NPA as percent of Boehringer's sales
1973	2,840	2,466	374	86.8
1974	3,316	2,473.8	842	74.6
1975	3,157	2,499.6	657	79.1
1976	3,453	2,438.3	1,015	70.8

	Boehringer sales	NPA	Difference	NPA as percent of Boehringer's sales
1973	2,840	2,466	374	86.8
1974	3,316	2,701	615	81.5
1975	3,157	2,807	350	88.9
1976	3,453	2,697	756	83.9

company's sales for the preceding year and the FDA estimate of percentage change in legitimate utilization for the quota year.

83. The second step in the standard procurement quota formula is to multiply the estimated quota year sales figure by 1.5 to allow for a fifty percent inventory reserve.

84. The final step in the standard procurement quota formula is to subtract the amount of the controlled substance inventory held by the applicant at the beginning of the quota year, including the inventory of a primary distributor if one exists.

85. For the quota years 1975, 1976, and 1977, DEA has used a standard formula for determining most Schedule II individual manufacturing quotas.

86. The first step in the standard manufacturing quota formula is to ascertain the projected procurement quotas to be fulfilled by the manufacturer, which constitute the manufacturer's estimated domestic sales for the quota year.

87. The second step in the standard manufacturing quota formula is to multiply the manufacturer's estimated sale by 1.5 to allow for a fifty percent inventory reserve, and then to add an amount equal to projected exports for the quota year.

88. The third step in the standard manufacturing quota formula is to subtract the amount of controlled substance inventory which the manufacturer has on hand at the beginning of the quota year. The resulting figure represents the individual manufacturing quota for that quota year.

89. The DEA standard formulae for computing procurement quotas and individual manufacturing quotas were not used in calculating the 1977 quotas for phenmetrazine.

90. The standard DEA procurement quota formula also was not utilized by DEA in determining Ciba-Geigy's phenmetrazine procurement quota in 1975 and 1976. The standard formula was modified in those years by subtracting from the figure arrived at through that formula, a figure representing the difference between Boehringer's reported sales during the preceding year and the NPA statistical estimate of the quantity of phenmetrazine dispensed by prescription at retail pharmacies in the United States.

91. However, the standard DEA manufacturing quota formula, without variation or adjustment, was initially applied to Western Fher with respect to its phenmetrazine manufacturing quotas for 1975 and 1976.

92. An *ad hoc* formula was used in calculating Ciba-Geigy's initial 1977 procurement quota for phenmetrazine to put the brakes on what DEA has concluded to be a spiraling production and distribution of Preludin in order

to meet an artificial demand for the product, i.e., an illicit demand.

93. The process of determining the 1977 quotas applicable to the basic class phenmetrazine began with DEA's receipt in March and April, 1976 of the applications filed by Western Fher and Ciba-Geigy.

94. By letter dated March 31, 1976, FDA advised DEA that legitimate utilization of phenmetrazine in 1977 could be expected to be one percent higher than in 1976.

95. In making its determinations with reference to the scientific and medical needs in the United States for controlled substances such as phenmetrazine in any given year, FDA does not take into account in any way the amount of such substances which has been or may be diverted from licit to illicit channels.

96. By letter dated March 31, 1975, FDA had advised DEA that legitimate utilization of phenmetrazine in 1976 could be expected to be the same as that for 1975.

97. Boehringer's sales of phenmetrazine in 1976 were 3,453 kg., as compared to its 1975 sales of phenmetrazine of 3,157 kg.

98. In performing the calculation of Ciba-Geigy's initial 1977 procurement quota for phenmetrazine, DEA first calculated the amount of phenmetrazine that Boehringer should have sold in 1976; this was based upon the premise that, of the total amount of phenmetrazine available to Ciba-Geigy and Boehringer in any year, one-third is intended as an inventory reserve while the remaining two-thirds are intended to be available for sale to their customers.

99. The total availability of phenmetrazine to Ciba-Geigy and Boehringer, 4,384 kg. in 1976, represents the sum of Ciba-Geigy's 1976 procurement quota for phenmetrazine (the maximum amount of phenmetrazine which could be procured by Ciba-Geigy in 1976) and the combined December 31, 1975, inventories of phenmetrazine at Ciba-Geigy and Boehringer, as illustrated by the following calculation:

3,476 kg. (Ciba-Geigy's 1976 procurement quota) + 908 kg. (combined inventories of Ciba-Geigy and Boehringer as of December 31, 1975) = 4,384 kg. (total availability of phenmetrazine to Ciba-Geigy and Boehringer in 1976).

100. Two-thirds of that total availability for 1976 is the amount which Boehringer should have sold in 1976, 2,923 kg.:

4,384 kg. $\times \frac{2}{3}$ = 2,923 kg. (total availability of phenmetrazine to Ciba-Geigy and Boehringer in 1976).

101. To determine the estimated legitimate medical and scientific needs of the United States for phenmetrazine in 1977, DEA added one percent (in accordance with FDA's estimate of

legitimate utilization of phenmetrazine in 1977) to the amount which Boehringer should have sold in 1976:

2,923 kg. + 29 kg. = 2,952 kg. (DEA's estimate of legitimate medical and scientific needs of the United States for phenmetrazine in 1977).

102. By letter dated November 5, 1976, Ciba-Geigy was informed by DEA that its initial phenmetrazine procurement quota for 1977 would be 2,952 kg.

103. The first step in the development of Western Fher's 1977 initial manufacturing quota was the ascertainment of Ciba-Geigy's 1977 procurement quota of 2,952 kg.

104. After addition of the fifty percent inventory allowance, the theoretical total availability figure for Western Fher was 4,428 kg.

105. The third step in the development of Western Fher's 1977 initial manufacturing quota was to subtract from the total availability figure (4,428 kg.) DEA's estimate of Western Fher's December 31, 1976, closing inventory.

106. In carrying out the third step in the formula, DEA made an error in the amount of 526 kg. Because Western Fher's estimated year-end inventory was erroneously calculated as 2,302 kg. rather than 1,776 kg., the initial phenmetrazine manufacturing quota was set at 2,126 kg. rather than the correct figure of 2,652 kg.

107. By FEDERAL REGISTER notice dated September 29, 1976, DEA proposed an initial aggregate phenmetrazine production quota (i.e., Western Fher's individual manufacturing quota) of 2,126 kg.

108. The previously described, unsatisfactorily high level of abuse and diversion of phenmetrazine in the United States was a factor within the process of determining the proposed final 1977 quotas applicable to phenmetrazine at the procurement and bulk manufacturing levels.

109. Confronted by this unacceptable level of abuse and diversion of phenmetrazine, DEA decided that it would not authorize any increased bulk production of phenmetrazine which would provide for any additional amount of phenmetrazine to be used for the purpose of manufacturing additional dosage forms of phenmetrazine during 1977 beyond the 2,952 kg. procurement quota already authorized to Ciba-Geigy.

110. Under the proposed final 1977 phenmetrazine procurement quota, the maximum amount of phenmetrazine theoretically available to Boehringer and Ciba-Geigy in 1977 would be the total of Ciba-Geigy's procurement quota (2,952 kg.) and the combined 1976 year-end inventories of Boehringer and Ciba-Geigy (576 kg.), or 3,528 kg.

111. The first step in the calculation of Western Fher's final 1977 manufac-

turing quota were identical to those stated in findings 103 and 104, as illustrated by the following:

2,952 kg. (Ciba-Geigy's 1977 procurement quota) $\times 1.5$ = 4,428 kg. (theoretical total 1977 availability for Western Fher).

112. From the total availability figure, DEA subtracted Western Fher's actual reported December 31, 1976, inventory, as illustrated by the following:

4,428 kg. (theoretical total 1977 availability for Western Fher) - 1,421.6 kg. = 3,006.4 kg. (Western Fher's inventory as of December 31, 1976).

113. The Administrator of DEA, mindful of the data concerning the large amount of abuse and diversion associated with phenmetrazine in the United States, thereafter adjusted Western Fher's 1977 individual manufacturing quota downward from 3,006.4 kg. to 2,900 kg.

114. By FEDERAL REGISTER notice dated April 29, 1977, DEA proposed a revised aggregate phenmetrazine production quota of 2,900 kg. (i.e., Western Fher's revised 1977 manufacturing quota).

115. This quota was made final by FEDERAL REGISTER notice dated July 15, 1977.

116. The foregoing methods of determining procurement, individual manufacturing and aggregate production quotas for 1977 were not unique to phenmetrazine. Another Schedule II substance, amphetamine, has been presenting DEA with similar diversion and abuse problems. DEA employed similar methods to arrive at the quotas for amphetamine for 1977 as it did for phenmetrazine.

Within his detailed discussion of this matter, the Administrative Law Judge made certain conclusions of law, which the Administrator hereby adopts with editorial modifications and incorporates into this final order in pertinent part as set forth hereafter.

CONCLUSIONS OF LAW AND DISCUSSION

This case is concerned with three quotas affecting the production of phenmetrazine in 1977—the procurement quota for Ciba-Geigy, the sole registered dosage form manufacturer in the U.S.; the individual manufacturing quota for Western Fher, the sole registered basic class manufacturer in the U.S.; and the total or aggregate production quota for the country as a whole. Since there is presently but one registered basic class manufacturer, Western Fher, the total or aggregate production quota for the country and the, individual manufacturing quota for Western Fher will be identical.

The Act provides (21 U.S.C. 826(a)) that the total or aggregate production

quota be set in an amount sufficient "to provide for the estimated medical, scientific, research, and industrial needs of the United States, for lawful export requirements, and for the establishment and maintenance of reserve stocks."

The Act also provides (21 U.S.C. 826(c)) that, in fixing individual manufacturing quotas, "the manufacturer's estimated disposal, inventory, and other requirements for the calendar year" are to be determined. It also provides that in making those determinations, "the manufacturer's current rate of disposal, the trend of the national disposal rate during the preceding calendar year, the manufacturer's production cycle and inventory position, the economic availability of raw materials, yield and stability problems, emergencies such as strikes and fires, and other factors" are to be considered.

The evidence in this record makes it abundantly clear that DEA has carefully considered all of the factors specified in the Act. The evidence in this record makes it abundantly clear that DEA has made the required determinations and has set the subject quotas after due and careful consideration and in the exercise of sound discretion, in all respects but one.

DEA's own regulations in pertinent part provide, at 21 CFR 1303.24(a):

"For the purpose of determining individual manufacturing quotas . . . each registered manufacturer shall be allowed as part of such quota an amount sufficient to maintain an inventory equal to.

(1) For current manufacturers, 50 percent of his average estimated net disposal for the current calendar year and the last preceding calendar year, . . ."

It is apparent from testimony that such an inventory allowance was not provided for Western Fher by the individual manufacturing or production quota set for it for 1977.

Regulations promulgated by a Government agency, not contrary to any statute, have the force and effect of law and are binding on everyone, including the agency itself and its personnel. In the instant case, Western Fher must be permitted the full amount of the inventory allowance provided for by DEA's own regulations.

In all other respects however, the three quotas were arrived at in a lawful manner and need not be changed.

Respondents quarrel with the reliability of some of the data pertaining to the extent of phenmetrazine abuse and diversion which DEA considered in setting the quotas. But the law does not require absolute certainty before a regulatory agency can act. All that is required is a reasonable effort to ascertain the relevant facts and an intelligent exercise of a sound discretion in applying them, avoiding arbitrariness and capriciousness. DEA has acted in this manner, except for the inventory allowance discussed above.

Throughout Respondents' brief the concepts of market demand for their product, and legitimate medical need for the product, are confused. Market demand and medical need are not necessarily identical, and the preponderance of the evidence in this record establishes that they are not identical with respect to phenmetrazine. There is far more market demand than there is legitimate medical need.

DEA is required by the Act to permit manufacture of sufficient quantities of phenmetrazine to meet the legitimate medical needs. The preponderance of the evidence establishes that DEA has taken reasonable steps to do so. There is no evidence in this record establishing that the quotas set by DEA have been so low that the legitimate medical need could not be met.

DEA is not required to permit all market demand to be satisfied. In fact, the agency is required to take steps to prevent the illegitimate portion of that demand from being met. To the extent that such steps may have affected these quotas, the preponderance of the evidence shows that they are reasonable and not arbitrary or capricious, with the one exception noted above.

It cannot be said that DEA has acted arbitrarily in treating phenmetrazine in a manner different from the way in which other substances were treated. The preponderance of the evidence is to the effect that one other Schedule II substance, amphetamine, presents problems similar to the Schedule II substance phenmetrazine. The evidence shows that the 1977 quotas for both these substances have been determined by following similar formulae.

In the instant case DEA has, indeed, departed from prior standards and formulae with respect to phenmetrazine. But it is clearly doing so pursuant to a reasoned analysis based on carefully weighed facts. There are no internal inconsistencies, and there has been no failure clearly to articulate the new standard and formulae being applied. The testimony of both Mr. Durrin and Mr. Fisher amply demonstrates that DEA took "a hard look at the problem areas" and has "set forth with clarity grounds of reasoned decision." See *Greater Boston Television Corp. v. F.C.C.*, 444 F.2d 841, 852-53 (D.C. Cir. 1970). Nothing more appears to be required.

The issues, as set forth by the Administrative Law Judge, should therefore be answered as follows:

A. Yes, with the one modification indicated above.

B. Yes, with the one modification indicated above.

C. Yes.

D. Yes, to the extent required.

1. Yes.

2. Yes, to the extent required.

3. No.

4. Yes, to the extent required.

E. Yes.

1. Yes, to a reasonable extent.

2. Yes, to a significant extent.

3. It need only be effective, it need not be more effective.

F. Yes. See Findings 89-116, above.

DECISION

Under the authority vested in the Attorney General under 21 U.S.C. § 826 and delegated to the Administrator of the Drug Enforcement Administration by 28 CFR 0.100, the Administrator hereby orders that such adjustments be made during calendar year 1978 as necessary to ensure that Western Fher receives within its quota such amount as may be necessary to include provision for the inventory allowance required by 21 CFR 1303.24(a). This has already been accomplished within the calculation of the 1978 interim aggregate production quota for phenmetrazine (42 FR 61900 (December 7, 1977)), wherein any deficiencies in inventory at Western Fher as projected for December 31, 1977, and caused by the lack of a full inventory allowance within the 1977 quota, have been corrected in accordance with the procedures set forth in 21 CFR 1303.23(a) and 1303.24(a).

In all other respects, it is hereby ordered that the three subject quotas remain unchanged.

Dated: February 8, 1978.

PETER B. BENSINGER,
Administrator,
Drug Enforcement Administration.

LEGAL SERVICES CORPORATION

GRANTS AND CONTRACTS

Applications

FEBRUARY 7, 1978.

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996f, as amended, Pub. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least 30 days prior to the approval of any grant application or prior to entering into a contract or project, the Corporation shall announce publicly . . . such grant, contract or project."

The Legal Services Corporation hereby announces publicly that it is considering the grant applications submitted by:

1. DNA Peoples Legal Services in Window Rock, Ariz. to serve the Indian population on or near the Hope Reservation in Arizona.

2. Colorado Rural Legal Services in Denver, Colo. to serve the Indian population on or near the Mountain Ute and Southern Ute Reservations in Colorado.

3. Zuni Legal Services in Zuni, N. Mex. to serve the Indian population in

the Pueblos of Nambe, Picuris, Pojoaque, San Ildefonso, San Juan, Santa Clara, Taos, Tesuque, Cochiti, Isleta, Jemez, Sandia, San Felipe, Santa Ana, Santo Domingo, and Zia in New Mexico.

4. Nevada Indian Legal Services in Stewart, Nev. (through California Indian Legal Services) to serve the Indian population on the Carson Colony, Dresslerville, Fallon, Fort McDermitt, Las Vegas, Lovelock, Moapa, Pyramid Lake, Reno-Sparks, Walker River, Winnemucca, Woodfords, Yerington, and Yomba Reservations in Nevada.

5. Upper Peninsula Legal Services in Sault Ste Marie, Mich. to serve the Indian population in Michigan.

Interested persons are hereby invited to submit written comments or recommendations concerning the above applications to the Regional Office of the Legal Services Corporation at:

Legal Services Corporation, Denver Regional Office, 1726 Champa Street, Suite 500, Denver, Colo. 80202.

THOMAS EHRLICH,
President.

GRANTS AND CONTRACTS

Applications

FEBRUARY 7, 1978.

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996f, as amended, Pub. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least 30 days prior to the approval of any grant application or prior to entering into a contract or project, the Corporation shall announce publicly . . . such grant, contract or project."

The Legal Services Corporation hereby announces publicly that it is considering the grant applications submitted by:

1. Maricopa County Legal Aid Society in Phoenix, Ariz. to serve Yavapai and Mojave Counties.

2. Southern New Mexico Legal Services in Tucson, Ariz. to serve Santa Cruz and Cochise Counties.

3. Legal Aid Society of Metropolitan Denver in Denver, Colo. to serve Jefferson and Gilpin Counties.

4. Colorado Rural Legal Services in Denver, Colo. to serve Larimer, Archuleta, Delores, Hinsdale, LaPlata, Mineral, Montezuma, and San Juan Counties.

5. Pikes Peak Legal Services in Colorado Springs, Colo. to serve Chaffee, Custer, Fremont, and Park Counties.

6. Southern New Mexico Legal Services in Las Cruces, N. Mex. to serve Chaves and Eddy Counties.

7. Northern New Mexico Legal Services in Taos, N. Mex. to serve Colfax and Guadalupe Counties.

8. Legal Aid and Defender Society of Travis County in Austin, Tex. to serve Llano, Lee, Bell, Blanco, Burnet, Caldwell, Bastrop, Hays, Williamson, and Fayette Counties.

9. Tarrant County Legal Aid Foundation in Fort Worth, Tex. to serve Deaf, Smith, Jones, and Nolan Counties.

10. East Texas Legal Services in Nacodoches, Tex. to serve Jefferson and Nacodoches Counties.

11. Utah Legal Services in Salt Lake City, Utah to serve Utah, Box Elder, and Davis Counties.

Interested persons are hereby invited to submit written comments or recommendations concerning the above applications to the Regional Office of the Legal Services Corporation at:

Legal Services Corporation, Denver Regional Office, 1726 Champa Street, Suite 500, Denver, Colo. 80202.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 78-5]

FINAL ENVIRONMENTAL IMPACT STATEMENT

Public Notice Regarding Availability

Notice is hereby given of the public availability of the final Environmental Impact Statement for the National Aeronautics and Space Administration (NASA) Michoud Assembly Facility, New Orleans, La.

Comments on the draft Environmental Impact Statement were previously solicited from state and local agencies and members of the public through a notice in the FEDERAL REGISTER of April 22, 1977.

Copies of the draft and final statement have been furnished to the Environmental Protection Agency, the Departments of Agriculture, Commerce, Defense, Health, Education, and Welfare, Housing and Urban Development, Interior, Labor, Navy, and Transportation, the Advisory Council on Historic Preservation, and to appropriate state and local agencies.

Copies of the final statement may be obtained or examined at any of the following locations:

(a) National Aeronautics and Space Administration, Public Documents Room (Room 126), 600 Independence Avenue SW., Washington, D.C. 20546.

(b) Ames Research Center, NASA (Building 201, Room 17), Moffett Field, Calif. 94035.

(c) Hugh L. Dryden Flight Research Center, NASA (Building 4800, Room 1017), P.O. Box 273, Edwards, Calif. 93523.

(d) Goddard Space Flight Center, NASA (Building 8, Room 150), Greenbelt, Md. 20771.

(e) Johnson Space Center, NASA (Building 1, Room 136), Houston, Tex. 77058.

(f) John F. Kennedy Space Center, NASA (Headquarters Building, Room 1207), Kennedy Space Center, Fla. 32899.

(g) Langley Research Center, NASA (Building 1219, Room 304), Hampton, Va. 23365.

(h) Lewis Research Center, NASA (Administration Building, Room 120), 21000 Brookpark Road, Cleveland, Ohio 44135.

(i) George C. Marshall Space Flight Center, NASA (Building 4200, Room G-11), Huntsville, Ala. 35812.

(j) National Space Technology Laboratories, NASA (Building 1100, Room A-213), Bay St. Louis, Miss. 39520.

(k) Jet Propulsion Laboratory (Building 180, Room 600) 4800 Oak Grove Drive, Pasadena, Calif. 91103.

(l) Wallops Flight Center, NASA (Library Building, Room E-105), Wallops Island, Va. 23337.

(m) Governor's Council on Environmental Quality (Room 11, Natural Resources Building, North and 4th Streets), Baton Rouge, La. 70804. (Recommended public access at site of Michoud Assembly Facility.)

Done at Washington, D.C., this 3rd day of February 1978.

By the direction of the Administrator.

KENNETH R. CHAPMAN,
Associate Administrator for External Relations, National Aeronautics and Space Administration.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

ADVISORY COMMITTEE EDUCATION PROGRAMS PANEL

Meeting

FEBRUARY 6, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub.

L. 92-463, as amended,) notice is hereby given that a meeting of the Education Programs Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in room 1130, from 9 a.m. to 5:30 p.m. on March 7-8, 1978.

The purpose of the meeting is to review applications for institutional curriculum development submitted to the National Endowment for the Humanities for projects beginning after June 1, 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee,
Management Officer.

PUBLIC PROGRAMS PANEL ADVISORY COMMITTEE

Meeting

FEBRUARY 3, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Public Programs Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in room 314, from 9 a.m. to 5:30 p.m. on March 2, 1978.

The purpose of the meeting is to review Public Programs applications for Challenge Grants in support of educational broadcasting organizations which were submitted to the National Endowment for the Humanities and which will begin after June 1, 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meeting would fall within exemptions

(4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee,
Management Officer.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 20405; 70-6112]

ALABAMA POWER CO.

Proposed Issuance and Sale of First Mortgage Bonds at Competitive Bidding

FEBRUARY 6, 1978.

Notice is hereby given that Alabama Power Co. ("Alabama"), 600 North 18th Street, Birmingham, Ala. 35291, a public-utility subsidiary company of the Southern Co., a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Alabama proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, \$100,000,000 principal amount of its first mortgage bonds of a new series having a term of not less than 5 nor more than 30 years. Alabama will determine and give notice to prospective bidders of the term of the new bonds not less than 72 hours prior to the time of bidding. The interest rate of the bonds and the price, exclusive of

accrued interest, to be paid to Alabama, which will be not less than 98 percent nor more than 101% percent of the principal amount thereof, will be determined by competitive bidding. It is stated that Alabama may request by amendment that such proposed sale be excepted from the competitive bidding requirements of Rule 50 should circumstances develop which, in the opinion of Alabama's management, make such exception in the best interest of Alabama and its investors and consumers.

The new bonds will be issued under the indenture dated as of January 1, 1942, between Alabama and Chemical Bank, as trustee, as heretofore supplemented by various indentures supplemental thereto and as to be further supplemented by a supplemental indenture to be dated as of March 1, 1978. The bonds will be redeemable, at the option of Alabama, in whole or in part at any time prior to maturity. The supplemental indenture will include a prohibition, for a period of not more than 5 years, against refunding the bonds, directly or indirectly, with funds borrowed at a lower effective interest cost.

Alabama intends to use the proceeds from the sale of the new bonds, along with other funds, in financing its 1978 construction costs, estimated at November 18, 1977, to be \$494,390,000, in paying a portion of notes payable incurred for such purpose, and in retiring \$10,345,000 principal amount of first mortgage bonds.

The fees and expenses to be incurred in connection with the proposed transaction are to be filed by amendment. It is stated that the issuance and sale of the new bonds have been expressly authorized by the Alabama Public Service Commission and that no other State or Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than March 3, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the

Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-14435; File No. SR-Amex-78-3]

AMERICAN STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on January 19, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

EXCHANGE'S STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The American Stock Exchange, Inc. ("Amex") proposes to amend Exchange Rules 927 and 928. The texts of the proposed amendments are set forth below (brackets indicate deletions).

Transactions With Issuers

Rule 927. No member or member organization shall accept an order for the account of any corporation which is the issuer of an underlying stock [or for the account of any affiliate of such corporation] for the sale (writing) of a call option contract with respect to that underlying stock.

[Commentary]

[01 For the purposes of this Rule, the term "affiliate" shall have the meaning specified in SEC Rule 405 under the Securities Act of 1933. Before accepting any order for the sale (writing) of a call option contract from any person who is an officer, director or substantial shareholder of a corporation which is the issuer of the underlying stock covered by such option contract, or from any person who directly, or indirectly through one or more intermediaries may control, be controlled by or be under common control with such corporation, the member or member organization should take steps to determine

whether such person would be deemed an "affiliate" of such corporation pursuant to the provisions of the Securities Act of 1933 and the rules of the SEC promulgated thereunder.]

[Restricted Stock]

[Rule 928. Shares of an underlying stock which may not be sold by the holder thereof except upon registration thereof pursuant to the provisions of the Securities Act of 1933 or pursuant to SEC rules promulgated under the Securities Act of 1933, may not be accepted by a member or member organization for the purpose of covering a short position in call option contracts or satisfying the margin requirements in respect thereto, and may not be delivered pursuant to the exercise of a put option contract or for the purpose of satisfying an exercise notice assigned in respect of a call option contract.]

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed changes is to amend the rules of the Amex to reflect recent SEC action concerning transactions in exchange-traded options by affiliates of issuers and holders of restricted securities. (See SEC Release No. 33-5890, December 20, 1977).

Rule 927, adopted at the outset of the Amex's options program, prohibits the acceptance by any Exchange member of an order for the sale (writing) of a call option contract relating to underlying stock if the order is for the account of the issuer of such stock or an affiliate of the issuer.

The rule recognizes that the sale of a call option may involve a solicitation of an order to buy the underlying securities and that, in the absence of an effective registration statement and prospectus, a member firm could violate Federal securities laws if it accepts orders from an issuer for the sale of call options relating to its securities. Since the Amex was aware that the SEC staff held the view that a solicitation was also involved if an affiliate sought to sell a call option relating to his corporation's shares, Rule 927 was made applicable to orders of affiliates as well as issuers.

In its recent release, the SEC announced that it had conducted a review of the procedures involved in trading listed options (and the exercise procedures in connection with such trading) and considered matters relating to the writing of exchange-traded call options on securities subject to the resale provisions of SEC Rules 144 and 145. In part, the Release noted that because the mechanics of selling call options upon national exchanges are similar to those involved in the sale on an exchange of other exchange-traded call options

should not be deemed under Rule 144(f) as a solicitation for the purchase of the underlying securities.

In light of the SEC's current position, the Amex proposes to amend Rule 927 to limit the scope of the rule to orders for the sale of call options entered by or for the account of the issuer of the underlying securities only.

Exchange Rule 928 currently prohibits Amex members from accepting stock which can only be sold either upon registration or pursuant to SEC rules (restricted stock) to: (i) Cover a short call position, (ii) satisfy margin requirements in connection with such position, or (iii) deliver or receive pursuant to the exercise of a put or call option. In consideration of the recent SEC release discussed above, the Amex proposes to delete Rule 928 in order to facilitate the acceptance of permissible options orders by member firms and, where appropriate, to permit margining of such options on a covered basis with "restricted stock."

The basis for the proposed rule change is found in section 6(b)(5) of the Securities Exchange Act of 1934 (the "1934 Act") as amended, which provides, in pertinent part, that the rules of the Exchange be designed to promote just and equitable principles of trade and protect investors and the public interest.

No comments were received from members, participants or others in connection with these proposed rule changes.

The proposed rule changes will not impose any burden on competition; rather, it will eliminate a potential competitive disadvantage between the Amex and any other options exchange which never adopted rules similar to present Amex Rules 927 and 928.

On or before March 20, 1978, or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549.

Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room 1100 L Street NW., Wash-

ington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before March 6, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 2, 1978.

[Rel. No. 20406; 70-6113]

CENTRAL & SOUTH WEST CORP., ET AL.

Proposed Issuance and Sale of Holding Company Common Stock and of Proposed Capital Contributions to Two Subsidiary Operating Companies

FEBRUARY 6, 1978.

In the matter of Central & South West Corp., P.O. Box 1631, Wilmington, Del. 19899; Central Power & Light Co., P.O. Box 2121, Corpus Christi, Tex. 78403; Southwestern Electric Power Co., P.O. Box 21106, Shreveport, La. 71156.

Notice is hereby given that Central & South West Corp. ("CSW"), a registered holding company and two of its subsidiary operating companies, Central Power & Light Co. ("CP&L") and Southwestern Electric Power Co. ("SWEPCO"), have filed an application-declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a), 7, 9, 10, and 12(f) of the Act and Rules 43, 45, and 50, promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

CSW proposes to issue and sell, pursuant to the competitive bidding requirements of Rule 50 under the Act, 7,000,000 shares of its authorized and unissued common stock, par value \$3.50 per share (the "additional shares"). CSW further proposes to make capital contributions to two of its electric utility subsidiaries, CP&L and SWEPCO, in the amounts of \$30,000,000 and \$15,000,000, respectively.

CSW states that of the net proceeds to be derived by it from the sale of the additional shares, estimated at approximately \$105,000,000, \$90,000,000 will be used to make the capital contributions to CP&L and SWEPCO and a contribution of \$45,000,000 to a third

CSW subsidiary, Public Service Co. of Oklahoma, such contribution being previously authorized by Commission order on January 10, 1978 (HCAR No. 20380), and the remainder, together with funds received from such subsidiaries in payment of their borrowings from CSW, to pay approximately \$60,000,000 of an estimated \$110,000,000 of borrowings by CSW expected to be outstanding at the time of sale.

CSW states that it has outstanding short-term borrowings of \$83,325,000 at December 31, 1977. CSW anticipates that the additional shares would be issued and sold on or about March 7, 1978, and that the capital contributions would also be made in March 1978.

CSW states that the proceeds of the foregoing short-term borrowings and capital contributions have been or will be used towards the payment of capital expenditures. Such expenditures are estimated as follows:

CSW CONSOLIDATED		
	1977	1978
Generation.....	\$315,951,000	\$458,948,000
Transmission.....	37,454,000	54,986,000
Distribution.....	58,283,000	66,267,000
Fuel exploration and development.....	30,572,000	47,572,000
Other.....	13,194,000	7,028,000
Total.....	455,454,000	634,801,000

CSW states that of the total \$1,090,255,000 CSW consolidated estimated capital expenditures for the 2 years, 1977 and 1978, CP&L accounts for \$437,288,000, PSO (consolidated) for \$382,985,000, SWEPCO for \$233,096,000, and West Texas Utilities Company for \$36,886,000.

CSW states that the estimated 1978 capital expenditures for CP&L and SWEPCO are as follows:

	CP&L	SWEPCO
Generation.....	\$214,321,000	\$68,336,000
Transmission.....	44,536,000	11,529,900
Distribution and other plant.....	22,882,000	22,170,000
Fuel exploration and development.....	8,192,000	11,260,000
Total.....	289,931,000	113,296,900

It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction with respect to the proposed transaction. It is stated that the fees and expenses to be incurred in connection with the proposed transaction are estimated at \$200,000, including \$38,500 in legal fees, \$20,500 in accountants fees and \$85,000 in printing costs. It is further stated that the fees and expenses to be incurred by the successful bidders for the additional shares are estimated at \$25,500, including \$23,000 in legal counsel fees.

Notice is further given that any interested person may, not later than February 28, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended, or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 10108; 811-366]

CHRISTIANA SECURITIES CO.

Filing of Application for an Order Declaring That Company Has Ceased To Be an Investment Company

JANUARY 30, 1978.

Notice is hereby given that Christiana Securities Co. ("Christiana"), Du Pont Building, Wilmington, Del. 19898, a Delaware corporation registered as a closed-end, nondiversified, management investment company under the Investment Company Act of 1940 ("Act"), has filed an application on August 8, 1977, and an amendment thereto on November 1, 1977, pursuant to section 8(f) of the Act for an order of the Commission declaring that Christiana has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations set forth therein, which are summarized below.

In July 1972, Christiana and E.I. du Pont de Nemours & Co. ("Du Pont") filed a joint application, pursuant to sections 17(b), 17(d), and 6(c) of the Act, and Rule 17d-1 thereunder, for an order of the Commission permitting a proposed merger of Christiana and Du Pont. On December 13, 1974, the Commission issued an order granting that application (Investment Company Act Release No. 8016), and such Commission order was affirmed by the Supreme Court of the United States on June 17, 1977.

Christiana states that on October 17, 1977, the stockholders of Christiana and Du Pont each met and voted on the proposed merger. According to the application, the holders of Christiana common stock approved the proposed merger by a vote of 11,160,285 shares in favor, with 3,164 shares opposed, and the holders of Du Pont common stock approved the proposed merger by a vote of 37,816,355 shares in favor, with 247,912 shares opposed. Christiana asserts that in addition to its common stock, it had outstanding, as of June 30, 1977, 106,500 shares of 7 percent cumulative preferred stock having a liquidation value of \$100 per share, plus accumulated dividends, and subject to redemption at \$120 per share on any dividend payment date. Holders of Christiana preferred stock have no voting rights except as expressly provided by law. Christiana states that on June 30, 1977, the aggregate net asset value of its common stock, of which there were on that date 11,710,103 shares outstanding, on the basis of preferred stock having a redemption value of \$120 a share, was \$1,586,468,160, and that the net asset value per share of its common stock was \$135.48.

Christiana states that on October 17, 1977, Christiana and Du Pont filed a properly executed and acknowledged agreement of merger ("agreement"), in accordance with the provisions of the general corporation law of Delaware, and that the merger became effective and Christiana's corporate existence ceased at the close of business on that day.

The agreement provided for the acquisition by Du Pont of all of the assets of Christiana (consisting principally of Du Pont common stock), and for the conversion of Christiana capital stock into Du Pont common stock. According to the application, on October 17, 1977, shares of Christiana capital stock became shares of Du Pont common stock in an amount determined by applying conversion formulas specified in the agreement, which are summarized as follows: (1) Each share of Christiana common stock to become 1.123 shares of Du Pont common stock, plus rights to additional Du Pont common stock, if any, to be issued in connection with an unliqui-

dated tax refund claim of Christiana, and (2) the holders of Christiana preferred stock to receive \$120 per share, the redemption price of their stock, payable in Du Pont common stock at the average of the latter's closing prices on the New York Stock Exchange during the 10 trading days preceding the effective date of the merger, and, in addition, an amount in cash equal to dividends accrued and unpaid on their preferred stock up to and including the effective date of the merger.

According to the application, on October 17, 1977, Du Pont issued to the Wilmington Trust Co. ("Trust Company"), Wilmington, Del., a certificate representing all shares of Du Pont common stock to be issued in the merger (excluding shares applicable to shares of Christiana preferred stock for which demands for appraisal have been made). Applicant states that former shareholders of Christiana may obtain a certificate or certificates representing shares of Du Pont common stock to which such shareholders are entitled under the merger, together with the proceeds of any fractional shares sold and, in the case of Christiana preferred stock, the cash payment for accrued dividends, by surrendering to the Trust Company their certificate or certificates representing capital stock of Christiana. Applicant asserts that until so surrendered, certificates for shares of Christiana capital stock shall be deemed for all purposes to represent the ownership of the number of shares of Du Pont common stock into which such shares of Christiana capital stock are converted by reason of the merger.

Section 8(f) of the Act provides, in part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than February 24, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request.

As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Rel. No. 20401; 70-6107]

COLUMBIA GAS SYSTEM, INC., ET AL.

Proposed Allocation of Consolidated Tax Liabilities

FEBRUARY 3, 1978.

In the matter of the Columbia Gas System, Inc., 20 Montchanin Road, Wilmington, Del. 19807; Columbia Gas Transmission Corp.; Columbia Gas of Ohio, Inc.; Columbia Gas of West Virginia, Inc.; Columbia Gas of Kentucky, Inc.; Columbia Gas of Virginia, Inc.; Columbia Gas of Pennsylvania, Inc.; Columbia Gas of New York, Inc.; Columbia Gas of Maryland, Inc.; Columbia Hydrocarbon Corp.; The Inland Gas Co., Inc.; Columbia LNG Corp.; Columbia Gas Development of Canada, Ltd.; Columbia Coal Gasification Corp.; Columbia Gas Development Corp.; Columbia Gas System Service Corp.; Columbia Gulf Transmission Co.; Columbia Alaskan Gas Transmission Corp.

Notice is hereby given that the Columbia Gas System, Inc. ("Columbia"), a registered holding company, and its subsidiary companies named above have filed a joint declaration, and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 12(b) and 12(f) of the Act and Rule 45 promulgated thereunder as applicable to the following proposed transactions. All interested persons are referred to the joint declaration, which is summarized below, for a complete statement of the proposed transaction.

By order dated February 18, 1976 (HCAR No. 19393), the Commission authorized Columbia to allocate the system's consolidated Federal income tax liability for the years 1975 and 1976 by a method other than prescribed by Rule 45(b)(6).

Columbia and its subsidiaries now seek the Commission's authorization

under Rule 45(a) for the taxable years 1977 and 1978.

The major part of the exploration and development activities within the Columbia system are centered in Columbia's nonutility subsidiaries, Columbia Gas Development Corp. ("Development U.S.") and Columbia Gas Development of Canada, Ltd. ("Development Canada"). Due to the expanded exploration and development program made necessary by the growing system demand for natural gas, these companies have required substantial contributions of capital from Columbia. In connection with their activities, these companies have incurred tax losses.

The combined expenditures by Development U.S. and Development Canada for exploration and development during 1977 and 1978 are currently estimated to be \$89,700,000 and \$86,500,000, respectively. It is also estimated that these companies will have tax losses of \$59,589,000 and \$48,194,000 for the years 1977 and 1978, respectively.

When the losses of Development U.S. and Development Canada are included in the consolidated tax return for the Columbia system, the consolidated tax liability is reduced. Under Rule 45(b)(6), the benefit of this tax reduction is allocated to companies in the consolidated group other than those whose tax losses gave rise to the tax savings, thus depriving the latter of the tax savings which might otherwise be applied in furtherance of their continuing exploration and development activities. In general, the declaration seeks authorization to allocate consolidated taxes in a manner which would initially remit the consolidated tax savings arising from their tax losses to the exploration subsidiaries in aid of their development programs.

To overcome the claimed inequities resulting from a strict adherence to the tax allocation provisions of Rule 45(b)(6), certain deviations therefrom are proposed as follows:

1. For the years 1977 and 1978, Columbia, while computing the system's consolidated tax liabilities in the usual manner, will for purposes of assessing liability among the individual companies of the system add back the reduction in such tax liabilities generated from any tax losses of Development U.S. and Development Canada resulting from their exploration and development activities.

2. The consolidated taxes as so adjusted will then be apportioned among the system companies other than Development U.S. and Development Canada in accordance with the procedure of Rule 45(b)(6). The cash difference between the adjusted consolidated tax liability and the actual consolidated tax liability will be remitted by Columbia to Development U.S. and

Development Canada in proportion to their respective tax losses, if any, incurred in 1977 and 1978 for use in further exploration and development work.

3. In future years, when Development U.S. or Development Canada have net taxable income they, or either of them, may be entitled to tax credits as a result of the loss carry-back or carry-over provisions of section 172(b) of the Internal Revenue Code of 1954 in order to comply with the separate return limitations required by Rule (b)(6). To the extent that these companies receive tax benefits pursuant to paragraphs 1 or 2 above, such benefits would be applied to reduce any tax credits in future years to which either of these companies might otherwise be entitled under the separate return limitations of Rule 45(b)(6).

4. Subject to paragraph 3, in no event will the tax allocated to any subsidiary company of Columbia exceed the amount of tax of such company based upon a separate return computed as if such company has always filed its tax return on a separate return basis.

Under the proposals set forth above, the actual consolidated tax liabilities of the Columbia system will not change. What will change is the allocation of that tax among the members of the group so that any tax credits remitted to the exploration companies would be matched by an equal aggregate increase in the tax allocation to other members of the group having taxable income. Nevertheless, under the proposed method of allocation, the resulting tax allocation to each of the Columbia subsidiaries having taxable income, although larger than would be the case under strict adherence to Rule 45(b)(6), is still smaller than the tax liability of each such company on a separate return basis. Declarants state that the proposed tax allocation has no effect on the cost of service treatment given to Columbia's distribution companies by regulatory commissions having jurisdiction over rates.

It is stated that the proven developed reserves as of October 1, 1977, for Development U.S. were 322,556 MMcf at an approximate composite cost of \$1 per Mcf. Development Canada had proven and probable reserves of 57,922 MMcf at 26 cents per Mcf for the same period.

Declarants request permission to file on an annual basis the certificates of notification required by Rule 24 under the Act. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. It is stated that the fees and expenses to be incurred in connection with the proposed transaction are estimated to be approximately \$8,300, including

charges for services by Columbia Gas System Service Corp. estimated at \$5,300.

Notice is further given that any interested person may, not later than March 1, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said amended declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing in respect thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[File No. 81-309]

CURTIS NOLL CORP.

Application and Opportunity for Hearing

FEBRUARY 1, 1978.

Notice is hereby given that Curtis Noll Corp. ("Applicant") has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act") for an exemption from the provisions of section 15(d) of the 1934 Act.

Section 15(d) provides that each issuer which has filed a registration statement which has become effective pursuant to the Securities Act of 1933, as amended, shall file with the Commission in accordance with such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors, such supplementary and periodic information, documents, and reports as may be re-

quired pursuant to section 13 of the 1934 Act with respect to a security registered pursuant to section 12 of the 1934 Act.

Section 12(h) empowers the Commission to exempt, in whole or in part, any issuer or class of issuers from section 15(d) if the Commission finds, by reason of the number of public investors, the amount of trading interest, the nature and extent of the activities of the issuer, income or assets of the issuer, or otherwise, that such action is not inconsistent with the public interest or the protection of investors.

The Applicant states, in part:

1. Applicant, an Ohio corporation, on October 11, 1977, as a result of a tender offer, became 99 percent owned by CN Corp., a wholly owned subsidiary of Congoleum Corp. On December 31, 1977, Congoleum Corp. of Delaware, a wholly owned subsidiary of CN Corp., was merged into the Applicant. As a result of the merger, CN Corp. became the sole owner of the common shares of the Applicant. The public common shareholders received cash for their shares in the merger. Holders of the Applicant's outstanding 5 percent Convertible Subordinated Debentures due July 1, 1987 (the "Debentures") were given notice of and the opportunity to submit their Debentures for conversion, and to tender the common shares received upon conversion. Following the tender offer, the remaining principal amount of Debentures were called for redemption. As of January 6, 1978, \$23,000 principal amount of Debentures, held by three holders, had not been surrendered to the Trustee for payment. The redemption price, including accrued interest, has been deposited with the Trustee for all Debentures outstanding on January 6, 1978.

2. On November 29, 1977, the Applicant's common stock was stricken from listing and registration on the New York Stock Exchange pursuant to section 12(d) of the 1934 Act and the Applicant, having fewer than 300 record holders of its common stock, was relieved from further compliance with the provisions of section 12 of the 1934 Act.

3. Congoleum Corp., whose common stock is listed on the NYSE and is registered with the Commission owns 100 percent of the common stock of CN Corp., which in turn is the sole owner of the Applicant's common stock. Congoleum Corp. will continue its periodic reporting under section 12 of the 1934 Act and the Applicant's results will be incorporated in such reports on a consolidated basis.

4. Pursuant to section 15(d) of the 1934 Act, Applicant is obligated to file all periodic reports with the Commission which may be applicable to its current fiscal year ending December 31, 1977.

5. The Applicant has no public shareholders.

6. The Applicant's securities are not publicly traded.

In the absence of an exemption, Applicant would be required to file a report on Form 10-K for the fiscal year ended December 31, 1977, as required by the provisions of section 15(d). Applicant believes that the granting of the exemption would not be inconsistent with any public interest or the protection of any investors.

For a more detailed statement of the information presented, all persons are referred to the application which is on file in the Offices of the Commission at 500 North Capitol Street, Washington, D.C.

Notice is further given that any interested person not later than February 27, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request and the issues of fact and law raised by the application which he desires to controvert.

At any time after that date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-14440; File No. SR-DTC-78-1]

DEPOSITORY TRUST CO.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975) notice is hereby given that on January 11, 1978, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change involves enhancements to the Institutional Delivery (ID) System which would provide institutions with an additional

day to acknowledge ID System transactions and broker-dealers with an additional day to submit trade data for processing by the ID System.

The proposed rule change is attached as Exhibit 2 to DTC's filing on Form 19b-4A, File No. SR-DTC-78-1.

STATEMENT OF BASIS AND PURPOSES

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to increase the number of transactions acknowledged in DTC's Institutional Delivery (ID) System by extending the time for an institution to affirm an ID confirmation. The proposed rule change would provide institutions with an additional day to acknowledge ID transactions and broker-dealers with an additional day to submit trade data for processing by the ID System.

The proposed rule change would carry out the purposes of section 17A of the Securities Exchange Act of 1934 by increasing the number of transactions acknowledged in the ID System between broker-dealers and their institutional customers and thereby facilitating the prompt and accurate clearance and settlement of securities transactions.

In discussions with Participants utilizing the ID System, Participants request that DTC extend the time for an institution to affirm an ID confirmation so that the number of transactions acknowledged could be increased. All Participants have been notified of the proposed rule change by the DTC Important Notice attached as Exhibit 2 to DTC's filing on Form 19b-4A, File No. SR-DTC-78-1.

DTC perceives no burden on competition by reason of the proposed rule change.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies

of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

All submissions should refer to the file number referenced in the caption above and should be submitted on or before March 6, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 3, 1978.

[Release 34-14438; File No. SR-NASD-77-21]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC..

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975) notice is hereby given that on December 2, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change. The proposed rule change, as amended on December 28, 1977, is as follows:

NASD'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The following is the full text of the proposed amendments to Sections 6 and 19 of the Code of Procedure for Handling Trade Practice Complaints of the National Association of Securities Dealers, Inc. ("Association"). New language is italicized and deleted language is bracketed:

Complaint Filed in District Entitled to Conduct Hearing

Sec. 6. If the complaint is filed with the District Business Conduct Committee entitled to hear such complaint, as provided in Section 3, or if a complaint is forwarded to such Committee by another District Business Conduct Committee, as provided in Section 5, such Committee shall, on the form to be supplied by the Board of Governors, forthwith send notice in writing of the receipt of such complaint, together with a copy of such complaint, to the Respondent, and shall require the Respondent to answer thereto. *A copy of said complaint shall also be sent to the member of the Association with whom the Respondent is an associated person as defined in Article I, Section 3(f) of the By-Laws of the Corporation.*

Notification of [Decision] Final Disposition of Complaint

Sec. 19 [Both t] The Complainant, [and] the Respondent, *and the member of the Association with whom the Respondent is presently an associated person (as defined in Article I, Section 3(f) of the By-Laws of the Corporation)* shall be promptly notified of, and be sent a copy of, any written decision rendered by the Board of Governors under Sections 16, 17 or 18 hereof, *or by a District Business Conduct Committee under Sections 11, 12 or 13 hereof if said decision is the final disposition by the Association of the complaint against Respondent. The member of the Association with whom the Respondent is presently an associated person shall be promptly notified of any application for review to the Securities and Exchange Commission made by the Respondent pursuant to Section 20 hereof and Section 19(d) of the Securities Exchange Act of 1934.*

NASD'S STATEMENT OF PURPOSE OF PROPOSED RULE CHANGE

The proposed amendments to Sections 6 and 19 of the Association's Code of Procedure for Handling Trade Practice Complaints results from the belief of the Association's Board of Governors that under current procedures an employer-member is not put on sufficient notice to be able to fully carry out its duty to adequately supervise its associated persons, thereby unnecessarily exposing public customers to potential harm and employer-members to the charge of inadequate supervision. Under current procedures, an employer-member is not formally advised of a complaint filed against an associated person by one of the Association's District Business Conduct Committees. In particular, this has been a problem where the associated person has changed employers after the alleged transgression but before a formal complaint has been filed since there would then be no practical way in which the new employer would have actual or constructive knowledge of the pending action. Neither the associated person's Form U-4 (Uniform Agent Application Form) nor activities of the Association's examining staff would signal any potential problems at that point in time. The Board of Governors feels that an employer-member has the duty to adequately supervise its associated persons and, therefore, should be advised of pending actions so that it might adjust its supervision accordingly.

¹There is a continuing obligation for an associated person to update the Form U-4 in regard to related questions therein. However, non-compliance with that requirement is frequent and enforcement of it would be difficult to administer. See also note 2 infra.

Also, the Board is concerned that its procedures faithfully comply with the statutory mandate to be fair to those accused of violating the Association's rules. While the Board recognizes the decision to terminate an employment relationship is normally between the employer and the associated person, it believes that until a matter has been properly adjudicated and becomes final, allegations in a complaint should not in any way affect the continuation of the employment relationship. Rather, depending on the nature and seriousness of the charge, the employer should increase his supervision of that particular associated person on an appropriate manner. The Board also believes it is not fair to the associated person nor his employer to advise an employer of a complaint without advising him of its final disposition.

The proposed amendments will specifically accomplish the following:

Section 6

This proposed amendment will require a District Business Conduct Committee issuing a disciplinary complaint to provide a copy of that complaint to the member of the Association with whom the respondent presently is an associated person. The purpose of the proposed amendment is to provide members with notice of pending actions against associated persons so that they might properly adjust their supervision where appropriate.

Section 19

This proposed amendment will add language which will advise a member of the final disposition of a complaint brought against an associated person. The purpose of this amendment is to protect the rights of the associated person by allowing the member to have knowledge of charges which are dismissed or reduced and to further assist the member in his ability to adjust his supervision according to the nature and seriousness of the findings.

NASD'S STATEMENT OF BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

Section 15A(b)(6) provides that the rules of a registered securities association be "designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade . . . and, in general, to protect investors and the public interest . . ." Section 15A(b)(8) provides that the rules of a registered securities association "provide a fair procedure for the disciplining of . . . persons associated with members . . ." Pursuant to these statutory directives, the Association has adopted Section 27 of its Rules of Fair Practice which imposes upon members extensive responsibilities in the area of supervision of associated persons and a Code of Procedure for Handling Trade Practice

Complaints which provides a comprehensive and fair procedure for the disciplining of members and persons associated with members.

NASD'S STATEMENT AS TO COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON THE PROPOSED RULE CHANGE

Considering the complexity of the issues and serious nature of the personal and public policy factors involved, the Board determined to transmit a Notice to Members requesting comments from members and associated persons on a proposed amendment to Section 6 of the Association's Code of Procedure for Handling Trade Practice Complaints.

Nineteen comment letters were received of which eleven supported the proposal in its entirety, three supported the proposal but would also provide for even more extensive notification of employers, one supported the proposal if privacy rights were protected, two supported the objective of the proposal but proposed a different method of attaining the objective; one posed certain problems regarding NYSE Rule 351 and questioned whether the responsibility of an employer to supervise more closely should be increased, and one was totally opposed to the proposal as violating due process and proper judicial type procedures.

Based on the comments received, the proposed amendment to Section 6 was modified by making it clear that all associated persons would fall within its scope and new amendments to Section 19 were proposed which would provide members with information about the final disposition of complaints involving associated persons.²

²In respect to the suggestion that the same objective be attained by utilizing the Form U-4 and a series of letters advising the associated person of his responsibility to update that from in regard to related questions therein, this alternative was rejected by the Board because non-compliance with updating the Form U-4 is one of the reasons the amended rule was proposed and the suggested procedure would be difficult to administer. Also, it would place the Association in the somewhat ridiculous posture of advising an associated person to inform the Association of a complaint brought and, therefore, already known by the Association.

Regarding a comment that the confidentiality of the proceeding regarding a member would be jeopardized where an associated person works for two members, the name of the employer-member who is also a respondent will be deleted administratively when providing the employer-member with a copy of this complaint.

In respect to the comments on the effect of the proposed rule change on NYSE Rule 351 (which requires NYSE members to inform the NYSE of self-regulatory proceedings against its employee), this is properly a matter to be determined by the NYSE. In regard to the comment that the

NASD'S STATEMENT AS TO BURDEN ON COMPETITION

The proposed rule changes impose no burdens on competition not necessary in the furtherance of the purposes of the Act.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period (i) as the Commission may designate up to ninety (90) days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Association consents, the Commission will:

(a) By order approve such proposed rule change, or (b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing, including Notice to Members 77-33, copies of all comment letters received in response thereto and a summary chart thereof, and of all other written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the Association at 1735 K Street NW., Washington, D.C. All submissions should refer to the file number referenced in the caption above and should be submitted on or before March 15, 1978.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 3, 1978.

[Release No. 34-14436; File No. SR-NYSE-77-24]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15

proposed rule would not impose any duty of increased supervision, the need to increase supervision where appropriate is the basis for the proposed rule change. There was also a suggestion that the complaint be directed to the appropriate compliance officer of the member firm. The complaint would be directed to the Executive Representative or the Financial Principal but the Association does not maintain a mailing list for compliance officers.

U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29 (June 4, 1975), notice is hereby given that on January 30, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission an amendment of a proposed rule change, designated as Amendment No. 1 to File No. SR-NYSE-77-24, as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF AN AMENDMENT TO PROPOSED RULE CHANGE

The instant amendment supplements a proposed rule change (File No. SR-NYSE-77-24) which the New York Stock Exchange, Inc. ("NYSE") filed with the Commission on August 26, 1977. Notice of the original proposal, including a statement of terms of substance, was published for public comment on September 9, 1977 (42 FR 45401) (Release No. 34-13915 (September 1, 1977)).

The August 26, 1977, submission proposed new Rule 103A to provide a non-disciplinary mechanism whereby the NYSE's Market Performance Committee ("MPC") could cancel a member's registration to act as specialist in one or more issues and commence a proceeding to reallocate any such issue, after provision of notice and opportunity for a hearing to the affected member. Paragraph .10 of proposed Rule 103A stipulates minimum standards of acceptable specialist performance which are defined by reference to scores achieved on the NYSE's quarterly evaluation of specialists by means of its Specialist Performance Evaluation Questionnaire ("SPEQ"). Failure to meet any of these minimum performance criteria could trigger action by the MPC under proposed NYSE Rule 103A.

Amendment No. 1 to File No. SR-NYSE-77-24 does not contain any modification of the text of proposed NYSE Rule 103A. Rather, the Exchange has supplemented its earlier responses in Form 19b-4A to the following areas respecting its proposed rule: purpose, statutory basis, comments received, and burden on competition.

SUMMARY OF THE NYSE'S AMENDED STATEMENT OF PURPOSE OF THE PROPOSED RULE CHANGE

The NYSE clarifies how the contemplated procedure under Rule 103A would operate as a non-disciplinary mechanism to effect the eventual reallocation of specialty stocks grounded upon a finding of substandard specialist performance. To accomplish this, NYSE details the following: (1) The content of and computation of performance ratings from the SPEQ; (2) selection of participants for the quarterly surveys; (3) staff procedures for reviewing completed SPEQ's, communicating SPEQ scores to specialists and

meeting with specialists whose performance is deemed to require improvement by virtue of substandard scores; and (4) the process for selecting individual securities as to which a proceeding under proposed Rule 103A might be initiated. In addition, the NYSE reiterates that a specialist whose stock may be put up for reallocation subsequent to a proceeding under the proposed rule would not be prohibited from reapplying for assignment of such an issue through the NYSE's stock allocation procedure or from registering to act as a competing specialist in the issue.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

NYSE'S AMENDED RESPONSE

Proposed new Rules 103A and 103A.10 will provide a method for the Exchange to renew the competition for registration in a stock through reallocation procedures and provide a means for the Exchange to improve the quality of its marketplace and, thus, to remain competitive with other market centers. The rules represent the culmination of years of effort, study and experience in developing a fair and acceptable method of upgrading market quality through performance evaluation and reallocation. The proposed new Rules are consistent with section 6(b)(5) of the Securities Exchange Act of 1934 which, in part, provides for Exchange rules concerned with the administration of the Exchange, and section 11A(a)(1)(C)(ii) which states that the Congress finds that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

NYSE'S AMENDED RESPONSE

The NYSE has not solicited comments on the proposed rule change nor have any written comments been received. The Exchange notes, however, that an Exchange member firm has submitted a written comment to the Securities and Exchange Commission dated September 30, 1977.

That member firm objected [on the grounds] that the SPEQ is subjective, "no more than a popularity poll", and does not provide objective measures of performance. They [the member firm] also noted that the members who evaluate a specialist may also be competitors of the specialist in other areas such as public retail brokerage business, and that the proposed rule

change may actually be anti-competitive in operation.

With regard to the complaint that the SPEQ is subjective, it is helpful to clarify exactly what the SPEQ is. It provides for the numeric evaluation of a specialist organization every quarter over eight precisely defined areas of specialist responsibility by approximately 25 professionals who must deal with that specialist organization on a day-to-day basis while representing the interests of the public investor and who must depend upon that specialist in order to adequately fulfill their responsibility to the public investor. The procedures proposed by Rules 103A and 103A.10 provide further protection for the incumbent specialist by requiring that action to reallocate stocks may be taken only if the consensus of 50 such professionals on two quarterly SPEQ's is that performance is unacceptable, only after repeated counseling/improvement efforts, and only then upon the majority vote of the 23-member MPC which is subject to oversight by the Board-level Quality of Markets Committee and which consists of three members of the Board of Directors, seven specialist members, seven nonspecialist members, three allied members and three representatives of institutional investors.

The NYSE has utilized statistical measures of market characterization for many years as an aid in monitoring market activity. However, no purely statistically generated number can accurately measure specialist performance due in part to the constantly changing character of the market in a stock. Experience has shown that the best measure of specialist performance is the evaluation by their "customers".

Moreover, the SPEQ is far from being a "popularity poll" as the experience of the NYSE demonstrates. This is supported by the fact that SPEQ results for specialist organizations have proven to be very consistent from quarter to quarter; when a specialist organization changes its floor location so that an entirely new mix of floor brokers complete the SPEQ; and when special questionnaires are conducted of a particular specialist organization by the 40 or 50 largest commission firms on the NYSE. In the latter regard, the grades a specialist organization achieves when a special questionnaire of the 40 or 50 largest firms is conducted are very consistent with the SPEQ grades the organization achieved on a regular, quarterly questionnaire.

With regard to the concern expressed that specialists might be evaluated by their competitors, experience with the SPEQ has not shown that this issue is a problem. Had this competitive aspect been a problem, the SPEQ grades of specialist organizations offering larger commission dis-

counts, either floor brokerage or retail, should have been impacted. This, however, is statistically without basis.

BURDEN ON COMPETITION

NYSE'S AMENDED RESPONSE

The proposed rule change does not impose any burden on competition. On the contrary, it provides a procedure to renew the competition for a stock through reallocation, and it provides a procedure whereby the Exchange may maintain and improve the quality of its marketplace and thus remain competitive with other market centers.

On or before March 20, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve the amended proposed rule change, or

(B) Institute proceedings to determine whether the amended proposal should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before March 6, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 2, 1978.

[8010-01]

[Release No. 34-14437; File No. SR-NYSE-78-21]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on January 31,

1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

NEW YORK STOCK EXCHANGE'S ("NYSE") STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The rule provides for a transfer and leasing fee of \$1,000 or five percent of the purchase price or the price of the most recent contracted membership sale (as applicable), whichever is greater, up to a maximum amount of \$5,000. The text of the rule is attached as Exhibit I-A.

PURPOSE OF PROPOSED RULE CHANGE

The purpose of the rule change is to reduce the current transfer fee charged new members who acquire an equity membership through purchase or transfer of a membership in view of the current market price of such membership; adopt a fee for a new member who leases a membership; and provide for a uniform fee for all purchases, transfers, or leases so that any disparity in fees would not serve as an inducement for acquiring any one particular means of membership. The proposed fee is \$1,000 or five percent of the purchase price or the price of the most recent contracted membership sale (as applicable), whichever is greater, up to a maximum amount of \$5,000.

BASIS UNDER THE ACT

The basis under the Act for the proposed rule change is section 6(b)(2) and section 6(b)(4).

(i) Is inapplicable.

(ii) The reduction of transfer fees will enhance the ability of any registered broker or dealer or natural person associated therewith to become a member.

(iii) Is inapplicable.

(iv) The fee will apply equally to all members having an equity interest in the Exchange and lessees of such equity members.

(v) Is inapplicable.

(vi) Is inapplicable.

(vii) Is inapplicable.

(viii) Is inapplicable.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, OR OTHERS

No comments were solicited or received with respect to the subject rule change.

BURDEN ON COMPETITION

None. The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may

summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before March 6, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 2, 1978.

Exhibit I-A

1. Text of Proposed Rule Change: New language italicized, Deleted language in [brackets].

Rule 301.27 as amended

Proposed Transfer or Lease of Membership

• • • • •

27 Payments to be made on day of approval of transfer [and] or lease and payments to be made prior to admission to membership.—On the day on which the application for a membership described in Section 1(a) of Article IX of the Constitution is scheduled to be considered, the proposed member (hereinafter referred to as a "new member") must deposit with the Exchange the balance of the purchase price of his membership, [an initiation fee of \$7,500 to the Exchange (Art. IX, Sec. 4 ¶ 1404)] and pay to the Exchange an initial contribution to the Gratuity Fund of \$15 (Art. XVI, Sec. 1 ¶ 1751), [and] the unexpired portion of the transferor's dues for the current quarter (Art. X, Sec. 4 ¶ 1454) [and], and an initiation fee for the transfer of such membership which shall be determined as follows, notwithstanding the provisions of Section 6 of Article IX:

(1) in the event that the new member shall have purchased such membership through a membership auction facility furnished by the Exchange the initi-

ation fee for the transfer of the membership shall be the greater of \$1,000 or five percent of the purchase price paid for the membership, up to a maximum amount of \$5,000;

(2) in the event that:

(i) a member (hereinafter referred to as "outgoing member") whose membership shall be transferred to a new member shall have had a contractual obligation to transfer the membership to such person as may be designated by a member organization of which the outgoing member then shall be either a partner or an officer therein, and

(ii) said contractual obligation shall have been entered into at the same time as the outgoing members shall have acquired said membership, and

(iii) the Exchange at the time said contractual obligation shall have been entered into shall have in writing approved or consented to the entering into of said obligation, and

(iv) the membership of the outgoing member shall in satisfaction of such obligation be transferred to the new member pursuant to such a designation, and the new members shall have substantial the same relationship to and financial interest in the member organization as the outgoing member had, and

(v) the new member shall have a contractual obligation to the same member organization to transfer the membership of the new member to such person as may be designated by the member organization, which obligation shall be upon substantially the same terms and conditions of said contractual obligation of the outgoing member to the member organization.

then the initiation fee for the transfer of the membership shall be the greater of \$1,000 or five percent of the purchase price at which the most recent contracted sale of a membership occurred through the auction facility prior to the date on which notice of the new member is posted, up to a maximum amount of \$5,000;

(3) in the event that the membership of a new member shall have been acquired in a manner other than as contemplated in either clause (1) or clause (2) of this paragraph the initiation fee for the transfer of the membership shall be the greater of \$1,000 or five percent of the purchase price at which the most recent contracted sale of a membership occurred through the auction facility prior to the date on which notice of the new member is posted.

On the day on which an application for a membership described in Section 2 of Article IX of the Constitution is scheduled to be considered, the proposed member shall pay to the Exchange an initiation fee for the leasing of a membership described in Section 1(a) of Article IX which shall be the

greater of \$1,000 or five percent of the purchase price at which the most recent contracted sale of a membership occurred through the auction facility prior to the date on which notice of such new member is posted, up to a maximum amount of \$5,000, and the unexpired portion of the lessor's dues for the then current quarter, provided, however, that no initiation fee shall be required upon the renewal of a lease agreement between the lessor and the lessee. Upon the termination of the lease agreement, the lessor shall pay the lessee the unexpired portion of the dues for the then current quarter.

[Release No. 14428; File No. SR-PSD-77-3]

PACIFIC SECURITIES DEPOSITORY TRUST CO.

Order Approving Rule Change Relating to Designation of the Location of Its Annual Meeting

FEBRUARY 1, 1978.

On December 7, 1977, Pacific Securities Depository Trust Company ("PSDTC"), 301 Pine Street, San Francisco, Calif. 94104, submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed rule change authorizing its Board of Directors or stockholders to designate the location of PSDTC's annual meeting.

In accordance with section 19(b) of the act and rule 19b-4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (42 FR 65341, December 30, 1977) and the public was invited to comment thereon. Notice of the filing and an invitation for comments also appeared in Securities Release No. 34-14302, December 21, 1977. No letters of comment were received.

The Commission has reviewed the proposed rule change and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies.

It is therefore ordered, Pursuant to section 19(b)(2) of the act, that the proposed rule change contained in File No. SR-PSD-77-3 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SHEARSON APPRECIATION FUND, INC. AND THE SHEARSON CAPITAL FUND, INC.

Filing of Application To Exempt a Proposed Merger

FEBRUARY 1, 1978.

Notice is hereby given that The Shearson Appreciation Fund, Inc. ("Appreciation"), and The Shearson Capital Fund, Inc. ("Capital") (collectively, "Applicants"), 505 Park Avenue, New York, N.Y. 10022, both open-end, diversified management investment companies registered under the Investment Company Act of 1940 ("Act"), filed an application on October 17, 1977, and amendments thereto on December 19, 1977, and on January 23, 1978, for an order, pursuant to section 17(b) of the act, exempting from the provisions of section 17(a) of the act a proposed merger of Capital into Appreciation, and pursuant to section 17(d) of the act and Rule 17d-1 thereunder, permitting Shearson Management Inc., ("Management"), to pay certain expenses incurred by Applicants in the proposed merger. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants represent that, on September 30, 1977, the total net assets of Appreciation were \$8,437,927, and those of Capital were \$1,485,593. They state that the Applicants both have long-term capital appreciation as their investment objective, and that they generally invest in similar types of securities.

Applicants state that they have the same investment adviser, Management, which is wholly-owned by Shearson Hayden Stone, Inc., which may be used by Applicants as a broker. Applicants further state that they have the same directors and officers, and that three of those officers are officers or directors of Management and two of Applicants' officers are also officers of Shearson Hayden Stone, Inc.

Capital proposes to merge into Appreciation, with Appreciation to be the surviving fund. On the effective date of such merger, the outstanding shares of Capital's outstanding common stock will be converted into Appreciation's common stock having the same aggregate book net asset value as the shares being converted, as computed on the close of business on the day next preceding the effective date of the merger. Applicants do not anticipate that any of Capital's stock will be sold immediately after the merger. Applicants state that, although shares of Capital presently may be purchased without a sales charge, a sales charge of 8.5 percent is

applicable to single purchases of less than 10,000 Appreciation shares, and that such 8.5 percent sales charge would apply for all single purchases of less than 10,000 shares of the surviving fund. No adjustments to the net asset value of either Applicants' shares will be made to compensate for any potential Federal income tax impact on the stockholders of Capital or Appreciation which might result from differences in each Applicants' present capital loss carryovers because, Applicants assert, utilization of such carryovers is contingent on the future uncertainty of capital gains. Shearson and Capital have tax loss carry forwards of approximately \$8,230,000 and \$1,720,000 respectively, and during their last fiscal year realized additional losses of \$450,000 and \$140,000, respectively. Shearson has net unrealized appreciation of \$762,000 and Capital has net unrealized appreciation of \$126,000.

Applicants represent that the merger is subject to several contingencies, including approval by the shareholders of both Applicants, the grant of all necessary orders and approvals under the Act and under the securities laws generally, and the receipt of opinion of counsel that the transaction will constitute a tax-free reorganization. Dissenting shareholders of the Applicants will have no appraisal rights in connection with the merger but they will have the right to have their shares redeemed at current net asset value in accordance with the act.

Applicants state that Management receives fees for its services from the Applicants at an annual rate of 1/4 of 1 percent of the first \$200 million of each Applicant's average daily net assets, except that (1) if the management fee and all other expenses (exclusive of brokerage commissions, interest and taxes) exceed 1.5 percent of the first \$30 million of each Applicant's average daily net assets (or 1% of such assets in excess of \$30 million) the management fee shall be reduced by such excess, and (2) if all such other expenses (exclusive of brokerage commissions, interest, taxes and extraordinary expenses) exceed 2 percent of each Applicant's average daily net assets, such excess expenses shall be borne absolutely by Management, even if such expenses exceed Management's fee during any given fiscal year.

The application states that for its fiscal year ended March 31, 1977, the ratio of Capital's expenses to net assets would have been 2.2 percent; but that, since by contract the management fee must be reduced by the amount by which it brings the expense ratio over 1.5 percent, Management returned its total fee of \$9,473 which resulted in an actual expense ratio of 1.7 percent after reimbursement. Appli-

cants estimate that, in the event that Applicants merge, the expense ratio (excluding non-recurring merger costs) for the surviving fund would decrease to 1.3 percent, which was the level experienced by Appreciation during 1976. Applicants observe that Management's income may be increased as a result of the merger because the surviving fund's expense ratio is not expected to exceed 1.5 percent, and that, although Management received no fee from Capital during the fiscal year ending March 31, 1977, it would have received additional fees of \$9,473 if the merger had been effective during that year.

Applicants represent that they have agreed with Management that the \$40,000 estimated total expense of the merger will be borne as follows: Appreciation will pay the estimated costs of its annual meeting had the merger not been considered, and directors fees for meetings dealing with the merger (approximately \$5,300); Capital will pay an amount computed on the same basis (approximately \$1,700); and Management will pay the remaining costs up to a maximum of \$20,000. They state that the estimated \$13,000 of costs in excess of that total will be borne by Capital because, they assert, Capital derives the most benefit as between the two funds.

Section 17(a) of the Act provides, in part, that it is unlawful for an affiliated person of a registered investment company, or any affiliated person of such a person, knowingly to sell to such registered investment company any security or other property. Section 2(a)(3) of the Act provides, in part, that an affiliated person of another person means any person directly or indirectly controlling, controlled by, or under common control with, such other person. Applicants state, without conceding, that the Applicants may be deemed to be affiliated persons of one another because each has investment advisory agreements with Management and because the Applicants have certain officers and directors in common with one another and with Management. Section 17(b) of the act provides, in part, that the Commission shall exempt a proposed transaction from the provisions of section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act. Applicants have requested an order pursuant to section 17(b) of the act exempting the proposed merger from provisions of section 17(a) of the act.

Applicants submit that the terms of the proposed merger are reasonable

and fair and do not involve overreaching on the part of any person concerned since Appreciation will be issuing shares to Capital at an exchange ratio based on their relative net asset values and without the payment of any commission. Applicants further submit that approximately \$20,000 of expenses in connection with the merger will be paid by Management. The application states that Appreciation has experienced over the past several years a decline in outstanding shares as well as net assets, that the directors believe this trend may continue, and that the additional assets of Capital will keep Appreciation's expense ratio from rising as fast as it otherwise might. Applicants submit that, if approved by the shareholders of each Applicant, the proposed merger will be consistent with the policies of the Applicants and the general purposes of the act.

Section 17(d) of the act and rule 17d-1 thereunder prohibit, in part, any affiliated person of a registered investment company, acting as principal, from affecting any transaction in which such investment company is a joint participant, unless an application has been filed with the Commission and has been granted by order. In passing upon such applications, the Commission will consider whether the participation of such registered company in such arrangement, on the basis proposed, is consistent with the provisions, policies and purposes of the Act, and the extent to which such participation is on a basis different from, or less advantageous than, that of other participants. Applicants have requested an order pursuant to Section 17(d) of the Act and Rule 17d-1 thereunder to permit Management to pay certain of the expenses incurred by Applicants in the proposed merger. Applicants and Management submit that the cost-sharing arrangements, summarized above, are reasonable and fair to the parties and are the result of negotiations between the non-interested directors of each Applicant and Management, after taking into account the relative benefits to each party.

Notice is further given that any interested person may, not later than February 24, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address

stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20403; 70-6029]

SOUTHWESTERN ELECTRIC POWER CO.
Proposed Modification of Existing Credit Agreement Between Bank and Utility Company

FEBRUARY 6, 1978.

Notice is hereby given that Southwestern Electric Power Co. ("SWEPCO"), P.O. Box 21106, Shreveport, Louisiana 71156, and electric utility subsidiary of Central and South West Corp. ("CSW"), a registered holding company, has filed a post-effective amendment to its declaration as amended, previously filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6 and 7 of the act as applicable to the proposed transaction. All interested persons are referred to the declaration, as further amended by said post-effective amendment, which is summarized below, for a complete statement of the proposed transaction.

By Commission order dated August 9, 1977 (HCAR No. 20135), SWEPCO was authorized to enter into a Credit Agreement (the "Agreement") with Bank of America National Trust & Savings Association (the "Bank") in essence establishing an acceptance line of credit ("acceptance credit") for SWEPCO with the Bank to provide a source for financing SWEPCO's periodic acquisition of coal for its Welsh Power Plant pending the collection of revenues from customers reimbursing SWEPCO for the cost of the coal and certain transportation charges. The acceptance credit was made available in a maximum amount of \$5,000,000 and the Agreement also extended to SWEPCO an "advance credit" in a maximum amount of \$500,000 to permit it to borrow the amount of the

Bank's discount and commission. In any event, the maximum aggregate principal amount outstanding of the two credits was not to exceed \$5,000,000.

SWEPCO has now filed a post-effective amendment in this proceeding seeking authorization to effect certain changes in the Agreement. SWEPCO proposes to: (a) increase the amount of loans permitted to be outstanding to \$15,000,000; (b) increase the "advance credit" to \$1,500,000; (c) make the lines of credit available to finance coal and transportation and storage costs for its Flint Creek Power Plant as well as for its Welsh Power Plant; and (d) to change the date to which drafts will be accepted by the Bank from June 1, 1978, to December 31, 1978. SWEPCO further proposes to amend the Agreement to permit it to finance the cost of coal inventory initially purchased by it for cash without utilizing the line of credit under the Agreement, provided that the total borrowings under the amended Agreement do not exceed \$15,000,000 and to enable it to, in effect, extend the due date of any loan under the Agreement so long as the total loan obligation for any single coal purchase invoice is not outstanding for longer than 270 days. SWEPCO states that, other than as set out above, no substantive change will be made in the terms of the Agreement.

It is stated that the fees and expenses to be incurred in connection with the proposed transaction are estimated at \$5,500. It is stated that the Arkansas Public Service Commission has jurisdiction with respect to the creation of a security interest in coal at the Flint Creek Power Plant. It is further stated that no other state commission and no federal commission, other than this Commission, has jurisdiction with respect to the proposed transaction.

Notice is further given that any interested person may, not later than March 3, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration, as amended by said post-effective amendment, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended by said post-effective amendment, or as it may be further amend-

ed, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[4910-59]**DEPARTMENT OF TRANSPORTATION****National Highway Traffic Safety Administration**

[Docket No. EX76-1; Notice 3]

JET INDUSTRIES, INC.**Petition for Temporary Exemption From Motor Vehicle Safety Standards**

Jet Industries, Inc., of Austin, Tex., has applied for a 2-year extension of NHTSA Exemption No. 76-1, from compliance with certain safety standards on the basis that exemption would facilitate the development and field evaluation of a low-emission motor vehicle. The previous exemption (41 FR 7545) expired on January 1, 1978.

Since 1975 Jet has imported the Subaru 360 van, manufactured by Fuji

Heavy Industries of Japan. The vehicle is not marketed in the United States and therefore is not certified as conforming to the Federal motor vehicle safety standards. Upon arrival in the United States these vehicles have had their gasoline-powered engines removed and electric motors substituted. They have been marketed as a truck under the name "Electra Van." Jet has asked for a 2-year exemption and will not import more than 2,500 vehicles during any 12-month period that the exemption is in effect. Thus far 56 vehicles have been sold under the existing exemption. The following is a list of Federal standards or portions thereof for which continued exemption is requested:

No. 101 Control Location, Identification, and Illumination. Section 4.3—Control identification for headlamps, hazard warning, and windshield wiper switches will not be directly illuminated. Ambient light is provided by light from adjoining gauges.

No. 103 Windshield Defrosting and Defogging Systems. Vehicle is furnished with systems but petitioner is unsure if performance requirements are met. Field experience in British Columbia and Connecticut indicates that "the system provides ice and fog free windshields within the limits of the existing standards".

No. 104 Windshield Wiping and Washing Systems. Wiping system has one speed only, with a frequency of 50 cycles per minute.

No. 108 Lamps, Reflective Devices, and Associated Equipment. Petitioner believes that stop, tail, turn signal, and side marker lamps are not of a size required by the standard.

No. 206 Door Locks and Door Retention Components. "Only limited tests as prescribed have been made at this time."

The company seeks no extension of its exemption from Standard Nos. 119 and 207 as compliance has been achieved.

Jet has been selected by the former Energy Research and Development Administration to participate in the Department of Energy's electric and hybrid vehicle development program and will incorporate the knowledge gained from its recent research and experience in developing and supplying the vehicles under this grant.

This notice of receipt of a petition for a temporary exemption is published in accordance with the NHTSA regulations on this subject (49 CFR 555.7), and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Interested persons are invited to submit comments on the petition for exemption of Jet Industries. Comments should refer to the docket number and be submitted to: Docket

Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received, are available for examination in the docket both before and after the closing date. Comments received after the closing date will also be filed and will be considered to the extent practicable. Notice of final action on the petition will be published in the FEDERAL REGISTER.

Comment date: March 10, 1978.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegations of authority at 49 CFR 1.51, 49 CFR 501.8.)

Issued on February 2, 1978.

ELWOOD T. DRIVER,
Acting Associate Administrator
for Rulemaking.

[Notice No. 587]

ASSIGNMENT OF HEARINGS

FEBRUARY 8, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 106674 (Sub-No. 226). Schilli Motor Lines, Inc., is assigned for continued hearing on March 20, 1978, at the offices of the Interstate Commerce Commission in Washington, D.C.

MC 116077 (Sub-No. 382). Robertson Tank Lines, Inc., is assigned for continued hearing on April 11, 1978, at the offices of the Interstate Commerce Commission in Washington, D.C.

MC 121496 (Sub-No. 3). Cango Corp., is now assigned for continued hearing on April 11, 1978, at the offices of the Interstate Commerce Commission in Washington, D.C.

MC 102567 (Sub-No. 194). McNair Transport, Inc., is now assigned for continued hearing on April 11, 1978, at the offices of the Interstate Commerce Commission in Washington, D.C.

MC 128270 (Sub-No. 27). Rediehs Interstate, Inc., now assigned February 15, 1978, at Dallas, Tex., is canceled and application dismissed.

MC 113855 (Sub-No. 376). International Transport Inc., now assigned February 22, 1978, at Omaha, Nebr., is canceled and application dismissed.

MC 142766 (Sub-No. 7). White Tiger Transportation, Inc., now assigned February 7, 1978, is canceled and transferred to modified hearings.

MC 87909 (Sub-No. 27). Arrow Motor Freight Lines, Inc., now assigned March 9, 1978, at Chicago, Ill., is canceled and application dismissed.

MC 67121 (Sub-No. 7). Harp Transportation Line, now assigned February 22, 1978, at Denver, Colo., is postponed indefinitely.

AB 57 (Sub-No. 10). Soo Line Railroad Co. Abandonment In Baraga And Houghton Counties, Mich., now assigned March 13, 1978, at Houghton, Mich., is postponed to March 20, 1978, at Houghton, Mich., in a hearing room to be later designated (1 week).

Acting Secretary.

[FR Doc. 78-3948 Filed 2-10-78; 8:45 am]

[7035-01]**FOURTH SECTION APPLICATIONS FOR RELIEF**

FEBRUARY 8, 1978.

These applications for long-and-short-haul relief have been filed with the ICC.

Protests are due at the ICC within 15 days from the date of publication of this notice.

FSA No. 43501, Erie Western Railway Co. No. 2, rates on grain, from stations on its line in Indiana, and Chicago, Ill., to Chicago, Ill., and Decatur, Ind., in its tariff 6, ICC 6, to become effective March 7, 1978. Grounds for relief—carrier competition.

FSA No. 43502, Southwestern Freight Bureau, Agent's No. B-728, rates on carbolic acid (phenol), from Allemania, La., and points in Texas, to Marietta, Ohio, in sups. 406 and 322 to its tariffs 38-D and 355-C, ICC 5044 and 5062, respectively, to become effective March 8, 1978. Grounds for relief—market competition.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Notice No. 292]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a

statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30 days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77320, filed September 26, 1977. Transferee: GIBNEY DISTRIBUTORS, INC., 300 Old Indian Head Road, Kings Park, N.Y. 11754. Transferor: Muhlenhaupt Movers, Inc., P.O. Box 238, Northport, N.Y. 11768. Applicant's representative: William J. Augello, 120 Main Street, P.O. Box Z, Huntington, N.Y. 11743. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate No. MC 110071 (Sub-No. 1), issued May 4, 1961, as follows: Household goods between points in Suffolk County, N.Y., on the one hand, and, on the other, points in New York, Connecticut, Maine, New Jersey, Pennsylvania, Maryland, Delaware, Rhode Island, Vermont, New Hampshire and District of Columbia. Transferee presently operates as a carrier under Certificate No. MC 124904 (Sub-Nos. 1, 2, & 5). Transferee does not seek section 210a(b) temporary authority.

H. G. HOMME, Jr.,
Acting Secretary.

[Investigation and Suspension Docket No. M-29665]

PASSENGER FARES—ROCKLAND COACHES, INC.

[Investigation Docket No. 36754]

PASSENGER FARES—MANHATTAN TRANSIT CO.

[Investigation Docket No. 36775]

PASSENGER FARES—HUDSON TRANSIT LINES

JANUARY 27, 1978.

The Interstate Commerce Commission hereby gives notice that its section of Energy and Environment has concluded that the proposed intercity commuter bus passenger fare increases averaging between 6 and 25 percent between New York, N.Y., and adjacent counties in northern New Jersey and New York, if approved by the Commission, do not constitute major Federal actions significantly affecting the quality of the human environment and that preparation of a detailed environmental impact statement will not be required.

It was concluded, among other things, that passenger diversion to other modes as a result of the proposed actions, both individually and cumulatively, would be minimal and, based on past experience, only temporary in duration. If diversion occurs, the environment will be negligibly impacted. The actions, however, are contrary to the policies and plans of state and local officials which call for the expanded use of bus transportation to New York City.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before February 28, 1978.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceedings and does not purport to resolve the issue of whether the involved fare increases are just and reasonable. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of

NOTICES

environmental impacts and reasonable alternatives.

H. G. HOMME, Jr.,
Acting Secretary.

NOTICE OF DELETION AND ADDITION OF ITEMS OF THE FEBRUARY 9, 1978 AGENDA

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10a.m.—February 9, 1978

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: (Addition) 28. Docket 32042, "New Low" fares proposed by TWA (BFR). (Deletion) 26. Docket 31993, Rules governing the acceptance and carriage of handicapped persons proposed by various carriers (BFR).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary,
202-673-5068.

SUPPLEMENTARY INFORMATION: Delta's complaint was received after the Board's staff had submitted their list of items for the February 9, calendar. TWA's answer was received on

February 6. The Board must act by February 14. Therefore, unless the Board wishes to consider the proposal on relatively short notice on February 9 either a special meeting will have to be scheduled or the matter will have to be handled by notation. Accordingly, the following Members have voted that agency business requires the addition of this item to the agenda of February 9, 1978 and that no earlier announcement of this addition was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Lee R. West
Member, Richard J. O'Mella
Member, Elizabeth E. Bailey

It now appears that staff coordination of the recommendation on this item cannot be completed in time for submission of recommendation to the Board in time for the scheduled meeting. If the Board is to suspend the proposed rules, such action must be taken no later than February 14. Therefore, a special meeting may be required on this item. Accordingly, the following Members have voted that agency business requires the deletion of this time to the agenda of February 9, 1978 and that no earlier announcement of this deletion was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Lee R. West
Member, Richard J. O'Mella
Member, Elizabeth E. Bailey

[S-334-78 Filed 2-3-78; 3:51 pm]

[6320-01]

16

[M-99 Amdt. 2, Feb. 8, 1978]

NOTICE OF ADDITION OF ITEM TO THE FEBRUARY 9, 1978 MEETING AGENDA

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., February 9, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 8a. Motion by Nationwide Leisure Corp. to withhold information from public disclosure and petition by Nationwide Leisure Corp. for review of staff action rejecting recent Nationwide charter filings (OGC, BOR).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary,
202-673-5068.

SUPPLEMENTARY INFORMATION: On January 27, 1978, the Bureau of Operating Rights by letter rejected charter filings made by Nationwide. On January 30, 1978, counsel for Nationwide filed a motion to withhold from public disclosure pursuant to

Rule 39 of the Board's Rules of Practice certain information contained in that letter and to withhold its motion. On February 2, 1978, counsel for Nationwide provided each Member of the Board with documents which requested Board review of staff action in a closed session on an expedited basis. On February 6, 1978, counsel for Nationwide provided each Member with a "Supplement" to Nationwide's February 2, 1978 documents.

Since ordinarily the Board's staff responses to charter filings are made publicly available as a matter of course, and so that Nationwide and the public can have the benefit of prompt Board determination of Nationwide's requests, the following Members have voted that agency business requires the addition of this item to the Board's open meeting agenda on February 9, 1978 and that no earlier announcement of the addition was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Richard J. O'Mella
Member, Elizabeth E. Bailey

[M-99, Amdt. 3, Feb. 8, 1978]

NOTICE OF DELETION OF ITEM FROM THE FEBRUARY 9, 1978 AGENDA

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., February 9, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 10. Docket 29445, Las Vegas-Dallas/Fort Worth Nonstop Service Investigation (recommendation on petition for review) (OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary,
202-673-5068.

SUPPLEMENTARY INFORMATION: The staff's recommendation on item 10 is still in preparation and the public target date for Board action has been moved from February 10 to March 6. Accordingly, the following Members have voted that agency business requires the deletion of item 10 from the February 9, 1978 agenda and that no earlier announcement of this deletion was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Lee R. West

DEPARTMENT OF TRANSPORTATION

Coast Guard

LIGHTS TO BE
DISPLAYED
ON PIPELINES

Proposed Requirement

Proposed Requirement

[4910-14]

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Parts 80, 90, and 95]

[CGD 73-216]

LIGHTS TO BE DISPLAYED ON PIPELINES

Proposed Requirements

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Coast Guard is proposing to require that pipelines, whether attached to dredges or disengaged from dredges, display at night a row of flashing yellow lights not more than 12 feet nor less than four feet above the water. The regulations currently require pipelines attached to dredges to display a row of amber lights not more than 12 feet nor less than eight feet above the water. These changes are being proposed because of the limited effectiveness of the existing lights and because pipelines disengaged from dredges are not under the existing requirements. Changing the characteristic of the yellow lights from fixed to flashing is intended to make it easier for the lights to be distinguished against most backgrounds. Reducing the lower height limit is intended to give the dredge operators more flexibility in placing the row of lights so that in areas of heavy recreational boating traffic the lights can be placed at a height closer to the level of the line of vision of the person operating the boat. The change in terminology from amber to yellow is consistent with the International Regulations for Preventing Collisions at Sea, 1972.

DATE: Comments must be received on or before March 30, 1978.

ADDRESS: Comments should be submitted to Commandant (G-CMC/81), (CGD 73-216), U.S. Coast Guard, Washington, D.C. 20590. Comments will be available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a

PROPOSED RULES

comment should include his name and address, identify this notice (CGD 73-216) and the specific section of the proposal to which his comment applies, and give the reasons for his comment. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned but one may be held at a time and place to be set in a later notice in the *FEDERAL REGISTER* if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

DRAFTING INFORMATION

The principal persons involved in drafting this proposal are: CDR David L. Parr, Project Manager, Office of Marine Environment and Systems, and Mr. Stephen D. Jackson, Project Attorney, Office of Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATIONS

Because of the background lighting in many dredge operating areas, it is often difficult to visually distinguish the row of fixed amber lights on the pipelines. Requiring that these lights be flashing should make it easier for the mariner to see them. Terminology has been changed from amber to yellow to be consistent with the International Regulations for Preventing Collisions at Sea, 1972.

Recreational boaters have had problems in the past identifying the lights as lights on a pipeline since the lights can be much higher than the boats. This proposal does not require that the lights be lowered to four feet above the water but it allows the dredge operator to lower them. This could be effective when the pipeline is in an area of heavy recreational boating traffic.

The existing regulations for pipelines apply only to pipelines attached to dredges. The proposed amendments would add new sections to apply to pipelines when they are disengaged from dredges at night. There have been incidents where a dredge has left the pipeline floating or supported on trestles at night with no lights. A few vessels have run into these unlighted pipelines resulting in injury to the passengers and damage to the vessels. The adoption of this proposal is expected to improve the ability of mariners operating at night to detect and properly identify floating dredge pipelines, thereby, contributing to an increase in navigation safety on U.S. inland waters.

The original notice of proposed rulemaking appeared in the September 19, 1974, issue of the *FEDERAL REGISTER* (39 FR 33709). That document proposed flashing lights and a lower height above water for the lights.

Comments received supported the proposal but requested that pipelines disengaged from dredges also be included in the requirements. These requests have merit but to incorporate pipelines disengaged from dredges in the final rule exceeded the scope of the notice; therefore, this second notice is being published.

In consideration of the foregoing it is proposed to amend Subchapters D, E, and F of Chapter I of Title 33 CFR as follows:

PART 80—PILOT RULES FOR INLAND WATERS

1. By revising § 80.23 to read as follows:

§ 80.23 Lights to be displayed on pipelines attached to dredges.

(a) Dredges must display on pipelines attached to them, when the pipelines are floating or supported on trestles, the following lights at night:

(1) One row of flashing yellow lights. The lights must be—(i) Flashing from 50 to 70 times per minute; (ii) visible all around the horizon; (iii) not less than four and not more than 12 feet above the water; (iv) approximately equally spaced; and (v) not more than 30 feet apart where the pipeline crosses a navigable channel. Where the pipeline does not cross a navigable channel the lights must be sufficient in number to clearly show the pipeline's location and direction.

(2) Two red lights on the shore or discharge end of the pipeline. The lights must be—(i) Visible all around the horizon; and (ii) three feet apart in a vertical line with the lower light the same height above the water as the nearest flashing yellow light.

(b) If a section of the pipeline attached to the dredge is opened at night for the passage of vessels, the dredge must display, at each end of the opening, the lights required in paragraph (a)(2) of this section.

(Sec. 2, 30 Stat. 102 as amended (33 U.S.C. 157); 80 Stat. 937 as amended (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

2. By adding a new § 80.23a as follows:

§ 80.23a Lights to be displayed on pipelines that are disengaged from dredges.

(a) If dredges disengage from pipelines and the pipelines remain either floating or supported on trestles, the dredges must—

(1) Display the lights on the pipeline as required in § 80.23 (a)(1) and (a)(2); and

(2) Display two red lights on the end that has been disengaged from the dredge. The lights must be—(i) Visible all around the horizon; and (ii) three feet apart in a vertical line with the lower light the same height above the water as the nearest flashing yellow light.

(b) If a section of the pipeline disengaged from the dredge is opened at night for the passage of vessels, the dredge must display, at each end of the opening, the lights required in paragraph (a)(2) of this section.

(14 U.S.C. 85, as amended); 80 Stat. 937, as amended (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

PART 90—PILOT RULES FOR THE GREAT LAKES

3. By revising § 90.27 to read as follows:

§ 90.27 Lights to be displayed on pipelines attached to dredges.

(a) Dredges must display on pipelines attached to them, when the pipelines are floating or supported on trestles, the following lights at night:

(1) One row of flashing yellow lights. The lights must be—(i) Flashing from 50 to 70 times per minute; (ii) visible all around the horizon; (iii) not less than four and not more than 12 feet above the water; (iv) approximately equally spaced; and (v) not more than 30 feet apart where the pipeline crosses a navigable channel. Where the pipeline does not cross a navigable channel the lights must be sufficient in number to clearly show the pipeline's location and direction.

(2) Two red lights on the shore or discharge end of the pipeline. The lights must be—(i) Visible all around the horizon; and (ii) three feet apart in a vertical line with the lower light the same height above the water as the nearest flashing yellow light.

(b) If a section of the pipeline attached to the dredge is opened at night for the passage of vessels, the dredge must display, at each end of the opening, the lights required in paragraph (a)(2) of this section.

(Sec. 3, 28 Stat. 649, as amended (33 U.S.C. 243); 80 Stat. 937 as amended (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

4. By adding a new § 90.27a as follows:

§ 90.27a Lights to be displayed on pipelines that are disengaged from dredges.

(a) If dredges disengage from pipelines and the pipelines remain either floating or supported on trestles, the dredge must—

(1) Display the lights on the pipelines as required in § 90.27 (a)(1) and (a)(2); and

(2) Display two red lights on the end that has been disengaged from the dredge. The lights must be—(i) Visible all around the horizon; and (ii) three feet apart in a vertical line with the lower light the same height above the water as the nearest flashing yellow light.

(b) If a section of the pipeline disengaged from the dredge is opened at night for the passage of vessels, the dredge must display, at each end of the opening, the lights required in paragraph (a)(2) of this section.

(14 U.S.C. 85, as amended); 80 Stat. 937, as amended (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

PART 95—PILOT RULES FOR WESTERN RIVERS

5. By revising § 95.57 to read as follows:

§ 95.57 Lights to be displayed on pipelines attached to dredges.

(a) Dredges must display on pipelines attached to them, when the pipelines are floating or supported on trestles, the following lights at night:

(1) One row of flashing yellow lights. The lights must be—(i) Flashing from 50 to 70 times per minute; (ii) visible all around the horizon; (iii) not less than four and not more than 12 feet above the water; (iv) approximately equally spaced; and (v) not more than 30 feet apart where the pipeline crosses a navigable channel. Where the pipeline does not cross a navigable channel the lights must be sufficient in number to clearly show the pipeline's location and direction.

(2) Two red lights on the shore or discharge end of the pipeline. The

lights must be—(i) Visible all around the horizon; and (ii) three feet apart in a vertical line with the lower light the same height above the water as the nearest flashing yellow light.

(b) If a section of the pipeline attached to the dredge is opened at night for the passage of vessels, the dredge must display, at each end of the opening, the lights required in paragraph (a)(2) of this section.

(Sec. 4, 62 Stat. 250, as amended (33 U.S.C. 353); 80 Stat. 937 as amended (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

6. By adding a new § 95.57a as follows:

§ 95.57a Lights to be displayed on pipelines that are disengaged from dredges.

(a) If dredges disengage from pipelines and the pipelines remain either floating or supported on trestles, the dredges must—

(1) Display the lights on the pipeline as required in § 95.57 (a)(1) and (a)(2); and

(2) Display two red lights on the end that has been disengaged from the dredge. The lights must be—(i) Visible all around the horizon; and (ii) three feet apart in a vertical line with the lower light the same height above the water as the nearest flashing yellow light.

(b) If a section of the pipeline disengaged from the dredge is opened at night for the passage of vessels, the dredge must display, at each end of the opening, the lights required in paragraph (a)(2) of this section.

(14 U.S.C. 85, as amended); 80 Stat. 937, as amended (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: February 3, 1978.

O.W. SILVER,
Admiral, U.S. Coast Guard
Commandant.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

Title 3—The President

Memorandum of January 18, 1978

Waiver of the Limitation on the Aggregate of Military Assistance Granted Under the Foreign Assistance Act of 1961, and of Credits Extended and Loans Guaranteed Under the Arms Export Control Act for African Countries in Fiscal Year 1978

[Presidential Determination No. 78-2]

Memorandum for the Secretary of State

THE WHITE HOUSE,
Washington, January 18, 1978.

Pursuant to the authority vested in me by Section 33(b) of the Arms Export Control Act, as amended, I hereby determine that the waiver of the limitations of Section 33(a) of the Arms Export Control Act, as amended, for fiscal year 1978 is important to the security of the United States.

You are requested, on my behalf, to report this determination promptly to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate, as required by law.

This determination shall be published in the FEDERAL REGISTER.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 330—RECRUITMENT, SELECTION AND PLACEMENT (GENERAL)

Employment in the Excepted Service; Recruitment, Selection, and Placement; Restoration to Duty; Appeals to the Commission

Correction

In FR Doc. 78-1308, appearing at page 2378 in the issue of Tuesday, January 17, 1978, the last section heading in column three should read, "§ 330.201 Priority in filling vacancies."

[3410-01]

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 1—ADMINISTRATIVE REGULATIONS

Service of Process

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document designates the General Counsel as the official to accept legal process in actions brought to enforce a Department of Agriculture employee's obligation to provide child support or make alimony payments. The rule is necessary to implement recent legislation.

FOR FURTHER INFORMATION CONTACT:

Robert L. Siegler, Deputy Director, Research and Operations Division, Office of the General Counsel, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-6035.

SUPPLEMENTARY INFORMATION: Section 459 of the Social Security Act, 42 U.S.C. 659, provides that the United States shall be subject to legal process brought for the enforcement of legal obligations of employees to provide child support or make alimony payments. Section 501 of Pub. L. 95-30 amended section 459 of the Social Security Act to provide that service of legal process shall be accomplished by certified or registered mail, or by personal service upon the appropriate agent designated for receipt of such service, or if no agent has been design-

nated, then upon the head of the governmental entity. The purpose of this document is to designate the General Counsel as the agent of the Secretary upon whom legal process for the enforcement of child support or alimony payments owed by employees of the Department of Agriculture shall be made.

Accordingly, § 1.41 of Title 7, Code of Federal Regulations is amended as follows:

Subpart C—Judicial Proceedings

Section 1.41 is amended by adding at the end thereof a new sentence to read as follows:

§ 1.41 Service of process.

• • • Service of process shall be made upon the General Counsel to enforce child support or alimony payments owned by employees of the Department either personally or by certified or registered mail, return receipt requested.

Done this 8th day of February, 1978.

BOB BERGLAND,
Secretary of Agriculture.

[FR Doc. 78-4069 Filed 2-13-78; 8:45 am]

[3410-05]

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE, DEPARTMENT OF AGRICULTURE

PART 724—FIRE-CURED, DARK AIR-CURED, VIRGINIA SUN-CURED, CIGAR-BINDER (TYPES 51 AND 52), CIGAR-FILLER AND BINDER (TYPES 42, 43, 44, 53, 54, AND 55) TOBACCO

Notice of Referendums

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of Referendums.

SUMMARY: This notice announces that two separate referendums will be conducted by mail during the period February 21-24, 1978 for producers of cigar-binder (types 51 and 52) and cigar-filler and binder (types 42-44 and 53-55) tobaccos. The law requires that these referendums be held before March 2, 1978. This notice is intended to inform producers of the time and method of referendums.

DATES: Referendums will be held February 21-24, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert L. Tarczy, 202-447-7601.

FEDERAL REGISTER, VOL. 43, NO. 31—TUESDAY, FEBRUARY 14, 1978

SUPPLEMENTARY INFORMATION: Notice was given (42 FR 65202) that consideration would be given to data, views, and recommendations on establishing the date or period for holding the referendums for cigar-binder (types 51 and 52) and cigar-filler and binder (types 42-44 and 53-55) tobaccos and whether the referendums should be conducted at polling places rather than by mail ballot. No comments were received from outside the agency concerning these items.

NOTICE OF REFERENDUMS

Referendums will be held by mail ballot during the period February 21-24, 1978, inclusive, to determine whether cigar-binder (types 51 and 52) tobacco and cigar-filler and binder (types 42-44 and 53-55) tobacco farmers are in favor of or opposed to national marketing quotas for the 1978-79, 1979-80, and 1980-81 marketing years. The referendums will be conducted in accordance with the provisions of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1312(c)) and the regulations contained in 7 CFR Part 717.

The Agricultural Stabilization and Conservation Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Signed at Washington, D.C. on: February 9, 1978.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION¹

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

PART 214—MANDATORY CANADIAN CRUDE OIL ALLOCATION REGULATIONS

Amendments to Canadian Allocation Program and Crude Oil Buy/Sell Program

AGENCY: Economic Regulatory Administration, Department of Energy.

¹Editorial Note: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration ("ERA") of the Department of Energy ("DOE") is adopting amendments to its Mandatory Canadian Crude Oil Allocation Regulations ("Canadian Allocation Program") and its Mandatory Crude Oil Allocation Program ("Buy/Sell Program") to assist refineries serving the Northern Tier in obtaining additional supplies of crude oil to offset reductions in Canadian exports. The amendments to the Canadian Allocation Program will permit first priority refineries dependent upon the diminishing supply of Canadian light crude oil to develop alternate supply sources for non-Canadian light crude oil through exchanges of Canadian heavy crude oil. To mitigate the potentially adverse impact of this amendment on priority refineries that historically processed Canadian heavy crude oil, such refineries will be accorded a preference with respect to the allocation of such crude oil. The amendments to the Buy/Sell Program eliminate the base period ceiling on purchases with respect to any first priority refinery owned by a refiner-buyer, so that purchases may be made on the same basis as for other refineries. Refiner-sellers will be required to deliver the additional volume of crude oil to such refiner-buyer's refinery or, if that is not practical, to a point in the United States acceptable to both the refiner-seller and refiner-buyer for exchange by the refiner-buyer for Canadian crude oil.

DATES: Effective April 1, 1978.

ment of Energy, 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION:

I. Background.

II. Discussion of Comments. A. Canadian Allocation Program. B. Buy/Sell Program.

III. Amendments Adopted. A. Canadian Allocation Program. B. Buy/Sell Program.

I. BACKGROUND

On December 8, 1977, the ERA issued a notice of proposed rulemaking and public hearing (42 FR 62493, December 13, 1977) to revise the Canadian Allocation Program (10 CFR Part 214) and the crude oil Buy/Sell Program (10 CFR 211.65). The proposed amendments to the Canadian Allocation Program regulations would have modified § 214.31(g)(1) to permit barrel-for-barrel exchanges (and matching purchase and sale transactions which have the same effect as an exchange) of Canadian heavy crude oil for non-Canadian source crude oil by first priority refineries, provided the crude oil received by the first priority refinery making such an exchange was processed in that refinery. As is the case under the current regulations, the proposed amendment would have permitted only quality and location differentials to be given effect in the calculation of the exchange ratio. The rationale for modifying the exchange provision in this regard was that some first priority refineries would be able to obtain additional supplies of crude oil through exchanges of Canadian heavy crude oil for domestic crude oil, which otherwise would be unavailable due to the supplier/purchaser rule set forth in § 211.63.

The ERA recognized the possibility that under the proposed amendment some first priority refineries that did not use or used only a small volume of Canadian heavy crude oil in the base period might nominate for a substantial volume of Canadian heavy crude oil solely for the purposes of exchanges, thereby resulting in a reduced allocation for heavy crude oil for first priority refineries that are dependent thereupon. To ensure that first priority refineries that processed Canadian heavy crude oil in the base period would continue to receive an equitable share of allocable Canadian heavy crude oil, the ERA also proposed to amend the allocation method for Canadian heavy crude oil set forth in § 214.31(a)(3) to accord such refineries a preference with respect to the al-

location of this crude oil. Under the proposed amendment, the base period volume entitlement for Canadian heavy crude oil of such first priority refineries would have been satisfied before any rights for Canadian heavy crude oil were issued to first priority refineries that did not process Canadian heavy crude oil in the base period. As is the case under the current regulations, all first priority refineries, irrespective whether they processed Canadian heavy crude oil in the base period, would have been permitted to fill out their total base period volume of Canadian crude oil with Canadian heavy crude oil before any rights for Canadian heavy crude oil would be issued for any second priority refinery.

The proposed amendments to the Buy/Sell Program would have eliminated the base period—"ceiling" in § 211.65(b)(4) which limits purchases of domestic crude oil by a refiner-buyer for processing in any first priority refinery owned by the refiner-buyer to the average volumes thereof purchased by that refiner-buyer for that refinery in the period September 1, 1976 through August 31, 1977. The proposal to eliminate the ceiling was predicated on the ERA's determination that refiners affected by the ceiling may not have the ability to offset the substantial reductions in exports of Canadian crude oil and that for such refiners the Buy/Sell Program may be the only viable supply source. Since most refiner-sellers might have difficulty delivering additional domestic crude oil into the Northern Tier, the proposed amendment provided that if the additional volume of crude oil was not practical for delivery to a refiner-buyer's refinery, a refiner-seller could deliver the additional crude oil to a location in the United States at which it would be practical for the refiner-buyer to exchange the crude oil for Canadian crude oil.

II. DISCUSSION OF COMMENTS

Written comments were invited on the proposed amendments to the Buy/Sell and Canadian Allocation Programs through January 13, 1978. Two hundred and fifty-eight written comments were received, including two hundred and twenty written comments on behalf of Murphy Oil Corporation. The comments submitted on Murphy's behalf uniformly urged regulatory action favorable to Murphy's refinery at Superior, Wisconsin, but generally did not offer substantive comments on the proposed amendments. In addition, thirteen persons testified at the public hearing held in Washington, D.C. on January 10, 1978. The commenters included trade associ-

ations, a labor union, State and local governments, members of Congress, and major, large independent, and small refiners.

A. CANADIAN ALLOCATION PROGRAM

The comments were divided with respect to the proposed amendment to the Canadian Allocation Program to provide first priority refineries greater flexibility in exchanging Canadian crude oil. Refiners which did not process or processed only small volumes of Canadian heavy crude oil in the base period generally contended that the proposal would permit first priority refineries that are largely dependent upon the diminishing supply of Canadian light crude oil to develop alternate supply sources for non-Canadian light crude oil through exchanges. These commenters also expressed agreement with the ERA's determination that the current allocation method for Canadian heavy crude oil should be modified to ensure that refineries that processed Canadian heavy crude oil in the base period continue to receive an equitable share of the available Canadian heavy crude oil.

Firms owning first priority refineries that processed Canadian heavy crude oil in the base period were generally critical of the proposed amendments to the Canadian Allocation Program. These firms argued that it is inconsistent with the program's underlying rationale of allocating "wet barrels"—crude oil which can be processed in the recipient refinery—to permit first priority refineries which do not have the capability to process or receive Canadian heavy crude oil to exchange such crude oil for non-Canadian crude oil. It was contended that permitting such first priority refineries to nominate for Canadian heavy crude oil solely for the purposes of exchanges would result in reduced allocations for heavy crude oil for both first and second priority refineries that are dependent thereupon. In this connection, several first priority refineries contended that the proposed modification of the allocation method for Canadian heavy crude oil would not ensure allocations of Canadian heavy crude oil sufficient to meet their current operating requirements for such crude oil. These commenters recommended that if the amendment to provide greater exchange flexibility for first priority refineries is adopted as proposed, the allocation method be modified to ensure that the nominations for Canadian heavy crude oil of first priority refineries that have the capability to receive and process such crude oil are satisfied before any heavy crude oil is allocated to other first priority refineries.

A number of the commenters contended that permitting first priority

refineries to exchange Canadian heavy crude oil for non-Canadian crude oil might further burden the mid-continent pipeline system, which is currently operating at near capacity, thereby depriving refineries outside the Northern Tier, particularly second priority refineries, of pipeline space upon which they are dependent for their crude oil supplies. Some of the comments which addressed the proposed amendment to the Buy/Sell Program expressed similar concerns. The ERA is not persuaded by the evidence presented in this proceeding that the amendments will in fact result in an increase in demand for shipments through the mid-continent pipeline system. However, even if this does occur, the ERA believes the amendments are nevertheless justified to facilitate the distribution into the Northern Tier of additional crude oil.

It is the ERA's conclusion from the record in this proceeding that the amendments to the Canadian Allocation Program should be adopted substantially as proposed. Permitting first priority refineries to exchange Canadian heavy crude oil for non-Canadian crude oil should assist such refineries dependent upon the declining exports of Canadian light feedstocks in obtaining additional supplies of light crude oil. To the extent this occurs, the amendment will further the purpose of the Canadian Allocation Program, stated in 10 CFR 214.1, which is "... to mitigate the adverse effects on dependent firms of the scheduled reductions in export levels of Canadian crude oil". Although the amendment may result in reduced allocations for Canadian heavy crude oil for refineries which have historically processed such crude oil, this potential hardship clearly is outweighed by the benefits which may accrue to first priority refineries dependent upon Canadian light crude oil. However, on the basis of the comments, the ERA is modifying the proposed method for allocating Canadian heavy crude oil in two respects. First, the amendments adopted will accord first priority refineries a greater preference by satisfying the requirements for heavy crude oil of such refineries before any second priority refinery is allocated heavy crude oil in excess of its base period use thereof. Second, the allocation method will accord second priority refineries that historically processed Canadian heavy crude oil a preference over other second priority refineries. The ERA believes that these modifications will ensure that all first and second priority refineries that processed Canadian heavy crude oil in the base period will receive an equitable share of the available supply of such crude oil.

B. BUY/SELL PROGRAM

The majority of the commenters supported the ERA's proposal to elimi-

nate the base period ceiling on purchases with respect to any first priority refinery owned by a refiner-buyer, so that purchases could be made on the same basis as for other refineries. These commenters generally contended that the ceiling on purchase opportunities of such refiner-buyers is no longer justified in light of the substantial reduction in exports of Canadian crude oil. Only three of the refiner-sellers commenting opposed the proposed amendment, principally on the ground that it would reduce the incentives of such refiner-buyers to secure alternate crude oil supplies. It was also contended that few, if any, refiner-sellers have access to supplies of domestic crude oil in the Northern Tier area for sale under the Buy/Sell Program or the capability to deliver additional domestic crude oil into the Northern Tier. On the other hand, several refiner-sellers expressed the view that the proposed flexibility for delivering additional allocated crude oil to the refiner-buyers affected by the elimination of the ceiling should provide sufficient protection to most refiner-sellers. However, inasmuch as the mid-continent pipeline system is currently operating at near capacity, the ERA has determined to modify the proposed delivery provision to emphasize the refiner-buyers' responsibility in actively assisting the refiner-sellers in arranging the delivery to a mutually acceptable location in the United States for exchange for Canadian crude oil.

A number of the commenters in this proceeding urged the ERA to amend the current "re-entry" provision in § 211.65(a)(5) of the Buy/Sell Program regulations to permit small refiners that currently are ineligible for an allocation to re-enter the Buy/Sell Program in the event they incur a twenty-five percent reduction in their total supply of domestic and Canadian crude oil. The provision presently permits re-entry only if a refiner can demonstrate a twenty-five percent reduction in its supply of domestic crude oil. While the ERA appreciates the rationale of this regulatory amendment and believes it would assist a number of small refiners in obtaining non-Canadian crude oil to offset the reductions in Canadian exports, the amendment is beyond the scope of the notice of proposed rulemaking upon which this final rule is predicated. However, the ERA intends to propose the amendment in the near future.

III. AMENDMENTS ADOPTED

Based on its analysis of the material submitted in the public hearing and in the written comments, and upon all other information available to it, the ERA has determined to adopt the amendments to the Buy/Sell Program and the Canadian Allocation Program

V

E
E
1
4

7
8
UMI

essentially as proposed, with the modifications discussed above.

A. CANADIAN ALLOCATION PROGRAM

Under the amendments adopted today, first priority refineries will be permitted to make barrel-for-barrel exchanges (and matching purchase and sale transactions which have the same effect as an exchange) of Canadian heavy crude oil for non-Canadian source crude oil, provided the crude oil received by the first priority refinery making such an exchange is processed in that refinery. As is the case under the current regulations, only quality and location differentials are to be given effect in the calculation of the exchange ratio.

The ERA is adopting the allocation method for Canadian heavy crude oil as proposed with the modifications explained above. The amendments adopted today establish a six-step procedure for the allocation of Canadian heavy crude oil. First, as proposed, the ERA will issue a number of rights for heavy crude oil to first priority refineries that processed Canadian heavy crude oil in the base period equal to their respective base period volumes of such crude oil. Second, ERA will issue a number of rights for heavy crude oil to all first priority refineries equal to their respective total base period volumes of Canadian light and heavy crude oil, less any rights previously issued for Canadian light and heavy crude oil for that allocation period. The third through the sixth steps reflect modifications to the proposal. Thus, in the third step, rights for heavy crude oil will be issued to second priority refineries that processed Canadian heavy crude oil in the base period with reference to their respective base period volumes of such crude oil. In the fourth step, additional rights for heavy crude oil will be issued to all first priority refineries with reference to their respective nominations or their refining capabilities, whichever is less. Fifth, rights for heavy crude oil will be issued to all second priority refineries with reference to their respective total base period volumes of Canadian light and heavy crude oil, less any rights issued for Canadian light and heavy crude oil for that allocation period. Sixth, rights for heavy crude oil will be issued to all second priority refineries with reference to their respective nominations or their refining capabilities, whichever is less.

B. BUY/SELL PROGRAM

The amendments adopted today will eliminate the ceiling set forth in §211.65(b)(4) on purchase opportunities of refiner-buyers that own first priority refineries, thereby permitting such refiner-buyers to purchase their full allocation for such refineries

under the Buy/Sell Program. The ERA also is adopting essentially as proposed the amendment governing delivery by refiner-sellers of volumes of crude oil required to be sold as a result of elimination of the ceiling. Under this amendment, if the additional volume of crude oil is not practical for delivery to a refiner-buyer's refinery, a refiner-seller will be required to deliver such additional volume of crude oil to a location in the United States which is practical for the refiner-buyer to exchange the crude oil for Canadian crude oil. As discussed above, the exchange point must be acceptable to both the refiner-buyer and refiner-seller. Further, as a precondition to such a sale, the refiner-buyer concerned will be required to obtain approval of the exchange of the allocated crude oil for Canadian crude oil from the Director, Oil Imports, pursuant to §213.28(b)(1) of the Oil Import Regulations and an export license from the Department of Commerce.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70 and Pub. L. 95-91; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385, and Pub. L. 95-70; Department of Energy Organization Act, Pub. L. 95-91; EO 11790, 39 FR 23185; EO 12009, 42 FR 46287.)

In consideration of the foregoing, Parts 211 and 214 of Chapter II, Title 10 of the Code of Federal Regulations, are amended as set forth below, effective April 1, 1978.

Issued in Washington, D.C., February 8, 1978.

HAZEL R. ROLLINS,
Deputy Administrator, Economic
Regulatory Administration.

1. Section 211.65 is amended by revising subparagraph (4) of paragraph (b) and subparagraph (3) of paragraph (i) to read as follows:

§ 211.65 Method of Allocation.

(b) Purchase opportunities of refiner-buyers.

(4) No refiner-buyer shall purchase under this section crude oil imported from Canada for processing in any first priority refinery (as defined in Part 214 of this chapter) owned by that refiner-buyer.

(i) Conditions of sale.

(3) The crude oil offered for sale by a refiner-seller must be practical for

delivery to and physically capable of being delivered to the refiner-buyer's refinery. The refiner-seller is responsible for arranging delivery of allocated crude oil to the refiner-buyer's refinery; *Provided*, That in the event that a refiner-seller offers for sale or is directed to sell pursuant to paragraph (j) of this section crude oil to a refiner-buyer for processing in any first priority refinery (as defined in Part 214 of this chapter) owned by that refiner-buyer in excess of the average volume of domestic crude oil purchased by that refiner-buyer for that refinery in the period September 1, 1976 through August 31, 1977, and if such excess volume of crude oil is not practical for delivery to such refiner-buyer's refinery, such refiner-seller shall deliver such excess volume of crude oil to a location within the United States to which the refiner-seller can arrange delivery and at which the refiner-buyer can arrange for the exchange of the crude oil for Canadian crude oil; and *Further provided*, That in the event of an exchange the refiner-seller may require the refiner-buyer to demonstrate that it has obtained approval of the exchange from the Director, Oil Imports, pursuant to Part 213 of this chapter and has been issued an export license by the Department of Commerce for the volume of crude oil involved.

2. Section 214.31 is amended by revising subparagraph (3) of paragraph (a) and by revising subparagraph (i) of paragraph (g) to read as follows:

§ 214.31 Allocation of Canadian light and heavy crude oil.

(a) Basis for issuance of Canadian crude oil rights.

(3) Canadian crude oil rights for heavy crude oil.

(i) FEA shall first issue a number of rights for Canadian heavy crude oil for first priority refineries on a pro-rata basis with reference to (but not to exceed) one-fourth of their respective base period volumes of Canadian heavy crude oil (as adjusted under the provisions of paragraphs (c) and (d) of this section).

(ii) In the event that the allocable supply of Canadian heavy crude oil for a particular allocation period is greater than the total number of rights calculated under subparagraph (3)(i) above, FEA shall issue a number of rights for Canadian heavy crude oil for first priority refineries on a pro-rata basis with reference to (but not to exceed) one-fourth of their respective base period volumes of Canadian light and heavy crude oil (as adjusted under the provisions of paragraphs (c) and

(d) of this section), less the number of rights for Canadian light and/or heavy crude oil issued under subparagraphs (2) and (3)(i) of this paragraph.

(iii) In the event that the allocable supply of Canadian heavy crude oil for a particular allocation period is greater than the total number of rights calculated under subparagraphs (3) (i) and (ii) above, FEA shall issue a number of rights for Canadian heavy crude oil for second priority refineries on a pro-rata basis with reference to (but not to exceed) one-fourth of their respective base period volumes of Canadian heavy crude oil (as adjusted under the provisions of paragraphs (c) and (d) of this section).

(iv) In the event that the allocable supply of Canadian heavy crude oil for a particular allocation period is greater than the total number of rights calculated under subparagraphs (3) (i) through (iii) above, FEA shall issue a number of additional rights for Canadian heavy crude oil for first priority refineries on a pro-rata basis with reference to (but not to exceed) the lesser of their respective nominations for Canadian heavy crude oil to FEA for that allocation period pursuant to paragraph (h) of this section or their respective refining capacities as certified by FEA multiplied by the number of days in the allocation period (as reduced by the volume of non-Canadian crude oil processed in the preceding allocation period), less the number of rights for Canadian light and heavy crude oil issued under subparagraphs (2), (3)(i) and (3)(ii) of this paragraph.

(v) In the event that the allocable supply of Canadian heavy crude oil for a particular allocation period of greater than the total number of rights calculated under subparagraphs (3)(i) through (iv) above, FEA shall issue a number of rights for Canadian heavy crude oil for second priority refineries on a pro-rata basis with reference to (but not to exceed) one-fourth of their respective base period volumes of Canadian light and heavy crude oil (as adjusted under the provisions of paragraphs (c) and (d) of this section), less the number of rights for Canadian light and/or heavy crude oil issued under subparagraphs (2) and (3)(iii) of this paragraph.

(vi) In the event that the allocable supply of Canadian heavy crude oil for a particular allocation period is greater than the total number of rights calculated under subparagraphs (3) (i) through (v) above, FEA shall issue a number of additional rights for Canadian heavy crude oil for second priority refineries on a pro-rata basis with reference to (but not to exceed) the lesser of their respective nominations for Canadian heavy crude oil to FEA for that allocation period pursuant to paragraph (h) of this section or their respective refining capacities as certified by FEA multiplied by the number of days in the allocation period (as reduced by the volume of non-Canadian crude oil processed in the preceding allocation period), less the number of rights for Canadian light and heavy crude oil issued under subparagraphs (2), (3)(iii) and (3)(v) of this paragraph.

(g) *Permitted exchanges and sales of Canadian crude oil.* (1) No volumes of Canadian crude oil subject to this part shall be sold or otherwise disposed of by refiners or other firms with respect to first priority refineries that they own or control except pursuant to (i) crude oil exchanges which involve only (directly or indirectly) Canadian crude oil and in which only quality and location differentials are given effect in the calculation of the exchange ratio, or (ii) matching purchase and sale transactions which involve only (directly or indirectly) Canadian crude oil and which have the same effect as an exchange described in clause (i) of this subparagraph (1); or (iii) exchanges of Canadian heavy crude oil for non-Canadian crude oil in which only quality and location differentials are given effect in the calculation of the exchange ratio and matching purchase and sale transactions having the same effect as such exchanges. *Provided*, That the volume of non-Canadian crude oil received by a first priority refinery pursuant to such a transaction is processed by that refinery.

PART 216—MATERIALS ALLOCATION AND PRIORITY PERFORMANCE UNDER CONTRACTS OR ORDERS TO MAXIMIZE DOMESTIC ENERGY SUPPLIES¹

AGENCY: Department of Energy.

ACTION: Final Rule.

SUMMARY: This Final Rule provides a procedure for implementing Department of Energy (DOE) functions with regard to the allocation of, or the priority performance under contracts or orders relating to, supplies of materials and equipment in order to maximize domestic energy supplies.

Several changes have been made in the proposed regulations. First, a provision has been added to the effect that if DOE determines at any time that previously made findings are no

¹Editorial Note: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Department of Energy.

longer valid, it will provide affected applicant(s) an opportunity to show cause why such findings should not be withdrawn (Part 216.5(a)). Second, a provision has been added to allow the affected applicant(s) to petition for reconsideration of DOE's withdrawal of previously made findings (Part 216.6). Third, an amendment has been adopted to make clear that denial of a petition for reconsideration is final agency action (Part 216.6). Finally, changes have been made regarding violations of the regulations (Part 216.9).

EFFECTIVE DATE: Immediately.

FOR FURTHER INFORMATION CONTACT:

Robert M. Grubenmann, Financial Planning and Materials Allocation, Office of Resource Applications, Department of Energy, Room 3516, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-7575.

James G. Beste, Office of the General Counsel, Department of Energy, Room 6144, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9296.

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

On July 13, 1977, the Federal Energy Administration (FEA) issued a notice of proposed rulemaking and public hearing (42 FR 35979) in which FEA proposed regulations providing a procedure for implementing FEA functions with regard to the allocation of, or the priority performance under contracts or orders relating to, supplies of materials and equipment in order to maximize domestic energy supplies. Seven written comments were received in response to the notice of proposed rulemaking, and oral presentations were made by two persons at the public hearing held on August 26, 1977. On October 1, 1977, pursuant to section 301(a) of the Department of Energy Organization Act (Pub. L. 95-91), all of the functions of FEA and all of the functions of the FEA Administrator were transferred to the Secretary of Energy. Consideration has been given to the views of industry representatives in that all of the comments and presentations were considered by DOE, as well as other information available to DOE, in arriving at the Final Rule adopted today.

The regulations are the result of section 104 of the Energy Policy and Conservation Act (EPCA). This section added a new subsection (c) to section 101 of the Defense Production Act of 1950, as amended (DPA), 50 U.S.C. App. 2071(c). DPA section 101(c)(1) authorizes the President to require the allocation of, or the priority performance under contracts or orders relat-

ing to, supplies of materials and equipment in order to maximize domestic energy supplies. It should be emphasized that DPA section 101(c)(1) concerns the authorization of allocations and priorities with regard to materials and equipment, not energy sources. It should be further emphasized that Congress wished to avoid liberal use of the allocation and priorities system and, for that reason, required findings prior to use of the authority.

The ideal time for promulgating these regulations is in a noncrisis atmosphere. Promulgation at this time will provide all potentially affected parties ample time to become familiar with the program before a crisis situation exists.

This authority may be used only if the President finds, as stated in DPA section 101(c)(3), that:

(A) Such supplies are scarce, critical, and essential to maintain or further (i) exploration, production, refining, transportation, or (ii) the conservation of energy supplies, or (iii) for the construction and maintenance of energy facilities; and

(B) Maintenance or furtherance of exploration, production, refining, transportation or conservation of energy supplies or the construction and maintenance of energy facilities cannot reasonably be accomplished without exercising the authority specified in paragraph (1) of this subsection.

Section 7 of Executive Order 11912 of April 13, 1976, designates and empowers the Administrator of General Services to perform the functions vested in the President by DPA section 101(c) with a requirement for a redelegation of such functions by the Administrator of General Services to the Secretary of Commerce. The Secretary of Commerce, as required by the Executive Order, redelegated to the Administrator of the FEA the function of finding that specific supplies of materials and equipment are critical and essential to maintain or further exploration, production, refining, transportation or conservation of energy supplies or for the construction and maintenance of energy facilities. Defense Mobilization Order 13 assigns to the FEA the authority to determine whether a program or project maximizes domestic energy supplies. As stated earlier, all of the functions of FEA and the Administrator of the FEA have been transferred to the Secretary of Energy pursuant to the Department of Energy Organization Act. The Secretary of Commerce retains the function of finding whether the supplies of materials and equipment are scarce and whether the purposes specified in DPA section 101(c)(3) cannot reasonably be accomplished without exercising the authority contained in DPA section 101(c)(1). The Administrator of General Services provides for the overall coordination and direction of DPA section 101(c) functions.

It should be emphasized that these regulations implementing DPA section 101(c) do not create a priority and allocation system for energy programs and projects separate from the systems designed to promote the national defense created under DPA section 101(a). The intention is to avoid duplication of existing procedures implementing DPA section 101(a) authority. These regulations prescribe procedures antecedent to use of the Defense Materials System (DMS) Regulation 1 and the Defense Priorities System (DPS) Regulation 1, described in Volume 32A of the Code of Federal Regulations. The authority to use the DMS and DPS can be granted only after the required determination is made by DOE and the required findings are made by both DOE and the Department of Commerce.

II. PURPOSE AND DESCRIPTION OF THE REGULATIONS

The purpose of the regulations is to describe how DOE will discharge the DPA section 101(c) functions delegated to it. Where findings are made, with respect to eligible energy programs or projects, DOE will report them to the Department of Commerce for further action. Where findings are not made, DOE will notify the applicant with suitable explanation. If the Department of Commerce, following receipt of the DOE determination and findings, finds that the described supplies of materials and equipment are scarce and that the purposes described in DPA section 101(c)(3) cannot reasonably be accomplished without exercising the authority contained in DPA section 101(c)(1), the Department of Commerce will so notify DOE. DOE will authorize the applicant to place "rated orders" and/or "authorized controlled material orders" as defined in and pursuant to the provisions of DMS Regulation 1 and DPS Regulation 1, as promulgated by the Department of Commerce. DOE will perform such duties related to its role as a "claimant agency" as the Department of Commerce shall direct in consultation with DOE.

III. PROCESSING AN APPLICATION FOR USE OF DPA SECTION 101(c) AUTHORITY

Persons who consider work they are performing appropriate for use of the authority contained in DPA section 101(c) may submit an application to DOE. Part 216.3(a) describes the minimum contents of such an application.

Upon receipt of a completed application, DOE will determine whether or not the program or project in connection with which the request for assistance is submitted maximizes domestic energy supplies and is therefore an appropriate program or project for considering the use of DPA section 101(c)

authority. If a determination is made, the program or project will be designated an "eligible energy program or project." In making this determination DOE will consider the impact of such program or project on the national energy situation. Consideration will also be given to the quantity of energy involved, the benefits of timely completion of the program or project, the socioeconomic impact of the program or project, the need for the end product for which the materials and equipment are allegedly required, established national energy policies and such other factors as DOE deems appropriate. Once DOE has determined that a particular program or project is an "eligible energy program or project," this determination will be deemed made with regard to subsequent applications involving the same program or project unless and until DOE announces otherwise.

Second, DOE will find whether or not the supplies of materials and equipment for which assistance is requested are critical and essential to the "eligible energy program or project." In making this finding, DOE will consider the availability and utility of substitute materials or equipment, the impact of the nonavailability of the specified materials or equipment on the timely fulfillment or completion of the program or project and such other factors as DOE deems appropriate.

It was suggested during the public hearings on the proposed regulations that a maximization determination be made on various types of energy programs and projects prior to the receipt of specific applications and that a list of "eligible" projects be published. This suggestion has been rejected because of the difficulties inherent in making such a maximization determination. Such a determination of eligible projects made without regard to specific applications would run the clear risk of being either too broad, and therefore subject to future downward revision, or too restrictive, thereby unfairly excluding certain projects. For these reasons the determination as to whether a program or project maximizes domestic energy supplies will be made only after receipt of an application, and each application will be evaluated individually in accordance with the stated criteria. However, under § 216.4(e), once a program or project is determined to maximize domestic energy supplies and is therefore "eligible" within the context of these regulations, subsequent applications relating to the same program or project will be subject only to the critical and essential findings procedure.

It was suggested that § 216.4(e) be amended to provide for affected parties to participate in DOE's review of a

program or project prior to withdrawal of its designation as an eligible energy program or project. It was also suggested that affected parties should be allowed to appeal a withdrawal determination. It was further suggested that withdrawal of an "eligible" designation not become effective until 90 days after a final ruling. DOE has determined that withdrawal of the "eligible" designation should not be subject to appeal because such withdrawal does not affect existing authorizations to applicants to obtain materials and equipment; withdrawal of an "eligible" designation would only affect future applications for use of section 101(c) authority. The "eligible" designation would remain in effect with regard to priorities and allocations previously authorized for the program or project in question. In cases where the "eligible" status of a program or project has been withdrawn, another application for allocation or priority authority can be made at which time the project's "eligibility" status will be reexamined. If such application is denied, the applicant can then petition for reconsideration. There is no need, therefore, to amend the proposed regulations to provide for a 90 day delay of the effective date of DOE's decision to withdraw a project's "eligible" status simply because a project loses nothing as a result of such a withdrawal.

One of the comments received suggested that the criteria established as the basis of the DOE's maximization determination be weighted according to their relative importance and that the "need for the end product" should be the most heavily weighted criterion. DOE has determined that the "need for the end product" should not be given greater weight than the other enumerated criteria. It is our intention to accord equal weight to all of the enumerated criteria.

In cases where DOE finds that the supplies of materials or equipment are critical and essential for the furtherance or timely completion of an eligible energy program or project, DOE will so indicate and transmit the application to the Department of Commerce for further action. If the Department of Commerce then finds (1) that the specific supplies of materials or equipment for which priorities/allocation authority has been requested are scarce and (2) that the eligible energy program or project cannot reasonably be accomplished without exercising the authority specified in DPA section 101(c)(1), the Department of Commerce will notify DOE. DOE will authorize the applicant to place "rated orders" and/or "authorized controlled material orders" as defined in and pursuant to the provisions of DMS Regulation 1 and DPS Regulation 1, as promulgated by the Department of Commerce.

If DOE does not determine that the energy program or project maximizes domestic energy supplies, the applicant will be so informed and may petition for reconsideration. In addition, if DOE does not find that the materials and equipment described in the application are critical and essential to an eligible energy program or project, the applicant will be so informed and may petition for reconsideration.

DOE has concluded that if it should determine at any time that findings previously made are no longer valid, the affected applicant(s) should be afforded the opportunity to show cause why such findings should not be withdrawn. Section 216.5(a) of the proposed regulations has been amended to provide the affected applicant(s) such an opportunity. In addition, DOE has concluded that the affected applicant(s) should be allowed to petition for reconsideration of DOE's determination that findings be withdrawn. Accordingly, § 216.6 has been amended to provide the affected applicant(s) with the opportunity to file such a petition for reconsideration.

It was suggested that the findings procedure be reversed, that the Department of Commerce make its findings prior to those of DOE. This proposed change in the regulations has been rejected because the threshold determination, whether the program or project in question maximizes domestic energy supplies, is to be made by DOE. That determination goes to the very essence of DPA section 101(c) because the purpose of the allocation and priority process described in that section is to maximize domestic energy supplies. In cases where DOE does not determine that a particular program or project maximizes domestic energy supplies, the findings delegated to the Department of Commerce are not relevant and need not be made. Thus, only in cases where DOE makes the required determination and findings is there a need for action by the Department of Commerce.

Recognizing the importance of timely responses, DOE will expeditiously process applications and petitions for reconsideration. However, because of the complexity of the determination and findings to be made, DOE cannot always respond within a specified time period. DOE has determined, therefore, that the proposed regulations should not be amended to provide that DOE act on applications and petitions for reconsideration within a specified time period. In addition, the suggestion that the proposed regulations be amended to require the applicant to provide information within a specified period of time is not meritorious. There is sufficient incentive for the applicant to act expeditiously without such a requirement.

The proposal was made that criteria be established to govern DOE action on petitions for reconsideration. This proposal ignores the purpose of such petitions. The basic purpose of a petition for reconsideration is to allow the petitioner to present material new facts or circumstances affecting the application or to point out material errors in DOE's denial of the application. In either event DOE would evaluate the petition according to the same criteria established for DOE consideration of the original application.

It was further suggested that the last sentence of § 216.6 seems to imply that there may be administrative review available in addition to the process provided by Part 216. In order to make clear that denial of relief requested in a petition for reconsideration is final agency action and not subject to further administrative review, the final regulations amend the proposed regulations by eliminating the last sentence of § 216.6.

Comments were received expressing the view that the proposed regulations would have various deleterious effects, such as allowing an applicant to regain time lost through deficient planning and management, allowing disreputable operators to benefit at the expense of established businesses and permitting a successful applicant to resell equipment or materials obtained through the program. It is not the intent of the regulations to allow an applicant that practices faulty management and planning to compensate for these deficiencies by obtaining equipment or materials under this program. The regulations are not designed to favor established businesses over newer businesses. The criteria established by the regulations are unrelated to the length of time that a business has been in operation. A successful applicant will not be able to obtain equipment or materials through the program in excess of the specific needs of such applicant. Information required by § 216.3(a)(8) to be included in an application and the criteria established by § 216.4(c) are designed to determine the applicant's specific need for the requested supplies of equipment or materials, and any approval for use of section 101(c) authorities will be limited to the specific demonstrated needs.

The further suggestion was made that the proposed regulations be amended to require anyone seeking materials or equipment through the program to notify all parties affected by the application and to require DOE to hear all affected parties and take into account their interests before taking action on an application. Such an amendment is unnecessary because the essence of this proposal is accomplished by section 3(a)(2) of Defense Mobilization Order No. 13 which de-

scribes the function of the Department of Commerce under DPA section 101(c). This section provides:

The Secretary of Commerce shall retain the functions of finding that supplies of materials and equipment are scarce, and that the purposes described in subsection 101(c)(3)(B) of the Act cannot reasonably be accomplished without exercising the authority specified in subsection 101(c)(1). This finding will include, to the extent practicable, an assessment of the effects of using the authority for the project in question on other significantly impacted projects.

A late filed comment suggested that anyone receiving a priority rating should be required to enter into a contract with the Government that would (1) make Federal procurement regulations applicable as to definitions and general rules of business conduct, and (2) make a Government contract appeal body the final arbiter in disputes. We have not included such a provision in the regulations. If a Government agency is a party to a contract which is authorized to use section 101(c) authorities, Federal procurement regulations would be applicable and appropriate appeals procedures would be available. However, if nongovernmental persons are parties to a contract subject to 101(c) authorities, we believe that DOE has no authority under the DPA to require that such parties be subject to Federal procurement regulations and appeals procedures. Moreover, we believe that such a requirement would be an unwarranted governmental intrusion into private business arrangements. Of course, private parties are free to bind themselves by contract to specified rules of business conduct and arbitration procedures.

DOE has determined that the violations section, § 216.9, should be amended in recognition of the fact that this is a procedural regulation and that it can be violated only by willfully furnishing false information in the course of the application process or in a petition for reconsideration. Willfully furnishing false information to the Federal Government or concealing a material fact is a crime under the Federal criminal code punishable by fine or imprisonment or both. Paragraph (b) has, therefore, been eliminated in its entirety.

IV. MISCELLANEOUS

The regulations have been reviewed in accordance with Executive Order 11821, issued November 24, 1974, and have been determined not to be of a nature that requires an evaluation of their inflationary impact pursuant to Executive Order 11821. The regulations have also been reviewed in accordance with 10 CFR Part 208 and the National Environmental Policy Act of 1969 and have been determined not to be of a nature that requires the pre-

paration of an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969. Also, as required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of these regulations has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of these regulations on the quality of the environment. The Administrator had no comments.

In consideration of the foregoing, Part 216, Chapter II of Title 10, Code of Federal Regulations, is hereby established, as set forth below, effective immediately.

Issued at Washington, D.C., February 6, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration,
Department of Energy.

AUTHORITY: Sec. 104, Energy Policy and Conservation Act (EPCA); sec. 101(c), Defense Production Act of 1950, as amended (DPA) (50 U.S.C. App. 2071(c)); sec. 7, E.O. 11912, April 13, 1976; Defense Mobilization Order No. 13, September 22, 1976, 41 FR 43720; Department of Commerce, Bureau of Domestic Commerce, Delegation No. 4, 41 FR 52331.

§ 216.1 Introduction.

(a) This part describes and establishes the procedures to be used by the Department of Energy ("DOE") in considering and making certain findings required by section 101(c)(3) of the Defense Production Act of 1950, as amended, 50 U.S.C. App. 2071(c)(3) ("DPA"). Section 101(c) authorizes the allocation of, or priority performance under contracts or orders (other than contracts of employment) relating to, supplies of materials and equipment in order to maximize domestic energy supplies if the findings described in section 101(c)(3) are made. Among these findings are that such supplies of materials and equipment are critical and essential to maintain or further exploration, production, refining, transportation or the conservation of energy supplies or for the construction and maintenance of energy facilities. The function of finding if such supplies are critical and essential was delegated to the Administrator of the Federal Energy Administration ("FEA") pursuant to Executive Order 11912 of April 13, 1976, Defense Mobilization Order ("DMO") No. 13 dated September 22, 1976, 41 FR 43720, and Department of Commerce, Bureau of

Domestic Commerce, Delegation No. 4, effective date December 1, 1976, 41 FR 52331. On October 1, 1977, pursuant to section 301(a) of the Department of Energy Organization Act (Pub. L. 95-91), all of the functions of FEA and all of the functions of the FEA Administrator were transferred to the Secretary of Energy.

(b) The purpose of these regulations is to establish the procedures and the criteria to be used by DOE in determining whether programs or projects maximize domestic energy supplies and finding whether or not supplies of material and equipment are critical and essential, as required by DPA section 101(c)(3). The critical and essential finding will be made only for supplies of materials and equipment related to those programs or projects determined by DOE to maximize domestic energy supplies. These regulations do not require or imply that the findings, on which the exercise of such authority is conditioned, will be made in any particular case.

(c) If DOE determines that a program or project maximizes domestic energy supplies and finds that supplies of materials and equipment are critical and essential to maintain or further the exploration, production, refining, transportation or conservation of energy supplies or for the construction and maintenance of energy facilities, such determination and finding will be communicated to the Department of Commerce. If not, the applicant will be so informed. If the determination and finding described above are made, the Department of Commerce, pursuant to DPA section 101(c), Executive Order 11912 and DMO No. 13, will find whether or not (1) the supplies of materials and equipment in question are scarce and (2) maintenance or furtherance of exploration, production, refining, transportation, or conservation of energy supplies or the construction and maintenance of energy facilities cannot be reasonably accomplished without exercising the authority specified in section 101(c). If these additional two findings are made, the Department of Commerce will notify DOE, and DOE will inform the applicant that it has been granted the right to use priority ratings under the Defense Materials System ("DMS") and the Defense Priorities System ("DPS") established by the Department of Commerce.

§ 216.2 Definitions.

As used in these regulations:
(a) "Secretary" means the Secretary of the Department of Energy.
(b) "Applicant" means a person requesting priorities or allocation assistance in connection with an energy program or project.
(c) "Application" means the written request of an applicant for assistance.

(d) "Assistance" means use of the authority vested in the President by DPA section 101(c) to implement priorities and allocation support.

(e) "BDC" means the Bureau of Domestic Commerce within the Domestic and International Business Administration of the United States Department of Commerce.

(f) "DOE" means the Department of Energy, acting through the Secretary or the delegate of the Secretary.

(g) "Eligible energy program or project" means a designated activity which maximizes domestic energy supplies by furthering the domestic exploration, production, refining, transportation or conservation of energy supplies or construction and maintenance of energy facilities within the meaning of DPA section 101(c), as determined by DOE.

(h) "FPA" means the Federal Preparedness Agency of the General Services Administration.

(i) "Materials and equipment" means any raw, in-process, or manufactured commodity, equipment, component, accessory, part, assembly or product of any kind.

(j) "Person" means an individual, corporation, partnership, association, or any other organized group of persons (or legal successor or representative thereof), and includes the United States or any other government and any political subdivisions (or any agency) thereof.

§ 216.3 Requests for assistance.

(a) Persons who believe that they perform work associated with a program or project which may qualify as an eligible energy program or project and wishing to receive assistance as authorized by DPA section 101(c)(1) may submit an application to DOE requesting DOE to determine whether a program or project maximizes domestic energy supplies and to find whether or not specific supplies of materials or equipment identified in the application are critical and essential for a purpose identified in section 101(c). The application should be sent to: Department of Energy, Office of Financial Planning and Materials Allocation, Office of Resource Applications, Room 3516, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. The application shall contain the following information:

(1) The name and address of the applicant and of its duly authorized representative.

(2) A description of the energy program or project for which assistance is requested and an assessment of its impact on the maximization of domestic energy supplies.

(3) The amount of energy to be produced by the program or project which is directly affected by the sup-

plies of the materials or equipment in question.

(4) A statement explaining why the materials or equipment for which assistance is requested are critical and essential to the construction or operation of the energy project or program.

(5) A detailed description of the specific supplies of materials and equipment in connection with which assistance is requested, including: Components, performance data (capacity, life duration, etc.), standards, acceptable tolerances in dimensions and specifications, current inventory, present and expected rates of use, anticipated deliveries and substitution possibilities (feasibility of using other materials or equipment).

(6) A detailed description of the sources of supply, including: Name of the regular supplying company or companies, other companies capable of supplying the materials and equipment, location of supplying plants or plants capable of supplying the needed materials and equipment, possible suppliers for identical or substitutable materials and equipment and possible foreign sources of supply.

(7) A detailed description of the delivery situation, including: Normal delivery times, promised delivery time without priorities assistance, and delivery time required for expeditious fulfillment or completion of the program or project.

(8) Evidence of the applicant's unsuccessful efforts to obtain on a timely basis the materials and equipment in question through normal business channels from current or other known suppliers.

(9) A detailed estimate of the delay in fulfilling or completing the energy program or project which will be caused by inability to obtain the specified materials and equipment in the usual course of business.

(10) Any known conflicts with rated or authorized controlled material orders already issued pursuant to the DPA for supplies of the described materials and equipment.

(11) Quarterly estimates of requirements for controlled materials, if applicable, by shapes and forms as prescribed by DMS Regulation 1.

(b) DOE, in consultation with the BDC, may prescribe standard forms of application or letters of instruction for use by all persons seeking assistance.

(c) In addition to the information described above, DOE may from time to time request whatever additional information it reasonably believes is relevant to the discharge of its functions pursuant to DPA section 101(c).

§ 216.4 Evaluation by DOE of applications.

(a) Based on the information provided by the applicant and other avail-

able information, DOE will assess the application and (1) determine whether or not the energy program or project in connection with which the application is made maximizes domestic energy supplies and should be designated an eligible energy program or project and (2) find whether the described supplies of materials and equipment are critical and essential to the eligible energy program or project.

(b) In determining whether the program or project referred to in the application should be designated an eligible energy program or project, DOE will consider all factors which it considers relevant including, but not limited to, the following:

- (1) Quantity of energy involved;
- (2) Benefits of timely energy program furtherance or project completion;
- (3) Socioeconomic impact;
- (4) The need for the end product for which the materials and equipment are allegedly required; and
- (5) Established national energy policies.

(c) In findings whether the supplies of materials or equipment described in the application are critical and essential to an eligible energy program or project, DOE will consider all factors which it considers relevant including, but not limited to, the following:

- (1) Availability and utility of substitute materials or equipment; and
- (2) Impact of the nonavailability of the specific supplies of materials and equipment on the furtherance or timely completion of the approved energy program or project.

(d) Increased costs which may be associated with obtaining materials or equipment without assistance shall not be considered a valid reason for finding the materials and equipment to be critical and essential.

(e) After DOE has determined a program or project to be an eligible energy program or project, this determination shall be deemed made with regard to subsequent applications involving the same program or project unless and until DOE announces otherwise.

§ 216.5 Notification of findings.

(a) DOE will notify the BDC if it finds that supplies of materials and equipment, for which an applicant requested assistance, are critical and essential to an eligible energy program or project, and in such cases will forward to the BDC the application and whatever information or comments DOE believes appropriate. If DOE believes at any time that findings previously made may no longer be valid, it will immediately notify the BDC and the affected applicant(s) and afford such applicant(s) an opportunity to show cause why such findings should not be withdrawn.

(b) If BDC notifies DOE that BDC has found that supplies of materials and equipment, for which the applicant requested assistance, are scarce and that the related eligible energy program or project cannot reasonably be accomplished without exercising the authority specified in DPA section 101(c)(1), DOE will notify the applicant that the applicant is authorized to place rated orders and/or authorized controlled material orders for specific supplies of materials and equipment pursuant to the provisions of DMS Regulation 1 and DPS Regulation 1, as promulgated by the Department of Commerce.

§ 216.6 Petition for reconsideration.

If DOE, after evaluating an application in accordance with § 216.4, does not determine that the energy program or project maximizes domestic energy supplies or does not find that the supplies of materials and equipment described in the application are critical and essential to an eligible energy program or project, it will so notify the applicant and the applicant may petition DOE for reconsideration. If DOE concludes at any time that findings previously made are no longer valid and should be withdrawn, DOE will so notify the affected applicant(s), and such applicant(s) may petition DOE for reconsideration of the withdrawal decision. Such a petition is deemed accepted when received by DOE at the address stated in § 216.9. DOE will consider the petition for reconsideration and either grant or deny the relief requested. Written notice of the decision and of the reasons for the decision will be provided to the applicant. There has not been an exhaustion of administrative remedies until a petition for reconsideration has been submitted and the review procedure completed by grant or denial of the relief requested. The denial of relief requested in a petition for reconsideration is a final administrative decision.

§ 216.7 Conflict in priority orders.

If it appears that the use of assistance pursuant to DPA section 101(c) creates or threatens to create a conflict with priorities and allocation support provided in connection with the national defense pursuant to DPA section 101(a), DOE will work with the BDC and other claimant agencies affected by such conflict in an attempt to reschedule deliveries or otherwise accommodate such competing demands. If acceptable solutions cannot be agreed upon by the claimant agencies the FPA will resolve such conflicts.

§ 216.8 Communications.

All written communications concerning these regulations shall be addressed to:

Department of Energy, Financial Planning and Materials Allocation, Office of Resource Applications, Room 3516, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

§ 216.9 Violations.

Any person who willfully furnishes false information or conceals any material fact in the course of the application process or in a petition for reconsideration is guilty of a crime, and upon conviction may be punished by fine or imprisonment or both.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Y; Docket No. R-0083]

PART 225—BANK HOLDING COMPANIES

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Interpretation and withdrawal of proposed rulemaking.

SUMMARY: In order to more effectively administer section 2(g)(3) of the Bank Holding Company Act, the Board of Governors has issued an interpretation of its Regulation Y. The interpretation codifies certain previous rulings of the Board on the scope of section 2(g)(3). This interpretation is issued in lieu of an amendment to Regulation Y proposed in February 1977 (42 FR 9679), and that proposal is withdrawn.

EFFECTIVE DATE: January 25, 1978.
FOR FURTHER INFORMATION CONTACT:

Robert E. Mannion, Associate General Counsel, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3274.

SUPPLEMENTARY INFORMATION: The Bank Holding Company Act provides that if a bank holding company transfers shares that it owns to a company or other transferee that is (a) indebted to the bank holding company, or (b) has an officer or director interlock with the bank holding company, control of the shares is presumed not to have changed unless the Board determines otherwise.

The Board has in effect interpreted this section of the Act—2(g)(3)—in previous decisions on specific cases. This interpretation:

1. Codifies these past rulings by the Board to the effect that (a) the presumption of continued control arises where the shares or other assets are transferred to a person who is an officer or director of the company making

the transfer and (b) the terms "transferor" and "transferee" include parent or subsidiary companies of each (including a transferred company itself).

2. Interprets section 2(g)(3) as being applicable where (a) all or substantially all of the assets of a company or subsidiary are being transferred, or (b) the asset being transferred is of such significant size or value as to constitute the transfer of an "activity" of a bank holding company; also, that transfers of partnership interests are covered.

3. Interprets the terms "officer" and "director" as including not only persons with such titles but also those with comparable functions, and those holding such offices in honorary or advisory capacities.

4. Provides that in the interests of expediting proceedings under this provision of the Bank Holding Company Act no future FEDERAL REGISTER notice will be published upon receipt of an application under this section, but that no application under section 2(g)(3) will be denied by the Board without affording the applicant company an opportunity for a hearing. The Board will continue to publish final decisions under this section in the FEDERAL REGISTER.

Pursuant to its authority under sections 2(g)(3) and 5(b) of the Bank Holding Company Act, the Board has issued the following interpretation of section 2(g)(3) of the Act:

§ 225.139 Presumption of continued control under section 2(g)(3) of the Bank Holding Company Act.

(a) Section 2(g)(3) of the Bank Holding Company Act (the "Act") establishes a statutory presumption that where certain specified relationships exist between a transferor and transferee of shares, the transferor (if it is a bank holding company, or a company that would be such but for the transfer) continues to own or control indirectly the transferred shares.¹ This presumption arises by operation of law, as of the date of the transfer, without the need for any order or determination by the Board. Operation of the presumption may be terminated only by the issuance of a Board determination, after opportunity for hearing, "that the transferor is not in fact capable of controlling the transferee."²

(b) The purpose of section 2(g)(3) is to provide the Board an opportunity to assess the effectiveness of divesti-

¹The presumption arises where the transferee "is indebted to the transferor, or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor."

²The Board has delegated to its General Counsel the authority to issue such determinations, 12 CFR 265.2(b)(1).

tures in certain situations in which there may be a risk that the divestiture will not result in the complete termination of a control relationship. By presuming control to continue as a matter of law, section 2(g)(3) operates to allow the effectiveness of the divestiture to be assessed before the divesting company is permitted to act on the assumption that the divestiture is complete. Thus, for example, if a holding company divests its banking interest under circumstances where the presumption of continued control arises, the divesting company must continue to consider itself bound by the Act until an appropriate order is entered by the Board dispelling the presumption. Section 2(g)(3) does not establish a substantive rule that invalidates transfers to which it applies, and in a great many cases the Board has acted favorably on applications to have the presumption dispelled. It merely provides a procedural opportunity for Board consideration of the effect of such transfers in advance of their being deemed effective. Whether or not the statutory presumption arises, the substantive test for assessing the effectiveness of a divestiture is the same—that is, the Board must be assured that all control relationships between the transferor and the transferred property have been terminated and will not be reestablished.³

(c) In the course of administering section 2(g)(3) the Board has had several occasions to consider the scope of that section. In addition, questions have been raised by and with the Board's staff as to coverage of the section. Accordingly, the Board believes it would be useful to set forth the following interpretations of section 2(g)(3):

(1) The terms "transferor" and "transferee," as used in section 2(g)(3), include parents and subsidiaries of each. Thus, for example, where a transferee is indebted to a subsidiary of the transferor,⁴ or where a specified interlocking relationship exists between the transferor or transferee and

³It should be noted, however, that the Board will require termination of any interlocking management relationships between the divesting company and the transferee or the divested company as a precondition of finding that a divestiture is complete. Similarly, the retention of an economic interest in the divested company that would create an incentive for the divesting company to attempt to influence the management of the divested company will preclude a finding that the divestiture is complete. (See the Board's Order in the matter of "International Bank", 1977 Federal Reserve Bulletin 1106, 1113).

⁴The indebtedness giving rise to the presumption is not limited to debt incurred in connection with the transfer; it includes any debt running to the transferor or its subsidiaries.

a subsidiary of the other (or between subsidiaries of each), the presumption arises. Similarly, if a parent of the transferee is indebted to a parent of the transferor, the presumption arises. The presumption of continued control also arises where an interlock or debt relationship is retained between the divesting company and the company being divested, since the divested company will be or may be viewed as a "subsidiary" of the transferee of group of transferees.

(2) The terms "officers," "directors," and "trustees," as used in section 2(g)(3), include persons performing functions normally associated with such positions (including general partners in a partnership and limited partners having a right to participate in the management of the affairs of the partnership) as well as persons holding such positions in an advisory or honorary capacity. The presumption arises not only where the transferee or transferred company has an officer, director or trustee "in common with" the transferor, but where the transferee himself holds such a position with the transferor.⁵ It should be noted that where a transfer takes the form of a pro-rata distribution, or "spin-off," of shares to a company's shareholders, officers and directors of the transferor company are likely to receive a portion of such shares. The presumption of continued control would, of course, attach to any shares transferred to officers and directors of the divesting company, whether by "spinoff" or outright sale. However, the presumption will be of legal significance—and will thus require an application under section 2(g)(3)—only where the total number of shares subject to the presumption exceeds one of the applicable thresholds in the Act. For example, where officers and directors of a one-bank holding company receive in the aggregate 25 percent or more of the stock of a bank subsidiary being divested by the holding company, the holding company would be presumed to continue to control the "divested" bank. In such a case it would be necessary for the divesting company to demonstrate that it no longer controls either the divested bank or the officer/director transferees. However, if officers and directors were to receive in the aggregate less than 25 percent of the bank's stock (and no other shares were subject to the pre-

⁵It has been suggested that the words "in common with" in section 2(g)(3) evidence an intent to make the presumption applicable only where the transferee is a company having an interlock with the transferor. Such an interpretation would, in the Board's view, create an unwarranted gap in the coverage of section 2(g)(3). Furthermore, because the presumption clearly arises where the transferee is an individual who is indebted to the transferor such an interpretation would result in an illogical inconsistency in the statute.

sumption), section 2(g)(3) would not have the legal effect of presuming continued control of the bank.⁶ In the case of a divestiture of nonbank shares, an application under section 2(g)(3) would be required whenever officers and directors of the divesting company received in the aggregate more than 5 percent of the shares of the company being divested.

(3) Although section 2(g)(3) refers to transfers of "shares" it is not, in the Board's view, limited to disposition of corporate stock. General or limited partnership interests, for example, are included within the term "shares." Furthermore, the transfer of all or substantially all of the assets of a company, or the transfer of such a significant volume of assets that the transfer may in effect constitute the disposition of a separate activity of the company, is deemed by the Board to involve a transfer of "shares" of that company.

(d) Section 2(g)(3) provides that a Board determination that a transferor is not in fact capable of controlling a transferee shall be made after opportunity for hearing. It has been the Board's routine practice since 1966 to publish notice in the FEDERAL REGISTER of applications filed under section 2(g)(3) and to offer interested parties an opportunity for a hearing. Virtually without exception no comments have been submitted on such applications by parties other than the applicant and, with the exception of one case in which the request was later withdrawn, no hearings have been requested in such cases. Because the Board believes that the hearing provision in section 2(g)(3) was intended as a protection for applicants who are seeking to have the presumption overcome by a Board order, a hearing would not be of use where an application is to be granted. In light of the experience indicating that the publication of FEDERAL REGISTER notice of such applications has not served a useful purpose, the Board has decided to alter its procedures in such cases. In the future, FEDERAL REGISTER notice of section 2(g)(3) applications will be published only in cases in which the Board's General Counsel, acting under delegated authority, has determined not to grant such an application and has referred the matter to the Board for decision.⁷

⁶Of course, the fact that section 2(g)(3) would not operate to presume continued control would not necessarily mean that control had in fact been terminated if control could be exercised through other means.

⁷It should be noted that in the event a third party should take exception to a board order under section 2(g)(3) finding that control has been terminated, any rights such party might have would not be prejudiced.

(Continued)

By order of the Board of Governors,
effective January 25, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION,
DEPARTMENT OF HEALTH, EDUCATION,
AND WELFARE

SUBCHAPTER A—GENERAL

SUBCHAPTER H—MEDICAL DEVICES

[Docket No. 76N-0324]

INTRAOcular LENSES

Investigational Device Exemption
Requirements; Correction

AGENCY: Food and Drug Administration.

ACTION: Final rule; correction.

SUMMARY: In FR Doc. 77-32258, appearing at page 58874 in the FEDERAL REGISTER of Friday, November 11, 1977, the following changes are made: In the preamble, in the second column of p. 58888, in the 17th line and in the 24th line, change "5 percent" to "0.5 percent."

FOR FURTHER INFORMATION CONTACT:

John Richards, Federal Register Writer (HFC-11), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2994.

Dated: February 7, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[4110-03]

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION
[Docket No. 75F-0119]

PART 175—INDIRECT FOOD ADDITIVES:
ADHESIVE COATINGS AND COMPONENTS

Resinous and Polymeric Coatings

AGENCY: Food and Drug Administration.

ACTION: Final rule.

(Continued)

by the order. If such party brought facts to the Board's attention indicating that control had not been terminated the Board would have ample authority to revoke its order and take necessary remedial action.

Orders issued under section 2(g)(3) are published in the FEDERAL REGISTER and in the Federal Reserve "Bulletin."

SUMMARY: This document amends the food additive regulations to provide for the safe use of *n*-butyl acrylate-styrene-methacrylic acid-hydroxyethyl methacrylate copolymers in coatings intended for contact with dry foods. Rohm & Haas Co. filed a petition for such use.

DATES: Effective February 14, 1978; objections by March 16, 1978.

ADDRESS: Written objections to this regulation may be filed with the Hearing Clerk (HFC-20), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFC-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204. 202-472-5690.

SUPPLEMENTARY INFORMATION: A notice published in the FEDERAL REGISTER of July 14, 1975 (40 FR 29560) announced that a food additive petition (FAP 5B3087) had been filed by Rohm & Haas Co., Independence Mall West, Philadelphia, Pa. 19105, proposing that 21 CFR 121.2514 (now 21 CFR 175.300 pursuant to recodification) be amended to provide for the use of *n*-butyl acrylate-styrene-methacrylic acid-hydroxyethyl methacrylate copolymers in coatings in contact with dry food or aqueous food containing no more than 8 percent alcohol. The petitioner subsequently amended the petition to limit use of the subject copolymers in coatings in contact with dry food only.

One minor optional adjuvant, 2-(dimethylamino) ethanol, is also being specified in the regulation because unlike the others in the petition it is not now covered by applicable regulation.

Having evaluated data in the petition and other relevant material, the Commissioner of Food and Drugs and concludes that § 175.300 should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 175 is amended in § 175.300 in paragraph (b)(3)(xx) by alphabetically inserting a new item in the list of substances, to read as follows:

§ 175.300 Resinous and polymeric coatings.

(b) * * *
(3) * * *
(xx) * * *

n-butyl acrylate-styrene-methacrylic acid-hydroxyethyl methacrylate copolymers con-

taining no more than 2 weight percent of total polymer units derived from methacrylic acid and containing no more than 9.5 weight percent of total polymer units derived from hydroxyethyl methacrylate; for use only in coatings in contact with dry food (food type VIII in table 1 of paragraph (d) of this section). 2-(Dimethylamino) ethanol (C.A.S. Registry No. 108-01-0) may be employed as an optional adjuvant substance limited to no more than 2 weight percent based on polymer solids in the coating emulsion.

Any person who will be adversely affected by the foregoing regulation may at any time on or before March 16, 1978, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective February 14, 1978.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).

Dated: February 7, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-503]

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE ELIGIBILITY OF MORTGAGES ON EXISTING PROJECTS

Subpart A—Eligibility Requirements

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This rule extends the date on which projects financed with State or local assistance, started prior to December 31, 1975, must be completed, and also the date for the submission of applications for insurance of mortgages on such projects is extended from January 1, 1978 to July 1, 1978. It makes explicit that multifamily projects covered by a Housing Assistance Payment contract under section 8 shall not be eligible for mortgage insurance under this subsection. This prohibition shall not apply to multifamily projects with individual tenants receiving assistance under the section 8 Existing Housing Program. These deadlines pose a serious problem for 16 State projects and 53 city projects involved in the request for the date extension. These projects would be determined ineligible for mortgage insurance unless an extension of 6 months is effected.

DATES: This amendment is effective as of February 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Sidney B. Severe, Multifamily Insurance Division, Department of Housing and Urban Development, Washington, D.C. 20410, 202-755-9280.

SUPPLEMENTARY INFORMATION: Section 207.32a(k)(1) presently requires that a project be fully completed prior to January 1, 1978, and that an application for mortgage insurance also be filed prior to that date. We are informed that these deadlines pose a serious problem for some projects that would be determined ineligible unless an extension of 6 months is effected. In order to facilitate the success of this refinancing program and accommodate these projects, we are amending this regulation by extending the date for project completion and the filing of an application.

Presently, the regulations are silent with respect to the eligibility of section 8 assisted projects under this program. Section 207.32a(k)(2) is amended by adding language which precludes multifamily projects covered by

a Housing Assistance Payment contract under section 8 from being eligible. Also, a new § 207.32a(k)(7) is added to establish one and one-half billion dollars as the maximum amount of insurance to be provided for under this program.

Since the amendments to Part 207 are technical in nature and because of the expiration of the eligibility date, the Secretary has determined that advance publication, notice and public procedure are impracticable and unnecessary and good cause exists for making these amendments effective upon publication. In addition, the Department will undertake review of this program, at which time these amendments will be evaluated within the scope of § 207.32a.

The Department has determined that an Environmental Impact Statement is not required with respect to these amendments. The Finding of Inapplicability in accordance with HUD's environmental procedures handbook (HUD Handbook 1390.1) is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, Room 5218, 451 Seventh Street SW., Washington, D.C. 20410.

Accordingly, 24 CFR Part 207, Subpart A, § 207.32a is amended by revising paragraphs (k)(1) and (k)(2) and adding (k)(7) to read as follows:

§ 207.32a [Amended.]

Paragraph (k)(1) is amended by deleting "January 1, 1978," wherever it appears, and inserting in lieu thereof "July 1, 1978."

Paragraph (k)(2) is amended by including two additional sentences which read as follows: "Multifamily projects covered by a Housing Assistance Payment contract under Section 8 shall not be eligible for mortgage insurance under this subsection. This prohibition shall not apply to multifamily projects with individual tenants receiving assistance under the section 8 Existing Housing Program."

Paragraph (k)(7) The total amount of loans insured pursuant to this section shall not exceed one and one-half billion dollars.

It is hereby certified that the economic and inflationary impacts of this final rule have been carefully evaluated in accordance with Executive Order No. 11821. (Section 7(d), Department of Housing and Urban Development Act, (42 U.S.C. 3535(d)).

Issued in Washington, D.C. on February 7, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing,
Federal Housing Commission-

er.

CHAPTER X—FEDERAL INSURANCE
ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE
PROGRAM

[Docket No. FI-3478]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the City of Seal Beach, Orange County, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Seal Beach, Orange County, Calif. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of Seal Beach, Calif.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Seal Beach, are available for review at City Hall, 211 8th Street, Seal Beach, Calif.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Seal Beach, California.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Local runoff from Golf Course Retarding Basin.	North and West of Lampson Ave.	14

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 27, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-2711]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the City of Sherwood, Pulaski County, Ark.; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of final rule.

SUMMARY: The Federal Insurance Administration has erroneously published at 42 FR 48996 on September 26, 1977, the final flood elevation determination for the City of Sherwood, Pulaski County, Ark. This notice will serve as a cancellation of that publication. A new notice of final flood elevation determination will be published in the near future.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

[Docket No. FI-3375]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the City of South Lake Tahoe, El Dorado County, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of South Lake Tahoe, El Dorado County, Calif. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of South Lake Tahoe, Calif.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of South Lake Tahoe, are available for review at City Hall, South Lake Tahoe, Calif.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of South Lake Tahoe, Calif.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received

from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Bijou Creek	Ralph Dr	6,306
	Pioneer Tr	6,295
	Palmer Ave	6,233
	U.S. Route 50	6,232
Heavenly Valley Creek	Pioneer Tr	6,295
	Johnson Rd	6,255
Trout Creek	U.S. Route 50	6,243
Upper Truckee River	U.S. Route 50	6,241

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: January 13, 1978.

RULES AND REGULATIONS

[4210-01]

[Docket No. FI-3480]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the Town of Palmer Lake, El Paso County, Colo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the town of Palmer Lake, El Paso County, Colo. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the town of Palmer Lake, Colo.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the town of Palmer Lake, are available for review at Town Hall, Lower Glenway and Crescent, Palmer Lake, Colo.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the town of Palmer Lake, Colo.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Monument Creek	Virginia Ave	7,276
	Lovers Lane	7,110
	Private driveway, (1,190 ft upstream of Red Rock Ranch Rd.)	7,016
	Private driveway (256 ft downstream of the confluence of Monument Creek bypass)	6,957
Monument Creek tributary	Westward Lane	7,002
	Colorado Highway 105	6,977
	County road	6,947
North Monument Creek	Walnut Ave	7,196
	Private driveway	7,156

[Docket No. FI-3377]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the City of Trinidad, Las Animas County, Colo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the city of Trinidad, Las Animas County, Colo. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Trinidad, Colo.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Trinidad, are available for review at City Hall, 135 North Animas, Trinidad, Colo.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Trinidad, Colo.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Purgatoire River ...	1-25.....	6.002
	Commercial St.....	5.986
	Linden Ave.....	5.972
Prospect Canyon.....	Atchison Ave.....	6.087
	Robinson Ave.....	6.064
	Nickerson Ave.....	6.040
Pinon Cayon.....	Nevada Ave.....	6.027
	Arizona Ave.....	6.020
Portland Avenue Canyon.....	East Main St.....	5.986
	Colorado & Southern RR.....	5.978
Fishers Peak Arroyo.....	2d St.....	6.034

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: November 29, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-3539]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for City of Atchison, Atchison County, Kans.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in City of Atchison County, Kans. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for City of Atchison, Atchison County, Kans.

ADDRESSES: Maps and other information showing the detailed outlines of the flood prone areas and the final elevations for City of Atchison, are available for review at City Clerk's Office, City Hall, 515 Kansas Avenue, Atchison, Kans. 66002.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line

800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for City of Atchison, Atchison County, Kans.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Missouri River	U.S. Highway 59...	792
	Rock Island Railroad.	793
White Clay Creek	Tenth St	814
	Fourteenth St	818
Brewery Creek	Utah Blvd	817
	Patriot St	818

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: November 29, 1977.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Beattyville, Lee County, Ky.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for se-

RULES AND REGULATIONS

lected locations in the City of Beattyville, Lee County, Ky. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of Beattyville, Lee County, Ky.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Beattyville, Lee County, Kentucky, are available for review at the County Judge's Office in the basement of the County Jail, Main Street, Beattyville, Ky.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Beattyville, Lee County, Ky.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Kentucky River.....	Confluence of Mirey Creek.	668
	Confluence of Silver Creek.	669
North Fork.....	State Route 11	670
Ketucky River.....	Upstream Corporate Limits (extended).	672

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mirey Creek.....	Confluence with Kentucky River.	668
	0.33 Mile above mouth.	675
	0.4 Mile above mouth.	683
	Upstream of State Route 52.	696
Crystal Creek.....	Mirey Creek Rd.	669
	Main St.	669
	Locust St.	671
	1.14 Miles above mouth.	669
Silver Creek.....	Main St.	669
	Silver Creek Rd.	669
	at 0.56 Mile above mouth.	680
	Silver Creek Rd.	680
	0.72 Mile above mouth.	696
	0.95 Mile above mouth.	696

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: January 17, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Unincorporated Areas of Iberia Parish, La.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the unincorporated areas of Iberia Parish, La. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the unincorporated areas of Iberia Parish, La.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the unincorporated areas of Iberia Parish, La., are avail-

able for review at Police Jury Office of Iberia Parish, New Iberia, La.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the unincorporated areas of Iberia Parish, La.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Rodere Canal.....	Downstream of Curtis La.	10
Peebles Coulee	Approximately 0.47 mi upstream from U.S. Highway 90.	11
	Approximately 400 ft downstream from the southern New Iberia corporate limits.	13
Vermilion Bay	Delcambre Canal, downstream of the town of Delcambre.	9
	Wilkins Canal of the confluence of Little Valley Bayou.	10
	Petite Anse Canal at the Avery Island oil field.	10
	Weeks Bayou at the northern Week Island oil and gas field.	11

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended;

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER U—ELECTRIC POWER SYSTEM

PART 231—COLORADO RIVER IRRIGATION PROJECT, ARIZONA

Revision of Regulations and Rates

FEBRUARY 7, 1978.

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION: Final revision of regulations and rates.

SUMMARY: The purpose of the final revision is to increase the four power rate schedules and to change the wording of §§ 231.5, 231.16, 231.22 and 231.23 to conform to the actual cost of services provided.

Present revenues are inadequate to meet expenses. As of July 31, 1977, the project has a credit cash balance of \$534,191.23 and this credit balance will continue to increase at a rate of \$30,000 to \$40,000 per month until the final rates are in effect. This problem has been caused by the continuing inflation of labor and material and the withdrawal of Colorado River Storage Project power and energy by the Bureau of Reclamation. The need to replace this power and energy from another more expensive source, Arizona Public Service Co., has caused the Colorado River Irrigation Project Power expenses to increase 196 percent.

DATES: These revised rates shall become effective on February 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles P. Corke, Bureau of Indian Affairs, Department of the Interior, Washington, D.C. 20245, telephone 202-343-2287.

SUPPLEMENTARY INFORMATION: Beginning on page 62394 of the December 12, 1977 FEDERAL REGISTER (42 FR 62394), there was published a Notice of proposed revision of rates. All interested persons were given until December 27, 1977 to submit comments regarding the proposed revision of rates. No comments were received.

The principal author of this document is Charles P. Corke, Bureau of

Indian Affairs, Department of the Interior, Washington, D.C. 20245, telephone 202-343-2287.

The Assistant Secretary—Indian Affairs has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular No. A-107.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 230 DM 2.

1. Section 231.5 is revised to read as follows:

§ 231.5 Cash deposits.

A Cash Deposit or other form of guarantee in advance, in an amount of twice the estimated monthly bill, but not less than \$50, will be required from all consumers except tribal, city, county, State, or Federal agencies. Where service to a consumer requires the construction of extensions beyond existing service lines, the consumer may be required by the Officer-in-Charge to deposit in advance an amount equal to one year's estimated billing.

2. Section 231.16 is amended by adding paragraphs (i), (j), (k), (l), (m), (n), and (o) as follows:

§ 231.16 Location and Installation of Meters and Metering.

(i) Customer's responsibility: The customer shall exercise reasonable care in protecting the Project's meter and other Project-owned equipment located on his premises. Only Project employees or agencies, or persons authorized by law, are permitted to inspect or handle same.

(j) Regularly scheduled meter tests shall be in accordance with the American National Standards Institute (ANSI) Code for Electric Metering.

(k) Special meter tests: On request of a customer, the Project should within 10 days after receipt of such request, make special meter tests. The customer shall bear the cost of such tests, including meter removal and replacement when the meter is found to be within the limits of acceptable accuracy as defined in paragraphs (k) and (l) of this section. Such cost shall be a charge of \$30. In all other cases, the Project will bear the cost of the test.

(l) Replacement of meter: Whenever a customer requests the replacement of the service meter because of accuracy, such request shall be treated as a request for a test of such meter and, as such, shall fall under the provision of special meter tests.

(m) Standard of meter accuracy: The Project shall not place in service,

or knowingly allow to remain in service without adjustment, any meter that has known error in registration of more than plus or minus two percent at light or at full load and unity power factor, or more than plus or minus three percent at full load and fifty percent power factor.

(n) Adjustment for inaccurate meter registration: Whenever a tested meter in service is found to be fast or slow beyond the limit of accepted accuracy as defined, the Project shall make an adjustment, based on the corrected registration for the period in which the meter was registering incorrectly, if such period is known and if not known for a period of not exceeding six months, but in no event for a period longer than the present customer's occupancy. Whenever any bill or bills have been adjusted or corrected as provided above and whenever such adjustment amounts to \$1 or more, the Project shall credit to the customer any amount found to have been collected in excess of the proper amount, or the Project may require the customer to pay any additional amount due, as the case may be.

(o) Incorrect meter installation: whenever any customer shall have been over-charged or under-charged as a result of incorrect installation of a meter or the use of an incorrect meter multiplier in billing the account, the amount of the over-charge shall be adjusted and credited to the customer, if in excess of \$1 or amount of the under-charge may be adjusted and billed to the customer if in excess of \$5, provided that in no event shall such period of adjustment exceed the length of time the service has been supplied to the customer through the incorrect metering installation at the present location.

3. Section 231.22 is amended by revising paragraph (c) to read as follows:

§ 231.22 Bills.

(c) Bills for a connection or reconnection service, the payments for deposits shall be paid before service is connected or reconnected. Reconnection service will be performed on advance payment of \$15, during normal working hours, or \$15 plus overtime expenses during non-working hours.

4. Section 231.23 is amended by revising paragraph (a) as follows:

§ 231.23 Discontinuance of service on failure to pay bills.

(a) Bills are due and payable upon receipt. On failure of the consumer to pay his bill for electric service within 15 days after billing date, the Officer-in-Charge shall discontinue the supply

RULES AND REGULATIONS

of energy, and service to the same customer will not be resumed at the same or at any other location until the consumer has paid all bills then due, plus a reconnection charge of \$15 during normal work hours, or \$15 plus overtime expenses during non-work hours.

5. Sections 231.51, 231.52, 231.53, and 231.54 are revised as follows:

§ 231.51 Rate Schedule No. 1—residential rate.

(a) *Application.* This schedule applies to electrical service required for residential purposes in individual private dwellings and in individually metered apartments delivered through one meter to a customer at one premise either urban or rural, for domestic use only. The electric service is to be used only on the consumer's own premises and must not be resold.

(b) *Type of service.* Single phase, 50 cycle, 120/240 volts.

(c) *Monthly rate.* (1) \$6 for the first 100 kilowatt-hours or less.

(2) 4.6 cents per kilowatt-hour for the next 300 kilowatt-hours.

(d) *Fuel costs adjustment.* An adjustment shall be added to each kilowatt-hour used equal to the estimated average purchase power adjustment paid by the project to the Project's power supplier.

§ 231.52 Rate Schedule No. 2—commercial rate.

(a) *Application.* This schedule applies to service required by commercial and industrial customers for all uses when such service is supplied at one point of delivery and measured through one meter. The electric service is to be used only on the consumer's own premises and must not be resold.

(b) *Type of service.* Single or three phase, 60 cycle, at one standard voltage (120/240, 120/208, 277/480, or 480 volts).

(c) *Monthly rate.* (1) \$6 for the first 100 kilowatt-hours or less.

(2) 4.6 cents per kilowatt-hour for the next 900 kilowatt-hours.

(3) 3.7 cents per kilowatt-hour for the next 4,000 kilowatt-hours.

(4) 2.8 cents per kilowatt-hour for all additional kilowatt-hours.

(d) *Demand charge.* (1) None for the first 5 kilowatts of billing demand.

(2) \$2.50 per kilowatt for all billing demand over 5 kilowatts.

(e) *Minimum charge.* (1) \$8 or \$2 per kilowatt of billing demand for billing demands over 5 kilowatts, or the amount specified in the contract whichever is greater, except where the Officer-in-Charge determines that the customer's requirements are of a distinctly recurring seasonal nature. Then the minimum monthly bill shall

not be more than an amount sufficient to make the total charges for the twelve (12) months ending with the current month, equal to twelve times the highest monthly minimum computed for the same twelve month period.

(f) *Billing demand.* The highest 15 minute integrated demand in kilowatts occurring during the month or the demand specified in a contract whichever is greater.

(g) *Fuel cost adjustment.* An adjustment shall be added to each kilowatt-hour used equal to the estimated average purchased power adjustment paid by the project to the Project's power suppliers.

§ 231.53 Rate Schedule No. 3—irrigation pumping rate

(a) *Application.* This schedule shall apply to power used for pumping of irrigation water for irrigation systems when such service is supplied at one point of delivery and measured through one meter and is approved by the Officer-in-Charge. Use must be limited to the consumer's premises and must not be resold.

(b) *Type of service.* Three phase, 60 cycle at one standard voltage (208, 240, or 480 volts).

(c) *Monthly rate.* (1) Energy Charge 1.7 cents per kilowatt-hour.

(2) Demand Charge \$1.50 per kilowatt of billing demand.

(3) Minimum Charge \$1.50 per kilowatt of billing demand.

§ 231.54 Rate Schedule No. 4—street and area lighting.

(a) *Application.* This rate schedule applies to service for lighting public streets, alleys, thoroughfares, public parks, school yards, industrial areas, parking lots, and similar areas where dusk-to-dawn service is desired. The Project will own, operate, and maintain the lighting system, including normal lamp and globe replacement.

(b) *Monthly rate.*

Lamps	Per lamp	
	Metered	Unmetered
(1) 175 watts, mercury vapor (approximately 6,500 lumens)	\$5.00	\$6.00
(2) 250 watts, mercury vapor (approximately 10,000 lumens)	6.30	7.70
(3) 400 watts, mercury vapor (approximately 18,000 lumens)	8.50	10.90

(c) *Minimum term of service.* The minimum term of service will be twelve months, payable in advance. This advance payment may be waived by the Officer-in-Charge.

(d) *Installation charges.* The customer will be required to pay the total installation costs including labor and material as determined by the Officer-

in-Charge. This will be a non-refundable charge. Ownership of all facilities will remain with the Project, including lamp and globe replacement.

FORREST J. GERARD
Assistant Secretary,
Indian Affairs.

Title 28—Judicial Administration
CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 766-78]

PART O—ORGANIZATION OF THE
DEPARTMENT OF JUSTICE

Seizure and Forfeiture of Materials Under
Copyrights Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The revision of the copyright law, Title 17, United States Code, which became effective January 1, 1978, provides for the first time for seizure and forfeiture to the United States of materials used or intended for use in violation of the criminal provisions of the copyright law. Existing Department regulations assign to the Criminal Division the function of bringing civil penalty actions under specified Federal statutes. This order adds the Copyrights Act to the list of Federal statutes specified.

EFFECTIVE DATE: February 7, 1978.

FOR FURTHER INFORMATION CONTACT:

John M. Harmon, Assistant Attorney General, Office of Legal Counsel, U.S. Department of Justice, Washington, D.C. 20530, 202-739-2041.

§ 0.55 [Amended]

By virtue of the authority vested in me by 17 U.S.C. 509, 28 U.S.C. 509, 510, and 5 U.S.C. 301, § 0.55(d) of Subpart K of Part O of Chapter I of Title 28, Code of Federal Regulations, is amended by adding "Copyrights Act," immediately after "Contraband Transportation Act."

Dated: February 7, 1978.

GRIFFIN B. BELL,
Attorney General.

[FR Doc. 78-4049 Filed 2-13-78; 8:45 am]

[3810-01]

Title 32—National Defense
CHAPTER XVIII—DEFENSE CIVIL
PREPAREDNESS AGENCY

PART 1802—DONATION OF FEDERAL SURPLUS
PERSONAL PROPERTY FOR CIVIL DEFENSE
PURPOSES

Deletion of Regulation

AGENCY: Defense Civil Preparedness Agency.

ACTION: Deletion of regulation.

SUMMARY: This action deletes 32 CFR, Part 1802, "Donation of Federal Surplus Personal Property for Civil Defense Purposes." The statutory authority to donate surplus personal property for this specific purpose terminated on October 17, 1977 pursuant to Pub. L. 94-519. Hence, there is no further need for these regulations.

EFFECTIVE DATE: February 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Walter Girstantas, Assistant Director, Administrative Services, Defense Civil Preparedness Agency, Room 1D487, Pentagon, Washington, D.C. 20301, 202-695-3402.

SUPPLEMENTARY INFORMATION: 32 CFR, Part 1802 prescribed, pursuant to sec. 203 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484), basic procedures for the donation of Federal surplus personal property for civil defense purposes. The regulation also established terms and conditions under which these donations were made, and indicated the manner in which the program was conducted. Section 203 also authorized donation of such property for health and education purposes. Public Law 94-519 amended the Federal Property and Administrative Services Act to provide for donation of such property to any public agency for use in carrying out or promoting for the residents of a given political area one or more public purposes such as conservation, economic development, education, parks and recreation, and public safety. Under the revised Act, the Director, DCPA, no longer participates in the donation process. Regulations concerning new donation procedures are issued by the Administrator of General Services and may be found at 41 CFR 101-44.

There is no longer any authority for DCPA to regulate this donation program, and hence, 32 CFR, Part 1802 should be deleted from the Code of Federal Regulations.

Public Law 94-519 provides that any term, condition, reservation, or restriction imposed on the use of any item of property (including any imposed by

RULES AND REGULATIONS

DCPA or its predecessors) prior to the effective date of the Act was terminated 30 days after that effective date, which was October 17, 1977. This provision of law does not terminate any civil or criminal liability arising out of a violation of such a term, condition, reservation, or restriction which occurred prior to October 17, 1977 if there was a judicial proceeding to enforce that liability pending on October 17, 1977, or one is commenced by October 17, 1978.

Notice and Public Procedure on this deletion of a regulation is unnecessary as the action is in response to termination of the authority to carry out activities pursuant to the regulation. For this reason also, the deletion is effective immediately.

Part 1802 [Removed]

In view of the foregoing, 32 CFR, Part 1802, is hereby deleted.

BARDYL R. TIRANA,
Director.

[FR Doc. 78-4029 Filed 2-13-78; 8:45 am]

[4310-70]

Title 36—Parks, Forests and Public Property
CHAPTER I—NATIONAL PARK SERVICE,
DEPARTMENT OF THE INTERIOR

PART 7—SPECIAL REGULATIONS, AREAS OF
THE NATIONAL PARK SYSTEM

Relaxation of Off-Road Motorcycle Operation
Regulations, Padre Island National Seashore,
Tex.

AGENCY: National Park Service, Department of the Interior.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to relax the present requirement that all operators and passengers on motorcycles using designated off-road routes wear approved safety helmets. The amended regulation will conform with a new Texas law effective September 1, 1977, which reduces state helmet requirements to cover only operators and passengers under 18 years of age.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. However, since this regulation relieves a restriction, it is determined that the rulemaking procedure is unnecessary and not in the public interest.

EFFECTIVE DATE: February 14, 1978.

FOR FURTHER INFORMATION CONTACT:

John F. Turney, Superintendent, Padre Island National Seashore, 9405 South Padre Island Drive, Corpus Christi, Tex. 78418, 512-937-

2621.

Section 7.75 is amended by revising paragraph (a)(1)(iii) as follows:

§ 7.75 Padre Island National Seashore.

(a) *Off-road motor vehicle and motorcycle operation.* (1) The following regulations pertain to the operation of motor vehicles and motorcycles off established roads and parking areas. The operation of such vehicles and motorcycles is subject also to the applicable provisions of Part 4 of this chapter and paragraphs (e) and (g) of this section.

(iii) No person under 18 years of age may operate or ride as a passenger on a motorcycle without wearing approved protective headgear (a helmet constructed to meet the requirements of Department of Transportation Standard Numbered Z90.1).

JOHN F. TURNEY,
Superintendent,
Padre Island National Seashore.

JANUARY 30, 1978.

Title 40—Protection of Environment
CHAPTER I—ENVIRONMENTAL PROTECTION
AGENCY

[FRL 854-31]

PART 428—RUBBER MANUFACTURING POINT
SOURCE CATEGORY

Revocation of Pretreatment Standards for New
Sources; Tire and Synthetic Segment

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule revokes the pretreatment standards for new sources within the emulsion crumb rubber subcategory (Subpart B) and the solution crumb rubber subcategory (Subpart C) of the Rubber Manufacturing Point Source Category, 40 CFR Part 428. This action is in response to requests made by the Firestone Tire & Rubber Co. and the Goodyear Tire & Rubber Co. and will resolve issues raised in litigation instituted by those companies.

EFFECTIVE DATE: March 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Juanita Hillman, Organic Chemicals Branch, Effluent Guidelines Division (WH-552), Environmental Protection Agency, Washington, D.C., 202-426-2497.

SUPPLEMENTARY INFORMATION: On September 23, 1977, the Environmental Protection Agency published a proposed rule revoking pretreatment standards for new sources in the emulsion crumb rubber and solution crumb rubber subcategories of the Rubber Manufacturing Point Source Category. The Agency pointed out that the data base for the standards is inadequate to support them at this time and that the standards are being revised under the consent agreement in *Natural Resources Defense Council v. Train*, 8 E.R.C. 2120 (D.D.C. 1976).

No unfavorable comments have been received, and the proposed rule is hereby adopted without change and is set forth below.

Part 428 is amended as follows:

Subpart B—Emulsion Crumb Rubber Subcategory

§ 428.26 [Revoked]

1. Subpart B is amended by revoking § 428.26.

Subpart C—Solution Crumb Rubber Subcategory

§ 428.36 [Revoked]

2. Subpart C is amended by revoking § 428.36.

Dated: February 7, 1978.

BARBARA BLUM,
Acting Administrator.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 168—GENERAL PROVISIONS RELATING TO STUDENT ASSISTANCE PROGRAMS: PROCEDURES FOR THE LIMITATION, SUSPENSION, OR TERMINATION OF INSTITUTIONAL ELIGIBILITY FOR PROGRAMS UNDER TITLE IV OF THE HIGHER EDUCATION ACT OF 1965

Correction

AGENCY: Office of Education, HEW.
ACTION: Correction, Final Regulations.

SUMMARY: In the regulations published in the FEDERAL REGISTER on December 23, 1977, pages 64569-64570, certain technical corrections need to be made. The document is corrected as follows:

(1) On page 64569, first column, § 168.75(b)(7), line 3, the second word, "and," should be deleted.

(2) On page 64569, second column, § 168.76(b)(1)(iii), line 7, the word, "or," should be inserted between the words, "limitation," and "termination."

(3) On page 64569, second column, § 168.76(b)(2), line 5, the semicolon should be deleted and a colon inserted in its place.

(4) On page 64569, second column, § 168.76(b)(6), line 1, a comma should be inserted after the word, "evidence."

(5) On page 64569, second column, § 168.76(b)(6), line 3, a comma should be inserted after the word, "warranted."

(6) On page 64569, second column, § 168.76(b)(6), line 7, the word, "action," should be inserted between the words, "termination," and "is."

(7) On page 64570, first column, § 168.80(b), line 1 the paragraph letter, "(b)," should be inserted before the heading, "Payment period."

(8) On page 64570, first column, § 168.80(b), line 8, the entire line, "(b)(2) For the purposes of this section," should be deleted.

(9) On page 64570, first column, § 168.80(b)(2), line 5, the words, "the period from the beginning to the midpoint of," should be inserted between the words, "is," and "the."

(10) On page 64570, second column, § 168.80(c)(1), line 6, a comma should be inserted between the words, "institution," and "or."

(11) On page 64570, second column, § 168.80(c)(2), line 3, a comma should be inserted between the words, "Grant," and "College."

(12) On page 64570, second column, § 168.81(b)(2)(ii), line 1, the letter "a," in the word, "any," should be capitalized.

FOR FURTHER INFORMATION CONTACT:

Mr. John R. Proffitt, Director, Division of Eligibility and Agency Evaluation, Bureau of Higher and Continuing Education, Office of Education, HEW, Washington, D.C. 20202, telephone 202-245-9873.

Dated: February 3, 1978.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Determination of Certain Bald Eagle Populations as Endangered or Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rulemaking.

SUMMARY: The Service issues a rulemaking which deletes the subspecific name *Haliaeetus leucoccephalus leucocephalus* (southern bald eagle) from the List of Endangered and Threatened Wildlife and Plants. Instead, the entire species *Haliaeetus leucocephalus* (bald eagle) will be listed as Endan-

gered throughout the 48 conterminous States of the United States, except in Washington, Oregon, Minnesota, Wisconsin, and Michigan, where it will be listed as Threatened. Until now, the Endangered Species Act of 1973 has applied only to the subspecies *Haliaeetus leucocephalus leucocephalus*. This rulemaking will extend the protective provisions of the Endangered Species Act of 1973 to all bald eagles in the 48 conterminous States, and clarify the listed status of this species.

EFFECTIVE DATE: The amendments will become effective on March 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director-Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4646.

SUPPLEMENTARY INFORMATION:

BACKGROUND

The bald eagle (*Haliaeetus leucocephalus*) has an overall range encompassing Canada, Alaska, and the 48 conterminous States of the United States. Two subspecies have been named: *H. l. alascanus*, the northern bald eagle, and *H. l. leucocephalus*, the southern bald eagle. The latter was listed as Endangered in the FEDERAL REGISTER of March 11, 1967. In the List of Endangered and Threatened Wildlife published in the FEDERAL REGISTER of July 14, 1977, the known distribution of the southern bald eagle is given as the United States south of 40° North Latitude. This line was arbitrarily selected for purposes of convenience to separate the two subspecies of bald eagles. When the southern bald eagle was listed as Endangered in 1967, the northern subspecies was not listed, primarily because the Alaskan population of that subspecies was not considered Endangered. At that time, it was not legally possible to list only a portion of a subspecies. Additionally, at that time there was no Threatened category.

In the FEDERAL REGISTER of July 12, 1976 (41 FR 28525-28527) the Service proposed to delete the name *Haliaeetus leucocephalus leucocephalus* from the List of Endangered and Threatened Wildlife. Instead, it was proposed to list the entire species *Haliaeetus leucocephalus* as Endangered throughout the conterminous 48 States of the United States, except in Washington, Oregon, Minnesota, Wisconsin, and Michigan, where the species would be listed as Threatened.

A number of problems had resulted from listing only the southern bald eagle. In the first place, there is no morphological or geographical basis for distinguishing the two named sub-

species. Although Alaska eagles average larger than Florida eagles, there is a gradual cline between the two extremes all across North America, with no clear breaking point. Moreover, there is considerable movement of eagles of both subspecies into each other's breeding range during nonbreeding periods. Southern bald eagles may wander northward as far as Canada during the late summer. Northern bald eagles migrate southward in large numbers for the winter. With respect to the species as a whole, the bald eagle probably has a larger regularly inhabited range than any other species now listed or being considered for listing. Over this vast range, status varies widely, with populations reportedly abundant in some areas and nearly extirpated in others. In certain parts of the northern half of the 48 conterminous States, bald eagle populations are in worse condition than within certain areas south of 40°N. In the upper Great Lakes region, and in the northwest, breeding populations seem to be doing relatively well, but these populations are small in absolute numbers. Large aggregations of bald eagles cross the Canadian border to spend the winter in the 48 conterminous States, especially the upper Mississippi and Missouri Valleys. These eagles are indistinguishable from those in populations that nest in the lower 48 States.

Considering the fact that the southern bald eagle already has been listed as Endangered, it would seem reasonable to extend Endangered status to populations in the northern part of the 48 conterminous States that are in comparable or worse condition. A Service survey in 1974 located 150 active bald eagle nests in Florida, 56 in the Chesapeake Bay region, and 26 in all other parts of the country south of 40°N. The survey also showed the presence of 33 active nests in Maine, but this population had the lowest successful reproduction ratio in the nation. In California, which on January 13, 1976, requested Endangered status for all of its bald eagles, there were 16 active nests north of 40°N. In 1974. In all other northern States, where the Endangered classification will apply, a total of 26 active nests was located in 1974.

The situation in the Northwest and upper Great Lakes region contrasts sharply with that in the remainder of the northern States. In 1974, Oregon had 63 active nests, and a 1975 survey indicated a total of 103 active nests in Washington. This population has a good ratio of successful reproduction, and, unlike that of Florida, is not isolated and actually is continuous with much larger populations extending through Canada to Alaska. The States of Minnesota, Wisconsin, and Michigan had a total of 318 active nests in

1974. Again, reproduction is good, and the population is continuous with others in Canada.

Considering the above, it has been decided to extend Endangered status to the bald eagle throughout the 48 conterminous States, except in Washington, Oregon, Minnesota, Wisconsin, and Michigan, where the species will be listed as Threatened. It is recognized that the populations in these five States do not meet the criteria for Endangered, as defined in Section 3(4) of the Act, and thus warrant less restrictive regulations than the other eagle populations in the 48 conterminous States.

SUMMARY OF CONTENTS

In response to the proposed rulemaking of July 12, 1976, letters of support were received from United States Senators Mike Gravel of Alaska, Floyd K. Haskell of Colorado, Gary Hart of Colorado, and Strom Thurmond of South Carolina; and from Representatives William M. Brodhead of Michigan, James P. Johnson of Colorado, and Patricia Schroeder of Colorado. Approximately 70 private citizens also wrote to express general approval of the proposal. Two other persons stated specifically that they would prefer to see the Endangered classification apply throughout the 48 conterminous States.

The United States Forest Service concurred with the proposal and supplied substantial data on bald eagles in National Forests. Of particular relevance is the following comment: "With respect to populations on the National Forests of Oregon, Washington, Minnesota, Wisconsin, Michigan, Montana, and Idaho, breeding success appears to be stable with only minor year-to-year fluctuations. However, our data reveals no cause for optimism, the nesting success rate is marginal and not improving, there are substantial threats to the habitat and poaching continues. There is little basis to refute classification as threatened."

The Governments of the following States sent written statements of concurrence with the proposal of July 12, 1976: Alabama, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Illinois, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Nevada, New Hampshire, New York, North Carolina, Ohio, Oklahoma, South Carolina, Virginia, Washington, West Virginia, and Wisconsin. Several of those States supplied data relative to their eagle populations. The Wyoming Department of Agriculture suggested that disease might be a factor threatening the eagle, but provided no further details. The California Bald Eagle Working Team, a group composed of State, Federal, and private representatives, supported the propos-

al and provided considerable data. The Oconto County Soil and Water Conservation District supporting listing of the eagle as Threatened in Wisconsin.

The Governments of the States of Colorado, Nebraska, and New Mexico expressed concern that by the new listing arrangement eagles might come under different, possibly improper, classifications as they moved from one State or country to another, especially with regard to wintering populations. The Service has considered this matter, but thinks that few practical difficulties are involved, and that the present rulemaking offers the simplest alternative in dealing with listing measures for the bald eagle.

The Idaho Department of Fish and Game objected to the proposal, suggesting that the Service wished to extent the listed status of the bald eagle only for administrative purposes, and not because the species actually was Endangered or Threatened. It is true that the proposal was made to eliminate administrative difficulties, but these difficulties came about because the biological status of the eagle was not properly covered by the original 1967 listing. The Service considers that all populations to be listed by the present rulemaking fully warrant classification because of biological factors.

The Governor of Minnesota opposed the classification of the bald eagle as Threatened in the State, stating that the species would not become Endangered within the foreseeable future. The Service agrees that the eagle population of Minnesota is doing well relative to most in the country, but considers that the absolute number of eagles in the State is small and cannot in itself assure the future of the species.

The Montana Department of Fish and Game opposed listing of the bald eagle, noting that its down or so nests were doing very well, and that large group of eagles entered the State during the winter. Montana also suggested that the Service wished to list northern eagles simply for administrative expediency, and not because the eagles actually are Endangered. Such is not the case; the rulemaking will facilitate administration because it will more accurately reflect the biological situation.

The Oregon Department of Fish and Wildlife objected to the proposal and stated that the Oregon bald eagle was not Threatened. Although the species is doing better in Oregon than in most States, it does not appear to be so abundant that it can be excluded from this classification.

The Governor of Utah expressed concern that the proposed measures might interfere with conservation programs dealing with wintering eagles. In fact, however, permits for scientific purposes or for the enhancement of

propagation or survival will be available in accordance with 50 CFR 17.22.

A number of parties involved in the lumber industry provided comments. The Clark Fork Logging Co. of Montana suggested that the bald eagle was not Endangered in its area, and called for an Environmental Impact Statement on the proposal. This question has been considered and dealt with by the environmental assessment prepared in conjunction with the rulemaking. The Edward Hines Lumber Co. and the Kallispel Pole & Timber Co. said that logging should not be listed as a factor threatening the bald eagle. The Service has information showing that in some cases logging has been harmful to eagles, but the proposal did not mean to imply that all logging is detrimental. The Federal Timber Purchasers Association questioned the need for a rulemaking, and also provided comments on the matter of Critical Habitat for the species, but Critical Habitat is not being considered at this time. The Simpson Lumber Co. indicated that the eagle was not Threatened in Washington. The Timber and Wood Products Group of Boise Cascade commented on financial implications of the proposal.

The Environmental Defense Fund opposed the proposal, stating that the bald eagle should be listed as Endangered throughout its entire range. The Act was interpreted to mean that if a portion of a subspecies (in this case *H. l. alascanus*) is designated as Endangered, the entire subspecies must be designated Endangered. The Service does not consider this interpretation to be valid.

The National Audubon Society, the American Ornithologists' Union, and the Smithsonian Institution expressed general approval of the proposal, but stated that it would be more appropriate to extend Endangered status to bald eagles in Oregon, and the southern parts of Minnesota, Wisconsin, and Michigan. The Service appreciates this suggestion, but maintains that in this case the designated State boundaries seemed most appropriate.

The National Wildlife Federation expressed the same concerns as the Audubon Society, and requested assurance that bald eagles designated as Threatened would receive essentially similar protection as those designated Endangered. The Service can give this assurance (see "Effect of the Rulemaking" below). The Wilderness Society also requested that stringent regulations apply to Threatened bald eagles.

LISTING CRITERIA

Section 4(a) of the Endangered Species Act of 1973 (16 U.S.C. 1533(a)) states that the Secretary of the Interior or the Secretary of Commerce may

determine a species to be Endangered or Threatened because of any of five factors. These factors, and their application to bald eagles in the 48 conterminous States of the United States, are as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The breeding range of the bald eagle has been considerably reduced in recent years, partly through widespread loss of suitable habitat. Human activities, such as logging, housing developments, and recreation have directly destroyed many nesting sites and have made others unattractive to the birds. In the northern part of the 48 conterminous States there were three major regions for bald eagle nesting: (1) New England and eastern New York; (2) the Great Lakes region from western New York to Minnesota; and (3) the Pacific Northwest from San Francisco Bay to Puget Sound. Some nesting also was found in the Plains and Mountain States. In recent years losses in habitat and range have been especially severe in the Northeast. Substantial nesting groups have been practically eliminated on Long Island, in the Adirondacks, and in most of New England, with a relatively small number of pairs holding out in Maine. In much of the Great Lakes region there also have been considerable declines. The formerly large population in Ohio, Indiana, the Lower Peninsula of Michigan, northern Illinois, and southern Wisconsin, has been greatly reduced. Substantial numbers now survive only in the northern parts of Minnesota, Wisconsin, and Michigan. In the Northwest there also appears to have been a decline in the population. The bald eagle once was a common breeder in the vicinities of San Francisco and Portland, but disappeared from these areas long ago. In other northern States the breeding range also has declined, with the population having been eliminated in Iowa and Nebraska and reduced elsewhere.

2. *Overutilization for commercial, sporting, scientific, or educational purposes.* Shooting continues to be the leading cause of direct mortality in adult and immature bald eagles, accounting for about 40 to 50 percent of birds picked up by field personnel.

3. *Disease or predation.* Not applicable.

4. *The inadequacy of existing regulatory mechanisms.* The bald eagle already is protected throughout the United States by the Bald and Golden Eagles Protection Act (16 U.S.C. 668-668d), the Migratory Bird Treaty Act (16 U.S.C. 703-711), and regulations issued thereunder. The protective provisions of section 7 of the Endangered Species Act of 1973, however, have not previously applied to populations of bald eagles that are found in the

northern part of the 48 conterminous States.

5. *Other natural or manmade factors affecting its continued existence.* Organochlorine pollutants are still contributing to reproductive failure in some nesting areas, especially in the Northeast. Only a single nesting pair of eagles remains in New York, where once the species was common, and this pair failed to produce offspring in 1974. The 33 pairs in Maine produced 14 young in 1974 for a success ratio of only 0.38 young per active territory. This was the lowest of any of the major populations in the country. The number of eagles nesting near the shore of Lake Superior also has been reduced because of this factor.

EFFECTS OF THE RULEMAKING

Bald eagles are already protected by the Bald and Golden Eagles Protection Act, the Migratory Bird Treaty Act, and certain regulations issued thereunder (16 U.S.C. 668-668d, 703-711; 50 CFR 10.13, 21.2, 21.22, Part 22). These provisions basically prohibit the taking, possession, sale, purchase, barter, transportation, exportation, and importation of bald eagles (16 U.S.C. 668, 703). Limited exceptions are available for taking, possession, or transportation under scientific, exhibition, or Indian religious use permits and for taking under depredation control and banding or marking permits (16 U.S.C. 668a; 50 CFR 21.22, 22.21-22.23).

The prohibitions and exceptions made applicable to endangered bald eagles by this listing, principally 16 U.S.C. 1538-1539 and 50 CFR 17.21-17.22, must be read together with the prohibitions and exceptions established by the Eagle and Migratory Bird Treaty Acts. As provided in a special rule, 50 CFR 17.41(a), the same is also true for the prohibitions and exceptions established herein for the threatened bald eagles. Such provisions are set forth principally in 50 CFR 17.31-17.32 which apply to threatened species most of the restrictions and exemptions applicable to endangered species.

INTERAGENCY COOPERATION

Section 7 of the Act states:

The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of

habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

Although no Critical Habitat now is being determined for the bald eagle, the other provisions of section 7 will apply to the populations covered by this rulemaking. The Service does intend to designate Critical Habitat for the bald eagle as soon as substantial data have been compiled. In this regard, persons with pertinent information are invited to send the same to the Director.

NATIONAL ENVIRONMENTAL POLICY ACT

An environmental assessment has been prepared and is on file in the Service's Office of Endangered Species in Washington, D.C. The assessment is the basis for a decision that the determinations of this rulemaking are not major Federal actions which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

The primary author of this rulemaking is Ronald M. Nowak, Office of Endangered Species (202-343-7814).

REGULATIONS PROMULGATION

Accordingly, Part 17 of Chapter I of Title 50 of the U.S. Code of Federal Regulations is amended as follows:

1. By deleting the southern bald eagle (*Haliaeetus leucocephalus*) from the List of Endangered and Threatened Wildlife in § 17.11.

2. By adding alphabetically the following populations of the bald eagle to the list in § 17.11 under "Birds," as indicated below:

§ 17.11 Endangered and threatened wildlife.

Species		Range					
Common name	Scientific name	Population	Known distribution	Portion endangered	Status	When listed	Special rules
Eagle, bald.....	<i>Haliaeetus leucocephalus</i> .	U.S.A. (48 conterminous States other than Washington, Oregon, Minnesota, Wisconsin, and Michigan).	U.S.A. (48 conterminous States other than Washington, Oregon, Minnesota, Wisconsin, and Michigan).	Entire.....	E.....	1, 34	NA.
Do.....	<i>Haliaeetus leucocephalus</i> .	U.S.A. (Washington, Oregon, Minnesota, Wisconsin, and Michigan).	U.S.A. (Washington, Oregon, Minnesota, Wisconsin, and Michigan).	do.....	T.....	1, 34	17.41(a).

3. By deleting the notation "Reserved" from § 17.41 and inserting the following:

§ 17.41 Special rules—birds.

(a) Bald eagles (*Haliaeetus leucocephalus*) found in Washington, Oregon, Minnesota, Wisconsin, and Michigan.

(1) *Applicable provisions.* The provi-

sions of §§ 17.31 and 17.32 shall apply to bald eagles specified in paragraph (a) of this section to the extent such provisions are consistent with the Bald and Golden Eagles Protection Act (16 U.S.C. 668-668d), the Migratory Bird Treaty Act (16 U.S.C. 703-711), and the regulations issued thereunder.

NOTE.—The Service has determined that

this document does not contain a major action requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: December 14, 1977.

LYNN A. GREENWALT,
Director, Fish and
Wildlife Service.

[FR Doc. 78-3899 Filed 2-13-78; 8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-34]

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[9 CFR Part 94]

MILK AND MILK PRODUCTS

Importation

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Withdrawal of proposal.

SUMMARY: This notice withdraws a proposal to provide for the importation of certain milk and milk products from countries infected with rinderpest or foot-and-mouth disease. This action results from the fact that certain information provided in the proposal was inaccurate and further study of the matter is required.

EFFECTIVE DATE: February 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. Blakey Deal, USDA, APHIS, VS, Federal Building, Room 824, Hyattsville, Md. 20782, 301-436-8379.

SUPPLEMENTARY INFORMATION: The proposed rulemaking published in the FEDERAL REGISTER, January 13, 1978 (43 FR 1962-1963), stated that certain experimental studies conducted at the Plum Island Animal Disease Center which provided a basis for the proposal included both rinderpest and foot-and-mouth disease viruses. However, it has since been determined by the Department that the research referred to was confined to the virus of foot-and-mouth disease only. Therefore, the proposal is withdrawn.

Done at Washington, D.C., this 10th day of February 1978.

J. K. ATWELL,
Acting Deputy Administrator,
Veterinary Services.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[10 CFR Part 430]

ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Proposed Rulemaking Regarding Test Procedures for Conventional Ranges, Conventional Cooking Tops, Conventional Ovens, Microwave Ovens, and Microwave/Conventional Ranges; Corrections

AGENCY: Department of Energy.

ACTION: Proposed rule; corrections.

SUMMARY: This document corrects errors made in the proposed rulemaking regarding test procedures for conventional ranges, conventional cooking tops, conventional ovens, microwave ovens, and microwave/conventional ranges in FR Doc. 77-36942 appearing at pages 65576 and following of the December 30, 1977 FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

James A. Smith, Department of Energy (Office of Conservation and Solar Applications), Old Post Office Building, Room 307, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461; 202-566-4635.

Jim Merna, Department of Energy (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461 202-566-9833.

Michael T. Skinner, Department of Energy (Office of the General Counsel), 12th and Pennsylvania Avenue NW., Room 7148, Washington, D.C. 20461, 202-566-9750.

SUPPLEMENTARY INFORMATION: The references to the American National Standards Institute (ANSI) standard "ANS-Z21.1b-1976" in the first and second columns of page 65577 and the third column of page 65581 of the December 30, 1977 FEDERAL REGISTER were incorrect. In each case the ANSI standard should have been cited as "ANS-Z21.1-1974 (as amended by ANS-Z21.1a-1974 and ANS-Z21.1b-1976)."

A number of provisions of Appendix I contained in the proposed regulation, pages 65583 and following, were incorrectly stated and are corrected below. In all other respects the proposed rulemaking remains as published on December 30, 1977.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; Department of Energy Organization Act, Pub. L. 95-91; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, the proposed regulation regarding test procedures for conventional ranges, conventional cooking tops, conventional ovens, microwave ovens, and microwave/conventional ranges published in 42 FR 65576 et seq. (December 30, 1977) is corrected as set forth below.

Issued in Washington, D.C., February 8, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

Sections 2.7.3, 3.3.4, 3.3.9, 4.1.1.2, 4.1.2.1.2, and 4.1.2.6 are corrected to read as follows:

APPENDIX I—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF CONVENTIONAL RANGES, CONVENTIONAL COOKING TOPS, CONVENTIONAL OVENS, MICROWAVE OVENS, AND MICROWAVE/CONVENTIONAL RANGES

2.7.3 Test block temperature. Maintain the initial temperature of the test blocks, T_b , within $\pm 4^\circ$ F of the ambient room air temperature as specified in 2.5.

3.3.4 Record the conventional oven test measurements T_a , E_a , T_b , E_b , T_c , E_c , T_d , E_d , and E_{10} .

3.3.9 Record the gas consumption, P_c , and the elapsed time, L_c , that any continuously burning pilot lights of a conventional cooking top are under test.

4.1.1.2 Conventional gas oven test energy consumption. For a conventional gas oven, calculate the gas test energy consumption, E_{10} , with the aid of the figure in 5 of this Appendix, expressed in Btu's and corresponding to T_b and defined as:

$$E_{10} = (F_{AB} \times H) \times \left[\left(\frac{T_{10} - T_{AB}}{T_{10} - T_{AB}} \right) \times (E_{CD} - F_{AB}) \times H \right]$$

where

H = either H_a or H_b , the heating value of the gas used in the test as specified in 2.2.2.2

and 2.2.2.3, expressed in Btu's per standard cubic foot.

$$T_{AB} = \frac{T_A + T_B}{2}$$

$$T_{CD} = \frac{T_C + T_D}{2}$$

$$F_{AB} = \frac{F_A + F_B}{2}$$

$$E_{CD} = \frac{E_C + E_D}{2}, \text{ where}$$

T_0 = 234 F above the initial block temperature.

T_a = block temperature at the end of the last "ON" period of the conventional oven before the test block reaches T_b .

E_a = volume of gas consumed in standard cubic feet at the end of the last "ON" period before the test block reaches T_b .

T_b = block temperature at the beginning of the "ON" period following the measurement of T_a .

E_b = volume of gas consumed in standard cubic feet of gas at the beginning of the "ON" period following the measurement of T_a .

T_c = block temperature at the end of the "ON" period which starts with T_b .

E_c = volume of gas consumed in standard cubic feet of gas at the end of the "ON" period which starts with T_b .

T_d = block temperature at the beginning of the "ON" period which follows the measurement of T_c .

E_d = volume of gas consumed in standard cubic feet of gas at the beginning of the "ON" period which follows the measurement of T_c .

4.1.2.1.2 Annual secondary cooking energy for gas ovens. Calculate the annual secondary energy consumption for cooking, E_{10} , expressed in kilowatt-hours and defined as:

$$E_{10} = \frac{E_{10}}{W_1 \times C_p \times T} \times \frac{O_0}{C_p \times T}, \text{ where}$$

E_{10} = electrical test energy consumption according to 3.2.1 or as calculated in 4.1.1.3.

O_0 = 47.09 kWh's, annual useful cooking energy output.

W_1 , C_p , and T are as defined in 4.1.2.1.1.

4.1.2.6 Total annual energy consumption of multiple conventional ovens. If the basic model of the conventional range, microwave/conventional range, or conventional oven includes more than one conventional oven, calculate the total annual energy consumption for all of the conventional ovens in the basic model, E_{10} , expressed in kilowatt-hours per year for electrical energy and in Btu's per year for gas energy, with the following equation:

PROPOSED RULES

$E_{10} = E_{ACO} + E_{ASO} + E_{TPO} + E_{SC} + E_{SS} + E_{CL}$, where gas and electrical energy are summed separately and where,

$$E_{ACO} = \frac{1}{n} \sum_{i=1}^n (E_{CO})_i$$

average annual primary energy consumption for cooking, where

n = number of conventional ovens in the basic model.

E_{CO} = annual primary energy consumption for cooking as determined in 4.1.2.1.1.

$$E_{ASO} = \frac{1}{n} \sum_{i=1}^n (E_{SO})_i$$

average annual secondary energy consumption for cooking, where

n = number of conventional ovens in the basic model.

E_{SO} = annual secondary energy consumption for cooking as determined in 4.1.2.1.2.

$$E_{TPO} = \sum_{i=1}^n (E_{FO})_i$$

total annual energy consumption, of any pilot lights, where

E_{FO} = annual energy consumption of any continuously burning pilot lights determined according to 4.1.2.2.

E_{SC} , E_{SS} , and E_{CL} are defined in 4.1.2.3.1, 4.1.2.3.2, and 4.1.2.4 respectively.

[FR Doc. 78-3965 Filed 2-13-78; 8:45 am]

[6355-01]

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1306]

UNVENTED GAS-FIRED SPACE HEATERS

Proposal To Ban

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to ban unvented gas-fired space heaters because such heaters permit combustion products, including carbon monoxide, to be discharged into the living space, and may result in possible carbon monoxide poisoning and/or asphyxiation.

DATES: (1) Written comments on the proposal must be received by the Commission by March 31, 1978.

(2) There will be an opportunity for interested persons to orally present data, views or arguments on March 6, 1978 at 10 a.m., in the Commission

hearing room. Those wishing to make oral presentations should notify the Office of the Secretary, 202-634-7700, by February 27, 1978. A summary or copy of testimony is to be submitted to the Office of the Secretary by March 1, 1978.

(3) The proposed regulation would become effective as to unvented gas-fired space heaters initially introduced into commerce 30 days after publication of any final banning rule.

(4) The time during which the Commission must either publish a final rule or withdraw this proposal is extended to July 17, 1978.

ADDRESSES: Written comments should be submitted to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. All material which the Commission has that is relevant to this proceeding, including any comments that may be received regarding this proposal, may be seen in, and copies obtained from, the Office of the Secretary, Consumer Product Safety Commission, 3rd Floor, 1111 18th Street NW., Washington, D.C. Oral presentations will be conducted in the Commission's 3rd floor hearing room.

FOR FURTHER INFORMATION CONTACT:

George Anikis, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6453.

Persons wishing to make oral presentations should contact: Richard Danca, Office of the Secretary, 202-634-7700.

BACKGROUND

For several years, the Commission has been examining and evaluating hazards associated with vented and unvented gas-fired heaters. By letter filed January 15, 1974, the Missouri Public Interest Research Group petitioned the Commission (CP 74-10) to initiate proceedings under the Consumer Product Safety Act (CPSA) to develop mandatory safety standards and labeling requirements for space heaters. The Commission examined the possible hazards associated with several different kinds of space heaters, including space heaters fueled by wood, kerosene, and gas, and those powered by electricity. After reviewing information then available to it, the Commission preliminarily concluded that only gas-fired space heaters presented unreasonable risks of injury to the public from such hazards as carbon monoxide poisoning and/or asphyxiation, contact burns, and fabric ignition. Therefore, on September 5, 1975 (40 FR 41172), the Commission issued a partial denial of petition CP 74-10 as to space heaters fueled by energy sources other than gas.

PROPOSED RULES

At that time, the Commission directed the staff to develop technical information on gas-fired space heaters for possible development of a proposed mandatory safety standard for these products. Concurrently, the Commission staff monitored the development of voluntary standards for vented gas-fired space heaters and wall furnaces by the American National Standards Institute (ANSI Z21.11.2, A21.44, and Z21.49). At a public briefing of the Commission on May 19, 1977, the staff advised the Commission that during this period, the voluntary standards for vented gas-fired heaters had been significantly improved; provisions for the safe ignition of vented heaters, reduction of surface temperatures, prevention of fabric ignition, and minimization of asphyxiation hazards, have been and are continuing to be substantially upgraded. Additionally, the Commission noted that conformance by manufacturers to the industry's voluntary standards and certification programs for vented gas-fired space heaters is high because industry certification of gas appliances to be installed in residences is widely prescribed by various state and local building codes and safety regulations. The Commission subsequently concluded that a mandatory regulation did not appear to be necessary to address any risks of injury that might be associated with vented gas-fired space heaters. A Notice of Decision to this effect was published September 14, 1977 (42 FR 46072). The Commission staff continues to monitor these voluntary efforts in order to advise the Commission on further safety developments in these voluntary standards.

The differentiating safety factor between vented and unvented gas-fired space heaters is that vented heaters provide a specific means for the removal of combustion products from the living space, whereas unvented gas-fired space heaters must depend upon the ventilation supplied to that space. Although unvented gas-fired space heaters should be operated in a space where there is sufficient ventilation, the generation of excessive levels of carbon monoxide by unvented gas-fired space heaters may occur from incomplete combustion resulting from insufficient air supply, faulty or poorly adjusted burner equipment, or other combinations of conditions.

Carbon monoxide produced by a vented gas heater will ordinarily pose a minimal threat of carbon monoxide poisoning because the combustion gases will be drafted from the living space through the flue opening. However, unvented gas-fired space heaters discharge the carbon monoxide and other combustion products directly into the atmosphere of the surrounding or adjacent living space. Carbon monoxide introduced into such a living

space by an unvented gas heater can accumulate to a hazardous concentration because the heater design inherently does not provide for venting of the combustion products to the building exterior.

The commission has previously examined the hazard of carbon monoxide poisoning from products not necessarily designed to discharge combustion products directly into the living space. On January 26, 1977 (42 FR 4882), the Commission denied petition CP 76-14 which requested the development of a safety standard to include, among other requirements, a device to shut off gas furnaces that may release CO because of malfunction. The Commission stated that "while the consequences of exposure to high levels of CO from gas furnaces are severe and occur with a frequency that is not negligible, the principal causes of dangerously high concentrations of CO from furnaces do not appear to be correctable through the issuance of a mandatory safety standard."

As stated in the Notice of Decision of September 14, 1977 (42 FR 46072), on gas-fired space heaters, the Commission publishes this proposal to ban unvented gas-fired space heaters under section 8 of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2057), because the Commission believes that the public can be protected from the hazards of carbon monoxide poisoning and/or asphyxiation associated with unvented gas-fired space heaters only by removing these products from the marketplace.

MEDICAL CONSEQUENCES OF CARBON MONOXIDE POISONING

Carbon monoxide (CO) entering the human respiratory system combines reversibly with blood hemoglobin (Hb) to form carboxyhemoglobin (COHb). This reaction displaces oxygen in the blood and may lead to anoxia (reduction of oxygen in body tissues below physiologic levels) and death if the reaction is not reversed. Asphyxia brought about by CO is caused by the affinity of hemoglobin for this gas, which is 200 times as great as its affinity for oxygen; therefore, low levels of CO in the atmosphere may still result in high levels of carboxyhemoglobin in the blood. The general physiological effects of increasing atmospheric concentrations of carbon monoxide are presented in the following table:

Percent CO in atmosphere	Parts per million	Response
0.005	50	Threshold limit value, no apparent toxic symptoms.
0.01	100	No poisoning symptoms for long periods of time. Allowable for several hours.

Percent CO in atmosphere	Parts per million	Response
0.02	200	Possible headache, mild frontal in 2-3 hr.
0.04	400	Frontal headache and nausea after 1-2 hr.
0.08	800	Headache, dizziness and nausea in 45 min; collapse and possible unconsciousness in 2 hr.
0.16	1,600	Headache, dizziness, nausea in 20 min; collapse, unconsciousness, possible death in 2 hr.
0.32	3,200	Headache and dizziness in 5-10 min; unconsciousness and possible death in 10-15 min.
0.64	6,400	Headache and dizziness in 1-2 min; unconsciousness and possible death in 10-15 min.
1.28	12,800	Immediate effect, unconsciousness and danger of death in 1-3 min.

SOURCE: Industrial Toxicology, 3rd ed. Alice Hamilton, M.D. and Harriet L. Hardy, M.D. Publishing Sciences Group, 1974.

A CO concentration as little as 1/100 of the normal (21 percent) oxygen content of air may be fatal within an hour. This concentration of 0.21 percent (2,100 ppm) CO lies between the values of 0.16 percent and 0.32 percent CO reflected in the table above. Chronic CO poisoning is essentially a series of mild acute exposures and may pose a threat to the central nervous system and myocardium, the muscular substance of the heart. These tissues are very sensitive to oxygen deprivation and can show symptoms of hypoxia (deficiency in amount of oxygen reaching body tissues) either promptly after acute intoxication, or progressively after multiple exposures to carbon monoxide.

NATURE OF THE RISK OF INJURY

In assessing the nature and degree of the risk of injury associated with unvented gas-fired space heaters, the Commission was assisted by the studies referenced in the bibliography below. This literature is available for review at the Office of the Secretary. The risks of injury associated with unvented gas-fired space heaters are threefold:

- (1) Poisoning caused by increased levels of carbon monoxide in the living space;
- (2) Asphyxiation resulting from anoxia effected by fuel combustion which reduces the oxygen level in the surrounding living space;
- (3) The combination of (1) and (2) above.

Unvented gas-fired space heaters derive their combustion air from the

space being heated and discharge the products of this combustion directly into this same space. The principle effluent products of combustion for any hydrocarbon fuel, whether solid, liquid, or gas, are carbon dioxide (CO₂), water vapor (H₂O), and a small concentration of carbon monoxide (CO). None of these products pose a threat at the concentrations given off under normal operating conditions. However, maladjustment of the burner, such as can occur by the linting of burner primary air passages, will result in the introduction of higher concentrations of CO into the living space. Additionally, the depletion of room oxygen resulting from combustion may effect a dangerous increase in CO evolution from a well adjusted burner, though the reduced oxygen level within the room may pose no threat in itself. The standard composition of air at sea level consists of 21 percent by volume oxygen (O₂). Carbon monoxide evolution in an oxygen deficient atmosphere of 19 percent O₂ can amount to 10 to 20 times the concentration produced in a normal atmosphere (21 percent O₂) with a well adjusted burner.

This latter phenomenon is of particular concern because the ventilation pattern in a room can change with the simple closing of a door, or a change in the outside wind pattern or speed. The human senses may not detect such a subtle change which can produce a dangerous reduction in the room air exchange rate.

DEGREE OF RISK OF INJURY

Data on unvented gas-fired space heater-related injuries and deaths occurring in the United States have been compiled using the best data bases currently available. The hazard patterns associated with unvented gas-fired space heaters have been identified as burns resulting from contact with heater exteriors and clothing ignition, and carbon monoxide poisoning and/or asphyxiation. This proposed ban addresses only the risk of injury associated with CO poisoning and/or asphyxiation.

The Commission's data sources for product-related injuries stem from the National Electronic Injury Surveillance System (NEISS) of 119 hospital emergency rooms and the coding scheme developed for NEISS. NEISS does not have a product code for unvented gas-fired space heaters specifically; therefore, the Commission staff tabulated data from the following four codes that could include unvented gas-fired space heaters:

- 0325 Heating Stoves, Space Heaters, Gas, LP.
- 0350 Heaters, Room, Gas, Floor type.
- 0352 Heaters, Wall, Gas.
- 0353 Space Heaters, Gas not otherwise specified.

Using these product codes, it is not possible to determine the proportion of the NEISS estimated injuries associated only with unvented gas-fired space heaters. Ninety-four percent of all gas-fired space heater-related injuries contained in NEISS are recorded as burns or other epidermal injuries. Fatalities associated with unvented gas-fired space heaters which may have resulted from CO poisoning and/or asphyxiation may not be taken to an emergency room and, therefore, would not be represented in NEISS.

In a review of the in-depth investigations and death certificates, all NEISS product codes which conceivably could contain any cases concerning the unvented gas-fired appliances defined in the proposed ban were reviewed.

Of 111 unvented gas-fired space heater investigations received between April 1968 and December 1977, six cases involving carbon monoxide poisoning were identified; 3 such cases resulted in asphyxiation and death.

The Commission's computerized Death Certificate file reflects 504 deaths during the period from January 1973 through January 1978 in which it could be ascertained that a gas-fired space heater was involved; 256 of these deaths resulted from carbon monoxide poisoning and/or asphyxiation. In 65 of these deaths the gas-fired space heater was identified as unvented. A percentage of the remaining deaths also resulted from unvented gas-fired space heaters; however, because of the limited information provided by these death certificates, the exact number of deaths resulting from unvented gas-fired space heaters cannot be determined. Therefore, the 65 carbon monoxide poisoning/asphyxiation deaths positively linked to unvented gas-fired space heaters must be considered as a minimum value.

The Death Certificate Project is designed to include death certificates from 54 health jurisdictions which include the 50 states, as well as New York City, the District of Columbia, Puerto Rico, and the Virgin Islands.

Data collected through the Commission's computerized Death Certificate project are a minimum and are not indicative of the true total of product-related deaths for the following reasons:

- (1) Not all Death Certificates identify the products and, therefore, are not included in the true count.
- (2) There are gaps in the data base in prior years for certain health jurisdictions due to non-participation.
- (3) There are also those health jurisdictions which delay submitting reports which often reduces the true number of Death Certificates obtained for any recent time period.

The Commission reviewed data on gas-fired space heaters from the National Fire Prevention and Control Administration. No data relevant to injuries/deaths from carbon monoxide

poisonings and/or asphyxiation related to gas space heaters were found.

Although the magnitude of the injury and death problem associated with unvented gas-fired space heaters cannot be precisely determined from the available data, the potential for such injuries or deaths, particularly those arising from carbon monoxide poisoning and/or asphyxiation, is substantial because such heaters discharge their combustion products directly into the living space.

DESCRIPTION OF THE PROPOSED BAN

Proposed Part 1306 declares that unvented gas-fired space heaters, as defined in §1306.3, are banned hazardous products under section 8 of the CPSA. The proposed ban applies to products that are customarily produced or distributed for sale to or for the personal use, consumption or enjoyment of consumers in or around a household or residence, a school, in recreation or otherwise and that are initially introduced into commerce 30 days after the effective date of the ban. For purposes of this Part 1306, "initially introduced into commerce" means physically shipped from the domestic manufacturer's facilities to a distributor, retailer, or consumer. A product manufactured outside the United States is initially introduced into commerce when it is first brought within a U.S. port of entry.

For the purposes of this proposal, an unvented gas-fired space heater in an unvented, self-contained, free-standing or recessed, gas-burning appliance which furnishes warm air to the surrounding living space by gravity convection, fan circulation or radiation directly from the heater and without duct connections. The heater discharges carbon dioxide and water vapor, and any carbon monoxide in the combustion products directly into the heated space. Although kitchen ranges and ovens may fit this product description, they are not included within this definition because their function is not to provide room heat, but to serve as a source of localized heat for food preparation.

Within the scope of this definition, unvented gas-fired space heaters include unvented circulators; radiant heaters; and wall heaters, unvented closed front; as defined in the following paragraphs:

(1) "Unvented Circulator." A room heater designed to convert the energy in the fuel to convected and radiant heat by direct mixing of air to be heated with the combustion products and excess air inside the jacket. Unvented circulators have an external jacket surrounding the burner and may be equipped with radiants with the jacket open in front of the radiants.

(2) "Radiant Heaters." An open-front unvented room heater designed

PROPOSED RULES

primarily to convert the energy in the fuel to radiant heat by means of refractory radiants or similar radiating materials. A radiant heater has no external jacket.

(3) "Wall Heater, Unvented Closed Front." An unvented circulator having a closed front for insertion in or attachment to a wall or partition.

The following unvented heaters are exempt from the proposed ban for the reasons set forth below: Gas logs, coal baskets, fireplace inserts, (categorized as decorative gas appliances for purposes of this rule); portable catalytic camp heaters; portable camp heaters other than catalytic; and infrared heaters.

(1) "Decorative gas appliances" are exempt. These are gas logs, coal baskets, and fireplace inserts. Although such items could possibly serve as substitutes for the banned hazardous products, they are exempt from the ban for the following reasons:

(a) An investigation of available data bases for product-related injuries/deaths revealed no data specific to these products. Although the magnitude of the injury/death problem associated with these decorative gas appliances cannot be accurately determined, it appears to the Commission that consumer use of these appliances is primarily limited to decorative use in vented fireplaces where the risk of CO poisoning and/or asphyxiation is minimal.

(b) The American National Standards Institute (ANSI), a voluntary standards organization, has published a certification standard and labeling requirement for decorative gas appliances for installation in vented fireplaces (ANSI-Z21.60). The large majority of such decorative gas appliances are labeled for use in a vented fireplace.

(c) The likelihood of substantial substitution from unvented gas-fired space heaters to decorative gas-fired appliances, the most predominant of which are gas logs, appears small. This judgment is based upon the steadily declining market for these products over the past several years—approximately 20,000 units were produced in 1976 compared to approximately 42,000 units in 1974, and the familiarity of potential users with vented gas-fired space heaters as a likely substitute for the banned product.

(2) Catalytic camp heaters and non-catalytic camp heaters are exempt.

(a) Catalytic camp heaters are open faced, unvented heating appliances which utilize a catalyst in the combustion process. The Commission has recently denied a petition, (CP 75-16, 42 FR 32565, June 27, 1977), to develop a safety standard addressing the hazards of CO poisoning, anoxia and hot surfaces associated with catalytic heaters because, among other consid-

erations, the voluntary standard developed by the ANSI Z21.62 Subcommittee, and recently adopted by ANSI, appears to reasonably address the possible hazards which may be associated with catalytic heaters. Therefore, the Commission sees no need to include these in the proposed ban.

(b) Non-catalytic camp heaters are unvented portable heating devices of other than the catalytic type for use with liquefied petroleum gases. Because the safety problems inherent to these heaters are essentially the same as the safety problems encountered with catalytic heaters, the ANSI Z21.63 Subcommittee has developed and presented to ANSI for adoption a proposed voluntary standard for non-catalytic camp heaters which closely parallels the catalytic heater standard. Therefore, the Commission proposes to exclude non-catalytic camp heaters from this ban.

(3) Infrared heaters are exempt because they are generally used for heating outdoor spaces or non-residential, non-recreational indoor spaces; such applications do not relate to situations involving the CO poisoning and/or asphyxiation hazard of unvented gas-fired space heaters normally encountered in consumer environments.

The Commission welcomes public comment on the inclusions and exemptions defined within the scope of the proposed ban.

ECONOMIC CONSIDERATIONS

Shipments of unvented gas-fired space heaters have declined dramatically during the past decade—to a level of 180,000 units in 1976—a 70 percent decline since 1967. The number of manufacturers has similarly decreased through this same decade and currently numbers three. Sales of unvented gas-fired space heaters accounted for less than one third of the total sales volume for all three manufacturers. These three firms produce a variety of gas-fired equipment, including vented heaters which are expected to be the major substitute product for unvented gas-fired space heaters. Therefore, a ban on unvented gas-fired space heaters would not cause serious adverse financial impact on the three manufacturers. Assuming these manufacturers are producing vented gas heaters at less than full capacity, substitution to these vented products would entail little or no additional cost to the manufacturers. Conversion to other products could, however, be time consuming and costly to the industry. Approximately \$1.5 million in machinery and tooling for unvented heaters could be lost.

A ban on unvented gas-fired space heaters would affect distributors only if additional product lines could not be substituted. This is not expected; for the large majority of retailers who

carry unvented gas-fired space heaters, these heaters are not a significant share of their business.

Primary users of unvented gas-fired space heaters tend to be elderly and low-income persons in southern areas of the United States where climatic conditions make central heating systems uneconomical for many households. Unvented gas-fired space heaters are selected primarily because of their low initial purchase price.

Historically, unvented gas space heaters have been one of the most inexpensive non-central heating appliances on the market. However, recent voluntary industry safety standards (Z21.11.2) have increased the price of unvented models as to minimize the competitive advantage they have over vented heaters in terms of purchase price. Current gas space heater retail prices for both vented and unvented models are approximately \$140 for medium-sized, 25,000 BTU heaters. Unvented gas-fired space heaters have a thermal efficiency approaching 100 percent since none of the heat energy generated is exhausted through a flue opening. Conversely, vented gas-fired space heaters have standard efficiency ratings of 65-70 percent and are, therefore, more expensive to operate. A switch from a 25,000 BTU unvented heater to an equivalent vented heater could have a projected increased operating cost of \$25-36 annually, at current fuel prices. Therefore, the adverse impacts to the consumer resulting from a ban on unvented gas-fired space heaters include modest increases in price of initial purchase, increases in cost of operation, or decreases in residential heating capabilities in cases in which substitution or replacement of heating equipment is unaffordable.

It is estimated that the most likely substitutes for unvented gas-fired space heaters are:

- (1) Vented gas-fired space heaters—45 percent of a substitute market
- (2) Electric portable heaters—25 percent of a substitute market
- (3) Other vented non-central heaters—20 percent of a substitute market
- (4) Other heater systems—10 percent of a substitute market

The cost of residential non-central space heating has been rising rapidly over the past few years. Factors in this increase in cost include rising fuel costs and stricter industry safety standards on new equipment. A ban on unvented gas-fired space heaters would contribute to the rising costs of non-central space heat by forcing consumers to switch to heaters which have higher life-cycle heating costs. The accumulated impacts of rising heating costs and a ban on unvented gas-fired space heaters are expected to place the life-cycle costs of non-central space heat beyond the expectation and perhaps ability to pay for some consumers.

The Gas Appliance Manufacturers Association (GAMA), through a survey of affiliated firms, has estimated that approximately 90 production workers could suffer unemployment because of a ban on unvented gas-fired space heaters. However, the three manufacturing firms are located in urban areas where long-term unemployment resulting from a ban would not be expected to be significant.

A ban on unvented gas-fired space heaters is expected to reduce the risks of carbon monoxide poisoning and/or asphyxiation since most substitute products appear to offer significantly reduced risks of CO poisoning and/or asphyxiation.

The Commission staff economic analysis and all supporting materials are available from the Office of the Secretary.

ENVIRONMENTAL CONSIDERATIONS

An environmental assessment of the alternatives associated with a possible ban on unvented gas-fired space heaters addressing the potential effects of actions on consumer safety, energy use, technological innovation, and the physical environment, has been conducted. The assessment concludes that a ban on unvented gas-fired space heaters would not have a significant adverse effect on the quality of the human environment and that an Environmental Impact Statement is not required.

It is estimated that the annual increase in energy consumption brought about by substitution to less efficient forms of space heat than unvented gas-fired heaters would be approximately 5.4 trillion British Thermal Units (BTU). The cumulative increase in energy usage projected by a ban on unvented gas-fired space heaters would reach a maximum value of approximately 0.1085 quads, or 1.085 x 10¹⁴ BTU, of energy by 1997. This figure may be compared to a Federal Energy Administration (FEA) projected total energy consumption of 98.9 quads for the United States in 1985. The maximum cumulative increase in energy consumption projected by a ban on unvented gas-fired space heaters is not large and may not occur with changes in demand for this product or changes in technology.

EFFECTIVE DATE

The proposed effective date of the ban is 30 days after publication of a final rule.

The Commission proposes that this rule will apply to the defined products initially introduced into commerce on or after the effective date of the ban. For purposes of this Part 1306, the term "initially introduced into commerce" means when the product is physically shipped or delivered from the domestic manufacturer's facilities

to a wholesaler, distributor, retailer or consumer. A product manufactured outside the United States is initially introduced into commerce when it is first brought within a U.S. port of entry. The sale of products that had been shipped or delivered to a wholesaler, distributor, retailer or consumer prior to the effective date of the ban would not be prohibited.

The prevailing practice of the gas-fired space heater industry is that manufacturers obtain order commitments from distributors during the first calendar quarter, and manufacture and deliver during the second and third calendar quarters. A proposed ban on the initial introduction into commerce, published near the end of the first calendar quarter, may discourage the acceptance of 1978 orders, as well as the future manufacture of unvented gas-fired heaters, and may serve to mitigate possible disruption of the industry. A ban that applies to initial introduction into commerce would permit depletion of existing inventories at the wholesale and retail levels; however, due to the seasonal nature of the demand for these products, it is anticipated that inventory levels would be low at the end of the first calendar quarter.

By the next consumer buying season in the fall of 1978, it is expected that the product proposed to be banned would be prohibited from initial introduction into commerce. A ban sufficiently in advance of the fall buying season will permit consumers time to consider the relative merits of various substitute heating products.

SECTION 8 FINDINGS

Section 8 of the CPSA requires that, in order to propose a ban, the Commission must find that a consumer product is being or will be distributed in commerce, that it presents an unreasonable risk of injury and that no feasible consumer product safety standard under the CPSA would adequately protect the public from that unreasonable risk.

A. *Unreasonable risk of injury.* The term "unreasonable risk of injury" is not defined in the CPSA; however, the term "risk of injury" is defined at section 3(a)(3) to mean a risk of death, personal injury, or serious or frequent illness. The legislative history of the CPSA (H.R. Rep. No. 92-1153, 92d Cong., 2d Sess., 1972 p. 33) states that determination of unreasonable hazard (risks) involves balancing the probability that risk will result in harm and the gravity of such harm against the effect of regulation on the product's utility, cost, and availability to the consumer.

The matter of distribution in commerce of unvented gas-fired space heaters is discussed under economic considerations. Although shipments of

this product decline 70 percent in the decade since 1967, it is noted that 180,000 units were shipped in 1976. Further, although it is expected that this decline would continue, it is anticipated that the manufacture and distribution of these products would also continue without Commission action to ban.

The hazard of CO is illustrated in the chart included in the discussion of medical consequences of carbon monoxide poisoning and indicates that a CO concentration of as little as 1/100 of the normal (21 percent) oxygen content, may be fatal within an hour. The discussion under nature of the risk of injury and degree of the risk of injury show that maladjustment of the burners of unvented heaters or shifts in room ventilation patterns may act to introduce high concentrations of CO into the living space. Further, a review of death certificates shows that 65 deaths were positively associated with unvented gas-fired space heaters, and were attributed to CO poisoning and/or asphyxiation.

The Commission considered the effect on the cost, utility, and availability of unvented, gas-fired space heaters, and except for the exemptions noted in section 1306.4 of the rule, it is noted that this rule would eliminate the product from the market. However, the Commission also noted, as is discussed under Economic Considerations, that there are substitute heating appliances available to the public.

After considering the nature and degree of this hazard, of which people are generally unaware, and the ready availability of substitutes, the Commission concludes that the risk of injury clearly outweighs the effect of the proposed rule on the cost, utility, and availability of the product, and finds that unvented gas-fired space heaters present an unreasonable risk of injury to the public.

B. *Feasibility of a standard.* The Commission has considered all the information currently available to it concerning the risk of injury associated with unvented gas-fired space heaters because of CO poisoning and/or asphyxiation. It appears to the Commission that this hazard is inherent in the product, because unvented heaters are designed to discharge all combustion products, including carbon monoxide directly into the living space and because carbon monoxide may be emitted whether or not the heater is functioning properly. Additionally, because CO is a colorless, odorless gas, people are generally unaware of CO emissions, particularly if it is emitted during sleeping hours. Therefore, the Commission concludes that unvented gas-fired space heaters present an unreasonable risk of injury.

In seeking to reduce or eliminate this unreasonable risk, the Commis-

sion reviewed the provisions of existing voluntary standards. Additionally, the Commission considered the technical and economic practicability of a mandatory safety standard to reduce or eliminate the unreasonable risk.

Voluntary standards. Two American National Standards Institute (ANSI) voluntary standards were reviewed and evaluated:

- (1) ANSI Z21.60 Decorative Gas Appliances for Installation in Vented Fireplaces.
- (2) ANSI Z21.11.2 Gas-Fired Room Heaters, Vol. II, Unvented Room Heaters.

Both the ANSI Z21.60 and ANSI Z21.11.2 standard contain provisions for:

- (a) Combustion tests and specific limits on production of CO under normal oxygen supply conditions and conditions of reduced oxygen supply.
- (b) Labels warning of ventilation requirements.
- (c) Printed instructions regarding combustion and ventilation requirements to be included with the sale of the individual appliance.

The ANSI Z21.11.2 standard also addresses optional oxygen depletion systems (ODS). If heaters covered by this standard have ODS, they are required to shut off the heater at oxygen levels of not less than 18%.

Additionally, a proposed revision of the ANSI Z21.11.2 standard pending ANSI approval, contains provisions for a temperature limiting device which will function to shut down the heater if the room temperature exceeds 100° F. This is intended to minimize further the potential build up of carbon monoxide in the room due to reduced availability of combustion air. It is predicated upon the premise that, as

combustion air availability decreases due to inadequate air infiltration into the room in which the heater is operating, room temperature will increase.

No provisions within either of these standards directly address the hazard of carbon monoxide in the living space. Consequently, it does not appear to the Commission that any voluntary standard exists which could address the hazard of CO poisoning associated with unvented gas-fired space heaters.

Engineering feasibility of a mandatory standard. The possibility of requiring CO detection and gas cut-off devices in a standard has been considered. The Commission has no knowledge of any unvented gas-fired space heaters with carbon monoxide detection and gas-ignition cut-off devices currently being manufactured. Two National Bureau of Standards (NBS) reports, prepared for the Commission, reviewed and evaluated six possible types of sensors.

Additionally, a review of the technology of such devices was performed (Economic Impact of Ban on Unvented Gas-Fired Space Heaters—Preliminary Report, A. T. Kearney, Inc., September 1977). These reports and associated materials are available at the Office of the Secretary. The reports conclude that the majority of the current technologies available are technically impractical for application to unvented gas-fired space heaters due to short useful life, unacceptable levels of CO detection, unreliable performance, or excessive cost. Table 1 of the Kearney report, summarizes the various findings.

TECHNOLOGIES APPLICABLE TO A PRODUCT SAFETY STANDARD FOR UNVENTED GAS-FIRED SPACE HEATERS

Device	Cost per unit	Technology	Remarks
Oxygen Depletion Sensor (ODS).	NA	Automatic shutoff at given level of O ₂ depletion.	Not readily available in U.S. Not reliable for natural gas.
Electro-chemical CO detector	\$900	CO detection by electrochemical oxidation.	Performs well. CO from 9-60 p/m can be detected with a CO sensitivity of 1 p/m or better.
Solid-state catalytic detector	NA	Utilizes modern circuit and semiconductor technology.	3 to 5 year service life. CO detection at 150 p/m.
Semiconductor absorption-type detector	\$43-\$100	do	Unstable and unreliable in range below 100 p/m CO. Requires electricity. Further developmental study and evaluation necessary.
Solid state electrolytic cell gas sensor.	\$1,000	do	Accurate, long lasting.
Nondiffuse infrared gas analyzer (NDIR).	\$3,000	Utilizes infrared radiation produced from heater elements.	Accurate, reliable.

Sources: National Bureau of Standards, "Evaluation of Protective Device on Catalytic Heaters" (March 17, 1977). National Bureau of Standards, "Detection Devices for Combustion Products Applicable to Unvented Space Heaters" (July, 1977). Interviews with Kang B. Lee, National Bureau of Standards.

Economic feasibility of a standard. The maximum feasible price increase for unvented gas-fired space heaters that would be economically practicable was estimated by calculating the price consumers might be willing to spend initially to obtain the high efficiency of an unvented gas-fired space heater rather than turning to substitute products. The maximum economically feasible increase is approximately \$110 a unit. This figure reflects, among other things, such factors as the product's purchase price, installation cost, thermal efficiency, and annual fuel costs.

A reliable carbon monoxide control device currently costs a minimum of \$900. The semi-conductor absorption type detector at its present state of development is less expensive, \$43-100, but subject to substantial error and is unreliable at CO concentrations below 100 ppm. It appears to the Commission, therefore, that current technology for adequately addressing the CO poisoning and/or asphyxiation hazard is economically unfeasible.

Lack of feasibility of a standard. The Commission concludes, based upon the information discussed in the foregoing sections under Feasibility of a Standard, that, at the present time, no feasible consumer product safety standard can make unvented gas-fired space heaters nonhazardous. Furthermore, given the current state of technology of CO detection and cut-off devices, it does not appear that a standard is economically practicable. Therefore, the Commission believes that no feasible consumer product safety standard under the CPSA can adequately protect the public from the hazard of CO poisoning and/or asphyxiation associated with this product.

EXTENSION OF TIME TO PUBLISH FINAL RULE

Section 9(a)(2) of the CPSA (15 U.S.C. 2058(a)(2)) requires the Commission to publish a notice of proposed rulemaking in the FEDERAL REGISTER and to provide interested persons with an opportunity to participate in the rulemaking through submission of written data, views, or arguments. In addition to these written comments, interested persons must also be given an opportunity for the oral presentation of data, views, or arguments.

Section 9(a)(1) of the CPSA provides that within 60 days after publication of a proposed rule, the Commission shall promulgate a final rule or withdraw the proposal. The Commission may extend the 60-day period for good cause and must publish its reasons for extension in the FEDERAL REGISTER.

In the case of invented gas-fired space heaters, the Commission is particularly interested in obtaining views on the possible effects of the ban from persons who use these products or are familiar with their use. To afford an ample opportunity for obtaining such views, the Commission has decided that, in addition to holding a public meeting in Washington, D.C., on March 6, 1978, the comment period in which the public is invited to submit written comments on the proposed ban, is to be longer than the 30-day period usually provided. Written comments may be submitted for 45 days until March 31, 1978. In addition, the Commission has directed its staff to determine whether a public meeting, with an opportunity for oral presentations, in the south or southwest United States, where use of the product is most prevalent, would encourage participation of persons who use unvented gas-fired space heaters. Announcement of such a public meeting if it is held, will be published in the FEDERAL REGISTER.

It is anticipated that these additional steps to obtain greater public participation in these rulemaking proceedings, and the need for analysis and evaluation of the public's oral and written views, would require more than the 60-day period provided in section 9(a) of the CPSA between publication of a proposal and publication of any final rule. Therefore the Commission has decided that this 60-day time period should be extended. In order to conserve the resources that would be needed to issue such an extension of time during the comment and evaluation period, the Commission announces in this proposal that good cause is found to extend for 90 days, until July 17, 1978, the time in which the Commission must either issue a final rule concerning unvented gas-fired space heaters or withdraw the proposal to ban. This period may be further extended for good cause and announced in the FEDERAL REGISTER.

CONCLUSION AND PROPOSAL

Based on the foregoing information, the Commission finds that unvented gas-fired space heaters are being and will be distributed in commerce, that they present an unreasonable risk of injury to the public, and that no feasible consumer product safety standard under the CPSA can adequately protect the public from that risk of injury. Therefore, the Commission proposes to declare that these products are banned hazardous products.

Accordingly, pursuant to provisions of the CPSA (section 8, 9, 86 Stat. 1215-17, 15 U.S.C. 2057, 2058) the Commission proposes that Title 16, Chapter II, be amended by adding to Subchapter B, the following new Part 1306.

PART 1306—BAN OF UNVENTED GAS-FIRED SPACE HEATERS

- Sec.
- 1306.1 Scope and application.
- 1306.2 Purpose.
- 1306.3 Definitions.
- 1306.4 Exemptions.
- 1306.5 Banned hazardous products.

AUTHORITY: Sections 8, 9; 96 Stat. 1215-1217, as amended, 90 Stat. 508; 15 U.S.C. 2057, 2058.

§ 1306.1 Scope and application.

(a) The Consumer Product Safety Commission declares that unvented gas-fired space heaters are banned hazardous products. This ban applies to the products listed in § 1306.3(c) (1) through (3), which are customarily produced or distributed for sale to or for the use, consumption, or enjoyment of consumers in or around a household, a school, in recreation or otherwise.

(b) The Commission has found that: (1) the unvented gas-fired space heaters described herein are being or will be distributed in commerce; (2) they present an unreasonable risk of injury because they are designed to discharge the combustion products, including carbon monoxide (CO) directly into the living space and people are generally unaware of the danger; and (3) no feasible consumer product safety standard under the CPSA can adequately protect the public from the hazard of CO poisoning. The proposed ban applies to all unvented heaters described in this Part which are initially introduced into commerce on or after the effective date of the ban.

§ 1306.2 Purpose.

This rule declares that unvented gas-fired space heaters are banned hazardous products because they present an unreasonable risk of injury due to: (a) carbon monoxide poisoning, (b) asphyxiation resulting from anoxia (reduction of oxygen in body tissues below physiologic levels) caused by fuel combustion that reduces existing oxygen levels in the living space, and (c) the combination of (a) and (b).

§ 1306.3 Definitions.

(a) The definitions in section 3 of the Consumer Product Safety Act (15 U.S.C. 2052) apply to this Part 1306.

(b) "Initially introduced into commerce" means that the product is physically shipped or delivered from the domestic manufacturer's facilities to a distributor, retailer or consumer. A product manufactured outside the United States is initially introduced into commerce when it is first brought within a U.S. port of entry.

(c) "Unvented Gas-Fired Space Heaters" are unvented, self-contained, free-standing or recessed, gas-burning

appliances, such as those described in this subsection, which furnish warm air to the surrounding or adjacent living space by gravity convection, fan circulation or radiation directly from the heater and without duct connections, and which discharge combustion products such as carbon monoxide, carbon dioxide, and water vapor directly into the heated space. Not included in this definition are kitchen ranges and ovens since the function of such products is not to provide a source of room heat, but rather to provide a source of localized heat for food preparation. The term "unvented gas-fired space heater" includes but is not limited to:

(1) "Unvented Circulator." This product is a room heater designed to convert the energy in the fuel to convected and radiant heat by direct mixing of air to be heated with the combustion products and excess air inside the jacket. Unvented circulators have an external jacket surrounding the burner and may be equipped with radiants with the jacket open in front of the radiants.

(2) "Wall Heater, Unvented Closed Front." This product is an unvented circulator having a closed front for insertion in or attachment to a wall or partition.

(3) "Radiant Heater." This product is an open-front unvented room heater designed primarily to convert the energy in the fuel to radiant heat by means of refractory radiants or similar radiating materials. A radiant heater has no external jacket.

§ 1306.4 Exemptions.

The following categories of products are exempt from the ban:

(a) *Decorative gas appliances.* Such appliances, generally used for decorative purposes in vented fireplaces to simulate natural materials such as wood and coal, are "gas logs," "coal baskets," and "fireplace inserts."

(b) *Catalytic camp heaters.* An existing voluntary standard is expected to adequately address whatever risks may be present during use of this product.

(c) *Non-catalytic camp heaters.* A voluntary standard is expected to adequately address whatever hazards may be present when using the product.

(d) *Infrared heaters.* Such heaters are generally used for heating outdoor spaces or for indoor, non-consumer environments.

§ 1306.5 Banned hazardous products.

Any unvented gas-fired space heater, not specifically exempted in § 1306.4, that is produced or distributed for sale to or for the personal use, consumption, or enjoyment of consumers, in or

around a permanent or temporary household or residence, a school, in recreation, or otherwise, which is initially introduced into commerce 30 days after publication of any final banning rule, is a banned hazardous product. Section 9(c) of the CPSA (15 U.S.C. 2058(c)) requires the Commission, prior to issuing a consumer product safety rule to consider and make certain findings for inclusion in the rule. As discussed in the preamble to this proposed rule, information set forth in the Bibliography, which is available in the Office of the Secretary, has enabled the Commission to draw preliminary conclusions relative to these findings. To further help the Commission in this effort, the Commission is particularly interested in obtaining, either by written comment or by oral presentations, additional data, views, and arguments on the following matters:

- The degree and nature of the risk of injury the rule is designed to eliminate or reduce;
- The approximate number of consumer products, or types or classes thereof, subject to the rule;
- The need of the public for consumer products subject to such rule, and the probable effect of such a rule upon the utility, cost, or availability of such products to meet that need;
- Any means of achieving the objective of the rule while minimizing adverse effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety;
- The necessity of the rule to eliminate or reduce the unreasonable risk of injury associated with the consumer products subject to the rule;
- Whether the rule is in the public interest;
- The feasibility of a consumer product safety standard under the CPSA to protect the public adequately from the unreasonable risk of injury associated with the products which are the subject of this proposed ban;
- The potential environmental effects of the rule;
- Any adverse effects that this proposed ban will have on elderly and handicapped persons.

There will be an opportunity for interested persons to orally present data, views, or arguments on this proposed rule on March 6, 1978, at 10 a.m., in the Commission hearing room, 3rd floor, 1111 18th Street, NW., Washington, D.C. Those wishing to make oral presentations should notify the Office of the Secretary, 202-634-7700 by February 27, 1978. In addition, a summary or copy of the testimony, preferably in 5 copies, is to be submitted to the Office of the Secretary by March 1, 1978.

Interested persons are invited to submit written data, views, or arguments on any aspect of the proposed rule by March 31, 1978, preferably in 5 copies, addressed to the Secretary,

Consumer Product Safety Commission, Washington, D.C. 20207.

The official transcript of the public meeting to hear oral presentations of data, views, or arguments, any written comments that are received, and all other material which the Commission has that is relevant to this proceeding may be seen in, or copies obtained from the Office of the Secretary, 3d floor, 1111 18th Street NW., Washington, D.C. 20207.

Dated: February 8, 1978.

SHELDON D. BUTTS,
Assistant Secretary, Consumer
Product Safety Commission.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 182, 184]

[Docket No. 77N-0041]

STANNOUS CHLORIDE

Proposed Affirmation of GRAS Status as Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to affirm the generally recognized as safe (GRAS) status of stannous chloride as a direct human food ingredient. The safety of this ingredient has been evaluated pursuant to the comprehensive safety review being conducted by the agency. This proposal would list the ingredient as a direct food substance affirmed as GRAS.

DATES: Written comments by April 17, 1978.

ADDRESSES: Written comments to Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration is conducting a comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction. The Commissioner has issued several notices and proposed regulations, published in the *FEDERAL REGISTER* of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of stannous chloride has been evaluated. In accordance with the provisions of § 170.35 (formerly § 121.40, prior to recodification published in the *FEDERAL REGISTER* of March 15, 1977 (42 FR 14302)), the Commissioner proposes to affirm the GRAS status of this ingredient.

Stannous chloride is the chloride salt of tin metal, SnCl_2 . It is listed in § 182.3845 (formerly § 121.101(d)(2)), prior to recodification published in the *FEDERAL REGISTER* of March 15, 1977 (42 FR 14302)), as GRAS for use as a chemical preservative in foods at a level not to exceed 0.0015 percent calculated as tin, published in the *FEDERAL REGISTER* of November 20, 1959 (24 FR 9369), and subsequently recodified.

According to § 172.180 (formerly § 121.1213, prior to recodification published in the *FEDERAL REGISTER* of March 15, 1977 (42 FR 14302)), stannous chloride may be used for color retention in asparagus packed in glass, with lids lined with inert material, in an amount not to exceed 20 parts per million (ppm) calculated as tin, published in the *FEDERAL REGISTER* of January 4, 1968 (33 FR 73) and subsequently recodified. Also, stannous and stannic salts are regulated for use as components in the manufacture of food packaging materials consisting of glass, rubber, paper and paperboard. The amount of tin migrating to food from these regulated indirect uses is thought to be negligible.

Tin is widely distributed in the environment. It occurs in plants grown in areas known to have a high content of tin in the soil; however, fresh vegetables in the United States usually contain less than 1 ppm tin. In canned goods it was reported to range from 2.8 to 11.8 ppm. In fish for market, tin was reported to range from 0.1 ppm for flounder to 0.63 ppm for halibut. Nonetheless, analyses conducted in 1963 of a typical institutional diet for one person per day contained 3.8 mg of tin.

In sea water, tin was found at a level of approximately 3 ppb, but it was not found in the fresh water tested. Municipal waters were reported to contain tin in amounts ranging from 0.8 to 20 ppb. In air, levels of 0.003 to 0.3 microgram per cubic meter were found in 60 percent of the samples from 22 cities.

It has been claimed that most infants in the United States, and some adults in nonindustrialized countries, do not have in their tissues readily detectable levels of tin. However, the element is deposited rapidly in persons who reside in industrialized countries during the first decade of their lives, without apparent further accumulation. Moreover, in mammals, tin is accumulated selectively by many different tissues. In beef, the concentration in the mucous membrane of the tongue may reach as high as 18.65 mg per kg of fresh tissue. Typical concentrations of tin in normal human tissues in mg per kg of wet tissue are long bone, 0.80; liver, 0.60; rib bone and stomach, 0.50; heart, 0.22; and muscle, 0.11. The mean concentration in urine has been reported to be 0.011 mg per kg and in blood, 0.12 mg per kg. Tin has been reported to be nutritionally essential for the growth of rats; however, there is no direct evidence to support its nutritional essentiality for man.

A representative cross section of food manufacturers was surveyed to determine the specific foods in which stannous chloride was used and at what levels. Information from surveys

of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to stannous chloride. The total amount of stannous chloride used in food in 1970 was reported to be about 68,000 pounds, or about seven times the quantity used in 1960.

Stannous chloride has been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered: (1) Chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, 6) any reported carcinogenicity, teratogenicity, or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 155 abstracts on stannous chloride was reviewed and 58 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (hereinafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

The oral LD_{50} of stannous chloride for mice has been reported as 215 mg per kg, and 250 mg per kg. After oral intubation of 1,000 mg per kg, practically all animals exhibited preterminal signs within hours and were killed to prevent any postmortem influence on the pathological and histological findings. Autopsy revealed necrosis of the liver and spleen and thrombi in the hepatic portal veins.

The lethal dose of stannous chloride administered intramuscularly for 6 days was reported to be 40 to 60 mg per kg per day, or a total of 240 to 360 mg per kg, in the mouse, guinea pig, and rabbit. Death was accompanied by convulsions, dyspnea, and paralysis. Oral administration of about 200 mg per kg caused severe and occasionally fatal intestinal disorders in dogs.

In one long-term study involving 108 mice receiving 5 ppm in the drinking water from weaning to natural death, tin accumulated in the spleen, but no toxic effects were observed and the median life span was not affected.

In rats, 5 ppm of tin as stannous chloride in the drinking water over the lifespan of the animals did not affect the growth rates significantly or the serum cholesterol levels. The longevity of the females appeared to be reduced, but because of the experimental difficulties in studying longevity, this effect was not attributed to the small amount of stannous chloride ingested.

A series of experiments on mice showed no differences in weight gain in animals fed 1000 or 5000 ppm of tin as sodium chlorostannate in the drinking water or 5000 ppm of tin as stannous oleate in the diet over a period of a year.

DeGroot et al. have reported that anemia in rats resulting from feeding of tin salts

and a low dietary level of iron, may be due to inhibition of hematopoiesis, possibly by impairing intestinal absorption of iron. The no-effect level of tin salts in diets containing liberal amounts of iron was found to be 0.1 percent, equivalent to about 22 mg of tin per kg per day.

Daily intravenous injection of 28 mg of tin as "Stanoxy" for a week into each of two men in a metabolic study led to no unusual physiological effects. From 52 to 75 percent of the dose of tin was excreted in the urine.

A case was reported in 1963 of an infant with a complete agenesis of the right hand, born of a mother who had taken 3 taenifuge pills a day for 5 days during her early pregnancy. Each pill contained 60 mg of metallic tin and 60 mg of tin oxide. Also, a dose of 250 mg of pyridoxine was taken each day for 3 days during the same period. The authors speculated whether the pyridoxine might have complexed with the tin to form a teratogenic substance. No confirming report has been found.

Gastrointestinal disorders among 38 women were ascribed by public health officials to a fruit punch that contained 2,000 ppm of tin. The high tin content presumably resulted from improper storage in a 5-gallon milk can. The onset of illness was abrupt, beginning with a bloated feeling, followed by overwhelming nausea, stomach cramps, vomiting, and diarrhea. No fatalities occurred.

The few reported observations concerning the possible carcinogenicity of stannous chloride and elemental tin have been negative. Mice fed a diet containing 0.28 μg tin per g of food in the form of stannous chloride stabilized with ascorbic acid, showed no significant differences in the incidence of tumors as compared with the controls. Rats given 5 ppm tin as stannous chloride in their drinking water over their lifespan showed no carcinogenic signs. A lower incidence of malignant lymphoma, hepatoma, and pulmonary adenoma was noted in mice receiving 1,000 or 5,000 ppm tin as sodium chlorostannate in the drinking water or 5,000 ppm tin as stannous oleate in the diet for a year as compared with control mice. The subcutaneous implantation of tin foil failed to induce tumors in rats, in contrast to sarcomata produced by some other metals.

However, one experiment suggests caution; three malignant tumors were observed in 30 rats which were fed a diet containing 2 percent sodium chlorostannate and survived for a year or more. No neoplasms were observed in 27 rats which survived a year on the diet containing initially 1 percent, then 0.5 percent stannous 2-ethylhexoate. The authors regarded the three tumors as probably without significance in the light of the small number of animals involved and the complexity of studying the possible carcinogenic effect of ingested substances.

When injected into the yolk sacs of 4- and 8-day-old chick embryos, stannous chloride showed no teratogenic effect. This was in contrast to the injurious effects caused by salts of nine other elements included in this comprehensive study of 53 elements. Oral intubation of up to 50 mg of stannous chloride

"Stanoxy" or "Stannoxy" appears to be a generic term for various tin preparations which were used in medicine 40 to 50 years ago. A glycerin solution of stannous chloride known as "Stanoxy" was also used in cosmetics. The latter is probably the one used in this experiment.

ride per kg of body weight for 10 consecutive days (day 6 through day 15 of gestation) in pregnant mice and rats and for 5 consecutive days (day 6 through day 10 of gestation) in pregnant hamsters, showed no observable effect on nidation, maternal survival, fetal survival, and tissue abnormalities of the fetus.

Stannous fluoride is used widely in preventive dentistry to control dental caries. There are no reports of toxic effects after this local application.

All of the available safety information on stannous chloride has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

Feeding tests of stannous chloride on several species of animals, including observations on carcinogenicity and teratogenicity, at dosage levels significantly above those present in the daily diet, did not reveal evidence that this compound is harmful. Human experience gained after the accidental ingestion of large amounts of tin containing materials or experimental intravenous injection of such materials reinforces this conclusion.

It is the conclusion of the Select Committee that there is no evidence in the available information on stannous chloride that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future. Based upon his own evaluation of all available information on stannous chloride (including a report on mutagenic tests which was not available when the Select Committee formed its conclusion), the Commissioner concurs with this conclusion. The Commissioner has considered the study referred to by the Select Committee in which three malignant tumors were observed in 30 rats that were administered a diet containing 2 percent sodium chlorostannate. In this regard, the importance of selecting the appropriate chemical compound for testing should be noted and emphasized. For example, the chlorostannates (SnCl_4), in which tin has a valence of plus four) should be chemically different from the stannous compounds (SnCl_2 , in which tin has a valence of plus two). Consequently, the effects produced by sodium chlorostannate administration cannot properly be extrapolated to stannous chloride. This conclusion is supported by studies involving the use of stannous chloride which failed to produce any carcinogenic response in test animals. Therefore, The Commissioner concludes that no change in the current GRAS status of stannous chloride is justified.

The use of up to 20 ppm stannous chloride for color retention in asparagus packed in glass, with lids lined with an inert material, is not affected by this proposal and will continue to be regulated by 21 CFR 172.180 (for-

merly § 121.1213, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)).

Copies of the scientific literature review on stannous chloride, reports of teratogenic and mutagenic screening tests and the report of the Select Committee are available for review at the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Rd., Springfield, Va. 22161, as follows:

Title	Order No.	Price code	Price *
Stannous chloride (scientific literature review).	PB-221-232	A04	\$5.25
Stannous chloride (teratology tests).	PB-221-780	A03	4.50
Stannous chloride (mutagenic tests).	PB-245-461/AS	A06	6.50
Stannous chloride (select committee report).	PB-254-531/AS	A02	4.00

* Price subject to change.

This proposed action does not affect the present use of stannous chloride for pet or animal feed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Parts 182 and 184 be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.3845 [Deleted]

1. By deleting § 182.3845 *Stannous chloride*.

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. By adding a new § 184.1845 to read as follows:

§ 184.1845 Stannous chloride.

(a) Stannous chloride (SnCl_2 , CAS Reg. No. 7772-99-8) is the chloride salt of metallic tin. It is prepared by the direct action of chlorine on molten tin.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d Ed. (1972).¹

(c) The ingredient is used as an antioxidant as defined in § 170.3(o)(3) of this chapter.

¹ Copies may be obtained from: National Academy of Sciences, 2101 Constitution Avenue NW., Washington, D.C. 20037.

(d) The ingredient is used in foods in accordance with § 184.1(b)(1) of this chapter, at levels not to exceed good manufacturing practices. Current good manufacturing practice results in a maximum level, as served, of 0.0015 percent or less, calculated as tin, for all food categories.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of this ingredient in foods under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before April 17, 1978, file with the Hearing Clerk, Food and Drug Administration, Room 4065, 5600 Fishers Lane, Rockville, Md. 20857, written comments (preferably in quadruplicate) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: February 6, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[21CFR Part 1000]

[Docket No. 77N-0422]

IONIZING RADIATION THERAPY FOR BENIGN DISEASES

Notice of Intent to Develop Recommendations

AGENCY: Food and Drug Administration.

ACTION: Notice of Intent.

SUMMARY: The Commissioner of Food and Drugs is considering devel-

oping recommendations on the use of radiation for the treatment of benign diseases. The agency asks for further information before beginning such a program. Announcement is also made of completion and availability of a contract study on the subject.

DATE: Comments and data by June 14, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Melvyn R. Altman, Bureau of Radiological Health (HFX-460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration (FDA) may develop recommendations concerning the use of ionizing radiation therapy for benign diseases. The Food and Drug Administration, through the Bureau of Radiological Health and under the authority of the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602, 42 U.S.C. 263a et seq.), conducts and supports research, training, and operational activities to minimize unnecessary exposure of the public to electronic product radiation. This authority provides for development of recommendations concerning the use of radiation emitting devices, including those used in medical radiation therapy.

Although in many instances alternative therapy exists, ionizing radiation continues to be used by dermatologists as well as radiologists for the treatment of benign diseases such as acne, bursitis, and psoriasis. There is currently only incomplete knowledge on the extent to which ionizing radiation is used to treat benign conditions. The agency seeks further information on the extent of use, and the effectiveness, of radiation therapy in the treatment of benign diseases. In addition, the agency is interested in whether certain radiation therapy uses in benign conditions might be contraindicated in view of the availability of other equally effective, safer methods that would avoid unnecessary radiation exposure.

A study on the current use of ionizing radiation in treating benign diseases was recently conducted for FDA by a committee of the National Academy of Sciences. The committee, in its report to the Academy, concluded and recommended:

(a) Radiation therapy may be acceptable if other methods have not been effective and the consequences of a failure to further treat the condition are unacceptable.

(b) Children should be treated only in very exceptional cases.

(c) Irradiation of particularly radiosensitive organs should be avoided.

(d) Therapists should be adequately trained in radiation protection as well as radiation therapy.

(e) Meticulous radiation protection techniques should always be used.

(f) The least penetrating radiation possible should be used.

(g) Further studies are needed on dose determination and to followup previously exposed persons.

A copy of the full report "A Review of the Use of Ionizing Radiation for the Treatment of Benign Diseases" is available for public examination in the office of the Hearing Clerk, Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday. The full report, including appendices, can be purchased from the National Technical Information Service, Springfield, Va. 22161—Paper Copy Price Code No. A04 (\$5.25), Microfiche Price Code No. A01 (\$3.00), Document Purchase Code No. PB274 032/AS. Copies of the report without appendices, are available from the Bureau of Radiological Health (HFX-28), 5600 Fishers Lane, Rockville, Md. 20857.

The Commissioner of Food and Drugs will consult with the Medical Radiation Advisory Committee concerning any proposed future action and the comments received in response to this notice of intent. The Medical Radiation Advisory Committee advises and consults with the Bureau of Radiological Health in formulating policy and developing a coordinated program related to use of ionizing radiation in the healing arts.

Interested persons are invited to participate in the development of recommendations on the use of ionizing radiation for benign diseases by submitting written comments, views, and data on the subject. Communications should reference the docket number appearing in the heading of this document and should be sent to the Hearing Clerk at the above address before June 14, 1978. Comments received after this date may be considered, depending on the stage of development of any recommendations.

To assist the Commissioner in developing useful recommendations, the agency specifically invites the submission of scientific and technical data, as well as comments or suggestions supported by detailed rationale and justification, on the following questions:

1. What information exists on the effectiveness of radiation therapy in the treatment of specific benign conditions compared to alternative therapeutic modalities? To what extent does contemporary practice reflect this knowledge, i.e., is radiation therapy being used when nonradiation

treatment can accomplish the same results?

2. With regard to question 1, can the effectiveness of ionizing radiation treatment be balanced against the potential hazards so as to permit reasonable selection among various therapeutic modalities, medical as well as radiotherapeutic?

3. What are the risks associated with the application of ionizing radiation for treating benign diseases? To what extent can these risks be quantified and what are these risk values with respect to specific critical organs, such as the thyroid gland, bone marrow, skin, breast, etc.? Is age sensitivity a critical consideration?

4. Are there specific benign diseases, or clinical circumstances involving a benign disease, in which radiation therapy is the preferred or only reasonable choice of therapy? Are there circumstances in which it is clearly contraindicated?

5. What recommendations, if any, are needed concerning current practice in the use of radiation therapy in treating benign diseases?

6. What recommendations, if any, should be made concerning the training of individuals using radiation for the treatment of benign diseases?

Persons or organizations wishing further information made public on the development of any recommendations may write to the Bureau of Radiological Health (HFX-460), Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Dated: February 6, 1978.

SHERWIN GARDNER,
Acting Commissioner of
Food and Drugs.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

(Docket No. FI-3894)

CITY OF MAULDIN, GREENVILLE COUNTY, S.C.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Mauldin, Greenville County, S.C.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or

PROPOSED RULES

show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, City of Mauldin, S.C.

Send comments to: Ms. Virginia Forrester, Acting City Administrator or Mr. Frank Mitchell, P.O. Box 675, Mauldin, S.C. 29662.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Mauldin, Greenville County, S.C., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Gilder Creek	Just upstream Butler Rd.	821
	Just upstream Barrett St.	845

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	Approximately 100 ft upstream of Cox St. (Miller Rd.).	873
Gilder Creek tributary No. 1.	Just upstream Bethel Rd.	852
Gilder Creek tributary No. 2.	Approximately 400 ft upstream of Bethel Rd.	838
Gilder Creek tributary No. 3.	Capewood Court (extended).	825
Gilder Creek tributary No. 3A.	Just upstream Corn St.	834

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 27, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[24 CFR Part 1917]

[Docket No. FI-3895]

CITY OF MANCHESTER, COFFEE COUNTY, TENN.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Manchester, Coffee County, Tenn.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Manchester City Hall, 200 West Fort Street, Manchester, Tenn.

Send comments to: Hon. Clyde V. Myers, Mayor of Manchester, Manchester City Hall, 200 West Fort Street, Manchester, Tenn. 37355.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Manchester, Coffee County, Tenn. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Duck River	Downstream corporate limits.	999
	U.S. Highway 41	1,000
	Morton Dam	1,002
	(downstream).	
	Morton Dam (upstream)	1,010
	Upstream corporate limits.	1,013
Little Duck River	Downstream corporate limits.	975
	U.S. Highway 41	994
	State Route 53	995
	(Downstream).	
	State Route 53	998

	(downstream).	
	McKeller Dr.	1,025
	(upstream).	

PROPOSED RULES

the City of Denton, Denton County, Tex.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Municipal Building, 215 East McKinney Street, Denton, Tex.

Send comments to: Hon. Eleinor Hughes, Mayor of Denton, 215 East McKinney Street, Denton, Tex. 76201.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Denton, Tex., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Cooper Creek	Downstream corporate limits (Mayhill Rd.)	572
	U.S. Highway 380	583
	Fishtrap Rd.	588

[Docket No. FI-3897]

HARDIN COUNTY, TEX.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Hardin County, Tex.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or

show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Hardin County Courthouse, at the intersection of Highway 326 and 69, Kountze, Tex.

Send comments to: Honorable Clyde E. Smith, Jr., District Judge of Hardin County, Hardin County Courthouse, Kountze, Tex. 77625.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Hardin County, Tex., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, above mean sea level
Mill Creek.....	State Highway 105.....	38
	Dirt road.....	46
	Farm to market route 418.....	50

Source of flooding	Location	Elevation in feet, above mean sea level
Mill Creek tributary.....	Dirt road crossing G.C. & S.F. RR.....	45
Little Pine Island Bayou.....	Dirt road crossing Woodlake Dr. extended.....	47
	Woodlake Dr. extended.....	28
Coon Marsh gully.....	Dirt path crossing Pinewood Boulevard.....	29
	Pinewood Boulevard.....	28
	Pinewood Boulevard.....	31
Goleman gully.....	Pinewood Dr. extended.....	32
	Pinewood Dr. extended.....	29

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 27, 1977.

CITY OF WICHITA FALLS, WICHITA COUNTY, TEX.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Wichita Falls, Wichita County, Tex.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Planning Department, Wichita Falls, Tex.

Send comments to: Major J. C. Boyd, Jr., P.O. Box 1431, Wichita Falls, Tex.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 to toll free line

800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Wichita Falls, Wichita County, Tex., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Wichita River.....	Just downstream of Loop 11.....	950
	Approximately 1,000 feet upstream of Central Freeway.....	946
	Just downstream of Eastside Dr.....	946
Holiday Creek.....	Just upstream of downstream bridge.....	967
	Just upstream of Southwest Parkway.....	958
	Just upstream of Holiday Rd.....	950
Holiday Creek tributary A.....	Just upstream of South Access Rd. to Central Freeway.....	984
	Just upstream of Lucas Ave.....	959
	Just upstream of Perigo St.....	946
Holiday Creek tributary B.....	Just downstream of Harrison Rd.....	961
	Just upstream of East Access Rd. to South Freeway.....	955
	Just upstream of California St.....	947
Brenda Hursh Channel.....	Approximately 100 feet upstream of Norman St.....	966
	Approximately 100 feet downstream of Weeks St.....	955
McGrath Creek.....	Just upstream of McNeil Ave.....	970
	Just upstream of Kemp Blvd. (northbound).....	970

PROPOSED RULES

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
McGrath Creek.....	Just upstream of Weeks Park Lane.....	951
McGrath Creek tributary.....	Just upstream of Kell Blvd.....	996
	Just downstream of Maplewood Ave.....	972
Holiday Creek Old Channel.....	Approximately 200 feet upstream of Old Lake Rd.....	963
Lake Wichita tributary.....	Just upstream of Trinidad Dr.....	999
East Plum Creek.....	Approximately 200 feet downstream of Fisher St.....	947
Plum Creek.....	Just downstream of Nunn St.....	955
	Just upstream of Wrangler Dr.....	975

[Docket No. FI-3900]

COUNTY OF CAMPBELL, UNINCORPORATED AREAS, VA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Campbell County, Unincorporated Areas, Va.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the County Administrator, Walter J. Haberer Building, Courthouse Square, Rustburg, Va.

Send comments to: Mr. Donald Johnson, Campbell County Administrator, P.O. Box 100, Rustburg, Va. 24588.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Campbell County, Unincor-

porated Areas, Va. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
James River	Downstream county boundary	481
	Chessie System (upstream face)	492
	Norfolk & Western RR..	500
	Confluence with Opossum Creek.	505
	Upstream county boundary.	508
Archer Creek	Confluence with James River.	500

(Docket No. FI-3901)

THE TOWN OF CLINCHPORT, SCOTT COUNTY, VA.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.
ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Clinchport, Scott County, Va.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Clinchport Post Office, Clinchport, Va.

Send comments to: Hon. W. Ray Russel, Mayor of Clinchport, P.O. Box 44, Clinchport, Va. 24227.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Clinchport, Scott County, Va., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

PROPOSED RULES

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Clinch River.....	Downstream corporate limits.....	1,237
	Railroad bridge.....	1,238
	Confluence of Stock Creek.....	1,239

[Docket No. FI-3908]

CITY OF WINCHESTER, VA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Winchester, Va.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Rouss City Hall, Winchester, Va.

Send comments to: Mr. Wendell L. Sheldon, city manager of Winchester, Rouss City Hall, Winchester, Va. 22601.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Winchester, Va. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the pro-

PROPOSED RULES

gram regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

THE CITY OF BELLEVUE, KING COUNTY, WASH.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Bellevue, King County, Wash.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Bellevue City Hall, 111 116th Street SE., Bellevue, Wash.

Send comments to: Hon. Milford F. Vanik, Mayor of Bellevue, P.O. Box 1768, Bellevue, Wash. 98009.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Bellevue, King County, Wash., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

OKANOGAN COUNTY, WASH.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Okanogan County, Wash.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Okanogan County Courthouse, Okanogan, Wash.

Sent comments to: Mr. Russell Will, County Commissioner of Okanogan County, Okanogan County Courthouse, Okanogan, Wash. 98840.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Okanogan County, Wash., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

[Docket No. FI-3007]

MANITOWOC COUNTY, WIS.

Revision of Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Manitowoc County, Wis.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 42 FR 34620 on July 6, 1977, and in The Manitowoc Herald Times published on June 29, 1977, and June 30, 1977, and

PROPOSED RULES

hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at Manitowoc County Courthouse, 110 South Eighth, Manitowoc, Wis.

Sent comments to: Mr. Dale J. Bolle, County Board Chairman, Manitowoc County, County Courthouse, 110 South Eighth, Manitowoc, Wis. 54220. Attention: Mr. Gerry Kirchner, Director, Park and Planning Commission.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in Manitowoc County, Wis., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations are:

[24 CFR Part 1917]

[Docket No. FI-3912]

TOWN OF DOUGLAS, CONVERSE COUNTY, WYO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Douglas, Converse County, Wyo.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Town Hall, Douglas, Wyo.

Send comments to: Mr. William Galletly, Town Manager, town of Douglas, Town Hall, 130 South Third Street, Douglas, Wyo. 82633.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Douglas, Wyoming, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban

Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Miller Draw.....	Burlington Northern RR.	4,817

INCOME TAX

Refundings of Industrial Development Bonds;
 Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to refundings of industrial development bonds.

DATES: The public hearing will be held on March 15, 1978, beginning at 10 a.m. Outlines of oral comments must be delivered or mailed by March 9, 1978.

ADDRESSES: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, D.C. The outlines should be submitted to the Commissioner of Internal Revenue, Attn.: CC:LR:T (LR-70-77), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

George Bradley or Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 103 of the Internal Revenue Code of 1954. The proposed regulations appeared in the FEDERAL REGISTER for Tuesday, December 6, 1977 (42 FR 61613).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by March 9, 1978. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the Government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

ROBERT A. BLEY,
Director, Legislation and Regulations Division.

PROPOSED RULES

[4310-70]

DEPARTMENT OF THE INTERIOR

National Park Service

[36 CFR Part 7]

BIG THICKET NATIONAL PRESERVE, TEX.

Management and Use Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed Rule.

SUMMARY: The intended effect of this action is to supplement general National Park Service regulations in order to conform with the special requirements set by Congress in the enabling legislation for Big Thicket National Preserve and to provide for the protection of its natural resources and visitors. Without such regulations it would not be possible to protect the natural resources of the area and the public visiting the area, or to provide effective administration of the Preserve.

DATES: Comments on the regulations, including suggestions for revisions, will be accepted until March 16, 1978.

ADDRESS: Comments should be directed to: Superintendent, Big Thicket National Preserve, P.O. Box 7408, Beaumont, Tex. 77706.

FOR FURTHER INFORMATION CONTACT:

Thomas Lubbert, Superintendent, Big Thicket National Preserve; telephone 713-838-0271, extension 373.

SUPPLEMENTARY INFORMATION: On October 11, 1974, an Act passed by the Congress of the United States became law (Pub. L. 93-439) and the Big Thicket National Preserve (hereinafter referred to as the Preserve) was established. The Preserve is located in the eastern part of the State of Texas, approximately 90 miles northeast of Houston, with parts of the Preserve bordering the City of Beaumont. The Preserve consists of twelve units located in the counties of Tyler, Hardin, Jasper, Polk, Liberty, Jefferson, and Orange in the State of Texas. Within the law establishing the Preserve, Congress stated that the Preserve was established in order to assure the preservation, conservation and protection of the natural, scenic, and recreational values of the Big Thicket area and to provide for the enhancement and public enjoyment of the Preserve. The law also provides that the Secretary of the Interior shall administer the Preserve as a unit of the National Park System in a manner which will assure its natural and ecological integrity in perpetuity. The Preserve is made up of disjunct representative units and river corridors of the Big Thicket country of East Texas and is the first (along

with Big Cypress National Preserve, Florida) of the almost 300 units administered by the National Park Service to be designated as a "National Preserve." This new concept affords a multiplicity of uses while retaining many of the traditional concepts of National Park Service administration.

With regard to regulations, the primary impact of the national preserve concept is that certain consumptive resource uses, including hunting and trapping, are permitted in preserves. Such uses are normally not permitted in other park areas managed principally to preserve their natural values and general park regulations in 36 CFR Part 2 reflect this policy. For Big Thicket, therefore, it is necessary that special regulations provide certain exceptions to the general regulations, in order to comply with the legislation which established the Preserve.

The impacts of these regulations on hunting, fishing, trapping, off-road vehicle use, etc., were discussed and put forth for public comment during a series of public workshops (held in April 1976) in conjunction with the Preserve's Development/Visitor Use Plan. Public responses from these meetings, directives from Pub. L. 93-439, and planning by the Preserve staff resulted in a draft proposal of regulations for the Preserve.

In drawing up these regulations, environmental and socioeconomic impacts described in the Final Environmental Impact Statement were also taken into account. The only adverse socioeconomic impacts that could be foreseen from these regulations would be the elimination of grazing from the Preserve, through application of 36 CFR 5.16, and the closure of some of the smaller Preserve units to commercial trapping and/or hunting, pursuant to 36 CFR 2.32(b)(1). However, the positive impact on the environment would be of much greater beneficial value than the negative socioeconomic impact of eliminating grazing in the Preserve. The intent of Congress, in establishing the Preserve, was quite specific in that the natural, scenic, and recreational values of the Preserve be preserved, conserved, and protected in order to provide for the enhancement and public enjoyment of the Preserve. The continuation of grazing in the Preserve, whether by cattle, sheep, or hogs would not be in keeping with these directives. Such grazing can and has led to soil compaction, resulting in drainage interference and compacted trails; to selective taking of one type of vegetation over another, resulting in unnatural influence on the habitat; to outright destruction of vegetation and soil, such as "rooting" by hogs; and to an unnatural population of insect pests. Also, such animals are considered as exotic, or unnatural, species in a natural area.

On January 18, 1977, a meeting was held with the Texas Parks and Wildlife Department, in Austin, Tex., in order to discuss with the State of Texas the proposed hunting, trapping, and fishing regulations for the Preserve. Agreement was reached with the State on what type hunting would take place in the Preserve and on seasons for hunting, trapping, and fishing. The reasons for closing some of the smaller Preserve units and the river and bayou corridors are mainly that they are not large enough to support hunting activities. For visitor safety, as well, especially along the river corridor units, certain units are being closed to trapping and hunting. The only other closures to hunting will be if threatened or endangered species are found inhabiting a Preserve unit that is open to hunting. The areas that will be open to hunting and trapping comprise approximately 70% of the Preserve's total area (84,500± acres). Hunting will be for game animals, during prescribed State hunting seasons. During these seasons, rabbits and wild hogs may be hunted as well.

A prohibition on the possession of firearms at night has been included in these regulations in order to make it less likely that illegal hunting will take place. Since there are no developed campgrounds or other overnight facilities within the Preserve, overnight use will consist solely of backcountry camping in widely separated locations. If these campers, whose activities the National Park Service cannot readily monitor, were permitted to possess firearms in their camps, it would be a simple matter for them to engage in illegal nighttime hunting. Since the Preserve units are not large and hunting activities can readily be based outside them, this restriction on firearm possession should not interfere to a significant degree with the conduct of authorized hunting in the Preserve.

DRAFTING INFORMATION

The following persons participated in the writing of these regulations: Jack Bixby, Carl Fleming, Carl Christensen.

IMPACT ANALYSIS

The special regulations proposed for the Big Thicket National Preserve have been covered, in substance, in the Final Environmental Impact Statement on establishment of the Preserve and in a series of public meetings (held during April of 1976) on the development of, and a visitor use plan for, the Big Thicket National Preserve. The latter plan listed types of activities, such as hunting and trapping, their impact on the environment, and alternative uses. The special regulations proposed have taken into account substantive public comments

from these meetings, the directives set forth by Congress, and the Management policies of the National Park Service. The preparation of another Environmental Impact Statement for the rules and regulations of the Big Thicket National Preserve is not necessary and would be redundant.

Section 3 of the Act of August 25, 1916 (39 Stat. 535, as amended; 16 U.S.C. 3); the Act of October 11, 1974 (88 Stat. 1254); 245 DM-1 (42 FR 12931); National Park Service Order No. 77 (38 FR 7478); and Regional Director, Southwest Region, Order No. 5 (37 FR 7722).

NOTE.—The National Park Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: January 30, 1978.

DANIEL J. TOBIN, JR.,
Associate Director,
National Park Service.

In consideration of the foregoing, it is proposed to amend Part 7 of Title 36, Code of Federal Regulations, by the addition of a new § 7.85, as follows:

§ 7.85 Big Thicket National Preserve.

(a) *Hunting.* Except as otherwise provided in this section, hunting is permitted in accordance with § 2.32(b) of this chapter.

(1) Hunting is permitted only during open seasons, as defined for game animals or birds by the State of Texas. During other periods of the year, no hunting is permitted.

(2) During applicable open seasons, only the following may be hunted:

(i) Game animals, rabbits, and feral or wild hogs.

(ii) Game birds and migratory game birds.

(3) No dogs or calling devices shall be used for hunting game animals or fur-bearing animals.

(4) No deer stands or other structures for use in hunting or for other purposes shall be built.

(b) *Trapping.* Trapping, for fur-bearing animals only, is permitted in accordance with § 2.32(b) of this chapter.

(c) *Hunting and trapping permits.* In addition to applicable State Licenses or permits, a permit from the Superintendent is required for hunting or trapping on Preserve lands. Permits will be available, free of charge, at Preserve headquarters and can be obtained in person or by mail.

(d) *Firearms, traps, and other weapons.* Except as otherwise provided in this paragraph, § 2.11(a) of this chapter shall be applicable to Preserve lands.

(1) During open hunting or trapping seasons, the possession and use of firearms or other devices capable of destroying animal life is permitted in accordance with § 2.11(b) of this chapter.

(2) The possession of firearms or other weapons is prohibited at night, from one hour after sunset to one hour before sunrise.

(3) Any non-hunting discharge of a firearm is prohibited.

(e) *Camping.* Camping in, or other overnight occupancy of, trailers, motor homes, pickup campers, or other wheeled vehicles is prohibited.

(f) *Backcountry sanitation.* The following restrictions shall apply to all persons in backcountry areas, which are defined as all areas of the Preserve which are more than 500 yards from any unit boundary or road and more than one-half (½) mile from any developed Preserve facility, other than trail, and those areas of the Preserve which are within 25 feet of the banks of the Neches River.

(1) The possession of food or beverages in glass containers is prohibited.

(2) Except in facilities provided therefore, no person shall urinate or defecate within 25 feet of any stream bank or trail. Fecal material must be placed in a hole and covered with no less than four (4) inches of soil.

COPYRIGHT ROYALTY TRIBUNAL

[37 CFR Ch. III]

FILING OF CLAIMS TO PHONORECORD PLAYER (JUKEBOX) ROYALTY FEES

Advance Notice of Proposed Rulemaking

AGENCY: Copyright Royalty Tribunal.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice of rulemaking is issued to inform the public that the Copyright Royalty Tribunal (CRT) is considering adoption of regulations to implement section 116(c)(2) of the Act for General Revision of the Copyright Law. This subsection directs the CRT to promulgate regulations concerning the filing of claims with the CRT by persons claiming to be entitled to compulsory license fees under section 116 of the Act. This notice invites participation of the public in providing comment, views, and information to assist the CRT in adopting appropriate regulations.

DATES: Initial comments concerning the content of the proposed regulations should be received on or before April 17th. Reply comments on or before May 15th.

ADDRESS: Interested persons should submit 15 copies of their comments to Chairman, Copyright Royalty Tribunal, 4th Floor, 1111 20th Street NW., Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT:

Thomas C. Brennan, Chairman,
Copyright Royalty Tribunal, telephone 202-653-5175.

SUPPLEMENTARY INFORMATION: The attention of interested persons is directed to the FEDERAL REGISTER, Vol. 42, No. 236, p. 62019, December 8, 1977, at which the CRT gave advance notice of proposed rulemaking designed to implement section 116(c)(5) of the Act for General Revision of the Copyright Law. That section concerns access to phonorecord players for the purpose of determining the proportion of contribution of musical works of various persons to the earnings of the phonorecord players for which fees shall have been deposited.

The CRT in this proceeding wishes to receive comments concerning the types of information that should be required of claimants. The CRT also wishes to receive comments concerning the desirability of requiring that all claims be filed by means of standard forms prescribed by the CRT.

COPYRIGHT ROYALTY
TRIBUNAL,
THOMAS C. BRENNAN,
Chairman.

[1410-01]

[37 CFR Ch. III]

FILING OF CLAIMS TO CABLE ROYALTY FEES

Advance Notice of Proposed Rulemaking

AGENCY: Copyright Royalty Tribunal.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice of rulemaking is issued to inform the public that the Copyright Royalty Tribunal (CRT) is considering adoption of regulations to implement section 111(d)(5)(A) of the Act for General Revision of the Copyright Law. This section directs the CRT to promulgate regulations concerning the filing of claims with the CRT by the copyright owners of works which were the subject of secondary transmissions by cable systems, and who are entitled to share in the distribution of royalty fees deposited by cable systems. This notice invites participation of the public in providing comment, views and information to assist the CRT in adopting appropriate regulations.

DATES: Initial comments concerning the content of the proposed regulations should be received on or before March 15, 1978. Reply comments on or before April 3, 1978.

ADDRESS: Interested persons should submit 15 copies of their comments to Chairman, Copyright Royalty Tribunal, 4th Floor, 1111 20th Street NW., Washington, D.C. 20036.

nal, 4th Floor, 1111 20th Street NW., Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT:

Thomas C. Brennan, Chairman,
Copyright Royalty Tribunal, telephone 202-653-5175.

SUPPLEMENTARY INFORMATION: The CRT wishes to receive comments concerning the types of information that should be required of copyright owner claimants. The CRT also wishes to receive comments concerning the desirability of requiring that all claims be filed by means of standard forms prescribed by the CRT.

Part 201.17(c)(1) of 37 CFR Chapter II (Copyright Office regulations, Compulsory License for Cable Systems) provides that "Statements of account shall cover semiannual accounting periods of: (i) January 1 through June 30, and (ii) July 1 through December 31, and shall be deposited in the Copyright Office, together with the total royalty fee for such accounting periods as prescribed by section 111(d)(2)(B), (c), or (d) of title 17, within sixty calendar days from the expiration of each such accounting period."

Section 111 (d)(5)(A) of the Copyright Act provides that in July of each year every person entitled to compulsory license fees for secondary transmissions shall file a claim with the CRT. During the rulemaking proceedings in the Copyright Office on the regulations concerning the compulsory license for cable systems, the CRT advised the Copyright Office that the accounting periods, now prescribed in the regulations of the Office, would not interfere with the CRT's performance of its statutory duties. It will be necessary, however, for the CRT to adopt regulations whereby copyright owners may make an initial filing of a claim during the month of July, and subsequently make a supplementary filing after consideration of the information contained in the statement of account covering the period January 1 through June 30. Comments should discuss the procedures by which this two-step filing procedure may be implemented.

The CRT has received an inquiry concerning whether a copyright owner must satisfy the deposit requirements and secure registration of the copyright claim as a condition of participation in the royalty distribution. The CRT has also received an inquiry as to whether the CRT would require the preservation and submission of copies of simultaneous fixations of live transmissions as a requirement of participation in the royalty distribution. In an advisory letter of January 1, 1978, the CRT has stated that participation in the royalty distribution proceedings does not require satisfying the deposit

requirements, securing registration, or preserving and submitting simultaneous fixations of live transmissions.

COPYRIGHT ROYALTY
TRIBUNAL,
THOMAS C. BRENNAN,
Chairman.

POSTAL SERVICE

[39 CFR Part 111]

UNDELIVERABLE MAIL

Disposition of Books and Sound Recordings
Found Loose in the Mail

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: The proposed rule would amend postal regulations to permit the release, after a 30 day retention period, of undeliverable books and sound recordings bearing a particular trade name, company name, or other organizational identification, to an organization or individual who certifies that he has a legal right to such books or sound recordings and formally requests such release. Books and sound recordings found loose in the mail which cannot be traced to a particular firm or mailing under current regulations are sold at public auction. The Postal Service proposes this change in the regulation because statistically reliable evidence shows that more than 90 percent of all books and sound recordings in the mailstream are mailed by commercial mailers, and therefore it is a reasonable assumption that more than 90 percent of all books and sound recordings found loose in the mail were also mailed by commercial mailers. In the opinion of the Postal Service this proposed change in the regulation would have the expected effects of returning books and sound recordings to their rightful owners and avoiding the present expense to the Postal Service of processing and selling this material. The rights of individual mailers to recover lost books or sound recordings would continue to be protected by the 30-day retention period, during which time the Postal Service can respond to inquiries on lost items. It should be noted that the proposed rule would not apply to articles loose in the mail other than books and sound recordings, because there is an insufficient statistical basis for making it applicable.

DATE: Comments must be received on or before March 16, 1978.

ADDRESS: Written comments should be directed to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, 475 L'Enfant Plaza West, SW., Washington, D.C. 20260.

PROPOSED RULES

Copies of all written comments received will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 8300.

FOR FURTHER INFORMATION CONTACT:

Ed McClure, 202-245-4530.

SUPPLEMENTARY INFORMATION: The Postal Service proposes to carry out the purposes described above by amending §§ 159.721g and 159.813b and by adding new § 159.814 to the Postal Service Manual, Chapter 1 of which has been incorporated by reference in the FEDERAL REGISTER, see 39 CFR 111.1.

Among other things, the proposed rule would also provide that books and sound recordings would not be eligible for release if they did not appear to be new, or if they were involved in the settlement of a postal indemnity claim, or if it were known that the requester was neither the mailer nor the addressee. The rule also provides procedures for handling requests for the same mail matter from two parties, permits requesters to pick up material at the dead parcel branch or have it delivered to them at another location, and provides for cancellation of requests under certain circumstances.

Although exempt from the requirements of the Administrative Procedure Act, 5 U.S.C. 553 (b), (c), regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revisions of the Postal Service Manual:

PART 159—UNDELIVERABLE MAIL

1. In 159.7 revise .721g to read as follows:

159.7 Dead Mail.

• • • • •
.721 Disposition.
• • • • •

g. *Articles Found Loose in the Mail.* Articles found loose in the mail, which cannot be delivered or returned after the initial handling prescribed in 159.444 and 159.445, are treated as dead mail and handled as follows:

(1) *Books and Sound Recordings.* Books and sound recordings found in bulk mail centers are sent to the dead parcel branch post office designated in 159.724 as they accumulate, and should be shipped at least weekly as volume warrants. However, books and sound recordings found in post offices are held for a minimum of 30 days at the post office where found and then sent to the designated dead parcel branch weekly.

(2) *Other Loose Matter.* All remaining loose matter is held for a minimum of 30 days at the bulk mail center or post office where found and then sent to the designated dead parcel branch weekly.

(3) *Sorting.* If the volume at any location during the 30-day retention period requires

a plan of sorting to facilitate search and disposal on schedule, proceed as follows:

(a) Separate the articles into general groups, such as books, clothing, hardware, etc. Store by weeks to facilitate location and disposal.

(b) Only if the volume makes it necessary, assign a serial number to each category referred to in (a); assign a serial number to each parcel within each category; make a card or book list of the parcels, by category and parcel numbers, with a brief description of the articles.

(4) *Wrapping.* Do not wrap or box loose articles during the retention period except when necessary to keep together several articles known to be from the same parcel.

2. In 159.8 revise .813b and add new .814 reading as follows:

159.8 Treatment in Dead Parcel Post Branches

• • • • •
.813 Other Parcels.
• • • • •

b. Except for books and sound recordings (See 159.814), prepare other parcels, including ordinary, insured, and COD, for disposal as soon as received if sender or addressee cannot be identified. Do not list contents.

• • • • •

.814 *Books and Sound Recordings.* Books and sound recordings from any mail facility except bulk mail centers may be prepared for disposal immediately since they have already been held for 30 days under 159.721g(1). Since books and sound recordings received from bulk mail centers have not yet had a retention period (see 159.721g(1)), they must be held for 30 days at the dead parcel branch post office as loose mail in accordance with 159.724c(3) before disposal. After this 30-day retention period, books and sound recordings in dead parcel branches will be prepared for disposal in accordance with 159.85, except for those that may be withheld from sale for release to the mailer under the following conditions:

a. An organization or individual may request, in the manner set forth below, that books and sound recordings bearing the requester's trade name, company name, or other organizational identification, be released to the requester, or to the requester's authorized representative.

(1) The requester must apply in writing to the postmaster at each dead parcel branch where release of material is desired.

(2) The request must be in quadruplicate.

(3) Requesters must certify that they have a legal right to books or sound recordings bearing a particular trade name, company name, or other organizational identification. The Postal Service may request additional information if the certification is deemed inadequate.

(4) More than one trade name, company name, or other organizational identification may be listed in the same request.

(5) The request must specify whether the books and sound recordings are to be picked up at the dead parcel branch or whether delivery to another location is desired. If delivery to another location is desired, the address must be specified and must be one used by the requester as a return address. A requester may select only one such address

for each dead parcel branch. The specified address may be changed at any time by submitting a written request to the postmaster at the dead parcel branch office.

(6) After approval, the postmaster will retain the original request and send one copy each to the requester, the Inspector in charge of the Division in which the installation is located, and the General Manager, Special Services Division, Office of Mail Classification, U.S. Postal Service, Washington, D.C. 20260.

(7) An approved request will remain in effect until cancelled in writing by either the requester or the Postal Service (see 159.814j).

b. A book or sound recording will be sold at auction and will not be released to the requester if, although it bears an applicable trade name, company name, or other organizational identification, it does not appear to be new, or was involved in the settlement of a postal indemnity claim, or if it is known that the requester was not the mailer or addressee.

c. A request for release of books or sound recordings will be granted except where a written protest, or a conflicting request from another party, is presented to the postmaster at the dead parcel branch post office. Merchandise involved in such a dispute will be sold at auction in the normal course of business, unless written notice from both parties advising of settlement of the dispute is received prior to the prescribed sale deadline (see 159.814g). The postmaster at the dead parcel branch post office will notify both parties in writing when such disputes arise or are settled and of the consequences to the merchandise in such disputes.

d. Upon approval of a request under 159.814a, dead parcel branches will establish special separations or bins, for segregation of books and sound recordings which bear the specified trade name, company name, or other organizational identification. Such identification must consist of a readily identifiable name and be easily read. Dead parcel branches will attempt to adhere to these special separation requests to the maximum extent practicable.

e. Except where delivery to another location is desired (see 159.814a(5) and .814h), dead parcel branches will release books and sound recordings to requesters or their authorized representatives at the dead parcel branch at a time and in a manner mutually agreeable between the requester and the postmaster, consistent with the instructions in this section (159.814). Such merchandise must be picked up at least once before each auction, but may be picked up more often by mutual agreement between the postmaster and the requester.

f. When books and sound recordings are to be released at the dead parcel branch, the following procedures apply:

(1) Ten days before each dead parcel auction, or more often, if warranted by volume, the dead parcel branch will send a written notice to each requester who has specified release of such merchandise at the dead parcel branch, advising of the quantity of books and sound recordings on hand. Merchandise which is to be released at the dead parcel branch will not be listed in the sale catalog.

(2) Requesters or their representatives may pick up books and sound recordings at the dead parcel branch upon presentation of a letter from the requester authorizing the Postal Service to release such merchandise

to the bearer. This letter of authorization must be executed in triplicate. Upon release of the merchandise, all copies of the letter of authorization will be retained in bulk by the person accepting delivery. One copy will be given out with the merchandise, one copy will be mailed directly to the requester, and the original will be retained by the dead parcel branch.

g. Books and sound recordings must be picked up at the dead parcel branch before the close of the business day immediately preceding the public display of auction sale merchandise. Failure to do so will result in cancellation of a request (see 159.814j).

h. As to books and sound recordings, which are to be released at another location under 159.814a(5), dead parcel branches will make up individual packages for shipment to the other location desired by the requester, unless hampers or other types of containers would be more advantageous.

(1) *Individual Packages.* Individual packages will be as large as possible subject to the weight and size limitations for fourth-class mail in 135.3. Each package will be prepared to comply with the requirements of 135.24, sent under a penalty label, and delivered at the destination as ordinary mail.

(2) *Containers.* Books and sound recordings from dead mail branches may be delivered in hampers, or other containers, where this means is more advantageous than making up individual packages, and adequate security against pilferage can be maintained. Postmasters at dead parcel branches and postmasters at delivery offices may coordinate suitable arrangements for containment, labeling, movement, and security of such merchandise through their respective transportation management offices.

i. Failure to accept delivery of any shipment under 159.814h will result in cancellation of a request (see 159.814j).

j. When a request is cancelled (see 159.814a(7), .814g, and .814i), the requester must be notified by the postmaster in writing. A cancelled request may not be renewed for six months after the date of cancellation. At that time, an application must be re-submitted in writing, as if it were a new request. Copies of any cancellation notice must be sent to the General Manager, Special Services Division, Office of Mail Classification, U.S. Postal Service, Washington, D.C. 20260. Merchandise on hand at the time of a cancellation will be included in the next auction.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401(2).)

ROGER P. CRAIG,
Deputy General Counsel.

PROPOSED RULES

[6560-01]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 855-4]

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions to the Rules and Regulations of the San Luis Obispo County Air Pollution Control District in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rulemaking.

SUMMARY: Revisions to the San Luis Obispo County Air Pollution Control District (APCD) rules and regulations have been submitted to the Environmental Protection Agency (EPA) by the California Air Resources Board (ARB) as revisions to the California State Implementation Plan (SIP). The intended effect of the revisions is to update the rules and regulations, and to correct certain deficiencies in the SIP. The EPA invites public comments on these proposed rules, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to March 16, 1978.

ADDRESSES: Comments may be sent to: Regional Administrator, Attention: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section (A-4), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105. Copies of the proposed revisions are available for public inspection during normal business hours at the EPA Region IX Office at the above address and at the following locations: San Luis Obispo County Air Pollution Control District, County Airport, Edna Road, San Luis Obispo, Calif. 93401; California Air Resources Board, 1709 11th Street, Sacramento, Calif. 95814; Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

David R. Souten, Chief, California SIP Section, EPA, Region IX, 415-556-7288.

SUPPLEMENTARY INFORMATION: The following rules were submitted by the California Air Resources Board on the indicated dates:

OCTOBER 13, 1977

Rule 113 San Luis Obispo County Air Pollution Control District Continuous Emissions Monitoring.

NOVEMBER 4, 1977

Rule 104 Action in Areas of High Concentrations.
Rule 105 Definitions.

Rule 407 Organic Material Emission Standards, Limitations and Prohibitions.
Rule 501(A)(7) Open Burning.
Rule 502(A)(3) Agricultural Burning.

A revision to Rule 213(N), Storage and Transfer Equipment, concerning new source review was also submitted. However, it is not being considered in this notice and will be acted upon in a separate FEDERAL REGISTER notice.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the proposed regulations as SIP revisions. The Regional Administrator hereby issues this notice setting forth these revisions, including rule deletions caused thereby, as proposed rulemaking and advises the public that interested parties may participate by submitting written comments to the EPA Region IX Office. Comments received on or before March 16, 1978 will be considered, and made available for public inspection at the EPA Regional Office and the EPA Public Information Reference Unit.

Authority: Sections 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. §§ 7410 and 7601(a)).

Dated: January 19, 1978.

PAUL DE FALCO, Jr.,
Regional Administrator.

[FR Doc. 78-3966 Filed 2-13-78; 8:45 am]

[6560-01]

[40 CFR Part 52]

[FRL 855-5]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions to the Kings County Air Pollution Control District's Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Revisions to the Kings County Air Pollution Control District's (APCD) rules and regulations have been submitted to the Environmental Protection Agency (EPA) by the California Air Resources Board for the purpose of revising the California State Implementation Plan (SIP). The intended effect of these revisions is to update the rules and regulations and to correct deficiencies in the SIP. The EPA invites public comments on these rules, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to March 16, 1978.

ADDRESSES: Comments may be sent to: Regional Administrator, Attention: Air and Hazardous Materials Division,

Air Programs Branch, California SIP Section (A-4), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105. Copies of the proposed revisions are available for public inspection during normal business hours at the EPA Region IX office at the above address and at the following locations: Kings County Air Pollution Control District, 1197 Berry Lane, Hanford, Calif. 93230; California Air Resources Board, 1709 11th Street, Sacramento, Calif. 95814; Public Information Reference Unit, Room 2922 (EPA Library), 401 "M" Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

David R. Souten, Chief, California SIP Section, EPA, Region IX, 415-556-7288.

SUPPLEMENTARY INFORMATION: The California Air Resources Board submitted the following rules and regulations on October 13, 1977:

REGULATION IV—PROHIBITIONS

- Rule
412 Gasoline Loading into Tanks.
412.1 Transfer of Gasoline into Stationary Storage Containers.
412.2 Transfer of Gasoline into Vehicle Fuel Tanks.

The California Air Resources Board submitted the following rules and regulations on November 4, 1977:

REGULATION I—GENERAL PROVISIONS

- 102 Definitions.
103 Confidential Information.
103.1 Inspection of Public Records.
104 Enforcement.
105 Order of Abatement.
108 Source Monitoring.
108.1 Stack Monitoring.
110 Arrests and Notices to Appear.
111 Shutdown, Startup and Breakdown.
112 Circumvention.
113 Applicability of Emission Limits.

REGULATION IV—PROHIBITIONS

- 401 Visible Emissions.
402 Exceptions.
404 Particulate Matter.
404.1 Disposal and Evaporation of Solvents.
405 Particulate Matter Emission Rate.
405.1 1955-1962 Model Year Vehicles (Deterioration).
405.1 Separation of Emissions.
405.2 Combination of Emissions.
405.3 Architectural Coatings.
406 Process Weight Table.
407.1 Disposal of Solid and Liquid Wastes.
409 Fuel Burning Equipment-Oxides of Nitrogen.
410 Organic Solvents.
412 Gasoline Loading into Tanks.
412.1 Transfer of Gasoline into Stationary Storage Containers.
412.2 Transfer of Gasoline into Vehicle Fuel Tanks.
416.1 Cotton Gin Waste Burning.
417 Exceptions.
417.1 Agricultural Burning.
418 Incinerator Burning.
421 Orchard Heater.

- 422 New Source Performance Standards.
423 Emission Standard For Hazardous Air Pollutants.

REGULATION V—PROCEDURE BEFORE THE HEARING BOARD

- 501 Applicable Articles of the Health and Safety Code.
503 Filing Petitions.
504 Contents of Petitions.
511 Notice of Hearing.

In addition, regulations were submitted concerning new source review and emergency episodes. These regulations will be considered in separate FEDERAL REGISTER actions.

The state also submitted regulations concerning New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) on November 4, 1977. These NSPS and NESHAPS regulations implement Sections 111 and 112 of the Clean Air Act, and are not appropriate for inclusion in a State Implementation Plan under Section 110 of the Act. Therefore, these regulations will be neither approved nor disapproved by EPA as part of an applicable implementation plan. They will, however, be reviewed in determining whether to delegate authority to implement and enforce the NSPS and NESHAPS regulations in the APCD under the appropriate provisions of Sections 111 and 112. Announcement of such delegation would appear in a separate FEDERAL REGISTER notice.

Pursuant to Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations submitted as revisions to the SIP. The Regional Administrator hereby issues this notice setting forth these revisions, including rule deletions caused thereby, as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Comments received on or before March 16, 1978, will be considered. Comments received will be available for public inspection at the EPA Region IX Office and the EPA Public Information Reference Unit.

AUTHORITY: Sections 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. §§ 7410 and 7601(a)).

Dated: January 19, 1978.

PAUL DE FALCO, Jr.,
Regional Administrator.

[FRL 855-6]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions to the Rules and Regulations of the Great Basin Unified Air Pollution Control District in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: The Great Basin Unified Air Pollution Control District (APCD) has adopted changes to its rules and regulations. The revisions have been submitted to the Environmental Protection Agency (EPA) by the California Air Resources Board (ARB) as revisions to the California State Implementation Plan (SIP). The intended effect of the revisions is to update the rules and regulations, and to correct certain deficiencies in the SIP. The EPA invites public comments on these proposed rules, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to March 16, 1978.

ADDRESSES: Comments may be sent to: Regional Administrator, Attention: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section (A-4), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105. Copies of the proposed revisions are available for public inspection during normal business hours at the EPA Region IX Office at the above address and at the following locations: Great Basin Unified Air Pollution Control District, 873 North Main Street, Bishop, Calif. 93514; California Air Resources Board, 1709 11th Street, Sacramento, Calif. 95814; Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

David R. Souten, Chief, California SIP Section, EPA, Region IX, 415-556-7288.

SUPPLEMENTARY INFORMATION: The California Air Resources Board submitted on November 4, 1977, proposed revisions to the following rules:

- Rule 300 Permit Fees.
Rule 423 Research Operations.
Rule 617 Emergency Variance.
Rule 418 Storage of Petroleum Products.
Rule 208 Instack Monitoring Specific Sources.
Rule 411 Hazardous Materials.

The State has also submitted regulations concerning New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air

Pollutants (NESHAPS). These regulations implement sections 111 and 112 of the Clean Air Act, and are not appropriate for inclusion in a State Implementation Plan under section 110 of the Act. Therefore, these regulations will be neither approved nor disapproved by EPA as part of an applicable implementation plan. They will, however, be reviewed in determining whether to delegate authority to implement and enforce the NSPS and NESHAPS in the APCD under the appropriate provisions of section 111 and 112. Announcement of such delegation would appear in a separate FEDERAL REGISTER notice.

Pursuant to section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the proposed regulations as SIP revisions. The Regional Administrator hereby issues this notice setting forth these revisions, including rule deletions caused thereby, as proposed rulemaking and advises the public that interested parties may participate by submitting written comments to the EPA Region IX Office. Comments received on or before March 16, 1978 will be considered, and made available for public inspection at the EPA Regional Office and the EPA Public Information Reference Unit.

AUTHORITY: Sections 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. §§ 7410 and 7601(a)).

Dated: January 13, 1978.

FRANK M. COVINGTON,
Acting Regional Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions to the Sacramento County Air Pollution Control District's Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Revisions to the Sacramento County Air Pollution Control District's (APCD) rules and regulations have been submitted to the Environmental Protection Agency (EPA) by the California Air Resources Board for the purpose of revising the California State Implementation Plan (SIP). The intended effect of these revisions is to update the rules and regulations and to correct deficiencies in the SIP. The EPA invites public comments on these rules, especially as to their consistency with the Clean Air Act.

DATE: Comments may be submitted up to March 16, 1978.

ADDRESSES: Comments may be sent to: Regional Administrator, Attention: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section (A-4), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105. Copies of the proposed revisions are available for public inspection during normal business hours at the EPA Region IX Office at the above address and at the following locations: Sacramento County Air Pollution Control District, 3701 Branch Center Road, Sacramento, Calif. 95827; California Air Resources Board, 1709 11th Street, Sacramento, Calif. 95814; Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

David R. Souten, Chief, California SIP Section, EPA, Region IX, 415-556-7288.

SUPPLEMENTARY INFORMATION: The California Air Resources Board submitted the following rules and regulations on November 4, 1977:

REGULATION I.—GENERAL PROVISIONS

- 3 Standard Conditions.

REGULATION II.—PROHIBITIONS

- 7 Ringelmann Chart.
8 Nuisance.
9 Fugitive Dust.
11 Storage of Petroleum Products.
12 Organic Liquid Loading.
13 Gasoline Transfer into Stationary Storage Containers.
14 Transfer of Gasoline into Vehicle Fuel Tanks.
15 Sulfur Content of Fuels.
21 Dust and Condensed Fumes.
22a Open Fires.
23 Particulate Matter.
24 Specific Contaminants.
25 Organic Solvents.
26 Reduction of Animal Matter.

REGULATION VI.—FEES

- 70 Permit Fees.

REGULATION VII.—AGRICULTURAL BURNING

- 94 Limitation on Daily Burning Rate.
95 Other Burning Limitations.
96 Emergency Permits.
97 Agricultural Waterway Delivery and Drainage Systems.
98 Issuance of Agricultural Burning Permits.

In addition, regulations were submitted concerning new source review and emergency episodes. These regulations will be considered in separate FEDERAL REGISTER actions. Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations submitted as revisions to the SIP. The Regional Administrator hereby issues this notice

setting forth these revisions, including deletions caused thereby, as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office.

Comments received on or before March 16, 1978, will be considered. Comments received will be available for public inspection at the EPA Region IX Office and the EPA Public Information Reference Unit.

AUTHORITY: Sections 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. §§ 7410 and 7601(a)).

Dated: January 19, 1978.

FUEL ECONOMY OF MOTOR VEHICLES

Fuel Economy and Emissions Testing and Other Procedures For 1979 and Later Model Year Automobiles

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes several changes to the fuel economy labeling regulations for the 1979 and later model years: changes in the procedure for calculation of cargo volume for stations wagons and hatchbacks to determine comparable classes for fuel economy labeling, and a change in the measurement procedure for front seat leg room. Also included is a request for comments regarding earlier completion of testing so that the EPA—Department of Energy, Gas Mileage Guides could be distributed at an earlier date.

DATES: Comments must be received on or before April 17, 1978.

ADDRESS: Deputy Assistant Administrator for Mobile Source Air Pollution Control (AW-455), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Gary E. Timm, Regulatory Management Staff, Office of Mobile Source Air Pollution Control, U.S. Environmental Protection Agency, Washington, D.C. 20460, 202-755-0596.

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency (EPA) is required by section 506 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2006) to publish rules for fuel economy labeling and

the determination of comparable vehicles for the purpose of fuel economy comparison. The first rules issued pursuant to this requirement were published on November 10, 1976 (41 FR 49752). EPA proposed several changes to the fuel economy labeling regulations on June 6, 1977 for 1978 and later model years (42 FR 28970). After receipt of comments from manufacturers, the general public and consumer groups, EPA determined that final action could be taken on most of the proposals and these provisions were published as a final rule on September 12, 1977 (42 FR 45668). However, EPA was not at that time prepared to decide certain issues on the basis of comments and other information received. Thus, resolution of certain outstanding issues was deferred for further consideration. These were: change in the procedure for calculation of cargo volume of station wagons, change in the procedure for calculation of cargo volume of hatchbacks, consideration of passenger leg room in determining the interior volume index, engine code redefinition in relationship to air conditioning usage and changes in the fuel economy estimates. The above deferred issues with the exception of possible changes in the fuel economy estimates and engine code redefinition in relationship to air conditioning usage are the subject of this notice of proposed rulemaking (NPRM). Alternatives for interpreting and communicating the fuel economy estimates to the public will be proposed in a separate rulemaking. Engine code redefinition to distinguish between vehicles which are and are not equipped with air conditioning will not be reconsidered by the Agency until a better means of simulating air conditioning is found.

DISCUSSION OF PROPOSALS

1. *Change in the procedure for calculation of cargo volume of station wagons.* The present procedure for characterizing the cargo volume of station wagons is deficient in two respects: It does not include the hidden volume which may be used for storage of small parcels and it tends to overestimate the volume of those wagons which have intrusions into the cargo carrying space such as wheel wells, spare tires, fuel tank, etc. The June 6 NPRM proposed two alternative methods for making the volume estimation: use of boxes or a cargo set similar to the procedure used for sedan trunk volume estimates, or the use of the rectangular volume but with a modified width which is the average of the shoulder width [Society of Automotive Engineers (SAE) procedure HSJ-1100a dimension (W4)] and the width between wells (W210).

Comments on these proposals did not provide a basis for concluding that

either proposal was an improvement to the existing procedure. The first alternative, use of a cargo set, received the support of only one manufacturer. The second proposal appeared to be technically deficient in that it did not recognize the large differences in the placement, number and relative sizes of the intrusions into the cargo space on different makes and models of station wagons, and thus did no better job of characterizing the useful cargo space than the present procedure.

In preparation for the rulemaking which is the subject of this notice, EPA informally asked several automakers to suggest definitions for procedures that will accomplish the objective of better characterization of this volume. This proposal is based on the results of that effort.

EPA proposes to use 1 cubic foot blocks, and 0.2 cubic foot rectangular blocks measuring 6x4.5x12.8 inches which are known as H-boxes [defined in Society of Automotive Engineers (SAE) procedure HSJ-1100a]. These cubes and rectangles would be used in combination as measuring tools to estimate the volume defined by the area behind the second seat, the cargo floor, side walls, roof and cargo hatch with the restriction that the volume of the H-boxes shall not exceed 20% of the total estimated cargo volume. The estimated volume would be the sum of the volumes of each of the blocks that could be accommodated in the cargo space behind the second seat. This measurement method will provide a more representative estimate of the truly usable volume than the current procedure, which uses the product of the SAE dimensions for shoulder width, cargo length, and cargo height. This procedure can be carried out by a physical stacking process or by means of a computer simulation of the measurement process. It provides a consistent estimate of usable space by a procedure that can be understood by the consumer.

As proposed on June 6, EPA would add the hidden cargo volume under the cargo floor or in side panels to the cargo volume of the open area to determine the cargo volume index. Hidden cargo volume is also proposed to be determined by the use of H-boxes.
